There is one change from the proposal, prompted not by any comments but by the general DOTPR revision also being accomplished by this document. Section 12–70.901 references various sections of the DOTPR which concern specific contract clauses. The DOTPR revision has changed the section numbers to be referenced and eliminated one of the referenced sections. Section 12–70.901 has been changed accordingly.

In the interest of consistency (since the rest of the DOTPR is being made effective September 8, 1977) and for the additional reason that this material also relates to public property and contracts, although notice and opportunity for public comment were provided, this coverage is also effective September 8, 1977.

Authorship. The persons principally responsible for this document are:

PROGRAM

H. E. Tetirick, Chief, Procurement Management Division, Office of Installations and Logistics.

LEGAL

W. Lawrence Hollar, Office of the General Counsel

In consideration of the foregoing, Chapter 12 of Title 41, Code of Federal Regulations, is revised to read as set forth below. Issued in Washington, D.C., on August 15, 1977.

EDWARD W. SCOTT, JR.,
Assistant Secretary for Administration.

TABLE OF PARTS

CHAPTER 12—DEPARTMENT OF TRANSPORTATION PROCUREMENT REGULATIONS

Part
12–1 General.
12–2 Procurement by formal advertising.
12–3 Procurement by negotiation.
12–4 Special types and methods of procurement.
12–5 Special and directed sources of supply.

V 42 174 SEP 8 77 UMI

Sec.
12-6 Foreign purchases.
12-7 Contract clauses.
12-9 Patents, data, copyrights, and recovery of developmental costs.
12-10 Bonds and insurance.
12-16 Procurement forms.
12-17 Extraordinary contractual actions to facilitate the national defense.
12-18 Procurement of construction.
12-26 Contract modifications.
12-30 Contract financing.
12-50 Service contracts.
12-60 Contract appeals.
12-70 Government Property.
12-99 Departmental orders.
Supplement No. 1—Manual for control of property in possession of contractors.

PART 12–1—GENERAL

Subpart 12–1.0—Regulation System

Sec.
12–1.001 Scope of subpart.
12–1.002 Purpose.
12–1.003 Authority.
12–1.004 Applicability.
12–1.005 Exclusions.
12–1.006–1 Code arrangement.
12–1.006–2 Publication.
12–1.006–3 Copies.
12–1.006–4 Coordination.
12–1.007–1 General plan.
12–1.007–2 Numbering.
12–1.007–3 Citation.
12–1.008 Implementation.
12–1.009 Deviations.
12–1.009–2 Procedure.
12–1.010 Interagency procurement policy committee

Subpart 12–1.2—Definition of Terms

12–1.204 Head of the agency.
12–1.205 Head of the procuring activity.
12–1.250 Administration.
12–1.251 Procurement office.
12–1.252 Change order.
12–1.253 Supplemental agreement.
12–1.254 Shall.
12–1.255 May.

Subpart 12–1.3—General Policies

12–1.302–3 Contracts between the Government and Government employees or business concerns substantially owned or controlled by Government employees.
12–1.305–3 Deviations from Federal specifications.
12–1.305–50 Index to Federal and Department of Defense specifications and standards.
12–1.306–1 Mandatory use and application of Federal standards.
12–1.307–5 Limitations on use of "brand name or equal" purchase descriptions.
12–1.311 Priorities, allocations, and allotments.
12–1.313 Records of contract actions.
12–1.315 Use of liquidated damages provisions in procurement contracts.
12–1.315–2 Policy.
12–1.318 Disputes clause.
12–1.318–50 Contracting officer's decision under the disputes clause.
12–1.318–51 Agreement after appeal is filed.
12–1.318–52 Payment after appeal is filed.
12–1.318–53 Implementation of decisions of the Contract Appeals Board.
12–1.320 Subcontractor gifts and kickbacks.
12–1.351 Contract number prefixes.
12–1.352 Industrial security.
12–1.353 Variation in quantity.
12–1.354 Standards of conduct.
12–1.355 Breakout of component items.
12–1.356 General procurement policy—Departmental orders.

Subpart 12–1.4—Procurement Responsibility and Authority

12–1.402–50 Contracting officer's representatives.
12–1.450 Responsibility of procurement personnel to question requirements and reaffirm their validity.

Subpart 12–1.5—Contingent Fees

12–1.508–3 Misrepresentation or violations of the covenant against contingent fees.

Subpart 12–1.6—Debarred, Suspended, and Ineligible Bidders

12–1.602 Establishment and maintenance of a list of concerns or individuals debarred, suspended, or declared ineligible.
12–1.604–1 Procedural requirements relating to the imposition of debarment.
12–1.605 Suspension of bidders.
12–1.606 Agency procedure.
12–1.701–1 Small business concern (for Government procurement).
12–1.704 Agency program direction and operation.
12–1.704–50 Small business assistance officer.
12–1.704–51 Small business specialists.
12–1.708 Certificate of competency program.
12–1.708–2 Applicability and procedure.
12–1.750 Procurement set-asides for small business when an SBA representative is not available.
12–1.750–1 General.
12–1.750–2 Review of set-aside recommendations initiated by small business specialists.
12–1.750–3 Withdrawal or modification of set-asides.
12–1.750–4 Contracting authority.
12–1.751 Small business set-aside for proposed construction procurements.

Subpart 12–1.8—Labor Surplus Area Concerns

12–1.807 Report on preference procurement in labor surplus areas.

Subpart 12–1.9—Reporting Possible Antitrust Violations

12–1.901 General.

Subpart 12–1.11—Qualified Products

12–1.1150 General.
12–1.1151 Justification for inclusion of qualification requirements.
12–1.1152 Prior determinations.
12–1.1153 Availability of lists.
12–1.1154 Opportunity for qualification.
12–1.1155 Clarification of qualification requirements.
12–1.1156 Procurement of qualified products.
12–1.1156–1 General.
12–1.1157 Contract provisions.
12–1.1158 Effect of debarment or suspension.
12–1.1159 Waiver of qualification requirement.
12–1.1160 Inadequate competition.
12–1.1161 Reporting nonconformance with specification requirements.
12–1.1162 Misuse of QPL information.

Subpart 12–1.12—Responsible Prospective Contractors

12–1.1204 Determination of responsibility or nonresponsibility.
12–1.1204–1 Requirement.

Subpart 12–1.16—Report of Identical Bids

Sec.
12–1.1608 Reporting requirement.
12–1.1608–3 Submission of reports.

Subpart 12–1.50—Options

12–1.5000 Scope of subpart.
12–1.5001 Definition.
12–1.5002 Applicability.
12–1.5003 Procedures.
12–1.5004 Exercise of options.
12–1.5005 Examples of option provisions.

Subpart 12–1.51—[Reserved]

Subpart 12–1.52—Value Engineering

12–1.5201 Policy.
12–1.5202 Value engineering incentives.
12–1.5202–1 Description.
12–1.5202–2 Use of value engineering incentive clause.
12–1.5202–3 Value engineering clauses.
12–1.5202–4 Types of savings to be shared with the contractor.
12–1.5203 Sharing arrangements.
12–1.5203–1 Sharing rates.
12–1.5203–2 Sharing base.
12–1.5203–3 Sharing period.
12–1.5203–4 Methods of sharing for future acquisitions.
12–1.5204 Submission and processing.
12–1.5205 Future payment funding and notice for future acquisition contracts.
12–1.5206 Value engineering program requirement.
12–1.5207 Contracting officer decision check list.

Subpart 12–1.53—Voluntary Refunds

12–1.5301 General.
12–1.5302 Solicited refunds.
12–1.5303 Disposition of voluntary refunds.

Subpart 12–1.54—Acquisition of Equipment by Lease, Purchase, or Lease With Option To Purchase

12–1.5401 General.
12–1.5402 Telewriting equipment and office copying machines.
12–1.5403 Automatic data processing equipment.
12–1.5404 Lease/purchase determinations.
12–1.5405 Selecting the method of acquisition.
12–1.5405–1 Purchase method.
12–1.5405–2 Lease-with-option-to-purchase method.
12–1.5405–3 Lease method.
12–1.5406 Periodic cost comparisons on leased equipment.

Subpart 12–1.55—Multi-Year Procurement

12–1.5500 Scope of subpart.
12–1.5501 Description of multi-year procedure.
12–1.5502 Policy.
12–1.5502–1 Principal advantages.
12–1.5502–2 Principal objective.
12–1.5502–3 Cost savings factors to consider.
12–1.5502–4 Set-asides.
12–1.5502–5 Multi-year subcontracts.
12–1.5503 Application—criteria.
12–1.5504 Method of solicitation.
12–1.5505 Procedures.
12–1.5505–1 Requirements.
12–1.5505–2 Previous competition.
12–1.5505–3 No previous competition.
12–1.5505–4 Pricing—unit price.
12–1.5505–5 Comparison criteria.
12–1.5505–6 Single year and/or multi-year award.
12–1.5505–7 Cancellation ceiling.
12–1.5505–8 Schedule provision.
12–1.5505–9 Quantity obligation.
12–1.5506 Establishment and revision of cancellation ceilings.
12–1.5507 Funds obligation—contingent liabilities.
12–1.5508 Payment for cancellation.
12–1.5509 Schedule provision limiting payment obligation.
12–1.5510 Termination for convenience.
12–1.5511 Limitations.
12–1.5512 Evaluation.
12–1.5513 Award.
12–1.5514 Contract clauses.

Subpart 12–1.56—Preaward Survey Procedures

12–1.5600 Scope of subpart.
12–1.5601 General.
12–1.5601–1 Need for survey.
12–1.5601–2 Type of survey.
12–1.5601–3 Conducting the survey.
12–1.5601–4 Release of survey information.
12–1.5601–5 Preparation for the survey.
12–1.5601–6 On-site survey procedures.
12–1.5602 Survey report.
12–1.5602–1 Format.
12–1.5602–2 Standards.
12–1.5603 Guide for on-site evaluation of prospective contractor.
12–1.5604 Format for on-site survey report.

AUTHORITY: Sec. 205(c), 63 Stat. 389; 40 U.S.C. 486(c), 10 U.S.C. 2301–2314.

Subpart 12–1.0—Regulation System

§ 12–1.001 Scope of subpart.

This subpart describes the Department of Transportation Procurement Regulations in terms of establishment, authority, applicability, issuance, arrangement, implementation and supplementation of the Federal Procurement Regulations, Office of the Federal Procurement Policy Regulations, exclusions, and deviation procedure.

§ 12–1.002 Purpose.

(a) This subpart establishes Chapter 12, Department of Transportation Procurement Regulations (DOTPR), implementing and supplementing the Federal Procurement Regulations (FPR), and states its relationship to the FPR.

(b) The FPR, as implemented and supplemented by Chapter 12 (DOTPR), are the authorized regulations governing the procurement of supplies and services (including construction and concessions) and the procurement of real property by lease by the Department of Transportation.

§ 12–1.003 Authority.

The DOTPRs are prescribed pursuant to the authority of section 205(c) of the Federal Property and Administrative Services Act of 1949.

§ 12–1.004 Applicability.

These regulations apply to all Department of Transportation procurements, unless otherwise specified.

§ 12–1.005 Exclusions.

(a) Certain Department of Transportation procurement policies and procedures which come within the scope of this Chapter 12 nevertheless may be excluded when there is appropriate justification, such as:

(1) Subject matter which bears a security classification.

(2) Policies or procedures which are expected to be effective for a period of less than six months.

(3) Policies and procedures which are effective on an experimental basis for a reasonable period.

§ 12–1.006–1 Code arrangement.

DOTPR which implement, supplement or deviate from the FPR (Chapter 1 of Title 41 of the Code of Federal Regulations) and have an impact upon the public will be published as Chapter 12 of Title 41, Code of Federal Regulations.

§ 12–1.006–2 Publication.

Chapter 12 of Title 41, Code of Federal Regulations will be published in the FEDERAL REGISTER, in cumulative form in the Code of Federal Regulations, and in separate looseleaf form on blue paper. The looseleaf form is designed to permit interleaf into the FPR.

§ 12–1.006–3 Copies.

Copies of the DOTPR in the FEDERAL REGISTER and in the Code of Federal Regulations may be purchased by Federal agencies and the public, at nominal cost, from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Looseleaf copies of Chapter 12 will be distributed to the Department of Transportation activities as authorized by the Director of Installations and Logistics, Office of the Secretary of Transportation.

§ 12–1.006–4 Coordination.

In the development of the DOTPR, the views of the Operating Administrations of the Department of Transportation will be solicited. Public notice of changes or additions to the DOTPR will be published in the FEDERAL REGISTER before issuance, when appropriate.

§ 12–1.007–1 General plan.

The DOTPR employ the same numbering system and nomenclature used in the FPR, and conform with FEDERAL REGISTER standards approved for the FPR, except that material published in looseleaf form which is not published in Title 41, Code of Federal Regulations will be indicated by the letters "DOT" preceding and following the material.

§ 12–1.007–2 Numbering.

(a) Where the DOTPR implement a part, subpart, section or subsection of the FPR, the implementing part, subpart, section or subsection of DOTPR will be numbered (and captioned) to correspond to the part, subpart, section, or subsection of the FPR.

(b) Where the DOTPR supplement the FPR, the number 50 and up will be assigned to the parts, subparts, or sections involved.

(c) Where the subject matter contained in a part, subpart, section, or subsection of FPR requires no implementation, the DOTPR will contain no corresponding parts, subpart, section, or subsection number and the subject matter as published in the FPR governs.

§ 12–1.007–3 Citation.

DOTPR will be cited in accordance with FEDERAL REGISTER standards approved for the FPR. For example, this section, when referred to in the DOTPR, may be cited as "12–1.007–3". Any section of these regulations may be informally identified for purposes of brevity, as DOTPR, followed by section number; i.e., "DOTPR, 12–1.007–3".

§ 12–1.008 Implementation.

(a) The DOTPR implement and supplement the FPR. Implementing material is that which expands upon related FPR material. Supplementing material is that for which there is no counterpart in the FPR.

(b) The DOTPR may in turn be implemented and supplemented by regulations issued by the following, using the letter suffix indicated:

Issuing organization:	Letter suffix
Federal Aviation Administration	12A [1]
Coast Guard	12B
Federal Highway Administration	12C
Federal Railroad Administration	12D
St. Lawrence Seaway Development Corp.	12E
Office of Administrative Operations, OST	12F
Urban Mass Transportation Administration	12H
National Highway Traffic Safety Administration	12I
Transportation Systems Center	12J

[1] i.e., 12A–1.008(b).

(c) The Administrations and their subordinate organizations shall not issue instructions, including directives, regulations, contract forms, contract clauses, policies, or procedures implementing the DOTPR or covering the procurement of supplies or services or the administration of contracts for such supplies or services, unless permitted by one of the following and consistent with paragraph (d) of this section:

(1) Internal procurement management instructions such as designations and delegations of authority, assignments of responsibilities, work flow procedures, and internal reporting requirements;

(2) Any special contract clause of a non-repetitive nature designed specifically to accomplish the peculiar requirements of an individual procurement, provided a clause relating to the subject is not set forth in this regulation;

(3) A variation of any contract clause which is set forth in this regulation but not for use verbatim, provided that such variation is not inconsistent with the intent, principle and substance of the DOTPR clause or related coverage of the subject matter;

(4) Procurement procedures specifically identified as being essential for carrying out the peculiar needs of an Administration when authorized by the head of the agency, or his designee, and notification is given to OST/TAD–60 prior to such authorization for the purpose of determining whether such procedures should be included in this regulation;

(5) Procurement instructions specifically identified as being essential for carrying out the peculiar needs of overseas commands of the Coast Guard, authorized by the Commandant of the Coast Guard (or his designee) and notification is given to OST/TAD–60

V 42 I 174 SEP 8 77 UMI

prior to such authorization for the purpose of determining whether such instructions should be included in this regulation:

(6) Material determined by OST/TAD–60 to be inappropriate for DOTPR coverage, but appropriate for inclusion in Administration publications.

(d) Instructions issued in accordance with paragraph (c) of this section shall not contain material which duplicates, is inconsistent with, or increases or restricts the use of, any authority contained in this regulation.

(e) Each Administration shall screen all existing instructions as well as those subsequently issued pursuant to paragraph (c) of this section and (d) above to assure strict compliance with this paragraph, and for the purpose of determining if the subject matter is appropriate for inclusion in this regulation.

(f) Each Administration shall furnish to OST TAD–60 one copy of each Administration procurement instruction issued in accordance with paragraph (c) of this section.

(g) Regulation implementing and supplementing the DOTPR will not be published in the FEDERAL REGISTER. Any such regulations which are deemed to have an impact on the general public, and any regulations which establish procurement policy, will be reserved for OST publication as DOTPR, Chapter 12.

(h) Those FAA Procurement Regulations which supplement the DOTPR, and which are basically instructional in nature, may be retained until they are superseded by comparable material published by the Office of the Secretary.

§ 12–1.009 Deviations.

§ 12–1.009–2 Procedure.

(a) In the interest of establishing and maintaining uniformity to the greatest extent feasible, deviations from the FPR and DOTPR will be authorized only when essential to effect necessary procurement or where special circumstances make such deviations clearly in the best interest of the Government.

(b) Requests for authority to deviate from the provisions of the FPR or the DOTPR shall be submitted as far in advance as the exigencies of the situation will permit. Each request for deviation shall contain the following:

(1) A clear statement of the deviation desired, including identification of the specific paragraph number(s) of the FPR or DOTPR,

(2) The reason why the deviation is considered necessary or would be in the best interests of the Government,

(3) If applicable, the name of the contractor and identification of the contract affected,

(4) A statement as to whether the deviation has been requested previously and, if so, circumstances of the previous request,

(5) A description of the intended effect of the deviation,

(6) A statement of the period of time for which the deviation is needed, and

(7) Any pertinent background information which will contribute to a full understanding of the desired deviation.

(c) Deviations from the FPR and DOTPR involving a single contract or procurement may be authorized by the Administrators of the Federal Aviation Administration, Federal Highway Administration, Federal Railroad Administration, St. Lawrence Seaway Development Corp., Urban Mass Transportation Administration, National Highway Traffic Safety Administration, and the Commandant of the Coast Guard, and each with the power of redelegation. For procurements processed by the Transportation Systems Center and Office of Administrative Operations (OST), deviations may be authorized by the Assistant Secretary for Administration, with the power of redelegation. A copy of each authorized deviation shall be sent to the Director of Installations and Logistics.

(d) Request for deviations from the FPR or DOTPR affecting more than one contract or contractor shall be forwarded to the Director of Installations and Logistics. Requests involving deviations from the FPR will be considered jointly by the Department and the General Services Administration, unless, in the judgment of the Assistant Secretary for Administration, after due consideration of the objective of uniformity and program responsibility of the Department, circumstances preclude such joint effort. In such cases, the Assistant Secretary for Administration will approve such class deviations as he determines necessary and will appropriately notify the General Services Administration.

§ 12–1.010 Interagency Procurement Policy Committee.

The Director of Installations and Logistics, OST has been designated the representative for the Department of Transportation on the Interagency Procurement Policy Committee.

Subpart 12–1.2—Definition of Terms

§ 12–1.204 Head of the agency.

"Head of the agency" means the Secretary and the following assistant chief officials: the Deputy Secretary, the Assistant Secretary for Administration; and for procurements within their Administrations, the Administrators of the Federal Aviation Administration, Federal Highway Administration, Federal Railroad Administration, Urban Mass Transportation Administration, National Highway Traffic Safety Administration, St. Lawrence Seaway Development Corp., and the Commandant, U.S. Coast Guard and the Director, Transportation Systems Center.

§ 12–1.206 Head of the procuring activity.

The following officials have been designated as "head of the procuring activity":

(a) In the Office of the Secretary—

(1) The Chief, Procurement & Supply Division, Transportation Systems Center, Cambridge, Mass.

(2) The Chief, Procurement Operations Division, Washington, D.C.

(b) In the Federal Aviation Administration—

(1) The Director, Logistics Service, Washington, D.C.

(2) The Director, Metropolitan Washington Airport Service, Gravelly Point, Va.

(3) The Director, Alaskan Region, Anchorage, Alaska.

(4) The Director, Western Region, Los Angeles, Calif.

(5) The Director, Southern Region, Atlanta, Ga.

(6) The Director, Pacific Region, Honolulu, Hawaii.

(7) The Director, Central Region, Kansas City, Mo.

(8) The Director, Eastern Region, New York, N.Y.

(9) The Director, Southwest Region, Fort Worth, Tex.

(10) The Director, Aeronautical Center, Oklahoma City, Okla.

(11) The Director, National Aviation Facilities Experimental Center, Atlantic City, N.J.

(12) The Director, New England Region, Burlington, Mass.

(13) The Director, Great Lakes Region, Des Plaines, Ill.

(14) The Director, Rocky Mountain Region, Denver, Colo.

(15) The Director, Northwest Region, Seattle, Wash.

(c) For the Coast Guard, the Comptroller of the Coast Guard, Washington, D.C.

(d) For the Federal Highway Administration, the Associate Administrator for Administration, Washington, D.C.

(e) For the National Highway Traffic Safety Administration, the Associate Administrator for Administration, Washington, D.C.

(f) For the Federal Railroad Administration, the Associate Administrator for Administration, Washington, D.C.

(g) For the St. Lawrence Seaway Development Corporation, the Director, Office of Procurement and Supply, Massena, N.Y.

(h) For the Urban Mass Transportation, the Director, Office of Procurement and Third Party Contract Review, Washington, D.C.

§ 12–1.250 Administration.

"Administration" means the Federal Aviation Administration, the Federal Highway Administration, the Federal Railroad Administration, the Urban Mass Transportation Administration, the Coast Guard, the St. Lawrence Seaway Development Corp., and the National Highway Traffic Safety Administration. The term "Administration" also includes the Transportation Systems Center, and the Office of Administrative Operations of the Office of the Secretary. The term "Administration" as used, for example, in the phrase "in accordance with Administration procedures" would include the foregoing organizations, unless the paragraph states otherwise.

§ 12–1.251 Procurement office.

"Procurement office" means an office with a designated contracting officer with authority to enter into contracts over $10,000 in value.

§ 12–1.252 Change order.

"Change order" means a unilateral written order signed by the contracting officer, and issued to a contractor pursuant to the Changes clause of the contract.

§ 12–1.253 Supplemental agreement.

"Supplemental agreement" means any contract modification or contract amendment which is accomplished by mutual action of the parties.

§ 12–1.254 Shall.

"Shall" is imperative.

§ 12–1.255 May.

"May" is permissive. However, the words "no person may * * *" mean that no person is required, authorized, or permitted to do the act proscribed.

Subpart 12–1.3—General Policies

§ 12–1.302–3 Contracts between the Government and Government employees or business concerns substantially owned or controlled by Government employees.

Unless a higher authority is specified within an Administration, heads of procuring activities are authorized to except individual contracts from the policy against awarding contracts to Government employees or business concerns substantially owned or controlled by Government employees. Each such exception shall be evidenced by a written determination signed by the head of the procuring activity, setting forth the facts in sufficient detail to demonstrate that the exception is being granted for the most compelling reasons, and attaching any supporting documentation. A copy of each such determination, with attachments, shall be forwarded to the Director of Installations and Logistics, OST.

§ 12–1.305–3 Deviations from Federal specifications.

(a) Each Administration shall designate an official to carry out the responsibilities set forth in FPR 1–1.305–3. One copy of each such designation shall be forwarded to the Director of Installations and Logistics, OST.

(b) Whenever a notification or recommendation for a change in a Federal Specification is submitted to the General Services Administration, as provided in FPR 1–1.305–3(b)(5), an information copy shall be forwarded to the Director of Installations and Logistics, OST. Similarly, the Director of Installations and Logistics shall be advised any time the General Services Administration disapproves a deviation from a Federal Specification.

§ 12–1.305–50 Index to Federal and Department of Defense Specifications and Standards.

The "Index of Federal Specifications and Standards" and the "Department of Defense Index of Specifications and Standards" are issued annually with periodic supplements. These indexes contain general information pertaining to their use and the availability of other Government specifications.

§ 12–1.306–1 Mandatory use and application of Federal Standards.

Whenever a request for an exception to the use of a Federal Standard is submitted to the General Services Administration, an information copy of the submission and GSA's response shall be forwarded to the Director of Installations and Logistics, OST.

§ 12–1.307–5 Limitations on use of "brand name or equal" purchase description.

Purchase descriptions containing the phrase "or equal" shall not be used as a device to grant an advantage to particular manufacturers by favoring one product over other products, or to substantiate a determination that no other manufacturer's products are equal in quality and performance to the products specifically named. Where a proper determination has been made that only one supplier can furnish the required item or items, the procurement will be accomplished by negotiation in accordance with FPR Part 1–3.

§ 12–1.311 Priorities, allocations and allotments.

The programs of the Coast Guard and certain programs of the Federal Aviation Administration are defense-related programs to which the priorities and allocations regulations apply. Rateable contracts and purchase orders shall contain the clause set forth in DOTPR 12–7.150–3 and the appropriate DO or DX rating (and the appropriate allotment number if the order calls for authorized controlled materials) in accordance with the provisions of DMS [Defense Materials System] Regulation 1 and BDSA Regulation 2. These regulations are available from the Business and Defense Services Administration of the Department of Commerce.

§ 12–1.313 Records of contract actions.

(a) In compliance with the requirements of FPR 1–1.313, each procurement office shall maintain for each procurement exceeding $10,000 a contract file containing a comprehensive record of all pre-award and post-award actions and other data. Adherence to this policy will require the assembly of either the original or a copy of all documents pertaining to the procurement in a file consisting of one or more folders. It will also require documentation for the record of all understandings, oral agreements, and any other facts or information pertinent to the transaction. It is left to the discretion of the procurement official to determine the manner in which unwritten matters are documented. However, it would be expected, for example, that those of a complex nature would be carefully documented by typewritten "memorandum for the record", while routine data might be recorded by a handwritten notation in the file. Photographs should be employed wherever they will serve to effectively document pertinent contract matters.

(b) Complete documentation will permit ready reconstruction of all stages of the transaction in order to:

(1) Support actions taken by various personnel in the procurement cycle.

(2) Provide information for internal management review and for reviews by the General Accounting Office.

(3) Supply data for use in preparing replies to legitimate inquiries.

(4) Furnish essential facts in the event of litigation.

(c) Small purchase records shall be maintained in accordance with FPR subpart 1–3.6 and DOTPR subpart 12–3.6.

§ 12–1.315 Use of liquidated damages provisions in procurement contracts.

§ 12–1.315–2 Policy.

(a) *Criteria for use.* (1) In proposed contracts involving an item where only a portion of the quantity ordered is for immediate programs, and liquidated damages provisions are considered to be necessary, care shall be taken to have the liquidated damages provisions apply only to the urgent quantity.

(2) The use of liquidated damages provisions should never be construed as relieving procurement officials of the obligation of establishing realistic delivery or performance schedules. Realistic delivery or performance schedules should be a prerequisite to the use of liquidated damages.

(3) Liquidated damages provisions generally should not be used:

(i) In contracts for supplies or services required for routine administrative purposes.

(ii) In contracts for standard commercial or "shelf items".

(iii) In any contract where time would permit the needs of the Department to be met by termination and reprocurement if the initial contractor defaults.

(iv) In small purchases.

(v) In study, experimental, development, or research contracts, including equipment contracts requiring developmental work.

(b) *Rate of assessment.* (1) Contracting officers must assure that the rate of liquidated damages stipulated for a given contract is a reasonable forecast of the Government's anticipated damages. A fixed formula, based on percentage of value, shall not be used to establish the rate of damages. The minimum amount of liquidated damages should be based on the estimated cost of inspection and

V 42 I 174 SEP 8 77 UMI

superintendence of each day of delay in completion. In addition, the following factors are examples of matters to be considered in establishing the rate of damages:

(i) The importance of the item in relation to the facility or project for which it is intended.

(ii) The relative importance of the item to the facility or project in the overall program of the Department.

(iii) Any rental of facilities necessitated by the delay in a construction completion date.

(iv) Cost of additional maintenance required on structures being replaced by contract items.

(v) Any unusual damages that can be anticipated.

(2) Unless it is clear that partial delivery will proportionately reduce the extent of probable damages, rates shall not be specified to be applicable to individual units of an item, but rather to quantities of an item or to groups of items which are required for delivery or completion at the same time. Rates should generally be expressed in terms of even dollars per day of delay.

(c) *Enforcement.* Where liquidated damages provisions are used, they shall be strictly enforced. In making partial or progress payments, deductions for damages should be made on the basis of the actual number of days of delay multiplied by the rate.

(d) *Termination.* If the contract is terminated, the contractor remains liable for liquidated damages that have accrued. Moreover, on a default termination, liquidated damages continue to accrue even after default, until the Department can reasonably obtain delivery of the supplies or performance of the service. This is in addition to any other rights of the Government to damages under default provisions for the excess costs of reprocuring the supplies or services of the terminated contract.

(e) *Remission.* An information copy of each submission to the Comptroller General of a recommendation for the remission of liquidated damages shall be forwarded to the Director of Installations and Logistics, OST.

§ 12–1.318 Disputes clause.

When a dispute cannot be settled by agreement and a decision under the Disputes clause is necessary, the contracting officer shall review the available facts pertinent to the dispute before making his final decision. When there is any doubt as to whether the issue in dispute is subject to the disputes procedure, a decision will be made pursuant to the Disputes clause. The disputes procedure shall not be invoked in cases when a dispute is clearly not subject to the procedure. The contracting officer shall obtain, from assigned legal and other advisors, such advice and assistance as is required to render a decision. However, the decision must be that of the contracting officer.

§ 12–1.318–50 Contracting officer's decision under the Disputes clause.

When a final decision of the contracting officer concerns a dispute that is or may be subject to the Disputes clause, the following paragraph shall be added to the paragraph contained in FPR 1–1.318–1:

The Department of Transportation Contract Appeals Board is the authorized representative of the Secretary in hearing, considering, and deciding such appeals. The rules of the Department of Transportation Contract Appeals Board are set forth in the Code of Federal Regulations (41 CFR 12–60 *et seq.*)

§ 12–1.318–51 Agreement after appeal is filed.

After an appeal has been filed, contracting agencies are encouraged to seek agreement as to disposition of the controversy. However, such efforts to dispose of a controversy shall not be conducted in lieu of formal board actions or hearings and shall not result in suspension of processing of an appeal, except as ordered or authorized by the Department of Transportation Contract Appeals Board.

§ 12–1.318–52 Payment after appeal is filed.

In the event of an appeal, the amount determined to be payable in the decision of the contracting officer, less any portion previously paid, normally should be paid in advance of any decision by the Board without prejudice to the rights of either party or the appeal.

§ 12–1.318–53 Implementation of decisions of the Contract Appeals Board.

(a) It is the policy of the Department of Transportation to take prompt action to effect payment in accordance with any decision of the Contract Appeals Board wholly or partially favorable to the appellant. If, however, an Administration believes such decision is "appropriate for review in court under prevailing statutory and judicial standards", it may recommend that action be taken to seek judicial review of the Board's decision. The recommendation shall be made to the DOT General Counsel who shall determine whether or not judicial review of the Board's decision will be sought. In the event that the DOT General Counsel determines that judicial review will be sought, the matter shall be referred to the Department of Justice and the appellant shall be promptly advised that payment in accordance with the Board's decision will not be made.

(b) In cases where the question of entitlement only has been decided by the Board and the matter of amount has been remanded to the parties for negotiation, if agreement is not reached the appellant will be afforded a prompt decision and an opportunity to appeal on the matter of amount.

§ 12–1.320 Subcontractor gifts and kickbacks.

Reports of suspected violations and action being taken shall be furnished to the Director of Installations and Logistics, OST.

§ 12–1.351 Contract number prefixes.

All contracts, exclusive of purchase orders, issued by the Department will be identified by a number of combination of letters and numbers, in accordance with Department Order 4220.1A (set forth in DOTPR Part 12–99).

§ 12–1.352 Industrial security.

(a) Pursuant to Executive Order 10865 (3 CFR, 1959–1963 Comp.) an agreement between the Department of Defense and the Department of Transportation was entered into on June 1, 1967, extending regulations prescribed by the Secretary of Defense under the Executive Order to apply to protect releases of classified information relating to DOT contracts and releases of other classified information which DOT has the responsibility for safeguarding. The Office of Investigations and Security, OST, has been designated as the Department of Transportation liaison for industrial security matters. The Defense Logistics Agency will perform all cognizant security office functions specified in, and will have the authority and responsibilities prescribed by, Deparment of Defense Industrial Security Regulations (ISR) (DOD 5220.22R) and Department of Defense Industrial Security Manual (DOD 5220.22M).

(b) Any DOT contract or prospective contract which would require access to classified information by the contractor or any of his employees in the bid, negotiation, award, performance, or termination of the contract, including clearances required for visit purposes, is considered to be a "classified contract" subject to the procedures of this section, even though the contract doument itself is unlassified.

(c) All proposed procurements shall be reviewed specifically to determine if access to classified information will be required by prospective contractors during the solicitation period or by a contractor at any time in the performance of the contract. If access to classified information will be required during the solicitation period, the security staff of the headquarters of the Administration, as designated in DOT Order 1640.4, dated 12/12/72 shall be advised immediately and furnished the list of firms to be solicited. Invitations for bid or requests for proposals shall not be issued until notification has been received from the appropriate security staff that the firms to be solicited have a valid facility security clearance. If access to classified information will not be required during the solicitation period but will be required during the performance of the contract, the invitation for bids or requests for proposals shall so state, and award shall only be made after the facility security clearance of the proposed contractor has been verified and approved by the appropriate security staff.

(d) Immediately upon the award of a classified contract, or in connection with precontract negotiations, if appropriate, the contracting officer shall furnish a copy of DD Form 254, Contract Security Classification Specification, to the prime contractor.

(e) Any DOT contract, the performance of which will require access to classified information by the contractor or any of his employees, shall contain a security requirements clause. For classified contracts of the type cited in this regulation, the appropriate Military Security Requirements clause as set forth in this regulation shall be used. Other types of classified contracts shall contain the appropriate Military Security Requirements clause of Section VII of ASPR.

(f) The Industrial Security Program encompassed by the publications cited in (a) applies only to contracts involving access to classified information which are performed within the United States, its territories, Puerto Rico and Canada. Offices which may wish to let classified contracts for performance outside the United States, its territories, Puerto Rico or Canada shall consult with their appropriate security staff.

§ 12–1.353 Variation in quantity.

(a) To the extent that a variation in quantity is caused by any of the conditions specified in the Variation in Quantity clause in FPR 1–7.102–4, the varied quantity may be accepted only to the extent specified in the contract. The Extent of Quantity Variation clause in DOTPR 12–7.102–450, or a substantially similar clause, shall be used for this purpose. The acceptable variation stated in the Extent of Quantity Variation clause shall be stated as a percentage of the required quantity, and may be an increase, a decrease, or combination of both. There should be no standard or usual percentage or variation. The variation in quantity permitted in any procurement should be based upon the normal commercial practices of the particular industry for the particular items, and the permitted percentage should be no larger than is necessary to afford a contractor reasonable protection against the conditions specified in the Variation in Quantity clause. In no event may the acceptable variation exceed plus or minus 10 percent. The clause set forth in DOTPR 12–7.102–450 may be included in the contract only when one or more of the conditions specified in the Variation in Quantity clause is foreseeable at the time of solicitation in the case of an advertised procurement, or at the time of award in the case of a negotiated procurement.

(b) Consideration shall be given to the quantity to which the percentage variation applies. For example, when it is contemplated that delivery will be made to multiple destinations and it is desired that the quantity variation extend to the item quantity for each destination, this requirement must be set forth with particularity. Similarly, when it is desired that the quantity variation extend to the total quantity of each item and not to the quanity for each destination, it may be desirable to express a percentage limitation for each destination to prevent unrealistic distribution of any increase or decrease.

§ 12–1.354 Standards of conduct.

All government personnel engaged in procurement and related activities shall conduct business dealings with industry in a manner above reproach in every respect. Transactions relating to expenditure of public funds require the highest degree of public trust to protect the interests of the Government. While many Federal laws and regulations place restrictions on the action of government personnel, the latter's official conduct must, in addition, be such that the individual would not be reluctant to make a full public disclosure thereof. DOT regulations on Employee Responsibilities and Conduct are set forth in the Department of Transportation regulations (49 CFR Part 99).

§ 12–1.355 Breakout of component items.

(a) Consideration shall be given to the breakout of component items (including services) of an end product for separate procurement whenever the possibility exists that such breakout would be both economical and practicable.

(b) Breakout decisions will be based largely on the degree and significance of the probable risks to quality, performance, reliability, timely delivery of the end item, and on the estimated overall cost savings. The following factors should be considered in determining whether to procure component items of an end product separately;

(1) In the case of sole source procurement of the end product, whether there is another source capable of supplying the component.

(2) Whether breakout will result in significant net cost savings.

(3) Whether breakout would cause over-fragmentation of the end item, and thereby materially impede administration and performance of the end item contract and identification of the cause of any end item failure.

(4) Whether the design of the component (and the design of the end item insofar as it will affect the component) is sufficiently stable that further design or engineering effort by the end item contractor in respect to the component is unlikely to be required.

(5) Whether any problems of quality control and reliability of the component can be resolved without requiring effort by the end item contractor.

(6) Whether breakout can be accomplished without jeopardizing delivery requirements of the end item.

(c) Support parts which are to be stocked as separate items should be considered for separate procurement, as should such required services as installation services or contractor-conducted instruction courses. Component items of an equipment system (such as common test equipment) which are to be physically separate from the basic equipment and which will require no modification or installation as an integral part of a more complex system or component, shall be procured separately unless separate procurement is found to be not economical or practicable.

§ 12–1.356 General procurement policy—Departmental orders.

DOT policy on selected subjects related to procurement matters is set forth in the Departmental orders contained in DOTPR Part 12–99.

Subpart 12–1.4—Procurement Responsibility and Authority

§ 12–1.402–50 Contracting officer's representatives.

(a) A contracting officer may designate Government personnel to act as his authorized representatives for such functions as inspection, approval of shop drawings, testing, approval of samples and other functions of a technical nature not involving a change in the scope, price, terms or conditions of the contract or order. Such designation shall be in writing and shall contain specific instructions as to the extent to which the representative may take action for the contracting officer, but will not contain authority to sign contractual documents. The responsibilities and limitations of the contracting officer's representatives may be set forth in the contract or in a separate letter, a copy of which shall be furnished to the contractor.

(b) A person assigned to and performing his primary duty within a procurement office, and who is under the supervision of a contracting officer, does not require designation as a representative to perform his assigned duties. Such a person is considered to be an employee of the contracting officer, acting in his behalf and as such has the authority to perform acts as assigned by the contracting officer. The contracting officer cannot, without delegating contracting officer authority, authorize his employees to sign any contract document or letter where the signature of a contracting officer is required.

§ 12–1.450 Responsibility of procurement personnel to question requirements and reaffirm their validity.

(a) Procurement personnel have a responsibility to question any contemplated procurement action which appears inconsistent with their knowledge of commodities, markets, prices and normal processes of doing business, or inconsistent with the authority of the requisitioner.

(b) When the award of a proposed procurement has been prolonged over an extended period of time or when during the processing of the procurement, matters are disclosed which give rise to questioning the magnitude of or necessity for the requirement, procurement personnel should reaffirm the validity of the requirement before award of contract.

V 42 174 SEP 8 77 UMI

Subpart 12–1.5—Contingent Fees

§ 12–1.508–3 Misrepresentation or violations of the covenant against contingent fees.

The views of the Office of the General Counsel, OST, shall be obtained prior to the referral of a case to the Department of Justice.

Subpart 12–1.6—Debarred, Suspended, and Ineligible Bidders

§ 12–1.602 Establishment and maintenance of a list of concerns or individuals debarred, suspended, or declared ineligible.

The Federal Aviation Administration is delegated authority to compile, print, and distribute on a Department-wide basis, the Department of Transportation Consolidated List of Debarred, Ineligible, and Suspended Contractors. Refer to Departmental Order DOT 4200.5 dated January 15, 1968, contained in DOTPR 12–99.

§ 12–1.604–1 Procedural requirements relating to the imposition of debarment.

(a) Administrative debarment by the Department shall be initiated within each Administration or OST in accordance with the procedures set forth in FPR 1–1.604–1. The written notice required by FPR 1–1.604–1 shall be signed by the head of the agency. Where no hearing on the basis of either oral testimony or a written statement is requested by the concern or individual sought to be debarred, debarment may be imposed by the head of the agency and shall be applicable to the entire Department. Where a hearing is properly requested, the debarment, if any, shall be imposed by the Secretary upon recommendation of the Chairman of the Department of Transportation Contract Appeals Board (DOTCAB), and shall be similarly applicable to the entire Department.

(b) The written notice of proposed debarment to be furnished in accordance with FPR 1–1.604–1 shall, in addition to the requirements specified therein, apprise the concern or individual that if such party desires to present information, either in person or in writing, in opposition to such action, at a hearing, (1) a request therefor is to be made to the Chairman of the DOTCAB by that party within 20 days following receipt of the notice of the proposed debarment, and (2) the request for a hearing is to be accompanied by a statement setting forth the grounds upon which the proposed debarment will be contested. In addition, the notice shall be include a notification that debarment, if imposed, shall be applicable throughout the Department. The notice shall be sent by registered or certified mail, return receipt requested, to the last known address of the concern or individual, but where actual or personal delivery is not effected by the Postal Service, a debarment may be imposed by the head of the agency; but any such debarment shall, upon the submission of an appropriate application, be subject to reopening and in such event a hearing shall be accorded with respect to the debarment. A copy of each such notice shall be sent to TAD–60.

(c) Hearings requested in connection with debarment proceedings as provided in FPR 1–1.604–1(b) shall be conducted before the DOTCAB. An opportunity shall be afforded the concern or individual to appear with witnesses and counsel to show cause why such concern or individual should not be debarred. Where a concern or individual requests a hearing and fails to appear, the DOTCAB shall consider the case on the basis of the records and information made available to it. In any instance where a party has requested a hearing, he may elect to forego the submission of oral testimony and may submit a written statement (together with any information relating thereto) in opposition to the proposed action. Hearings shall be held by the DOTCAB within 30 days after receipt of the request for a hearing, unless the Chairman of the DOTCAB grants additional time. The Chairman shall include in his recommendation to the Secretary whether or not debarment is warranted under the particular circumstances and, where debarment is warranted, a recommended period thereof.

(d) When debarment is imposed by the head of the agency, or by the Secretary, the concern or individual shall be notified of the decision and of the period during which such debarment shall be effective. If a proposed debarment is not upheld by the Secretary, the concern or individual shall be so notified. Notice as to the imposition of a debarment shall be furnished to the concern or individual in the same manner as provided in DOTPR 12–1.604–1(b) for a notice of proposed debarment.

§ 12–1.605 Suspension of bidders.

Where a suspension is effected by the Department, it shall be invoked by the Secretary upon recommendation of the General Counsel, OST.

§ 12–1.606 Agency procedure.

(a) Each Administration and OST, as applicable, shall furnish the notifications to GSA required by FPR 1–1.606(c), for debarments initiated by it, and shall concurrently forward a like copy to (1) Federal Aviation Administration, Logistics Service, Contracts Division, Procurement Management and Services Branch, ALG–380 for inclusion on or removal from the Department list, and (2) the Director of Installations and Logistics, OST, for information.

(b) Requests for standard distribution and for individual copies of the Department Consolidated List shall be made to the Federal Aviation Administration, Logistics Service, Contracts Division, Procurement Management and Services Branch, ALG–380, Washington, D.C. 20591.

Subpart 12–1.7—Small Business Concerns

§ 12–1.701–1 Small Business concern (for Government procurement).

(a) When the solicitation is for a manufactured product classified within an industry set forth in FPR 1–1.701–1 (h), and small business set-aside procedures are utilized, a size standard reading substantially as follows shall be included in the solicitation:

> The small business employment size standard prescribed for this procurement is not more than ------[1] employees, except when the concern is a small business non-manufacturer in which case the employment size standard is not more than 500 employees.

(b) When the solicitation is for a manufactured product that is not classified within an industry set forth in FPR 1–1.701–1(h), and small business set-aside procedures are utilized, a size standard reading substantially as follows shall be included in the solicitation:

> The small business employment size standard prescribed for this procurement is not more than 500 employees.

(c) Similar language shall be used to prescribe other size standard criteria.

§ 12–1.704 Agency program direction and operation.

Each Administration of the Department will establish and maintain a strong and viable small business program, designed to further the small business policies as set forth in FPR 1–1.702.

§ 12–1.704–50 Small business assistance officer.

Each Administration will designate an individual as the Administration's small business assistance officer. The small business assistance officer will be responsible, either on a full time basis or as a collateral duty, for the establishment, implementation and execution of the small business program of his Administration. He will be the central point of contact within his Administration for inquiries concerning the small business program such as from industry, the Small Business Administration (SBA), the Congress or the Office of the Secretary of Transportation. His duties shall include developing a plan of operation to increase the share of contracts awarded to small business by his Administration.

§ 12–1.704–51 Small business specialists.

(a) A small business specialist shall be appointed by name, in writing, for each procurement office, to operate on either a full time or collateral duty basis. Only those individuals possessing the necessary business acumen, knowledge of the Department's procurement policies and procedures, training and background to accomplish effectively the objectives of the small business program shall be considered for appointment. In any instance where the duty of a small business specialist is on a part-time basis, the appointment shall clearly indicate that the part-time nature of the assignment shall in no way relieve the individual from full responsibility for effectively accomplishing the activity's small business program requirements.

(b) In larger offices, where practical, the small business specialist shall not be the contracting officer nor an individual under the supervision of the contracting officer. He shall be given the authority to exercise independent judgment in his areas of responsibility. In small offices the assignment of the small business specialist should promote maximum effectiveness within the capabilities of the office.

(c) The small business specialist appointed pursuant to paragraph (a) of this section shall perform such of the following duties as are determined by the Administration to be appropriate for his procurement office:

(1) Maintain a program designed to locate capable small business sources for current and future procurements;

(2) Coordinate inquiries and requests for advice from small business concerns on procurement matters;

(3) Review proposed solicitations for supplies and services, assuring that small business concerns will be afforded an equitable opportunity to compete, and as appropriate initiating recommendations for small business set-asides;

(4) Take action to assure the availability of adequate specifications and drawings, when necessary, to obtain small business participation in a procurement;

(5) Review proposed procurements for possible breakout of items suitable for procurement from small business concerns;

(6) Advise small business concerns with respect to the financial assistance available under existing laws and regulations and assist such concerns in applying for financial assistance;

(7) Participate in determinations concerning the responsibility of a prospective small business contractor;

(8) Participate in the evaluation of a prime contractor's small business subcontracting programs;

(9) Assure that adequate records are maintained, and accurate reports prepared, concerning small business participation in the procurement program;

(10) Make available to SBA copies of solicitations when so requested; and

(11) Act as liaison between the contracting officer and the appropriate SBA office in connection with set-asides, certificates of competency, size classification and any other matter in which the small business program may be involved.

§ 12–1.708 Certificate of competency program.

§ 12–1.708–2 Applicability and procedure.

No referrals shall be made to the SBA unless the contracting officer has determined that the bid or proposal of the small business concern is responsive. All referrals shall be in writing.

§ 12–1.750 Procurement set-asides for small business when an SBA representative is not available.

§ 12–1.750–1 General.

If no SBA representative is available, the small business specialist shall initiate recommendations to the contracting officer for a small business set-aside for an individual procurement or class of procurements or portion thereof.

§ 12–1.750–2 Review of set-aside recommendations initiated by small business specialists.

When a small business specialist has recommended that all, or a portion, of an individual procurement or class of procurements be set aside for small business, the contracting officer shall promptly either (a) concur in the recommendation or (b) disapprove the recommendation, stating in writing his reasons for disapproval. If the contracting officer disapproves the recommendation of a small business specialist, the small business specialist shall be afforded an opportunity to appeal to an official above the level of the contracting officer. The decision of this official shall be final.

§ 12–1.750–3 Withdrawal or modification of set-asides.

Withdrawal or modification of an individual or class set-aside which was originally established upon the recommendation of the small business specialist may be initiated by the contracting officer by giving notice containing the reason therefor, to the small business specialist. If the small business specialist does not agree to a withdrawal or modification, the action may be appealed to an official above the level of the contracting officer, whose decision shall be final.

§ 12–1.750–4 Contracting authority.

For purposes of determining the appropriate contract authority, set-asides initiated by the small business specialist and concurred in by the contracting officer shall be considered to be unilateral small business set-asides, and shall cite 41 U.S.C. 252(c)(1) or 10 U.S.C. 2304 (a)(1), as applicable.

§ 12–1.751 Small business set-aside for proposed construction procurements.

(a) Each proposed procurement for construction services (excluding ship construction) estimated to cost between $2,500 and $500,000, shall be set aside for exclusive small business participation. Such set-asides shall be considered to be unilateral small business set-asides, and shall be withdrawn, in accordance with the procedures of FPR 1–1.706–3 and DOTPR 12–1.750–3, only if found not to serve the best interest of the Government.

(b) Small business set-aside preferences should be considered for construction procurements in excess of $500,000 on a case-by-case basis.

Subpart 12–1.8—Labor Surplus Area Concerns

§ 12–1.807 Report on preference procurement in labor surplus areas.

Reports required by FPR 1–1.807 will be forwarded to the Director of Installations and Logistics, OST, no later than November 1 (annual) and May 1 (semi-annual) of each year. The Director of Installations and Logistics will prepare and submit to GSA the consolidated Departmental report.

Subpart 12–1.9—Reporting Possible Antitrust Violations

§ 12–1.901 General.

The reports required by FPR Subpart 1–1.9 shall be prepared for the signature of the Secretary, and forwarded to the Director of Installations and Logistics, OST.

Subpart 12–1.11—Qualified Products

§ 12–1.1150 General.

(a) It is sometimes necessary to test products in advance of any procurement action to determine if a product is available that will meet specification requirements. In such cases, the specification may require qualification of the product. Qualification is the entire process by which products are obtained from manufacturers or distributors, examined and tested for compliance with specification requirements, and then identified on a list of qualified products. Qualification is performed in advance and independent of any specific procurement action.

(b) A Qualified Products List (QPL) identifies the specification, manufacturer or distributor, item by part or model number or trade name, place of manufacture, and the test report involved. Suppliers whose products have successfully passed qualification and who furnish evidence thereof are eligible for award even though the product is not yet included in the QPL.

(c) Chapter IV of the Federal Standardization handbook (Federal Property Management Regulations 101–29) is the basic instruction concerning qualified products and qualifications procedures. Copies of this handbook may be purchased by the public from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

(d) A specification is the only medium for establishing a requirement for qualification. The preparing activity identified in the specification is responsible for qualification.

§ 12–1.1151 Justification for inclusion of qualification requirements.

Subject to approval by the office as designated in Administration procedures, a qualification requirement may be included in a specification only when one or more of the following conditions exist:

(a) The time required for testing after award would unduly delay delivery of the supplies being purchased.

[1] (Insert "750", "1000", or "1500", as appropriate)

V 42 174 SEP 8 77 UMI

(b) The cost of repetitive testing would be excessive.

(c) The tests would require expensive or complicated testing apparatus not commonly available.

(d) The interest of the Government requires assurance, prior to award, that the product is satisfactory for its intended use.

(e) The determination of acceptability would require performance data to supplement technical requirements contained in the specification.

§ 12–1.1152 Prior determinations.

Prior to inclusion of qualification in a specification, the preparing activity shall determine that:

(a) There is no other practicable way to obtain evidence of availability of products meeting the requirements of the specification.

(b) Sources, sufficient in number to provide an adequate base of supply, insofar as practicable, are available and willing to submit their products for qualification.

(c) Test facilities and resources are available to establish and maintain the QPL adequately and without delay.

§ 12–1.1153 Availability of lists.

Qualified Products Lists are intended for the use of the Government and its contractors, subcontractors, prospective bidders, and suppliers. Lists may be obtained by prospective bidders or suppliers who require these Lists in furnishing supplies or services to the Government or its contractors. Lists are also available to the public upon request. When a person is provided with, or given access to, a QPL he should be advised as follows:

(a) The QPL has been prepared for use by or for the Government in the procurement of products covered by the specification and such listing of a product is not intended to and does not connote endorsement of the product by the Department of Transportation;

(b) All products listed have been qualified under the requirements for the prod as specified in the latest effective issue of the applicable specification;

(c) The QPL may be revised or amended as necessary, and subject to change without notice;

(d) The listing of a product does not release the supplier from compliance with the specification requirements; and

(e) Use of the information for advertising or publicity purposes is permitted, provided that such publicity or advertising does not state or imply that the product is the only product of that type so qualified or that the Department of Transportation in any way recommends or endorses the manufacturer's product.

§ 12–1.1154 Opportunity for qualification.

(a) Upon determination that a product is to be covered by a QPL, manufacturers shall be urged to submit their products for qualification and where possible shall be given sufficient time to arrange for qualification testing prior to issuance of the initial invitation for bids or request for proposals for the item as a qualified product. Appropriate notice of such determination shall be furnished to the U.S. Department of Commerce, Commerce Business Daily, Room 1304, 433 West Van Buren Street, Chicago, Ill. 60607, requesting publication in five consecutive issues of the daily "Synopsis of U.S. Government Proposed Procurement, Sales and Contract Awards". The publicity given to the requirement for qualification testing shall include the following:

(1) An intention to establish a QPL for a product;

(2) The specification number and nomenclature of the product, and the name and address of the office to which the request for qualification should be submitted; and

(3) Notice that in making future awards consideration shall be given only to such products as have been accepted for inclusion in a QPL.

(b) Lists shall always be kept open for inclusion of products from additional suppliers.

§ 12–1.1155 Clarification of qualification requirements.

When there is any question concerning qualification requirements in a specification, the activity that prepared the specification will furnish clarification when requested by the contracting activity.

§ 12–1.1156 Procurement of qualified products.

§ 12–1.1156–1 General.

(a) Whenever qualified products are to be procured by the Government as end items, only bids or proposals offering products which are qualified for listing on the applicable QPL at the time set for opening of bids or award of negotiated contracts shall be considered in making awards.

(b) Whenever a qualified product is to be procured by a prime contractor as a component of an end item, the prime contractor shall be required to furnish a component which has been tested and qualified for inclusion in the applicable QPL by the time of award of the subcontract. Delay resulting from the prime contractor's awaiting qualification approval by the Government of a component shall not constitute excusable delay when a previously qualified component could have been procured in time to meet the end item delivery schedule.

(c) Procurements involving qualified products shall be governed by paragraph (c)(1) through (4) of this section.

(1) Synopses of proposed procurements shall be published by purchasing activities, in accordance with FPR 1–1.1003, promptly upon receipt of procurement requests.

(2) The maximum time consistent with delivery requirements shall be allowed between issuance of the solicitation and the opening of bids or the award of a negotiated contract. As a minimum, however, contracting officers shall allow 30 calendar days between the dates of issuance and opening (award, in the case of negotiated contracts): *Provided*, That periods of less than 30 days may be set in cases of urgency when the justification for a shorter period is set forth in writing and made a part of the procurement file. In appropriate cases, advance notice of procurement involving qualified products may be given suppliers through the use of preinvitation notices. Such notices shall identify the specification requiring qualification.

(3) In procuring qualified products by formal advertising, invitations for bids will be distributed to suppliers in the same manner as if a qualified product were not involved, and will not be restricted to suppliers whose products have been qualified.

(4) Contracting officers shall forward requests from suppliers concerning qualification of products to the specification preparing activity.

§ 12–1.1157 Contract provisions.

(a) When qualified end products are to be procured, the provision in FPR 1–1.1101(b) shall be inserted in the solicitation, supplemented by the following:

> The offeror shall insert the item name and the text number (if known) of each qualified product in the blank spaces below.
> Item name ----------
> Test No. ----------
>
> Any change in location or ownership of the plant at which a previously approved product is, or was, manufactured requires re-evaluation of the qualification. Such re-evaluation must be accomplished prior to the bid opening date in the case of advertised procurements and prior to the date of award in the case of negotiated procurements. Failure of offerors to arrange for such re-evaluation shall preclude consideration of their offers.

If the procurement is formally advertised, the following statement shall also be included:

> Any bid which does not identify the qualified product being offered, either above or elsewhere in the bid, will be rejected.

(b) When qualified products are to be procured as components of end items, insert the following provision in the solicitation:

> QUALIFIED PRODUCTS—COMPONENTS
>
> When any of the end items which are to be supplied to the Government by the Contractor will contain one or more components which are required by the applicable specification to be qualified products, such components shall have been tested and shall be qualified for inclusion in the Qualified Products List (whether or not actually included in the List) at the time of award of any subcontract by the Contractor for such components, or, in the event the Contractor plans to manufacture such components himself, shall have been so tested and have so qualified before the Contractor begins to manufacture such components for performance of this contract (not before manufacture of the prototype, preproduction model, or first article, for qualification testing). Unless required for interchangeability or compatibility, the Contractor shall not cite brand names from any Qualified Products List in any subcontract solicitation, but shall refer to the pertinent specification so that optimum competition may be obtained. Delay resulting from the Contractor's awaiting qualification approval by the Government of a component shall not constitute excusable delay when a previously qualified component could have been procured in time to meet the end item delivery schedule. Any change in location or ownership of the plant at which a previously approved product is, or was, manufactured requires re-evaluation of the qualification. Such re-evaluation must be accomplished prior to the award of any subcontract by the Contractor for such components or prior to the beginning of manufacture if the Contractor manufactures such components himself.

§ 12–1.1158 Effect of debarment or suspension.

The inclusion of a product on the QPL's may be denied, and the qualification of a listed product may be withdrawn, by the Administration concerned, without notification to the manufacturer, if the name of the manufacturer appears on the lists of debarred or ineligible bidders which are maintained pursuant to FPR Subpart 1–1.6.

§ 12–1.1159 Waiver of qualification requirement.

When procuring a product under a specification which includes qualification requirements either for the end item or for components of the end item, such qualification requirements can be waived only by the activity that prepared the specification. In appropriate cases, when requested by the contracting officer, the preparing activity may waive qualification requirements. A notice, issued by the preparing activity, directing a waiver of the qualification requirement, constitutes adequate authorization for waiver of product qualification requirements. Where waivers have been granted, solicitations shall specifically indicate that the qualification requirement is inapplicable. Such information shall also be included in any Synopsis of the procurement.

§ 12–1.1160 Inadequate competition.

(a) *Pre-solicitation.* In connection with procurement of a qualified product as an end item, the contracting officer shall review the applicable QPL prior to solicitation to ascertain whether the number of sources is adequate for competition. If, in the opinion of the contracting officer, the number of sources is inadequate, action shall be taken as prescribed below unless he already has the necessary information.

(1) The contracting officer shall request the activity that prepared the specification to provide information concerning the status of tests on additional products, including the anticipated dates when such tests will be completed so that opening of bids or submission of proposals may be so scheduled as to allow completion of the tests.

(2) If no tests are being conducted or contemplated, the contracting officer shall further request the preparing activity to advise whether a means of quality assurance other than qualification approval may be substituted in the procurement.

(b) *Post-solicitation.* The contracting officer shall advise the specification preparing activity of the name and address of any concern which requested copies of the solicitation but was not included on the QPL. The specification preparing activity may then attempt to interest such concerns in becoming qualified.

§ 12–1.1161 Reporting nonconformance with specification requirements.

If a supplier on the QPL repeatedly submits products not meeting specification requirements for inspection, resubmits products previously rejected without correcting the defects, or is otherwise unsatisfactory in the performance of contracts, he shall be reported to the activity that prepared the specification for a determination as to whether the supplier's product shall be removed from the list.

§ 12–1.1162 Misuse of QPL information.

Misuse of QPL information, such as for advertising or publicity purposes contrary to that permitted in DOTPR 12–1.1153(e), shall be reported promptly to the preparing activity.

Subpart 12–1.12—Responsible Prospective Contractors

§ 12–1.1204 Determination of responsibility or nonresponsibility.

§ 12–1.1204–1 Requirement.

(a) Except as provided in paragraph (c) of this section, the contracting officer shall, prior to award, prepare, sign, and place in the contract file, DOT Form F 4220.1 titled "Determination of Prospective Contractor Responsibility." Where a prospective contractor is determined to be nonresponsible, the form shall also be completed before notice of the rejection is furnished and the contract awarded to another.

(b) For each factor applicable to the procurement, the type of evaluation and the rating shall be checked. A completed form may include any combination of checks in the A, B, and C columns. Where the determination of responsibility is based on an SBA certificate of competency, a copy of the certificate shall be attached to the form and Block 6 of the form should not be completed except to reference the attachment.

(c) The form need not be completed in the case of:

(1) Procurements of the types listed in FPR 1–1.1201(b);

(2) Contracts of $10,000 or less, except that the form shall be prepared prior to the award of all contracts the primary purpose of which is research; or

(3) Contracts for perishable subsistance supplies available for immediate shipment.

(d) Pending a revision of DOT Form F 4220.1, the reference in Block 7 to "FPR 1–1.310–6" shall be changed to read "FPR 1–1.1202."

Subpart 12–1.16—Report of Identical Bids

§ 12–1.1603 Reporting requirements.

§ 12–1.1603–3 Submission of reports.

The report required by FPR 1–1.1603–3 (b) shall be sent by each Administration directly to the Attorney General. An information copy shall be sent to the Director of Installations and Logistics, OST.

Subpart 12–1.50—Options

§ 12–1.5000 Scope of subpart.

This subpart applies to contracts for supplies and services other than for construction and research and development. It does not preclude the use of appropriate option provisions in such construction and research and development contracts.

§ 12–1.5001 Definition.

As used in this subpart, an option clause is a provision in a contract under which, for a specified time, the Government may elect to purchase additional quantities of the supplies or services called for by the contract, or may elect to extend the period of performance of the contract.

§ 12–1.5002 Applicability.

(a) Option clauses may be included in contracts where increased requirements within the period of contract performance are foreseeable, or where continuing performance beyond the original period of contract performance may be in the best interest of the Government. Since options require offerors to guarantee prices for definite periods of time with no guarantee that orders will be placed, their improper use could result in prices which are unfair to either the Government or the contractor. When additional requirements are foreseeable and subsequent competition would be impracticable because of such factors as production lead time and delivery requirements, the use of options may be preferable to later negotiating a price with the contractor at a time when it is the only practical source.

(b) An option normally should not be used where it can reasonable be foreseen that (1) minimum economic production quantities will be procured at some future date, and (2) start-up costs, production lead time, and probable delivery requirements would not preclude adequate future competition.

(c) Option provisions and clauses shall not be included in contracts when:

(1) The supplies or services being purchased are readily available on the open market.

(2) The contractor would be required to incur undue risks: e.g., the price or availability of necessary materials or labor is not reasonably foreseeable.

(3) An indefinite quantity contract or requirements contract is appropriate except that options for continuing performance may be used in such contracts.

(4) Market prices for the supplies or services involved are likely to change substantially.

(5) The option quantities represent known firm requirements for which procurement funds are available.

§ 12–1.5003 Procedures.

(a) When a contract is to contain an option quantity, the solicitation must contain an appropriate option provision and the contract file shall be documented with a justification for the inclusion of

V 42 174 SEP 8 77 UMI

the option. If the contract is to be negotiated, the determination and findings shall set forth the approximate quantity to be awarded and the extent of the increase to be permitted by the option. The contract shall limit the additional quantities of supplies or services which may be procured, or the duration of the period for which performance of the contract may be extended, under the option and will fix the period within which the option may be exercised. In fixing the period within which the option may be exercised, consideration shall be given to (1) necessary lead time in order to assure continuous production and (2) the time required for additional funding and other necessary approval action. The period specified for exercising the option shall in all cases be kept to a minimum.

(b) Solicitations containing option provisions should cover five basic points:

(1) *Quantity of additional supplies or services which may be procured.* Where the exercise of the option would result in increased quantities of supplies, the option quantity should be expressed in terms of a specified number of additional units rather than as a percentage of the base quantity. Where exercise of the option would result in an increase in the performance of services, the option may be similarly expressed in terms of the units of work contained in the contract (e.g., man hours). Where exercise of the option would result in an extension of the duration of the contract, the option may be expressed in terms of a specific date or dates or of an additional time period such as days, weeks, or months. Generally the quantity subject to the option should not exceed the basic quantity by more than 25%.

(2) *The period within which the option may be exercised.* The contract shall fix the period within which the option may be exercised. The period specified shall in all cases be kept to a minimum (generally no longer than 6 months).

(3) *Delivery terms for the option quantities.*

(4) *Prices for the option quantities.* The clause shall provide for firm unit prices for any additional quantity that may be ordered up to the maximum quantity of the option, or for any increase in the performance of services or extension of the duration of the contract.

(5) *A statement on the evaluation of bids or proposals.* Solicitations shall state that evaluation will be on the basis of the firm quantity set forth in the schedule and the option quantity, if any, exercised at time of award.

The option clause should not contain a price control feature on the option quantities, such as a requirement that the option quantities be offered at prices no higher than those of the basic quantity. The use of price controls to avoid unreasonable offers on option quantities can be disadvantageous to the Government because the contractor may spread the cost of bona fide risks of option quantities to the basic quantity.

§ 12–1.5004 Exercise of options.

(a) The exercise of an option by the Government requires the contracting officer's written notification to the contractor within the time period specified in the contract.

(b) Where the contract provides for price escalation and the contractor requests revision of price pursuant to such provision, or the provision applies only to the option quantity, the effect of escalation on prices under the option must be ascertained before the option is exercised.

(c) Options should be exercised only if it is determined that:

(1) Funds are available.

(2) The requirement covered by the option fulfills an existing need of the Government, and

(3) The exercise of the option is most advantageous to the Government, price and other factors considered.

(d) Insofar as price is concerned, the determination under paragraph (c)(3) of this section shall be made on the basis of one of the following:

(1) A new solicitation fails to produce a better price than that offered by the option. When the contracting officer anticipates that the option price will be the best price available, he should not use this method of testing the market but should use one of the methods in paragraph (d) (2), (3), or (4) of this section.

(2) An informal investigation of prices, or other examination of the market, indicates clearly that a better price than that offered by the option cannot be obtained.

(3) The time between the award of the contract containing the option and the exercise of the option is so short that it indicates the option price is the lowest price obtainable, considering such factors as market stability and a comparison of the time since award with the usual duration of contracts for such supplies and services.

(4) Established prices are readily ascertainable and clearly indicate that formal advertising or informal solicitation can obviously serve no useful purpose.

(e) Insofar as the "other factors" mentioned in paragraph (c)(3) of this section are concerned, the determination should, among other things, take into account the Government's need for continuity of operations and potential costs to the Government of disrupting operations, including the cost of relocating necessary Government-furnished property (as, for example, in certain repair and overhaul contracts for aircraft or other complex equipment).

(f) When it has been determined that an option may properly be exercised, such determination shall be set forth in writing and included in the contract file. Written notification to the contractor of the exercise of the option and any contract modification resulting therefrom shall cite the option clause contained in the contract as authority for the procurement of the option quantity, and no citation under 41 U.S.C. 252(c) or 10 U.S.C. 2304(a) is required.

§ 12–1.5005 Examples of option provisions.

Clauses substantially as set forth in 12–7.151–17 may be used in accordance with the provisions of this subpart.

Subpart 12–1.51—[Reserved]

Subpart 12–1.52—Value Engineering

§ 12–1.5201 Policy.

(a) Value engineering (VE) is concerned with the elimination or modification of anything that contributes to the cost of a contract item or task but is not necessary for needed performance, quality, maintainability, reliability, or interchangeability. Specifically, VE as contemplated by this Subpart constitutes a systematic and creative effort, not required by any other provision of the contract, directed toward analyzing each contract item or task to ensure that its essential function is provided at the lowest overall cost. Overall cost may include, but need not be limited to, the costs of acquiring, operating, and logistically supporting an item or system. VE provisions may be incorporated into a contract by using the VE incentive clause which sets forth the methods by which a contractor may propose ways to perform the contract more economically and share in any resulting cost saving, or by using the VE program requirement clause which requires the contractor to establish a VE program aimed at identifying more economical ways to perform the contract and which may include incentive sharing.

(b) In order to realize fully the cost saving potential of VE, it is DOT policy to:

(1) Incorporate provisions which encourage or require VE into all contracts for supplies, services and construction of sufficient size and duration which offer reasonable likelihood for cost savings.

(2) Assure contractors a substantive share in cost savings, i.e., a fair proportion of the savings applied to a substantial base.

(3) Objectively and expeditiously process value engineering change proposals (VECPs) submitted by contractors.

(4) Encourage subcontractor participation through extension of VE incentives, by prime contractors, to appropriate subcontractors.

§ 12–1.5202 Value engineering incentives.

§ 12–1.5202–1 Description.

(a) The objective of a VE incentive provision is to encourage the contractor to submit VECPs by permitting the contractor to share in cost savings. To be acceptable, a VECP must involve some change in the contract specifications, purchase description, or statement of work; this may include the elimination or modification of any requirement found to be in excess of actual needs in the areas of, for example, design, components, materials, material processes, tolerances, packaging requirements, technical data requirements, or testing procedures and requirements, and consequent reduction in the contract cost. Furthermore, even when the contract cost may be increased, the incentive provisions encourage contractors to submit VECPs that are likely to lead to overall savings resulting from significant net reductions in collateral costs of Government-furnished property, operational requirements or logistic support requirements.

(b) VE proposals which satisfy the above requirements shall not be rejected on the ground that they also involve a termination, in whole or in part, of contract line items; moreover, the cost savings resulting from such quantitative reductions shall be shared with the contractor. On the other hand, contractor proposals which concern the quantitative requirements of the Government but do not satisfy the above criteria are not within the intent of the VE provisions, and the contractor will not share, under the VE Incentive clause, in savings resulting solely from such quantitative proposals.

(c) In all cases, the contractor's share in overall cost savings resulting from the Government's acceptance of a VECP shall be determined as provided in the VE Incentive clause.

§ 12–1.5202–2 Use of value engineering incentive clause.

(a) Except as provided in paragraph (b) of this section, a VE incentive clause shall be included in all advertised and negotiated supply and service contracts, and construction contracts of $100,000 or more, unless it is determined by the contracting officer that VE offers no potential for cost reduction, as for example, where a particular contract or class of contracts is of insufficient duration to allow VECPs to be processed, or where the item or class of items being procured is a commercial product whose design and cost are primarily controlled by the commercial market. A VE clause should be included in contracts under $100,000 if the contracting officer foresees a potential for significant savings.

(b) Normally, a VE incentive clause shall not be included in the following type contracts unless the contracting officer affirmatively determines that the contract has a clear potential for VE cost savings and that a VE incentive clause will provide the effective stimulus to the contractor:

(1) Contracts for research or exploratory development;

(2) Contracts for engineering services from "not-for-profit" organizations;

(3) Cost reimbursement type contracts other than cost plus incentive fee or cost plus award fee type contracts;

(4) Contracts for architect-engineer services;

(5) Contracts containing a VE Program Requirement clause except as provided by 12–1.5206 below;

(6) Contracts providing for product or component improvement unless the VE incentive clause application is restricted to areas not covered by provisions for product or component improvement;

(7) Contracts for commercial items (See FPR 1–3.807–1(b)(2)) being procured without invoking special requirements and specifications (such as packaging specifications); and

(8) Contracts for personal services.

§ 12–1.5202–3 Value engineering clauses.

In accordance with this subpart 12–1.5202 and 12–1.5206, the VE clauses set forth in §§ 12–7.151–13, 12–7.251–9 and 12–7.651–16 are to be used as applicable.

§ 12–1.5202–4 Types of savings to be shared with the contractor.

(a) There are two types of savings to be shared between the Government and the contractor. These are acquisition savings and collateral savings.

(b) Acquisition savings are those which accrue from the net reduction in the contract price for supplies, service and construction. Acquisition savings may include instant, concurrent and future savings.

(1) "Instant contract savings" are those net measurable reductions in the price of the contract under which a VECP has been submitted by the contractor and accepted by the Government. In the case of requirements or other indefinite delivery type contracts, basic ordering agreements, multi-year contracts, fixed-price contracts providing for prospective price redetermination, or contracts in which supplemental agreements or other modifications increase the quantity of items or add items to the contract, see paragraph (j) of the clause in § 12–7.151–13(a) for the appropriate definition of "instant contract."

(2) "Concurrent contract savings" are those net measurable reductions in the price of a concurrent contract let by the same procuring activity.

(3) "Future contract savings" are either those measurable net reductions in the price of a future contract (other than the contract under which the VECP was accepted) or a lump sum payment paid to the contractor at the time the VECP is accepted and based upon estimated future applications.

(c) Collateral savings are those ascertainable net reductions in the Government's overall documented projected costs including but not limited to costs of operations, maintenance, logistics support, and Government furnished property where such collateral savings result from a VECP submitted by the contractor. A contractor may share in collateral savings in addition to sharing in instant contract savings. However, when a contracting officer determines that there is no reasonable potential for significant collateral savings, the collateral savings provision may be omitted from the VE incentive clause.

§ 12–1.5203 Sharing arrangements.

§ 12–1.5203–1 Sharing rates.

(a) The sharing rates used in the various VE clauses for acquisition savings are shown below. These rates are common for all acquisition savings, i.e., instant concurrent and future contract savings.

Type of contract	Incentive clause (Government/contractor)	Program clause (Government/contractor)
Fixed price (other than incentive)	50/50	75/25
Fixed price (construction)	45/55	(1)
Fixed-Price-Incentive (FPI) or cost - plus - incentive - fee (CPIF)	65/35	80/20
Cost-plus-award-fee (CPAF)	75/25	85/15
Cost reimbursement (other than CPIF and CPAF)	(1)	85/15

[1] Not applicable.

(b) The contractor's share of collateral savings is 20 percent of the estimated savings to be realized during an average or typical year of use, as determined by the Procuring Activity except that such share shall not exceed the price of the contract on which the VECP is submitted or $100,000, whichever is greater.

(c) The clauses in 12–7.151–13 and 12–7.251–9 (specifically the sharing provisions of paragraph (e)), may be modified when used in incentive contracts to provide no adjustment to targets or ceilings when a VECP is approved. This permits instant VE savings to be rewarded under the overall contract cost incentive. Appropriate substitute clause language is in 12–7.151–13(e), and 12–7.251–9. Concurrent and future contract rates shall be the same as specified in (a) above, unless modified in accordance with 12–1.5203–4(c).

(d) The method of computing a contractor's share of acquisition and collateral savings is provided in the VE clauses in DOTPR Part 7.

§ 12–1.5203–2 Sharing base.

The sharing base is defined to be the affected end items on contracts of the procurement office or its successor approving the VECP. This base may be expanded to include contracts of other procurement offices. Such expansion of the base shall be specified in the contract.

§ 12–1.5203–3 Sharing period.

(a) The contractor shall share in the savings on all affected end items scheduled for delivery not later than 3 years after acceptance of the first item incorporating the VECP, or until the originally scheduled delivery date of the last affected end item under the instant contract, whichever is later. The contractor shall be responsible for maintaining adequate records to identify the first unit delivered which incorporates the applicable VECP. These records must be maintained for a period of three years after final payment on the contract under which the VECP was accepted. For the purpose of establishing the starting date of the sharing period, the contractor shall identify the first unit incorporating the VECP on the applicable invoice or inspection and receiving report.

(b) When the contract is for items which require an extended period of time for production (e.g., ship construction), it may be desirable to provide for future sharing on items accepted under all contracts awarded within the sharing pe-

V 42 I 174 SEP 8 77 UMI

riod, even if the scheduled delivery date is outside the sharing period.

§ 12–1.5203–4 Methods of sharing for future acquisitions.

(a) *Methods.* There are two methods of sharing future acquisition savings. The clause in § 12–7.151–13(a)(1) provides for contractor sharing in savings by the procurement office, or its successor, on future purchases of essentially the same end item utilizing the VECP. Payments are not made until such future contracts are actually awarded. The lump sum method, which is optional, provides for a single payment at the time of VECP approval by a contract modification, based upon estimated application of the VECP to other projected procurements by the procurement office or its successor (i.e., five-year plan, or other suitable projection). To use the lump sum method, substitute § 12–7.151–13(a)(4) for paragraph (e)(3) of the clause in § 12–7.151–13(a)(1). In deciding whether to use the lump sum method, the contracting officer shall consider:

(1) The accuracy with which the number of items to be procured during the sharing period can be estimated and the probability of actual production of the projected procurement;

(2) The availability of funds for a lump sum payment;

(3) Whether disclosure of estimated future requirements would compromise national security; and

(4) The administrative expense of using the future payment method.

(b) *Calculations.* The contractor's share of future acquisition savings is based upon the sharing percentage (specified in the clause), the unit cost reduction, and the number of units involved. The calculations are in the clauses in § 12–7.151–13. However, the contracting officer should carefully select the definition of the future contracts unit cost reduction to be used. Normally this is the unit cost reduction in the instant contract without considering any cost of contractor development and implementation (see paragraph (e)(3)(i) of the clauses in § 12–7.151–13(a)(1)(2)(3) or (4)). However, if significant future contract unit cost changes (e.g., item still in design or early production, or significant changes in the rate of production) are expected, it may be desirable to reflect this in the clause by substituting the definition in § 12–7.151–13(a)(5).

(c) *Modifications for design to cost.* For design and development contracts with design to cost features (e.g., future unit production cost targets or thresholds are specified), the future acquisition sharing portion of the clause should be modified appropriately. If the contract has a production unit cost target requirement, but no incentive in this regard, it may be desirable to share future VECP savings only on the amount that the achieved unit production cost is lower than the target unit production cost. If the design to cost requirement is incentivized, care should be taken to insure that no duplication in incentive awards exists, before sharing any future VECP savings.

§ 12–1.5204 Submission and processing.

(a) Instructions for submission and processing of VECPs are provided in the clauses.

(b) The contracting officer, with the necessary technical and other support, shall be responsible for expeditiously evaluating and determining the acceptability of all VECPs submitted under a contract. The contracting officer's decision shall be final and shall not be subject to the Disputes clause of the contract.

(c) If a VECP is not accepted, the contracting officer shall notify the contractor in writing giving reason why the VECP was rejected.

(d) Before accepting a VECP which involves sharing collateral savings, the contracting officer must make sure that sufficient funds are available under the instant contract or from other sources to cover any increase in the contract price.

§ 12–1.5205 Future payment funding and notice for future acquisition contracts.

The future payments will be made pursuant to the contract under which the VECP was accepted; however, they shall be funded from the appropriation supporting any succeeding contract which utilizes the VECP. In order to provide guidance on the proper citation of appropriations, insert the following notice in each contract for additional purchase of items on which future payments will be made. The notice should be inserted directly following the citation of appropriation and accounting data or, if space does not permit such insertion, the notice should be referred to there.

Notice of Value Engineering Payments. Award of this contract obligates the Government to make payments to the contractor under Contract No. _____[1] in accordance with the Value Engineering provisions of that contract. These payments are to be made from appropriations currently available for the procurement of items under this contract. To the extent that the Government does not, in fact, receive delivery of and accept all items on which payment is made, the Government is entitled to reimbursement of a proportionate share of the payment from the contractor to whom it was paid.

§ 12–1.5206 Value engineering program requirement.

(a) The purpose of the VE program requirement clause is to apply VE methods early in the project life (i.e., in the initial stages of design development or production), so that specifications, drawings, and production methods will reflect the full benefit of VE. The clause requires the contractor to establish a VE program and engage in a sustained VE effort, as specified in the contract. The VE program requirement shall be shown as a separately priced line item in the contract and may apply to all or to selected phases of contract performance. This clause is designed primarily for contracts covering conceptual, validation and full-scale development phases of a program. It may also be used in production or service contracts.

(b) If this clause is restricted to well defined areas of performance under the contract, a VE incentive clause consistent with § 12–1.5202 should be included for the remaining requirements of the contract.

§ 12–1.5207 Contracting Officer Decision Check List.

Application of the clauses in § 12–7.151–13 to a specific contract requires at least two decisions by the contracting officer. Additional decisions may be made to vary the clause to fit the individual contract at hand.

(a) Mandatory decisions: Should a VE clause be used? If so, what kind? (See paragraph 12–1.5202).

(b) Additional decisions to modify coverage:

(1) If this is an incentive type contract, should the modified instant sharing be used? See § 12–1.5203–1(c)

(2) Should the sharing base be expanded? See § 12–1.5203–2

(3) Should the sharing period be modified? See § 12–1.5203–3

(4) Should the lump sum method of payment be used for future acquisition sharing? See § 12–1.5203–4(a)

(5) Should the clause for future acquisition sharing be modified to reflect major differences in instant contract unit cost reduction and future contract unit cost reduction? See § 12–1.5203–4(b)

(6) (Development Contracts Only) Should the future acquisition sharing be modified to accommodate design to cost requirements or incentives? See § 12–1.5203–4(c)

(7) Should collateral savings be omitted? See § 12–1.5202–4(c)

(c) In addition, should the contractor be requested to submit notification of a potention VECP prior to risking significant expenditures? (Note this can be invoked at any time during the contract). See paragraph (j)(7) of the clause in § 12–7.151–13(a)(1).

§ 12–1.5301 General.

Subpart 12–1.53—Voluntary Refunds

A voluntary refund is a payment or credit, not required by any contractual or other legal obligation, made to the Government by a contractor or subcontractor either as a payment or as an adjustment under one or more contracts or subcontracts. It may be unsolicited or it may be made in response to a request by the Government. Where it is desired to solicit a voluntary refund from a subcontractor, the prime contractor should be encouraged to facilitate the making of such refund. In deciding whether to solicit a voluntary refund or to accept an unsolicited refund, the contracting officer shall ask legal counsel to review the contract or contracts and all data relevant thereto to determine whether the Government's rights would be jeopardized or impaired, by the contracting officer's proposed action.

[1] Insert the number of the contract under which the pertinent VE change proposal was accepted

§ 12–1.5302 Solicited refunds.

Voluntary refunds may be requested during or after contract performance. They shall be requested only when it is considered that the Government was overcharged under a contract or was inadequately compensated for the use of Government-owned property, or in the disposition of contractor inventory, retention by the contractor or subcontractor of the amount in question would be contrary to good conscience and equity. Generally, retention by the contractor or subcontractor shall not be considered contrary to good conscience and equity, and thus a voluntary refund shall not be requested unless the overcharged or inadequate compensation was due, at least in part, to the fault of the contractor or subcontractor. The decision to solicit a voluntary refund shall be made by the head of the procuring activity.

§ 12–1.5303 Disposition of voluntary refunds.

(a) If a refund is offered prior to final payment, it is preferable that the contract price be appropriately modified to reflect the refund. In such a case, the amount of the refund shall be credited to the applicable appropriation cited in the contract.

(b) In cases where the refund is to be made by check rather than by an adjustment in the contract price, the check shall be made payable to the Treasurer of the United States, and shall be forwarded in accordance with the procedures of each Administration.

Subpart 12–1.54—Acquisition of Equipment by Lease, Purchase, or Lease With Option To Purchase

§ 12–1.5401 General.

This subpart prescribes DOT policy and procedures with respect to determination of whether to lease, purchase, or lease with option to purchase, when acquiring equipment for Department use, where these options are available.

§ 12–1.5402 Telewriting equipment and office copying machines.

Guidelines for making lease/purchase determinations in the acquisition of telewriting equipment and office copying machines are specified in the Federal Property Management Regulations (FPMR), Subpart 101–25.5.

§ 12–1.5403 Automatic data processing equipment.

See FPMR Part 101–32 (referred to in FPR subpart 1–4.1).

§ 12–1.5404 Lease/purchase determinations.

(a) Whenever procurement is to be made of items of equipment normally available for both lease and purchase, a determination shall be made as to whether acquisition by lease, purchase, or lease with option to purchase is most advantageous to the Government. The determination shall be supported by comparisons of costs of the various acquisition alternatives. The extent of the cost comparison required to support the determination will be a matter of judgment, depending primarily on the estimated cost of the equipment.

(b) For equipments of relatively high dollar values, considerations shall be given to including the following cost elements in the cost comparison:

(1) Purchase price delivered to the point of installation.

(2) Leasing cost including delivery charges to the Department and cost of return to the vendor.

(3) Present value of money to be used in the acquisition of the equipment. The present value computation is applicable to all costs over the life of the equipment.

(4) Maintenance costs to the Government under lease and under purchase. When maintenance is to be performed by the Government, these costs would include:

(i) Cost of direct labor.

(ii) Cost of parts and supplies, including investment costs and warehousing and distribution costs.

(iii) Cost of additional tools and repair equipment needed for maintenance of the equipment.

(iv) Cost of training maintenance personnel.

(v) Cost of repair manuals.

(vi) Cost of any applicable overhead.

(5) Installation and dismantling costs.

(6) Residual value of equipment after expected use period, including possible continued use by the Government in another application or program.

(7) Operating costs (exclusive of maintenance costs) in those instances where, under the lease method, the vendor would perform part or all of the labor incident to the operation of the equipment.

(c) For equipments of small dollar value, the cost comparison can be limited to the cost of purchase and an estimate of installation and maintenance cost versus the cost of lease, as described in FPMR Subpart 101–25.5.

§ 12–1.5405 Selecting the method of acquisition.

§ 12–1.5405–1 Purchase method.

(a) The purchase method is preferred when all of the following conditions exist:

(1) There is little or no doubt that the equipment to be procured can be efficiently and effectively utilized, cost and other factors considered.

(2) A comparative cost analysis of the alternative methods of acquisition indicates that a cost advantage will accrue over the anticipated useful life of the equipment by using the purchase method.

(3) The capabilities of the equipment will continue to be needed and will be sufficient to satisfy the requirements of the Government, current and projected, for a period beyond the point in time at which the purchase method begins to provide a cost advantage. The possibility that future technological advances would make the selected equipment comparatively less desirable before the cost advantage point is reached should not rule out purchase if the selected equipment is expected to be able to satisfy the Government's requirements economically.

§ 12–1.5405–2 Lease-with-option-to-purchase method.

The lease-with-option-to-purchase method is preferred when it is reasonably anticipated that purchase may be justified, but it is desirable to defer this decision temporarily because the conditions necessary to indicate purchase are not fully satisfied. This situation might arise when it is determined that a short period of operational experience is desirable to prove the effectiveness of an equipment for which there is no previous experience, or where technical changes might substantially alter the requirement for the equipment.

§ 12–1.5405–3 Lease method.

The lease method, without option to purchase, is indicated when it has been established that neither the conditions in § 12–1.5405–1 nor § 12–1.5405–2 prevail.

§ 12–1.5406 Periodic cost comparisons on leased equipment.

For equipment under lease, the contracting officer shall compute cost comparisons periodically (at least once a year) to revalidate the original determination that the lease method is most advantageous to the Government.

Subpart 12–1.55—Multi-Year Procurement

§ 12–1.5500 Scope of subpart.

This subpart contains the multi-year method of procurement for supplies.

§ 12–1.5501 Description of multi-year procedure.

Multi-year procurement is a method for competitive contracting for known requirements for supplies, in quantities and total cost not in excess of planned requirements for five years set forth in approved programs, even though the total funds ultimately to be obligated by the contract are not available to the contracting officer at the time of entering into the contract. Under this method, contract quantities are budgeted for and financed in accordance with the program year for which each quantity is authorized. The procedure provides for solicitation of prices based either on award of the current one-year program quantity only, or, in the alternative, on the total multi-year quantities. Award is made on whichever of these two alternative bases reflects the lowest unit prices to the Government. If award is made on the multi-year basis, funds are obligated only for the first year's quantity, with succeeding years' contract quantities funded annually thereafter. In the event funds are not made available to support one or more succeeding year's quantities, cancellation is effected. The contractor is protected against loss resulting from cancellation by contract provisions allowing reimbursement of unrecovered nonrecurring costs included in prices for canceled items.

V 42 174 SEP 8 77 UMI

§ 12–1.5502 Policy.

§ 12–1.5502–1 Principal advantages.

Multi-year procurement shall be used to the maximum extent consistent with §§ 12–1.5502–4, 12–1.5503, and 12–1.5511. Advantages of this method include, for example:

(a) Lower costs;

(b) Enhancement of standardization;

(c) Reduction of administrative burden in the placement and administration of contracts;

(d) Substantial continuity of production;

(e) Stabilization of work forces; and

(f) Broadening the competitive base with opportunity for participation by firms not otherwise willing or able to compete for lesser quantities, particularly in cases involving high startup costs.

§ 12–1.5502–2 Principal objective.

The principal objective of the multi-year procedure is to generate realistic competition by minimizing competitive disadvantage and by increasing contractor interest in participating in procurements which involve high startup costs and makeready expense and which also may require substantial capital investment by contractors for expansion of their facilities. Under this procedure:

(a) Nonrecurring costs are distributed over a larger number of units, thus narrowing any price advantage of a firm already in production;

(b) There is greater assurance of depreciation recovery for capital investment; and

(c) The competitive base is broadened with better prospects for lower prices, where firms otherwise might be unwilling or unable to compete.

§ 12–1.5502–3 Cost savings factors to consider.

Another major objective is to obtain lower prices in those procurements which do not necessarily involve high startup cost but which do provide opportunity for substantial cost savings and other advantages through assurance of continuity of production over longer periods of time. In determining whether substantial cost savings and related advantages can be realized, consideration may be given to whether:

(a) Production or performance close-out or shut-down costs, including employee severance pay, represent a substantial cost contingency in prices quoted on only one year's program;

(b) Stabilization of work forces will provide greater assurance of sustaining and improving production efficiency and quality;

(c) Substantial cost and quality advantage will accrue through avoidance of the possible need for establishing and "proving out" quality control techniques and procedures for a new contract each year;

(d) Costly preproduction or pilot testing will be avoided;

(e) The ability to recruit and retain highly skilled personnel will be enhanced through assurance to employees of longer periods of employment than would be the case in single-year procurement, thereby avoiding costs of repeated training of new personnel;

(f) The ability to vary production rates during peak and off-peak periods in each program year will result in economies; and

(g) Substantial in-house savings in maintenance and supply operations will accrue from standardization of supplies accomplished by procurement from a single source throughout the multi-year period.

§ 12–1.5502–4 Set-asides.

Total small business set-asides are compatible with the multi-year method of procurement and may be used when both procedures are appropriate. Partial set-aside procedures (both small business and labor surplus area) generally are not compatible with the multi-year procedure when high startup costs are involved because of the potential duplication of such costs by the set-aside contractor and the non-set-aside contractor. However, when the multi-year procedure is based not on high startup costs but on the opportunity for cost savings through assurance of continuity of production over longer periods of time, partial set-aside procedures are compatible with the multi-year procedure. Furthermore, even where high startup costs are involved, use of partial set-aside procedures together with the multi-year procedure may be appropriate in exceptional circumstances, such as where criteria for partial set-asides are met under FPR 1–1.7 or 1–1.8, and it is likely that broader or more realistic competition will result from a combination of both procedures, and this broader competition is likely to more than offset any duplication of startup costs. When reviewing a proposed procurement involving possible use of this procedure, in addition to consideration of the criteria established in this subpart, the contracting officer shall invite the advice and counsel of the activity's small business specialist and the SBA representative, if one is assigned to that activity, permitting either or both to review all pertinent facts and make recommendations thereon.

§ 12–1.5502–5 Multi-year subcontracts.

The same benefits and advantages that are derived from multi-year prime contracts may frequently be increased by multi-year subcontracts thereunder. The prime contractor in the exercise of his management responsibilities must freely choose the subcontract types that best satisfy his needs. However, multi-year prime contractors should be encouraged to employ multi-year subcontracts selectively and only when:

(a) The subcontract item is of stable design and specification;

(b) The quantity required is known and firm;

(c) Effective competition is assured; and

(d) The use of multi-year subcontracts can reasonably be expected to result in reduced prices.

In such cases, the prime contractor is adequately protected against cancellation since appropriate cancellation charges for such multi-year subcontractors are included within the cancellation charge of the multi-year prime contract. Multi-year subcontracts may be particularly desirable under a sole source multi-year prime contract since effective competition at the subcontract level may thereby be enhanced and the attendant cost reductions realized by the prime contractor and the Government.

§ 12–1.5503 Application—criteria.

Except as provided in DOTPR 12–1.5511 below, the multi-year procurement method should be used when all of the following criteria are present:

(a) Reduced unit prices can reasonably be anticipated over annual buys by reason of continuity of production or elimination of repetitive substantial startup costs, including such costs as preproduction engineering, special tooling, plant rearrangement, initial rework, initial spoilage, and pilot runs;

(b) There is reasonable expectation that effective competition can be obtained;

(c) There are known requirements for the quantities to be purchased under the multi-year contract;

(d) The design and specifications of the item are not expected to change to an extent that would involve a major impact on contract price; and

(e) The items being procured are not regularly manufactured and offered for sale in substantial quantities in the commercial market, except that (1) when quantities to be procured by the Government represent a substantial portion of the total market and would require special manufacturing runs for all or substantially all of the Government's requirements and (2) significant cost savings would result from multi-year procurement, this procedure may be authorized by the head of the procuring activity or his designee with the procurement file fully documented as to reasons why the expected substantial savings are not obtainable under annual procurements.

§ 12–1.5504 Method of solicitation.

Formal advertising, including two-step formal advertising, is the preferred method for use in multi-year procurement. In cases where the period of production is such that a contingency for labor and material costs is likely otherwise to be included in the multi-year contract price, the contracting officer should normally use a provision for price escalation.

§ 12–1.5505 Procedures.

Solicitations shall include the information described in §§ 12–1.5505–1 through 12–1.5505–9, as appropriate.

§ 12–1.5505–1 Requirements.

State the requirements, separately identified by bid or proposal item in the schedule, for (a) the first program year;

and (b) the multi-year procurement including the quantities for each program year thereunder.

§ 12–1.5505–2 Previous competition.

When previous production procurements of the item have been made with competition:

(a) Include a provision that a price may be submitted for the total requirements of the first program year, or for the total multi-year requirements, or both, or

(b) When competition in future procurements of the items would be impracticable after award of a contract covering the first program year quantity alone and the head of the procuring activity determines that, in order to eliminate the possibility of a first program year "buy-in," these provisions will be in the best interests of the Government—include provisions that a price may be submitted only for the total multi-year quantity and that prices on a single-year basis will not be considered for any purpose.

§ 12–1.5505–3 No previous competition.

When there has been no previous competition for the production of the item:

(a) Include provisions that a price must be submitted for the total requirements of the first program year, that a price may be submitted for the total multi-year quantity, and that a bid or offer on the multi-year quantity only will be considered nonresponsive; and a provision that if only one responsive bid or offer on the multi-year requirements is received from a responsible bidder or offeror, the Government reserves the right to disregard the bid or offer on the multi-year quantity and to make an award only for the first program year requirements; or

(b) When competition in future procurements of the items would be impractical after award of a contract covering the first program year quantity alone and the head of the procuring activity determines that, in order to eliminate the possibility of a first program year "buy-in," these provisions will be in the best interest of the Government—

(1) Include provisions that a price may be submitted only for the total multi-year quantity and that prices on a single-year basis will not be considered for any purpose, and

(2) A provision that if only one responsive bid or offer on the multi-year requirements is received from a responsible bidder or offeror, the Government reserves the right to cancel the solicitation and resolicit on a single-year basis by whatever procedures are then appropriate.

§ 12–1.5505–4 Pricing—unit price.

Include a provision that the unit price of each item in the multi-year requirement shall be the same for all program years included therein.

§ 12–1.5505–5 Comparison criteria.

Provide criteria for comparing the lowest evaluated submission on the first program year's requirement against the lowest evaluated submission on the multi-year requirements.

§ 12–1.5505–6 Single year and/or multi-year award.

When the solicitation permits bids or offers on either the first program year requirements or the multi-year requirements or both, include a provision that in the event the Government determines prior to award that only the first program year quantities are actually required, the Government may evaluate bids or offers and make award solely on the basis of prices bid or offered on the first program year requirements.

§ 12–1.5505–7 Cancellation ceiling.

Include a provision setting forth a separate cancellation ceiling (on a percentage basis) applicable to each program year subject to cancellation (see § 12–1.5506).

§ 12–1.5505–8 Schedule provision.

Include a prominently placed provision directing attention to the multi-year features of the soliciation, and to—

(a) The Limitation of Price and Contractor Obligations clause (see § 12–7.151–14) which limits the payment obligation of the Government to the requirements of the first program year and to those of such succeeding program years as may be funded by the Government;

(b) The Cancellation of Items clause Government to cancel, by a specified date (see § 12–7.151–14) which allows the Government to cancel, by a specified date or within a specified period, all remaining program years; and

(c) The cancellation ceiling set forth in the schedule.

§ 12–1.5505–9 Quantity obligation.

Include a statement that award will not be made on less than the quantity stated as the first program year requirements.

§ 12–1.5506 Establishment and revision of cancellation ceilings.

(a) The term "cancellation" as used in multi-year procurement refers only to the cancellation of the total requirements of all remaining program years. Such cancellation results from (1) notification from the contracting officer to the contractor of nonavailability of funds for contract performance for any subsequent program year, or (2) failure of the contracting officer to notify the contractor that funds have been made available for performance of the succeeding program year requirement. For each program year except the last, the contracting officer shall establish a cancellation ceiling applicable to the remaining program years which are subject to cancellation. Cancellation ceilings will be lower for each succeeding program year in that such ceilings must exclude all amounts allocable to items included in prior program years. Such ceilings shall be expressed in the schedule and shall apply to all bidders alike. The reduction in the cancellation ceilings percentage for each program year shall be in direct proportion to the reduction in the quantity remaining subject to cancellation. For example, if the total nonrecurring costs are estimated at 10 percent of the total multiyear price and program year quantities for 5 years are 30, 30, 20, 10, and 10; the cancellation percentage after deducting 3 percent for the first program year would be 7 percent, 4 percent, 2 percent, and 1 percent of the total multiyear price applicable to the 2nd, 3rd, 4th, and 5th program years respectively. In determining cancellation ceilings, the contracting officer must estimate reasonable preproduction, labor learning and other nonrecurring costs, to be incurred by an "average" prime or subcontractor which would be applicable to and which normally would be amortized in all items to be furnished under the multi-year requirements. They include such costs as plant rearrangement, special tooling, preproduction engineering, initial rework, initial spoilage, pilot runs, and unrealized labor learning. They shall not include any costs of labor or materials, or other expenses (except as indicated above) which might be incurred for production of the items subject to cancellation for each program year. The total estimate must then be compared with the best estimate of the procurement cost to arrive at a reasonable percentage figure. To perform this calculation, it is essential that the contracting officer obtain in-house engineering cost estimates which will identify the detailed recurring and nonrecurring costs, and indicate labor learning implications. Cancellation dates for each program year's requirements shall be established with due regard for production lead time and the date by which funding therefor can reasonably be accomplished.

(b) Original cancellation ceilings may be revised from information developed after issuance of a solicitation discloses that such ceilings are not realistic. In the case of formal advertising, such changes shall be by amendment of the invitation for bids prior to bid opening. In two-step formal advertising, discussion conducted during the first step may indicate the need for revised ceilings in step two. Negotiations with offerors in a negotiated procurement may provide information requiring a change in cancellation ceilings for all offerors, prior to final negotiation and contract award. In order to assure that all interested sources of supply are thoroughly aware plished, use of pre-solicitation or pre-bid conferences may be advisable. During such conferences the contracting officer should ascertain whether escalation provisions are appropriate (see FPR 1–2.104–3) and whether the proposed cancellation ceiling is adequate.

§ 12–1.5507 Funds obligation—contingent liabilities.

For each program year requirement, funds shall be obligated to cover the quantities to be delivered thereunder. In addition, contingent liabilities for cancellation charges shall be carried as outstanding commitments.

V 42 174 SEP 8 77 V UMI

§ 12–1.5508 Payment for cancellation.

In the event of a cancellation the contractor is entitled to payment as consideration therefor in accordance with the terms of the Cancellation of Items clause in § 12–7.151–14 in an amount not to exceed the cancellation ceiling.

§ 12–1.5509 Schedule provision limiting payment obligation.

The schedule shall contain a provision limiting the payment obligation of the Government to a monetary amount there described as being available for contract performance. Such amount for the first program year requirements shall be inserted by the contracting officer upon award of the contract and shall be modified for successive program years upon availability of funds for such years.

§ 12–1.5510 Termination for convenience.

In the event of a total termination for the convenience of the Government, including items subject to cancellation, the Government's obligation shall not exceed the amount set forth in the schedule as available for contract performance, plus the applicable amount established as the cancellation ceiling.

§ 12–1.5511 Limitations.

Multi-year procurement shall not be used:

(a) When funds covering the procurement are limited by statute for obligation during the fiscal year in which the contract is executed;

(b) For quantities or total costs in excess of the planned requirements for five years set forth in approved programs; or

(c) When any one of the criteria set forth in § 12–1.5503 is not present.

§ 12–1.5512 Evaluation.

(a) Evaluation of offers in a multi-year procurement involves not only the determination of the lowest overall evaluated cost to the Government for both alternatives, the multi-year procurement and the first program year procurement; it also involves the comparison of the cost of buying the total requirement under a multi-year procurement with cost of buying the total requirement in successive independent procurements. All the factors to be considered for the various evaluations involved shall be set forth in the solicitation.

(b) In the event the Government determines prior to award that only the first program year quantities are actually required, the procurement will no longer be evaluated on a multi-year basis:

(1) When the solicitation permits bids or offers on either the first program year requirements or the multi-year requirements or both, only bids or offers on the first program year requirements will be evaluated; and

(2) When the solicitation does not permit the submission of prices on a single-year basis, the single year requirement will be resolicited.

(c) The cancellation ceiling shall not be a factor for evaluation. Unless Government administrative costs incident to annual procurement methods and contract administration can be reasonably established and supported, they shall not be used as a factor for evaluation. When administrative costs are to be used in evaluation, the dollar amount to be used shall be stated in the solicitation.

(d) Delivery destinations may be unknown for certain quantities due to the extended duration of contract performance. In such cases, destinations shall be developed on the basis of best estimates; a definite place or places shall be designated in the solicitation as the point to which transportation costs will be computed (but only for the purpose of evaluating bids or proposals); and the solicitation shall contain the notice required by FPR 1–19.202–7.

(e) When Government production and research property is provided, the use of such property may be on a rent-free basis. In this event, the solicitation shall set forth a detailed description of the procedure to be followed and the factors to be considered for the elimination of competitive advantage. The amount added for evaluation to each offeror's unit price for the first program year requirement shall also be added to his unit price for the multi-year requirements.

(f) When the solicitation requires the submission of prices on the first program year requirements in accordance with § 12–1.5505–3(a), bids or offers which submit prices on the multi-year requirements only shall be rejected as nonresponsive.

(g) When the solicitation provides for submission of prices only for the total multi-year quantity, submission of prices for the single-year quantity will be disregarded for any purpose but will not render the bid or offer nonresponsive as to any alternate multi-year submission by the same bidder or offeror.

(h) To determine the lowest evaluated unit price, compare the lowest evaluated bid or offer on the first program year alternative against the lowest evaluated bid or offer on the multi-year alternative as follows:

(1) Multiply the evaluated unit price for each item of the lowest evaluated bid or offer on the first program year alternative times the total number of units of that item required by the multi-year alternative, and then

(2) Take the sum of these products for all the items, plus the dollar amount of any administrative costs of the Government which are to be used in the evaluation, and finally

(3) Compare this result against the total evaluated price of the lowest bid or offer on the multi-year alternative.

§ 12–1.5513 Award.

(a) Except as provided in paragraphs (b) and (c) of this section, award shall be made on the basis of the lowest evaluated unit price determined in accordance with § 12–1.5512, whether that price is on a single-year basis or a multi-year basis.

(b) If only one responsive bid or offer is received on the multi-year requirements from a responsible bidder or offeror, then award shall be made as follows:

(1) If the solicitation gave the bidder or offeror the choice of submitting prices on a single-year basis or multi-year basis or both, then award shall be made in accordance with § 12–1.5512(a) above;

(2) If the solicitation required the submission of prices on the first program year requirements in accordance with § 12–1.5505–3(a) award shall be made to the lowest evaluated bidder or offeror on the single-year basis, even though the multi-year price submission may represent the lowest evaluated price submission, except that if the multi-year price offers distinct advantages to the Government a multi-year award may be made with the advance approval of the head of the procuring activity;

(3) If the solicitation restricted the submission of prices to the multi-year basis only, the solicitation shall be cancelled and a new solicitation issued by whatever procedures are then appropriate except that if the multi-year price offers a distinct advantage to the Government a multi-year award may be made with the advance approval of the head of the procuring activity.

(c) In no event shall award be made at an unreasonable price.

§ 12–1.5514 Contract clauses.

The clauses in § 12–7.151–14 shall be included in all contracts under the multi-year procurement method.

Subpart 12–1.56—Preaward Survey Procedures

§ 12–1.5600 Scope of subpart.

This subpart prescribes the procedures for conducting preaward on-site evaluations (preaward surveys) of prospective contractors. While the procedures are primarily applicable to supply contracts, they shall be applied, to the extent appropriate, to other contracts.

§ 12–1.5601 General.

§ 12–1.5601–1 Need for survey.

(a) Before requesting or performing an on-site survey, the contracting officer shall review the data available in the procurement office files or information available from other sources (e.g., other Government procurement offices, contractor's performance under current or prior contracts, and such commercial sources as banks and credit rating and reporting firms). Prior preaward evaluation reports, if any, should be reviewed.

(b) When available information is not sufficient for the contracting officer to determine the prospective contractor's responsibility, the contracting officer shall perform or have performed a preaward survey to determine if the prospective contractor meets the standards set forth in FPR subpart 1–1.12 and any additional requirements set forth in the solicitation. A survey is not ordinarily performed on contracts of less than $10,000, or when there is sufficient data available to make a positive determination of responsibility.

§ 12–1.5601–2 Type of survey.

A complete survey encompasses investigation of all standards concerning responsibility and any other requirements of special inquiry as deemed necessary by the contracting officer. A partial survey is limited to certain standards: for example, it might cover only technical qualifications, production backlog, or financial resources.

§ 12–1.5601–3 Conducting the survey.

When a preaward survey is necessary, it shall be conducted by the contracting officer or his designated representative, or by a survey team consisting of the contracting officer or his designated representative and such other qualified specialists as are deemed necessary to evaluate all appropriate phases of the prospective contractor's capability. The type of survey needed (complete or partial) and the areas of consideration shall be identified by the contracting officer. Personnel of the field contract inspection staffs within the Department may be employed, through cross-servicing, as provided in DOT Order 4200.6c.

§ 12–1.5601–4 Release of survey information.

No indication shall be made to the prospective contractor that an award will or will not be made. This prohibition does not preclude discussion with the prospective contractor of questionable areas which require clarification. Information obtained during the survey shall be treated in strict confidence and divulged only to Government personnel having a need to know. The survey report is confidential business information and shall not be released outside the Government. The completed report, however, or the facts it contains can be discussed with the concern involved.

§ 12–1.5601–5 Preparation for the survey.

The contracting officer or the individual designated by him as responsible for the conduct of the survey shall:

(a) Review all requirements set forth in the solicitation or proposal.

(b) Determine composition of the team if more than one specialist is required.

(c) Make arrangements for plant visits. On-site preaward evaluations must be completed in timely fashion. Therefore it is necessary to make prompt contact and arrangements with the prospective contractor for the survey. At the time contact is made, the prospective contractor should be advised of the documentation that may be needed, such as financial statement, resumes of company personnel, descriptions of existing plant workload, and production loading charts.

(d) Advise team members what information is required from their respective organizational elements, the date needed, and any particular portion of the survey for which they are responsible.

(e) Brief team members on their responsibilities and conduct relative to interviews and discussions with officials of the concern.

(f) Arrange for discussion among members during and after the on-site survey to assure that evaluations by individual specialists are coordinated and complete.

§ 12–1.5601–6 On-site survey procedures.

(a) Discussions should be held with the prospective contractor's management officials. These discussions should be in sufficient detail to obtain as much information as can be supplied by the officials concerning the prospective contractor's ability to perform satisfactorily, and to assure that the solicitation requirements and its technical aspects (such as specifications, prototype, data, inspection and testing, packaging, delivery, instruction books and reports), are understoood. If a cost-reimbursable contract is contemplated, the prospective contractor's accounting system will be reviewed to determine that it is adequate for the determination of costs applicable to the contract.

(b) The facilities and procedures the prospective contractor proposes to use, and his overall plans for performing the contract, shall be reviewed and analyzed for adequacy.

(c) The contracting officer or the individual designated by him as responsible for the conduct of the survey shall:

(1) Review with other team members the findings developed during the survey. Points of disagreement should be reviewed in depth.

(2) Obtain clarification from the contracting officer when questions of interpretation arise during the course of the evaluation.

(3) Write a narrative report of the team's findings.

(4) Otherwise direct the efforts of the team.

(d) Each team member shall analyze and evaluate the prospective contractor's capability to perform with respect to that part of the survey for which he is responsible. His report shall be promptly furnished to the team leader, and be in sufficient detail to substantiate his findings.

§ 12–1.5602 Survey report.

§ 12–1.5602–1 Format.

The report shall be in narrative form. The format set forth in DOTPR 12–1.5604 shall be used to the maximum extent practicable. All pertinent documentation should be forwarded with the report.

§ 12–1.5602–2 Standards.

The report shall discuss the standards set forth in FPR 1–1.12 and the requirements of the solicitation sufficiently to substantiate the conclusion. I shall include a discussion of all pertinent topics of the "Guide for On-Site Evaluation of Prospective Contractor" (see DOTPR 12–1.5603). In any case where there is conflict of opinion between team members as to whether the prospective contractor meets a standard, this fact shall be discussed in detail, and the team leader shall determine the survey team's position on that standard. Copies of team members' reports, including those which dissent from the position recommended by the team, shall be included as enclosures to the survey report. The survey report shall unequivocally state that the prospective contractor does or does not meet each standard.

§ 12–1.5603 Guide for on-site evaluation of prospective contractor.

This guide is intended to assist in developing the facts to be used for preparing the survey report. It should be used only as a guide, not as a question/answer sheet.

GENERAL INFORMATION

(a) Solicitation or proposal number or other identification.
(b) Date(s) of evaluation.
(c) Firm name, address, telephone number.
(d) Name(s) and title(s) of the person(s) contacted in making evaluation.
(e) Name(s) and routing symbol(s) of evaluation team members.

ORGANIZATION

(a) List the names, titles, and citizenship of the principal company officials. Also list experience and background if resumes not available.

(b) Form of company: Corporation (parent/subsidiary affiliations), partnership, sole proprietorship? Date company was founded. If incorporated, in which State?

(c) Name and relationship of parent company, if any.

(d) Location of parent company. (Complete only if applicable to the solicitation.)

(e) Evaluate organization against the requirements of the solicitation; i.e., are there any conflicts of duties within or between organizational segments which may endanger contract performance; is the organization such that all facets of the contract will be controlled?

(f) Does the prospective contractor have the necessary organization to satisfactorily perform the proposed work?

FINANCIAL RESOURCES

(a) Obtain a copy of the prospective contractor's financial statements for the prior two fiscal years and a copy of his most recent financial statement.

(b) Does the prospective contractor intend to obtain bank or other lines of credit financing to perform on the proposed contract? 1. If so, in what amount? ---------- with whom? ----------

(c) Obtain data on credit available from local financial institutions. Differentiate between credit available on an open basis and that available as a result of an award of the proposed contract. Identify the financial institution, its address and telephone number, and personnel who may be contacted for verification of information. Also identify the prospective contractor's banking facilities.

(d) Is the prospective contractor receiving any Government financing? If so, indicate:

1. Amount of unliquidated progress payments outstanding ----------

2. Amount of Government guaranteed loans with dollar amount being used at present ----------

3. Identify Government agencies and contract numbers involved in (a) and (b) above.

(NOTE.—If requested by the contracting officer, send the financial information to him immediately upon receipt. Include complete address and name of person(s) who may be contacted regarding financial matters.)

V 42 174 SEP 8 77 UMI

EXPERIENCE

(a) Is the item to be procured a standard item for the prospective contractor? If so, for how many years has the item been produced, and what is the quantity produced?

(b) Has the prospective contractor ever produced identical or similar items to those required on the solicitation for either Government or commercial purposes? If so, describe in detail giving dates produced, Government contract numbers, and quantities delivered.

(c) Has the prospective contractor performed previous contracts such that he is familiar with Government specifications in general or applicable specifications in particular?

(d) Do the prospective contractor's responsible officials question any of the contract requirements or allege any misunderstanding of the contract requirements?

(e) List the firm's present product, or obtain brochures listing same, and years of production experience with such products.

(f) Are the prospective contractor's purchasing personnel experienced in procuring materials, components, services, and subcontracting to Government specifications?

(g) Does the prospective contractor have the necessary experience to satisfactorily perform the proposed contract?

TECHNICAL QUALIFICATIONS

List the names and positions of the prospective contractor's key engineering, quality control, and all other technical personnel who will be involved with an award. Also list experience and educational background if resumes are not available.

(a) *Engineering competence.* (1) Do the prospective contractor's engineers fully understand all equipment specification requirements of the solicitation?

(2) What experience do the prospective contractor's engineers have with design, development and manufacturing of the products required by the solicitation?

(3) Do the prospective contractor's engineers have the specialized engineering experience considered necessary to build the product required by the solicitation?

(4) How many engineers will be assigned to the proposed contract?

(5) Will the engineers who will be assigned to the proposed contract also be assigned to other projects?

(6) If the engineers will be assigned to other projects, at what time during the proposed contract will they actually commence work on the proposed contract?

(7) What percentage of each engineer's time will be devoted to the proposed contract?

(8) Does the prospective contractor propose to employ consultants to assist in any of the engineering or technical areas? If so, are the consultants available? (Give name, address, experience, and confirm that arrangements have been made for these services.)

(9) Does the prospective contractor have qualified technical writers and do they intend to write their own instruction books or other manuals required by the contract? Explain, equating the technical writer's experience with the specific requirements.

(10) If the prospective contractor intends to obtain outside technical writing services, are such services immediately available? (Give name, address, experience, and confirm that arrangements have been made for these services.)

(b) *Quality and reliability assurance.* (1) Does the prospective contractor have a Quality Control or Quality Assurance Department?

(2) Does the prospective contractor have written Quality Control or Quality Assurance procedures? If so, obtain a copy.

(3) Are the prospective contractor's quality procedures now implemented in all respects?

(4) Do the prospective contractor's responsible quality control personnel fully understand all quality control inspection, testing, source inspection and certification of compliance requirements of the solicitation?

(5) Do the prospective contractor's quality control personnel have the specialized inspection experience considered necessary to test the product required by the solicitation? Explain.

(6) Does the prospective contractor have the necessary facilities and equipment, including peculiar or special test equipment for performing all tests required and will it be available for the proposed work? (Obtain list of required test equipment.)

(7) Are the prospective contractor's quality assurance procedures and controls adequate in all respects to meet the requirements of the solicitation?

(c) *Summary of technical qualification.* (1) Do you find the prospective contractor's engineering, quality control and other technical staff competent to satisfactorily complete the proposed contract? Explain, equating the technical competency, and experience to the specific item(s) required.

FACILITIES

(a) *Land, buildings, production, and test equipment.* (1) What is the area of land on which building(s) is located?

(2) Describe buildings.

(3) Describe floor area: (1) Administrative, (2) Engineering, (3) Production, (4) Storage, (5) Maintenance, etc.

(4) Obtain list of type, quantity, and condition of prospective contractor-owned production equipment and test equipment.

(5) Does the prospective contractor employ preventive maintenance and are maintenance facilities available and adequate?

(6) What percentage of equipment and facilities (including land and buildings) are:

(1) Being purchased ----------?
(2) Owned ----------?
(3) Leased ----------?

(7) Are any facilities or equipment Government-owned? If so, from whom and under what terms and conditions are they leased?

(8) Will any conversion of existing facilities and equipment be required to produce the solicitation item(s)?

(9) Does the prospective contractor have the necessary facilities for domestic and/or overseas packing of the items required? If subcontracted, identify by name and location the proposed subcontractor.

(10) Are present facilities, including production and test equipment, adequate to fulfill the requirements of the solicitation?

(11) If any part is leased, what portion and under what terms and conditions?

(b) *Production capacity.* (1) Is the item to be procured a stock item with the prospective contractor? If so, are stock quantities sufficient to supply initial or all quantities on the schedule?

(2) What is the current condition of the prospective contractor's Government Order Board?

(1) Indicate backlog in man-hours and dollars.

(2) Indicate monthly production rate (in dollars and man-hours or percent of company's overall capacity).

(3) What is the current condition of the prospective contractor's Commercial Order Board?

(1) Indicate backlog in manhours and dollars.

(2) Indicate monthly production rate (in dollars and manhours or percent of company's overall capacity).

(4) Does the prospective contractor use records and charts, i.e., production flow charts, operation sheets, and machine-loading charts, to schedule and control production? Obtain from the prospective contractor a copy of his projected master production schedule; and, if possible, a man hour breakdown related to the schedule. Ascertain if the schedule is feasible and compatible with the proposed contract schedule. If the situation does not warrant obtaining proposed schedules from the prospective contractor, prepare one from the information (data) developed during the survey.

(5) List the names and addresses of important potential subcontractors and the functions which such subcontractors will perform; e.g., shop testing, packaging, annealing, anodizing, etc. Quoted delivery time for these services should also be obtained. Are the delivery times realistic and compatible with the solicitation schedule?

(6) List the names and addresses of suppliers who are to provide critical and components, and/or materials for the contract; e.g., major components, materials in short supply, items which would normally be expected to have long delivery periods, and items needed relatively early in the production process. List such items, the quantities required, and the required delivery dates. Vendor's quoted delivery dates shall also be listed.

(7) Are vendor deliveries in line with lead time required to meet the production schedule? Are vendor-quoted deliveries realistic?

(7) Equating the prospective contractor's present production schedule commitments for Government and commercial orders and schedule requirements of the solicitation with his overall capacity, is there now sufficient production capacity to produce the required items within the required delivery schedule?

(c) *Transportation.* (1) Will the end items of the proposed contract require special transportation handling or facilities?

(2) Are the transportation facilities (rail, motor, truck, etc.) available to the prospective contractor adequate for the delivery of end items of the proposed contract?

(d) *Power and fuel.* (1) Does the proposed contract require any special power or fuel requirements?

(2) Is the prospective contractor's power and fuel supply sufficient to enable the prospective contractor to meet all performance requirements of the proposed contract?

(e) *Government property.* (1) Does the prospective contractor have written procedures for control of Government property?

(2) Is there a particular employee designated as a Government property representative?

(3) What facilities does the prospective contractor have for protecting and safeguarding of GFP?

(4) Does the solicitation provide for the furnishing of GFP? Does the prospective contractor plan to ask for any GFP? If so, identify type of property and reason for request.

(5) Will the prospective contractor acquire any property for the Government other than that to be incorporated into the end item(s)? If so, identify the type of property. Does the prospective contractor's control system provide for control of contractor-acquired property as well as GFP?

(f) *Security.* (1) Does the proposed contract require plant security clearance?

(2) What Government agency has plant security cognizance of the contractor's facility?

(3) What is the level of security clearance that has been granted the contractor's facility by a Government agency?

(g) *Summary of facilities.* Are the facilities of the prospective contractor adequate in all respects to satisfactorily perform the proposed contract?

SKILLS

(a) Present number of employees by skills.
(1) Professional (Scientific) ----------
(2) Engineers----------
(3) Quality Control----------
(4) Production----------
(5) Managerial or Administrative----------
(6) Others----------

(b) What is the present work schedule (number of work shifts, hours per shift, number of employees per shift, and work days per week)?

(c) Is present work schedule and personnel complement adequate to satisfactorily perform the proposed contract concurrently with present commitments? If additional personnel are required, are the necessary skills available? In particular evaluate the need for, and availability of, any unusual or scarce skills.

(d) What, if any, is (are) the prospective contractor's present labor affiliation(s)? Give dates of expiration of any existing collective bargaining agreements.

(e) Does anything indicate any current or anticipated problems with the labor force? Does the propsective contractor have the necessary skills to satisfactorily perform the proposed contract?

OFFEROR'S RECORD OF INTEGRITY, JUDGMENT, AND PERFORMANCE

(a) Has the prospective contractor previously completed a contract with the Department? Yes---- No----. Identify the contracts by commodity and total value.

(1) Were delivery schedules met? If not, why?

(2) What problems, if any, were encountered?

(b) Has the prospective contractor previously completed contracts for other Government agencies? Yes---- No----.

(1) Were delivery schedules met? If not, why?

(2) What problems, if any, were encountered?

(c) Does the prospective contractor presently have Department contracts? Identify contracts by number, commodity, and value.

(1) Is contract(s) on schedule? If not, why?

(2) What problems are being encountered?

(3) What percentage of current contracts are delinquent in performance?

(4) Did the Government cause or contribute to the problems or were they within the control of the contractor?

(d) Does the prospective contractor presently have contracts with other Government agencies? Identify by agency, number, commodity and value.

(1) Is contract on schedule? If not, why?

(2) What problems are being encountered?

(3) What percentage of current contracts are delinquent in performance?

(4) Did the Government cause or contribute to the problems or were they within the control of the contractor?

(e) Has the prospective contractor required unusual and burdensome (to the Government) assistance (e.g., inspection, testing) on above contracts?

(f) Does the prospective contractor have a satisfactory record of integrity, judgment, and performance?

ABILITY TO COMPLY WITH TIME OR DELIVERY OR PERFORMANCE SCHEDULE

Does the prospective contractor have the ability and all things necessary to comply with the delivery or performance schedule of the solicitation?

§ 12–1.5604 Formal on-site survey report.

Subj: Preaward survey report of ----------
(prospec-
---------- under Solicitation No ----------
tive contractor)

To: ----------

(In the first paragraph, give date(s) of the on-site evaluation; name, address and telephone number of the prospective contractor; names and titles or positions of personnel contacted and names and routing symbols of DOT personnel who participated in the onsite evaluation.)

(Subsequent paragraph headings should generally be used as shown below, and the findings, discussions and conclusions under each heading will be based on the information developed with the guide in DOTPR 12–1.5603 and other relevant facts deemed pertinent by the representative responsible for performing the survey.)

Organization:
Financial:
Experience:
Technical qualifications:

(a) Engineering competence. (b) Quality and reliability assurance.
Facilities:
(a) Land, buildings, and production and test equipment.
(b) Production capacity.
(c) Transportation.
(d) Power and fuel.
(e) Government property.
(f) Security.
Skills:
Prospective Contractor's Record of Integrity, Judgment, Performance and Ability To Comply With Time of Delivery or Performance Schedule:
Conclusion: This conclusion must specifically state the standards which the prospective contractor does meet, and the standards which the prospective contractor does not meet. As an example of a prospective contractor who meets all standards, the conclusion should be written similar to the following:

"Based on the facts developed during this on-site evaluation, it is concluded that (prospective contractor) has the necessary organization, experience, technical qualifications, skills, facilities, satisfactory record of integrity, judgment and performance, and has the ability to comply with the required delivery (or performance) schedule."

Signature: ----------

PART 12–2—PROCUREMENT BY FORMAL ADVERTISING

Subpart 12–2.1—Use of Formal Advertising

Sec.
12–2.102 Policy.

Subpart 12–2.2—Solicitation of Bids

12–2.201 Preparation of invitations for bids.
12–2.202–1 Bidding time.
12–2.202–2 Telegraphic bids.
12–2.202–5 Descriptive literature.
12–2.203–1 Mailing or delivery to prospective bidders.
12–2.203–3 Publicity in newspapers and trade journals.
12–2.205–5 Release of bidders mailing list.

Subpart 12–2.4—Opening of Bids and Award of Contract

12–2.402–50 Classified bids.
12–2.407–8 Protests against award.
12–2.408 Information to bidders.

Subpart 12–2.5—Two-Step Formal Advertising

12–2.503–1 Step one.
12–2.503–50 Determination of size status.

AUTHORITY: Sec. 205(c), 63 Stat. 389; 40 U.S.C. 486(c), 10 U.S.C. 2301–2314.

Subpart 12–2.1—Use of Formal Advertising

§ 12–2.102 Policy.

Chapter 137 of Title 10 of the United States Code (see 10 U.S.C. 2304(a)), is applicable to procurements by Coast Guard. Negotiation of contracts is authorized under certain circumstances enumerated therein. The circumstances are set forth in DOTPR Subpart 12–3.2.

Subpart 12–2.2—Solicitation of Bids

§ 12–2.201 Preparation of invitations for bids.

In addition to the applicable information contained in FPR 1–2.201, the following shall be included in the invitation for bid if applicable to the procurement:

(a) *For supply and service contracts including construction.*

(50) In all cases where multiple awards are to be considered, the following provision:

EVALUATION OF BIDS FOR MULTIPLE AWARDS

In addition to other factors, bids will be evaluated on the basis of advantages or disadvantages to the Government that might result from making more than one award (multiple awards). For the purpose of making this evaluation, it will be assumed that the amount of $100 would be the administrative cost to the Government for issuing and administering each contract awarded under this invitation, and individual awards will be for the items and combinations of items which result in the lowest aggregate price to the Government, including such administrative costs.

§ 12–2.202–1 Bidding time.

The minimum bidding times set forth in FPR 1–2.202–1 and 1–1.307–4(a) should not be construed to be maximum or automatic bidding times. The bidding time permitted under each procurement should reflect the considered judgment of the contracting officer taking into account all of the facts surrounding the procurement, and recognizing that doubts should be resolved in favor of a longer rather than a shorter bidding time. If the bidding time for any procurement is reduced below the minimum, the reduction shall be fully justified and documented in the contract file by the contracting officer.

§ 12–2.202–2 Telegraphic bids.

When telegraphic bids are authorized, include the following provision in the Schedule of the invitation:

V 42 174 SEP 8 77 V UMI

TELEGRAPHIC BIDS

Telegraphic bids may be submitted in response to this invitation for bids. Telegraphic bids must be received in this office prior to the time specified for opening of bids. Such bids must specifically refer to this invitation for bids, include the item or sub-items, quantities and unit prices for which the bid is submitted and the time and place of delivery; and contain all the representations and other information required by the invitation for bids together with a statement that the bidder agrees to all the terms, conditions and provisions of the invitation. Failure to furnish, in the telegraphic bid, the representations and information required by the invitation for bids may necessitate rejection of the bid. Signed copies of the invitation for bids must be furnished in confirmation of the telegraphic bids.

§ 12–2.202–5 Descriptive literature.

(a) Descriptive literature shall not be required of the bidder unless all requirements of FPR 1–2.202–5 and this § 12–2.202–5 have been met.

(b) The justification required by FPR 1–2.202–5(c) must state, in sufficient detail, the reasons why acceptable products cannot be procured without the submission of descriptive literature. A justification that states little more than the conclusion that descriptive literature is required is not acceptable. Bidders shall not, except in the most unusual circumstances which can be clearly justified, be required to furnish descriptive literature when the specifications are stated in such detail that they leave nothing for the bidder to describe.

(c) Among other things, FPR 1–2.202–5(d) requires "• • • the invitation for bids shall clearly state *what* descriptive literature is to be furnished, the *purpose* for which it is required, the *extent* to which it will be considered in the evaluation of bids, *and* the *rules* which will apply if a bidder fails to furnish it before bid opening • • •." The asterisked note in FPR 1–2.202–5(d)(1) lists categories of general subjects which may be appropriate for inclusion in the Requirement for Descriptive Literature clause. A mere repetition of these subjects in the clause is not sufficient to establish a common basis for evaluation of bids.

(d) An invitation for bids must contain sufficient particularity to put bidders on notice (1) as to why the descriptive data is necessary, and (2) as to how much detail the bidder must furnish in his descriptive data for his bid to be considered responsive.

§ 12–2.203–1 Mailing or delivery to prospective bidders.

(a) Copies of invitations may be furnished for informational purposes to non-governmental organizations such as trade associations and bidding informational services, provided they lend some assistance in advertising the requirements. The extent to which supporting papers (drawings, specifications and general provisions) are furnished will depend on how the organizations intend to use the material. If they merely prepare a synopsis of bid solicitations for distribution to their members or subscribers, the invitation itself should suffice. If, however, they provide a reading room service (such as various trade associations do for construction projects), a complete set of all papers should be furnished without cost.

(b) In connection with invitations for construction, where the cost of reproduction and distribution of plans or drawings is a substantial cost item, the extent of distribution of bidding papers may be controlled by charging prospective contractors and subcontractors a flat, non-refundable deposit fee. This method is preferred over the use of a refundable deposit system. When the plan fee method is used, arrangements should be made for plans and other bidding papers to be readily available for free inspection at the originating procurement office and other appropriate procurement offices, trade association reading rooms, and similar locations. The non-refundable plan fee should be $5.00, $10.00, or $15.00 per set, or more as may be appropriate. The value of the project and the cost of reproduction and distribution of the plan should be considered in determining the fee to be charged. No additional charge should be made for plans which are revised or added after the invitation is issued, or for additional plans required by the successful bidder. Plan fees collected are for deposit in the "Miscellaneous Receipts" account.

§ 12–2.203–3 Publicity in newspapers and trade journals.

(a) Section 3703 of Title 44 of the U.S. Code provides that "All advertisements, notices, proposals for contracts, and all forms of advertising required by law for the several departments of the Government may be paid for at a price not to exceed the commercial rates charged to private individuals, with the usual discounts." Section 3701 of the same title prohibits advertising in any newspaper published and printed in the District of Columbia unless the supplies or labor to be secured are to be furnished or performed in the District of Columbia or in the adjoining counties in Maryland and Virginia.

(b) The head of the agency may authorize the publication of advertisements, notices, or proposals relating to the procurement and disposal of real and personal property and services. This authority may be delegated, but without power to further delegate, to subordinate officials.

(c) Standard Forms 1143 and 1143a shall be used to place orders for paid advertising.

§ 12–2.205–5 Release of bidders mailing lists.

When it is necessary to dispatch identical information by means of electrical transmission to prospective bidders or offerors, the electrically transmitted message, when released for communications handling, shall be marked "Book Message—Transmit a Single Address Message" to preclude prospective bidders or offerors from knowing the names of others solicited.

Subpart 12–2.4—Opening of Bids and Award of Contract

§ 12–2.402–50 Classified bids.

The opening of classified bids shall not be accessible to the general public. Such opening may be witnessed and the results recorded by those bidder representatives who have been previously cleared from a security standpoint and who represent bidders which were invited to bid on the procurement. Bids shall be made available only to those persons authorized to attend the opening of bids. The procedures set forth in FPR 1–2.402 for safeguarding unclassified bids are also applicable to classified bids. Classified bids shall be stored in GSA-approved security containers. No public record shall be made of bids or bid prices received on classified invitations for bids.

§ 12–2.407–8 Protests against award.

When a protest is received after award of contract, the contracting officer shall obtain the views and advice of legal counsel and the head of the procuring activity.

§ 12–2.408 Information to bidders.

Unsuccessful bidders shall be given a written notification of award. It shall contain the name of the successful contractor(s), and the unit price(s) or the total amount of the contract, whichever is appropriate. However, when numerous unit prices apply, thereby creating an extensive workload in furnishing this information, or where the total amount of the contract would not be meaningful, price information may be omitted. In the latter instance, the location where the abstract of bids is available for inspection shall be stated.

Subpart 12–2.5—Two-Step Formal Advertising

§ 12–2.503–1 Step one.

Although the Government's delivery or performance requirements are not evaluation factors under Step One, information about those requirements may be of assistance to potential bidders in determining whether or not to submit a technical proposal. Accordingly, a request for technical proposals may contain a statement indicating what the Government's probable contract delivery or performance requirements will be. The statement shall also advise that such information is not binding on the Government and that the Government's actual delivery or performance requirements will be contained in the invitation for bid issued under Step Two.

§ 12–2.503–50 Determination of size status.

Where a two-step procurement is set aside for small business firms, the controlling point in time for determining the size status of a concern is, as prescribed in FPR 1–1.703–1(b), the date of award of contract. The fact that the size status of an offeror submitting a proposal in good faith changed from a "small" to a "large" business during the interval between Step One and Step Two is not

sufficient to justify an exception to the rule that size status is for determination at time of award.

PART 12–3—PROCUREMENT BY NEGOTIATION

Subpart 12–3.2—Circumstances Permitting Negotiation

Sec.
12–3.200 Scope of subpart.
12–3.201 National emergency
12–3.202 Public exigency.
12–3.203 Purchases not in excess of $10,000.
12–3.204 Personal and professional services.
12–3.205 Services of educational institutions.
12–3.206 Purchases outside the United States.
12–3.207 Medicine or medical supplies.
12–3.208 Property purchased for authorized resale.
12–3.209 Subsistence supplies.
12–3.210 Impracticable to secure competition by formal advertising.
12–3.211 Experimental, development, or research work.
12–3.212 Purchases not to be publicly disclosed.
12–3.213 Technical equipment requiring standardization and interchangeability of parts.
12–3.214 Negotiation after advertising.
12–3.215 Otherwise authorized by law.
12–3.250 Technical or specialized supplies requiring substantial initial investment or extended period of preparation for manufacture.
12–3.251 Purchases in the interest of national defense or industrial mobilization.
12–3.252 Negotiation of construction contracts.

Subpart 12–3.3—Determinations, Findings and Authorities

12–3.301 General.
12–3.305–50 Format for D&F for authority to negotiate a contract.
12–3.305–51 Format for D&F for use of cost reimbursable or fixed-price incentive type contracts.

Subpart 12–3.4—Types of Contracts

12–3.408 Letter contract.
12–3.450 Delivery orders.
12–3.451 Letter of intent.

Subpart 12–3.50—Solicitation of Proposals

Subpart 12–3.6—Small Purchases

12–3.603–2 Data to support small purchases.
12–3.650 Purchase orders.
12–3.650–1 "Minimum billing" quotations.
12–3.650–2 Unpriced purchase orders.
12–3.650–3 Estimated purchase orders.
12–3.650–5 List of vendors.
12–3.650–6 Follow-up.
12–3.650–7 Inspection and acceptance.
12–3.651 Service Contract Act of 1965.
12–3.651–1 General.
12–3.651–2 Purchase order transactions.
12–3.652 Fast payment procedures.
12–3.652–1 General.
12–3.652–2 Conditions for use.
12–3.652–3 Preparation of orders.
12–3.652–4 Fast payment clause.
12–3.652–5 Consignee notification of nonreceipt, damage, or nonconformance.
12–3.652–6 Responsibility for collection of debts.

Subpart 12–3.7—Negotiated Overhead Rates

Sec.
12–3.700 Scope of subpart.
12–3.703 Applicability.
12–3.704 Contract clauses.
12–3.704–1 Contracts with concerns other than educational institutions.
12–3.704–2 Contracts with educational institutions.
12–3.704–50 Interim payment of indirect costs.
12–3.704–51 Audit determination (actual).

Subpart 12–3.8—Price Negotiation Policies and Techniques

12–3.801–2 Responsibility of contracting officers.
12–3.807–6 Refusal to provide cost or pricing data.
12–3.808–2 Factors for determining fee or profit.
12–3.809 Contract audit as a pricing aid.

Subpart 12–3.50—Solicitation of Proposals

12–3.5000 Scope of subpart.
12–3.5001 Competition.
12–3.5002 Preparation of request for proposals.
12–3.5003 Receipt and safeguarding of offers.
12–3.5004 Solicitation for informational or planning purposes.
12–3.5005 Bidders mailing lists.
12–3.5006 Pre-proposal conferences.
12–3.5006–1 General.
12–3.5006–2 Procedure.
12–3.5007 Amendment of request for proposals—prior to closing date.
12–3.5008 Treatment of procurement information.
12–3.5008–1 Restrictions on disclosure and use of data in proposals.
12–3.5008–2 Disclosure of information during the pre-award or pre-acceptance period.
12–3.5008–3 Pre-award notice of unacceptable offers.
12–3.5009 Notice of award technique.
12–3.50–10 Protests against award.
12–3.5011 Unsolicited contract proposals.

AUTHORITY: Sec. 205(c), 63 Stat. 389; 40 U.S.C. 486(c), 10 U.S.C. 2301–2314.

Subpart 12–3.2—Circumstances Permitting Negotiation

§ 12–3.200 Scope of subpart.

(a) This subpart is applicable only to the Coast Guard.

(b) Procurements by the Coast Guard may be effected by negotiation under any one of the seventeen exceptions contained in 10 U.S.C. 2304(a). Except as modified in this subpart 12–3.2, the regulations set out in FPR Subpart 1–3.2 shall apply to Coast Guard negotiated procurement.

§ 12–3.201 National emergency.

Section 2304(a)(1) of 10 U.S.C. shall be cited as the authority for Coast Guard procurement under this section.

§ 12–3.202 Public exigency.

Section 2304(a)(2) of 10 U.S.C. shall be cited as the authority for Coast Guard procurement under this section.

§ 12–3.203 Purchases not in excess of $10,000.

Section 2304(a)(3) of 10 U.S.C. shall be cited as the authority for Coast Guard procurement under this section.

§ 12–3.204 Personal and professional services.

Section 2304(a)(4) of 10 U.S.C. shall be cited as the authority for Coast Guard procurement under this section.

§ 12–3.205 Services of educational institutions.

Section 2304(a)(5) of 10 U.S.C. shall be cited as the authority for Coast Guard procurement under this section.

§ 12–3.206 Purchases outside the United States.

(a) *Authority.* Section 2304(a)(6) of 10 U.S.C. shall be cited as the authority for Coast Guard procurement under this section "for property or services to be procured and used outside the United States, and its territories, possessions and Puerto Rico."

(b) *Application.* This authority shall be used only for the procurement of—

(1) Supplies to be (i) shipped from, (ii) delivered, and (iii) used, or

(2) Services to be performed

outside of the United States, its possessions and Puerto Rico, irrespective of the place of negotiation or execution of the contract.

§ 12–3.207 Medicines or medical supplies.

Section 2304(a)(7) of 10 U.S.C. shall be cited as the authority for Coast Guard procurement under this section.

§ 12–3.208 Property purchased for authorized resale.

Section 2304(a)(8) of 10 U.S.C. shall be cited as authority for Coast Guard procurement under this section.

§ 12–3.209 Subsistence supplies.

Section 2304(a)(9) of 10 U.S.C. shall be cited as authority for Coast Guard procurement under this section.

§ 12–3.210 Impracticable to secure competition by formal advertising.

Section 2304(a)(10) of 10 U.S.C. shall be cited as authority for Coast Guard procurement under this section.

§ 12–3.211 Experimental, development, or research work.

(a) *Authority.* Section 2304(a)(11) of 10 U.S.C. shall be cited as authority for Coast Guard procurement under this section.

(b) *Limitations.* In addition to the limitations set forth in FPR 1–3.211(b), determinations and findings for contracts negotiated under this section requiring expenditures of not more than $100,000, shall be made by the Comptroller, Coast Guard Headquarters (Commandant (G–F)); those in excess of $100,000 shall be made by the Commandant of the Coast Guard.

(c) *Reporting requirement.* (1) Reports required by Section 2304(e), of 10 U.S.C. to be made to the Congress on May 19 and November 19 of each year shall be made by Chief, Procurement Division (Commandant (G–FCP)), to the Department of Transportation, Office of Installations and Logistics, TAD–60, by

V 42 174 SEP 8 77 UMI

May 1 and November 1 of each year of the purchases and contracts made under this § 12–3.211 since the date of last report.

(2) Reports shall contain the following information:

(i) Name of contractor;

(ii) Dollar amount of contract (including amendments); and

(iii) Brief description of the work required to be performed under the contract (when necessary, because of the national security, the word "Classified" may be used in lieu of the description).

§ 12–3.212 Purchases not to be publicly disclosed.

(a) *Authority.* Section 2304(a)(12) of 10 U.S.C. shall be cited as the authority for Coast Guard procurement under this section.

(b) *Limitations.* Determinations and findings for negotiation under this section shall be made by the Commandant.

§ 12–3.213 Technical equipment requiring standardization and interchangeability of parts.

(a) *Authority.* Section 2304(a)(13) of 10 U.S.C. shall be cited as authority for Coast Guard procurement under this section.

(b) *Limitations.* Determinations and findings for negotiation under this section shall be made by the Commandant.

§ 12–3.214 Negotiation after advertising.

(a) *Authority.* Section 2304(a)(15) of 10 U.S.C. shall be cited as authority for Coast Guard procurement under this section. Determinations and findings for negotiation under this section shall be made by the Commandant.

(b) *Limitations.* (1) In addition to the limitations imposed in FPR 1–3.214(b), the negotiated price must be less than the lowest rejected bid of any responsible bidder, as determined by the Commandant.

(2) Determinations and findings for negotiation under this section shall be made by the Commandant.

§ 12–3.215 Otherwise authorized by law.

(a) *Authority.* Section 2304(a)(17) of 10 U.S.C. shall be cited as authority for Coast Guard procurement under this section.

(b) *Application.* The contract shall cite as authority to negotiate, in addition to 10 U.S.C. 2304(a)(17), the applicable statute or United States Code reference.

§ 12–3.250 Technical or specialized supplies requiring substantial initial investment or extended period of preparation for manufacture.

(a) *Authority.* Pursuant to 10 U.S.C. 2304(a)(14), purchases and contracts may be negotiated if "for technical or special property that he [the Commandant] determines to require a substantial initial investment or an extended period of preparation for manufacture and for which he determines that formal advertising would be likely to result in additional cost to the Government by reason of duplication of investment or would result in duplication of necessary preparation which would unduly delay the procurement of the property."

(b) *Application.* The authority of this section may be used for the procurement of technical or specialized supplies; for example, aircraft, radar, guided missiles, rockets, and similar items of equipment; major components of any of the foregoing, and any supplies of a technical or specialized nature which may be necessary for the use or operation of any of the foregoing. Such procurement generally involves:

(1) High starting costs which have already been paid for by the Government or by the supplier;

(2) Preliminary engineering and development work that would not be useful to or useable by any other supplier;

(3) Elaborate special tooling already acquired;

(4) Substantial time and effort already expended in developing a prototype or initial production model; and

(5) Important design changes which will continue to be developed by the supplier.

The authority cited in this section will, in general, be used in situations where it is preferable to place a production contract with the supplier who had developed the equipment, and thereby either assure to the Government the benefit of the techniques, tooling, and equipment already acquired by that supplier or avoid undue delay arising from a new supplier having to acquire such techniques, tooling, and equipment. This exception should not be used to avoid duplication of private investment unless this duplication would be likely to result in additional cost to the Government.

(c) *Limitations.* The authority of this section requires a determination and findings by the Commandant which states:

(1) The supplies are of a technical or special nature requiring a substantial investment or an extended period of preparation for manufacture; and

(2) Procurement by formal advertising either—

(i) Would be likely to result in additional cost to the Government by reason of duplication of investment; or

(ii) Would result in duplication of necessary preparation which would unduly delay the procurement.

§ 12–3.251 Purchases in the interest of national defense or industrial mobilization.

(a) *Authority.* Pursuant to 10 U.S.C. 2304(a)(16), purchases and contracts may be negotiated if "he [the Commandant] determines that (i) it is in the interest of national defense to have a plant, mine, or other facility, or a producer, manufacturer or other supplier, available for furnishing property or services in case of a national emergency; or (ii) the interests of industrial mobilization, in the case of such an emergency, or the interests of national defense in maintaining active engineering, research, and development, would otherwise be subserved."

(b) *Application.* The authority cited in this section may be used to effectuate such plans and programs as may be evolved under the direction of the Commandant to provide incentives to manufacturers to maintain and keep active, engineering and design staffs and manufacturing facilities available for maximum production. The following are illustrative of circumstances with respect to which this authority may be used:

(1) When procurement by negotiation is necessary to keep vital facilities or suppliers in business or to make them available in the event of national emergency.

(2) When procurement by negotiation with selected suppliers is necessary in order to train them in the furnishing of critical supplies to prevent the loss of their ability and employee skills, or to maintain active engineering, research, and development work.

(3) When procurement by negotiation is necessary to maintain properly balanced sources of supply for meeting the requirements of procurement programs in the interest of industrial mobilization. (When the quantity required is substantially larger than the quantity which must be awarded in order to meet the objectives of this authority, that portion not required to meet such objectives will ordinarily be procured by formal advertising or by negotiation under another appropriate negotiation exception.)

(c) *Limitations.* The authority cited in this section shall not be used unless and until the Commandant has determined that—

(1) It is in the interest of national defense to have a particular plant, mine, or other facility or a particular producer, manufacturer, or other supplier available for furnishing supplies or services in case of national emergency and negotiation is necessary to that end; or

(2) The interests of industrial mobilization in the case of a national emergency would be subserved by negotiation with a particular supplier; or

(3) The interest of national defense in maintaining active engineering, research and development would be subserved by negotiation with a particular supplier.

(d) *Reporting requirements.* Reports required by section 2304(e) of 10 U.S.C. to be made to the Congress on May 19 and November 19 of each year will be made by the Chief, Procurement Division (Commandant (G–FCP)), by May 1 and November 1 of each year to the Department of Transportation, Director of Installations and Logistics, TAD–60, of the purchases and contracts made under 10 U.S.C. 2304(a)(16) since the date of last reporting.

(1) Reports shall contain the following information:

(i) Name of contractor.

(ii) Dollar amount of contract (including amendments).

(iii) Brief description of the work required to be performed under the contract. (When necessary, because of the national security, the word "classified" may be used in lieu of description.)

(2) Negative reports are not required.

§ 12–3.252 Negotiation of construction contracts for work to be performed in the United States, its possessions and Puerto Rico.

(a) *Authority.* Section 2304(a)(1), (2), (3), (10), (11), (12), or (15) of 10 U.S.C. shall be cited as authority for Coast Guard procurement under this section. The appropriate code provision shall be cited in the contract as authority for the negotiation.

(b) *Limitation.* Coast Guard contracts to be performed under this section may not be negotiated pursuant to 10 U.S.C. 2304(a)(6).

Subpart 12–3.3—Determinations, Findings, and Authorities

§ 12–3.301 General.

The determinations and findings required to be made under FPR Part 1–3 by the Coast Guard shall cite the appropriate section of Chapter 137 of Title 10 of United States Code. Determinations and findings of all other Administrations shall cite the appropriate section of Title 41 of United States Code.

§ 12–3.305–50 Format for D & F for authority to negotiate a contract.

DEPARTMENT OF TRANSPORTATION

(Name of Administration)

DETERMINATION AND FINDINGS

Authority to negotiate a contract under ----------

(insert authority)

FINDINGS

(1) The proposed contract provides for the procurement of (describe here the nature and scope of the work to be performed, including estimated cost).

(2) (In this and any subsequent paragraphs, set forth the facts and circumstances that clearly and convincingly establish that formal advertising would not be feasible and practicable for the procurement.)

DETERMINATION

Upon the basis of these findings, I hereby determine that the proposed contract may be negotiated without formal advertising pursuant to ----------

(insert authority)

Dated: ----------

----

§ 12–3.305–51 Format for D & F for use of cost reimbursable or fixed price incentive type contracts.

DEPARTMENT OF TRANSPORTATION

DETERMINATION AND FINDINGS

(Name of Administration)

DETERMINATION AND FINDINGS

Authority to use a ---------- contract

(insert type)

FINDINGS

(1) The proposed contract provides for the procurement of ---------- at an estimated cost of $----------.

(brief description of supplies or services)

(2) (In this and any subsequent paragraphs set forth the facts that show why it is impracticable to secure supplies or services of the kind or quality required without the use of such type of contract, or that such method of contracting is likely to be less costly than other methods.)

DETERMINATION

Upon the basis of these findings, I hereby determine that it is impracticable to secure supplies or services of the kind or quality required without the use of (insert type of contract). [Alternate: * * * I hereby determine that the use of (insert type of contract) is likely to be less costly than other methods.]

(When a cost-plus-a-fixed-fee is involved, the following finding is also to be made:)

Pursuant to (insert "41 U.S.C. 254(b)" or "10 U.S.C. 2306(d)", as applicable), I hereby determine that the estimated cost of the contract, exclusive of the fee, is $----------, that the fee in the amount of $---------- is ------ percent of the estimated cost, exclusive of fee, and that the fee is within statutory and administrative limitations.

Dated: ----------

Subpart 12–3.4—Types of Contracts

§ 12–3.408 Letter contract.

(a) *Request for approval.* The use of letter contracts must be approved in advance on a case-by-case basis by the head of the procuring activity, and variations from the limitations set forth in (b) below must be approved by the head of the procuring activity. The request for approval must state: the necessity and advantage to the Government in issuing the letter contract; why no other type of contract is suitable; name and address of the proposed contractor; duration of proposed letter contract in number of days from date of execution; amount of letter contract and estimated amount of definitive contract showing source and citation of funds with statement that funds are available; the estimated delivery date or dates and the proposed type of definitive contract.

(b) *Limitations.* In addition to the limitations prescribed in FPR 1-3.408(c), the following apply to, and shall be expressly stated in, each letter contract:

(1) The period of effectiveness for the letter contract, including a specific date when definitization will be completed. This date shall not be later than the first to occur of the following:

(i) The expiration of 120 days from the date of the letter contract; or

(ii) The date by which 40 percent of the performance of the work will be completed.

(2) The maximum liability of the Government stated in the letter contract shall not exceed fifty percent of the total estimated cost of the procurement.

Amendments to letter contracts to accomplish new procurement are subject to the same limitations as new letter contracts.

(c) *Content.* In addition to the requirements in FPR 1–3.408(d), the letter contract shall also:

(1) Incorporate, by reference or otherwise, all clauses required by statute, FPR, DOTPR, and optional standard and special clauses determined to be applicable.

(2) State that the definitive contract shall contain all provisions under paragraph (c)(1) of this paragraph.

(3) Contain an overall price ceiling or a maximum ceiling on fee, where a quoted price has been received and it is considered appropriate to limit the Government's ultimate liability.

§ 12–3.450 Delivery orders.

(a) Except as to specialized procurements for which other instructions have been issued, delivery orders shall be used without monetary limitation for ordering supplies and services (1) under an established contract: *Provided*, The order is issued in accordance with the terms and conditions of the contract and the order refers to the particular contract involved, (2) from another Government agency whether or not a contract number has been assigned.

(b) When the delivery order is issued to another Government agency and the precise extent of the work to be done is not known at time of issuance, an estimated delivery order may be issued. Each estimated delivery order shall contain a provision reading substantially as follows:

NOTICE.—Funds are available in the estimated amount stated below. If at any time the amount to be vouchered under this order is expected to exceed the estimated amount, withhold performance and immediately notify the Contracting Officer.

§ 12–3.451 Letters of intent.

Letters of intent shall not be used.

Subpart 12–3.6—Small Purchases

§ 12–3.603–2 Data to support small purchases.

DOT Form F 4230.1 titled "Small Purchase Summary" may be used to satisfy the documentation requirements of FPR 1–3.603–2.

§ 12–3.650 Purchase orders.

§ 12–3.650–1 "Minimum billing" quotations.

Occasionally an item can be obtained only from a supplier who quotes a minimum order price or a minimum order quantity, which either unreasonably exceeds the agency's needs or results in an unreasonable price for the quantity required. If practicable before placing the order the requiring activity should be informed in such cases of all facts regarding the quotation and consideration should be given to increasing the quantity, consolidation of orders, or other appropriate action. The file shall be documented to show the final action taken in such cases.

§ 12–3.650–2 Unpriced purchase orders.

(a) *General.* An unpriced purchase order is an order for supplies or services the price of which is not firmly established at the time of issuance of the order. Such orders shall contain a "Not To Exceed" provision. The contracting officer shall assure that suppliers receiving unpriced purchase orders are carefully selected.

(b) *Conditions for use.* An unpriced purchase order may be used only when all of the following conditions are present:

(1) The purchase will not exceed $10,000, and

V 42 I 174 SEP 8 77 UMI

(2) It is impractical to obtain pricing in advance of issuance of the purchase order, and

(3) The procurement is for (i) repairs to equipment requiring disassembly to determine the nature and extent of such repairs, (ii) sole source material for which cost cannot be readily established, or (iii) supplies or services where prices are known to be competitive but exact prices are not known.

(c) *Procedures.* A realistic "Not To Exceed" limitation shall be placed on the order which shall be stated in the Notice to Supplier provision in the blank space provided. This amount shall be obligated subject to adjustment when the firm price is established. Each unpriced purchase order shall contain the following provision:

NOTICE TO SUPPLIER.—This is a firm order if the total price does not exceed the amount of $_____. If the amount to be invoiced will exceed the amount stated below, or if you cannot furnish the work described in exact accordance with the description and delivery schedule set forth herein, withhold performance and immediately notify the Contracting Officer giving your quotation or proposed substitution or changes. In no event will the total amount paid under this order exceed the amount stated unless and until the order has been amended in writing and signed by the Contracting Officer.

The contracting officer or his designated representative shall certify that the invoiced price is fair and reasonable and process the invoice for payment. Suitable local records and controls of outstanding unpriced purchase orders shall be maintained to assure regular follow-up with suppliers until the order is firmly priced. These records should include any information available to support the fairness and reasonableness of the proposed monetary limitation. If the firm price exceeds the "not to exceed" price and the contracting officer determines, nevertheless, that such purchase be made from the supplier, the order shall be amended accordingly: *Provided*, That in no event may the amount of the order exceed $10,000. If the firm price does not exceed the "not to exceed" price, the order should not be amended for the sole purpose of changing the estimated price to a firm price.

§ 12–3.650–3 Estimated purchase orders.

(a) *General.* An estimated purchase order is an order of $2,000 or less for supplies or services the price of which is not firmly established at the time of issuance of the order but which, unlike the unpriced purchase order, provides for approval and payment of billed prices without referral to the contracting officer. Such orders may be issued when it is not practical to obtain a firm price as when, for example, the need is urgent or the vendor is other than a local source and the administrative cost to secure a firm offer would be disproportionate to the value of the order.

(b) *Preparation of order.* The word "estimated," the total price, and a provision reading substantially as follows shall be included on the order:

NOTICE TO SUPPLIER.—This is a firm order if the amount to be invoiced does not exceed the estimated amount stated by 10%. In such cases, submit your invoice to the Paying Office. If the amount to be invoiced will exceed the stated limitations, withhold performance and immediately notify the Contracting Officer. In no event will the total amount paid under this order exceed the stated amount by 10 percent unless and until the order has been amended in writing and signed by the Contracting Officer.

§ 12–3.650–4 List of vendors.

Each procurement office shall establish such lists of vendors as are necessary for recurring requirements to assure access to adequate sources of supply. Where the number of firms on a list is considered excessive, the list may be reduced by any method which will promote competition commensurate with the dollar value of the purchase to be made. If a rotation method is used, the vendors known to regularly submit the lowest price shall be solicited.

§ 12–3.650–5 Follow-up.

Each procurement office shall establish and maintain a simple and effective follow-up system. It should permit maximum latitude for the exercise of initiative and judgment in the administration process and be designed to assure that, to the maximum practicable extent, purchase orders are completed in accordance with their terms. The system may use copies of purchase orders, one or more cards, or the like.

§ 12–3.650–6 Inspection and acceptance.

When inspection and acceptance are to be performed at destination, advance copies of the purchase order shall be furnished to consignee(s) for material receipt purposes. Receiving reports shall be accomplished immediately upon receipt and acceptance of material to assure expeditious payment of orders and to obtain prompt payment discounts.

§ 12–3.651 Service Contract Act of 1965.

§ 12–3.651–1 General.

The Service Contract Act of 1965 applies, with certain exceptions, to Federal contracts whose principal purpose is to furnish services through the use of service employees. The Act applies without dollar limitation, but different contract clauses are required depending upon whether the contract price exceeds $2500 in accordance with FPR Subpart 1–12.9.

§ 12–3.651–2 Purchase order transactions.

The Act applies to contracts made through use of purchase order forms if such contracts have as their principal purpose the furnishing of services through the use of service employees and if such contracts are not otherwise exempt. The clause prescribed in FPR 1–12.904–2 shall be included in purchase orders subject to the Act's coverage.

§ 12–3.652 Fast payment procedures.

§ 12–3.652–1 General.

The procedure is designed to simplify the handling and payment of small purchases. It provides for payment for supplies based on the vendor's submission of an invoice which constitutes a representation that ordered supplies have been delivered in accordance with the provisions of the purchase order. The vendor agrees, by acceptance of the order, to replace, repair, or correct supplies not received by the consignee at destination, damaged in transit, or not conforming to the order.

§ 12–3.652–2 Conditions for use.

(a) Except as set forth in paragraph (b) of this section, the fast payment procedure should be used to the maximum extent practicable, provided its use is consistent with the other conditions of the procurement, when all of the conditions set forth below are present:

(1) Each order does not exceed $10,000;

(2) Title to the supplies will vest in the Government (i) upon delivery to a post office or common carrier for mailing or shipment to destination, or (ii) upon receipt by the Government when the shipment is by means other than post office or common carrier;

(3) The vendor agrees to replace, repair, or correct supplies not received at destination, damaged in transit, or not conforming to the order; and

(4) The supplies will be shipped transportation or postage prepaid. Therefore, no Government Bill of Lading (GBL) will ever be issued.

(b) Use of the fast payment procedure would not be indicated, for example, in small purchases by offices, vessels, air stations, bases, and other locations when material being purchased is destined for use at such activities and contract administration will be performed by the procurement office of such activities.

§ 12–3.652–3 Preparation of orders.

(a) Orders shall be issued on the appropriate purchase order form except that calls against blanket purchase agreements shall be issued in accordance with Administration procedures. Orders may be either priced or unpriced.

(b) Special data to be included in purchase orders or in blanket purchase agreements using fast payment procedures are:

(1) A requirement for the supplies to be shipped transportation or postage prepaid; and

(2) A requirement that invoices be submitted directly to the paying office designated in the order, or in the case of unpriced purchased orders, to the contracting officer.

§ 12–3.652–4 Fast payment clause.

The clause set forth in § 12–7.104–50 shall be included in all fast payment orders.

§ 12–3.652–5 Consignee notification of nonreceipt, damage, or nonconformance.

The consignee shall be instructed to notify the procurement office within 30 days after the specified date of delivery in the purchase order, of supplies not received or damaged in transit, or not conforming to purchase description.

§ 12–3.652–6 Responsibility for collection of debts.

The Contracting Officer shall be primarily responsible for collecting debts resulting from failures of contractors to properly replace, repair, or correct supplies lost, damaged, or not conforming to purchase requirements.

Subpart 12–3.7—Negotiated Overhead Rates

§ 12–3.700 Scope of subpart.

This subpart sets forth policy and procedures governing the negotiation of overhead rates for use in cost-reimbursement type contracts.

§ 12–3.703 Applicability.

Negotiated final overhead rates are authorized for use primarily in cost-reimbursement type contracts for research and development with commercial organizations and nonprofit or educational institutions. They may also be used in other cost-reimbursement type contracts, after a determination is made by the contracting officer that their use is advantageous to the Government. Where it is not apparent that any one of the major purposes enumerated in FPR 1–3.702 results or will result by the use of negotiated final overhead rates, the contracting officer will provide for settlement of overhead by audit determination.

§ 12–3.704 Contract clauses.

§ 12–3.704–1 Contracts with concerns other than educational institutions.

When the "Negotiated Overhead Rates" clause set forth in FPR1–3.704–1 is included in the contract, the appropriate "Indirect Cost" clause cited in DOTPR 12–3.704–50 shall also be included in the contract. When the contract is a cost-plus-incentive-fee type, delete "Allowable Cost, Fixed Fee, and Payment" from paragraph (a) of the clause in FPR 1–3.704–1 and substitute "Allocable Cost, Incentive Fee, and Payment."

§ 12–3.704–2 Contracts with educational institutions.

When either the "Postdetermined" or "Predetermined" negotiated overhead rates clauses in FPR 1–3.704–2 is included in the contract, the appropriate "Indirect Costs" clause cited in DOTPR 12–3.704–50 shall also be included in the contract.

§ 12–3.704–50 Interim payment of indirect costs.

(a) When the contract includes a "Negotiated Overhead Rate" clause as set forth in FPR 1–3.704–1 or 1–3.704–2, one of the clauses set forth in DOTPR 12–7.23–950 (whichever is consistent with the contractor's normal method of interim and final overhead reimbursement) shall be inserted in the contract schedule.

(b) Prior to establishing or revising the negotiated provisional rates, the contracting officer should request the contractor to submit for review his proposed overhead rates with supporting cost data, with a copy to the cognizant audit activity.

(c) Provisional overhead rates may be revised after the contracting officer has received advice that the Department of Defense or other Government office sponsoring overhead negotiations with the contractor has negotiated acceptable overhead rates.

§ 12–3.704–51 Audit determination (actual).

Where it is not apparent that any of the major purposes enumerated in FPR 1–3.702 results or will result by the use of negotiated final overhead rates, the contracting officer will provide for settlement of overhead by audit determination. In these cases the clause set forth in 12–7.203–951 shall be used in lieu of the "Negotiated Overhead Rate" clause prescribed in FPR 1–3.704–1 or 1–3.704–2.

Subpart 12–3.8—Price Negotiation Policies and Techniques

§ 12–3.801–2 Responsibility of contracting officers.

In the event a contractor insists on a price or demands a profit or fee which the contracting officer considers unreasonable, and if the contracting officer is unable to obtain a satisfactory solution after exhausting the courses of action set forth in FPR 1–3.801–2(c), the matter shall be referred for resolution to the head of the procuring activity with a statement of facts and the contracting officer's recommendations.

§ 12–3.807–6 Refusal to provide cost or pricing data.

In addition to the data required by FPR 1–3.807–6, a referral to higher authority should indicate the impact on the affected procurement program if an award is not made to the refusing offeror, and include a recommended course of action.

§ 12–3.808–2 Factors for determining fee or profit.

In determining the fee or profit, consideration must be given to the tax posture of the organization. A fair and reasonable fee to a non-profit or not-for-profit organization, with tax exemptions would be considerably lower than a fee to a commercial enterprise with no tax exempt status.

§ 12–3.809 Contract audit as a pricing aid.

(a) In establishing the due date for receipt of the auditor's report, the minimum time which will be allowed by DOT contracting officers shall normally be 30 days. Exceptions to this 30 day minimum period may be made only when program considerations require a shorter time. Urgency caused by end of year funding considerations will not be a justification for requiring a shorter period for advisory audit review.

(b) When DCAA is assigned post-award audit responsibility under cost reimbursable contracts, the contractor shall be instructed to forward the first and final vouchers to the cognizant auditor for audit review. The cognizant DCAA auditor shall also be furnished a paid copy of each voucher furnished under the contract by the paying office.

§ 12–3.811 Record of negotiations.

The requirement in FPR 1–3.811(a) shall be satisfied by the preparation of a memorandum which summarizes the key procurement decisions and the principal elements of the negotiations. The format below shall be followed to the extent appropriate:

(a) *Introduction.* (1) Describe the products or services to be purchased.

(2) Specify the type and amount of proposed contract.

(b) *Background.* (1) Identify the requisitioning office and the individual responsible for requirement.

(2) Show the procurement request number and its total estimated cost.

(c) *Solicitation of proposals.* (1) Identify the RFP by number and date.

(2) Show number of sources solicited, including requests received resulting from the synopsis.

(3) Reference any pre-bid conference held.

(4) Indicate date proposals were due.

(5) Furnish explanation for opening date of less than 30 days.

(d) *Proposals.* (1) Indicate the number of proposals received.

(2) Identify offerors and the amounts of their price proposals.

(e) *Technical evaluation of proposals.* (1) Identify the memorandum received from the technical evaluation team.

(2) List the firms whose proposals were considered technically acceptable and their ratings.

(3) Identify those firms considered to be within a competitive range.

(f) *Negotiations.* (1) In addition to the applicable information described in FPR 1–3.811, this section of the memorandum should also:

(i) Summarize any pre-negotiation conference, including the primary objectives in the areas of price and technical and legal considerations.

(ii) Describe any special contract provisions negotiated. Provide an explanation if the delivery schedule or period for performance negotiated differs from that in the RFP. State the reasons for any substantive differences between the RFP and the contract proposed for award.

(iii) Describe any consideration given to the use of an incentive type contract and, when used, the details of the incentive provisions.

(iv) Explain why the final negotiated price is fair and reasonable. Include a statement of receipt of the certificate of current cost or pricing data. Reference the prospective contractor's confirmation of the negotiated price, terms, and conditions of the contract.

V 42 174 SEP 8 77 UMI

(g) *Other information.* Provide details, if the procurement involves procedural or contractual innovations, protests by unsuccessful proponents, GAO or Congressional inquiries, or any other special circumstances which would be of interest to approving authority.

(h) *Recommendations.* Include a positive recommendation for award.

Subpart 12–3.50—Solicitation of Proposals

§ 12–3.5000 Scope of subpart.

This subpart applies to all negotiated procurement except small purchases.

§ 12–3.5001 Competition.

Competitive proposals shall be solicited from the maximum practicable number of qualified and eligible suppliers.

§ 12–3.5002 Preparation of request for proposals.

(a) Generally, requests for proposals shall be in writing. However, in appropriate cases, such as the procurement of perishable subsistence, proposals may be solicited orally. When the request is to be in writing, the following forms shall be used:

(1) For negotiated construction contracts, the standard forms in FPR 1–16.401.

(2) For other than construction, Standard Form 33 (Solicitation, Offer, and Award) and Standard Form 33A (Solicitation Instructions and Conditions).

(b) Requests for proposals shall indicate the type of contract contemplated by the Government. When technical proposals are required, requests for proposals shall indicate the factors on which the Government will evaluate the proposals and list them in their relative order of importance. Any other factors, excluding price, which will be given paramount consideration in making an award shall also be indicated.

(c) The guidelines established in DOTPR 12–2.202–1 for minimum bidding times are applicable to requests for proposals.

§ 12–3.5003 Receipt and safeguarding of offers.

The instructions for the receipt and safeguarding of bids in FPR 1–2.401 shall also apply to the receipt and safeguarding of proposals.

§ 12–3.5004 Solicitation for informational or planning purposes.

See FPR 1–1.314.

§ 12–3.5005 Bidders mailing lists.

Bidders mailing lists for negotiated procurements shall be established, maintained, and utilized in accordance with FPR 1–2.205 and DOTPR 12–2.205–5.

§ 12–3.5006 Pre-proposal conferences.

§ 12–3.5006–1 General.

(a) The pre-proposal conference is a procedure which may be used, generally in complex negotiated procurement, as a means of briefing prospective offerors after a solicitation has been issued but before offers or proposals are prepared.

(b) Such a conference permits the Government to explain or clarify complicated specifications and requirements to interested firms. It may also be used to provide an opportunity for interested firms to examine a model of the equipment being procured, where for reasons such as security or limited quantities, such model can only be shown at a specific time and location.

§ 12–3.5006–2 Procedure.

(a) Where it is determined to be in the best interests of the Government to hold a pre-proposal conference, the contracting officer shall make the necessary arrangements and notify all those to whom solicitations have been issued as to the time, place, and general nature of the proposed conference. If time permits, prospective offerors should be asked to submit, in advance, any questions they may have.

(b) The pre-proposal conference shall be conducted by the contracting officer or his representative, with participation by technical and legal personnel as appropriate.

(c) All prospective offerors shall be furnished identical information in connection with the proposed procurement. All conferees shall be advised that remarks and explanations at the conference shall not qualify the terms of the solicitation and specifications unless the solicitation is amended in writing. A summary shall be made of the conference and copies furnished prospective offerors.

§ 12–3.5007 Amendment of request for proposals—prior to closing date.

(a) If after issuance of a request for proposals, but before the closing date of its receipt, it becomes necessary to make changes in quantity, specifications, delivery schedules, or closing dates, or to correct a defect or ambiguity, such change shall be accomplished by issuance of an amendment to the request, whether or not a preproposal conference is held. SF–30 shall be used for amending requests for proposals.

(b) When it is considered necessary to issue an amendment to a request for proposals, the period of time remaining before closing and the need for extending this period by postponing the time set for closing must be considered. Where only a short time remains before the time set for closing, consideration should be given to notifying offerors of an extension of time by telegram or telephone. Such notification should be confirmed in the amendment.

(c) Any information given to a prospective offeror concerning a request for proposals shall be furnished promptly to all other prospective offerors as an amendment to the request if the lack of such information would be prejudicial to uninformed offerors. No award shall be made on request for proposals unless such amendment thereto has been issued in sufficient time to permit prospective offerors to consider such information in submitting or modifying their proposals.

§ 12–3.5008 Treatment of procurement information.

§ 12–3.5008–1 Restrictions on disclosure and use of data in proposals.

(a) Requests for proposals may require the offeror to submit data with his proposal which may include a design or plan for accomplishing the objectives of the procurement. Such data may include information which the offeror does not want disclosed to the public or used by the Government for any purpose other than evaluation of the proposals.

(b) Contracting officers and other Government personnel shall not refuse to consider any proposal merely because it or the data submitted with it is so marked with a restrictive legend. Those portions of the proposal and data which are so marked (except for information which is also obtained from another source without restriction) shall be used only to evaluate the proposal and shall not be disclosed outside the Government without the written permission of the offeror. If it is desired to duplicate, use, or disclose the data of the offeror to whom the contract is to be awarded, for purposes other than to evaluate the proposal, the contract should so provide.

§ 12–3.5008–2 Disclosure of information during the pre-award or pre-acceptance period.

(a) *General.* See FPR 1–3.805–1(b) for restrictions regarding the disclosure of information.

(b) *Equal consideration and information to all prospective contractors.* During the interval between mailing of requests for proposals and the making of awards, discussion of the procurement with prospective contractors and the transmission of technical or other information shall be conducted only by or with the knowledge of the contracting officer; except that necessary technical or other information during such period may be transmitted to prospective contractors by other personnel via contracting personnel, at meetings arranged by contracting personnel, or by official correspondence from the contracting officer to the originating activity or technical office seeking clarification of the matter in question. In the conduct of necessary discussion of a request for proposals with suppliers, no personnel shall furnish any information to a supplier which may afford him any advantage over others. However, general information which would not be prejudicial to others may be furnished upon request, e.g., explanations of a particular contract clause or a particular condition of the schedule. When necessary to clarify ambiguities, or correct mistakes or omissions an appropriate amendment to the solicitation shall be issued.

§ 12–3.5008–3 Pre-award notice of unacceptable offers.

In any procurement in excess of $10,000 in which it appears that the period of evaluation of proposals is likely to exceed 60 days or in which a limited number of suppliers have been selected for additional negotiation, the contracting officer, upon determination that a proposal is unacceptable shall provide prompt notice of that fact to the source submitting the proposal. Such notice need not be given where the proposed contract is to be awarded within a few days and notice pursuant to FPR 1–3.103 would suffice. In addition to stating that the proposal has been determined to be unacceptable, notice to the offeror shall advise that, since further negotiation with him concerning this procurement is not contemplated, a revision of his proposal will not be considered. If the firm requests a debriefing, this shall be provided at the earliest feasible time after the request, but not prior to award of the contract.

§ 12–3.5009 Notice of award technique.

When time is of the essence, the notice of award technique may be used as an acceptance of a proposal. To assure that the notice of award will constitute a valid acceptance of the offeror's proposal, the contracting officer will insure that the proposal fully embodies the terms of the agreement between the parties. If the proposal is changed, for any reason, the contractor must set forth his understanding of any modifications or additions in a letter to the contracting officer. The notice of award shall reference the contractor's proposal and any other document modifying the proposal. The following is a sample notice of award:

NOTICE OF AWARD

Gentlemen: The United States of America, acting through the undersigned contracting officer, hereby accepts your proposal No. ____, dated _____, as modified by your letter(s) of _____, to furnish (supplies, services, work) in accordance with RFP No. ____ dated _____, for a total price of $_____. This notice of award constitutes a binding contract obligation from time of mailing. All delivery dates will be computed from the date of this notice unless otherwise provided.

A document formalizing this contract will be sent to you for signature as soon as possible. This formal contract will be dated and numbered as above.

You are directed to proceed with the performance of this contract in accordance with the terms of your proposal and this acceptance.

Sincerely,

(Written Signature)
(Typed Name)
Contracting Officer _____
(on copies only) (Date)

Negotiation Authority: _____

§ 12–3.5010 Protests against award.

Protests against awards of negotiated procurements shall be processed in the same manner as prescribed in FPR 1–2.407.8.

§ 12–3.5011 Unsolicited contract proposals.

Department Order 4200.4 (set forth in DOTPR Part 90) establishes the policies and procedures for processing unsolicited contract proposals.

PART 12–4—SPECIAL TYPES AND METHODS OF PROCUREMENT

Subpart 12–4.10—Architect-Engineer Services

Sec.
12–4.1002 Definitions.
12–4.1003 Public announcements.
12–4.1004 Selection.
12–4.1004–1 Establishment of Architect-Engineer Evaluation Boards.
12–4.1004–2 Functions of the Evaluation Board.
12–4.1004–3 Evaluation criteria.
12–4.1004–4 Action by the agency head or his authorized representative.
12–4.1004–5 Procedures for procurements estimated not to exceed $10,000.
12–4.1005 Negotiation procedures.
12–4.1006–1 General.
12–4.1050 Release of information.
12–4.1051 Clauses for architect-engineer contracts.
12–4.1052 Debriefing unsuccessful interviewed firms.

Subpart 12–4.50—Utilization and Disposal of Personal Property Pursuant to Exchange/Sale Authority

12–4.5001 General.

Subpart 12–4.51—Procurement of Tax-Free Spirits

12–4.5100 Scope of subpart.
12–4.5101 Delegation of authority.
12–4.5102 Procedure.

AUTHORITY: Sec. 205(c), 63 Stat. 389; 40 U.S.C. 486(c), 10 U.S.C. 2301–2314.

Subpart 12–4.10—Architect–Engineer Services

§ 12–4.1002 Definitions.

(a) [Reserved]

(b) "Agency Head" refers to those DOT officials designated in DOTPR 12–1.204.

(c) [Reserved]

(d) "head of the Procuring Activity" refers to those DOT officials designated in DOPR 12–1.206.

(e) "Fee"—The compensation (contract price) for professional services paid to the A–E.

§ 12–4.1003 Public announcements.

The time allowed for A–E firms to respond to an advertisement of a project notice shall generally follow the requirements for bidding time in FPR 1–2.202–1 and DOTPR 12–2.202–1. If practical the time allowed for firms to respond to a project notice shall be 30 days from the date the notice is published; however, the minimum time shall be 15 days. If the time allowed for response is reduced below 15 days the contracting officer shall document in the contract file the full justification for the reduction.

§ 12–4.1004 Selection.

§ 12–4.1004–1 Establishment of Architect-Engineer Evaluation Boards.

(a) Each agency head (or his authorized representative) shall establish an ad hoc Architect-Engineer Evaluation Board for each procurement of Architect-Engineer services. The Board shall perform the functions set forth in § 12–4.1004–2 unless procedures for contracts estimated to be $10,000 and under are used as provided for in § 12–4.1004–5. The A–E Evaluation Board shall be composed of the following members, one of whom shall be appointed as Chairman and one of whom may be appointed recording secretary:

(1) One member with experience in procurement of A–E services. This member will normally be the cognizant contracting officer or the contract negotiator for the project.

(2) Two members with technical experience in the fields of architecture, engineering or construction. These members will normally be from the organization responsible for the work.

(3) One member with technical knowledge of the functional (user) requirements of the project.

(4) For A–E procurements estimated at $60,000 or more, a member appointed by the Director, Installations and Logistics, OST (TAD–60), unless he declines to appoint a member.

(5) Other special members as are deemed necessary.

(6) A–E Board members may be appointed from among highly qualified professional employees of other Government agencies or the private sector, engaged in the practice of architecture, engineering, construction or related professions. When a proposed Architect-Engineer Evaluation Board includes a member from the private sector, the Office of Installations and Logistics, OST (TAD–60) shall be notified before the Board is established. No firm or organization shall be eligible for consideration for a contract with a procuring activity during the period in which any of its principals or associates are participating as members of an A–E Evaluation Board on behalf of that procuring activity.

(7) Operating elements and secretarial offices that do not have personnel experienced in Architect-Engineer selection procedures or personnel with the necessary technical disciplines to evaluate Architect-Engineer firms for a particular project may request the assistance of the Office of Installations and Logistics, OST (TAD–60) in establishing the A–E Evaluation Board.

§ 12–4.1004–2 Functions of the Evaluation Board.

(a) (1) Because of the Department policy to establish ad hoc evaluation boards instead of permanent boards to select Architect-Engineers, the cognizant procurement office or facilities design and construction activity shall be responsible for collecting the Standard Forms 254 and maintaining the qualification data on file. Although A–E firms should submit a new Form 254 each year, forms up to three years old shall be considered current. Forms more than three years old may be discarded.

(2) Organizations may choose not to maintain A–E qualification data files and arrange to use existing data files of other DOT organizations including the files available in the Office of Installations and Logistics, OST (TAD–60). If an organization chooses this option it should forward all A–E qualification data it receives from interested firms to the organization maintaining the data file.

V 42 I 174 SEP 8 77 UMI

(b) The following outlines the functions of the Architect-Engineer Evaluation Board in more detail and the sequence in which the functions are to be performed:

(1) Analyze the nature and scope of the project work requirements.

(2) Develop the criteria and evaluation systems to be used in screening firms for the Pre-selection List and in the final selection.

(3) Prepare the public announcement for the project (§ 12–4.1003) and provide it to the procurement office for publication.

(4) Screen the Standard Form 254s and Standard Form 255s and any other qualification data received in response to the public announcement of the project and prepare a Pre-selection List of the best qualified firms for further consideration. The Pre-selection List must consist of at least three firms.

(5) Obtain additional, detailed qualification and past performance information for each of the firms on the Pre-selection List. This information shall include the following:

(i) *Past record of performance.* How well firms have performed on previous projects including quality of work, ability to meet schedules, accuracy of cost estimates and any other pertinent factors. This information should be obtained by contacting former clients in Government and private industry.

(ii) *Project proposal.* The A–E firm shall submit a project proposal to the A–E Evaluation Board, in writing, prior to the interviews required by § 12–4.1004–2(b)(6). The project proposal should normally include the type of information outlined below. However, the proposal may vary in content and level of detail depending on the scope, complexity and nature of the particular project under consideration. The firm shall be provided with a description of the nature and scope of work to be accomplished to assist the firm in preparing the proposal. In addition, firms selected to submit proposals shall be advised of the evaluation criteria that will be used to select the firm for negotiations.

(A) *Technical approach.* A brief discussion of: the tasks or steps that the firm will undertake to accomplish the work described in the scope of work, overall planning and design approach/philosophy, possible conceptual approaches (narrative) and unusual aspects or potential problems the firm envisions that may be encountered during project execution, and which may require special consideration (including environmental considerations and provisions for the handicapped).

(B) *Energy conservation approach.* Brief narrative of the technical approach that the A–E firm would use to maximize energy conservation for the project under consideration. The approach should discuss those systems that could have significant impact on energy conservation, and the criteria and engineering considerations that would be used to design these systems for maximum energy conservation. The A–E should also give examples of energy conservation design techniques and measures that the firm has used in previous design projects including the results obtained. If possible the results should be expressed quantitatively in terms of operating costs, resource consumption or BTU's per square foot.

(C) Proposed project schedule and man-loading plan (manpower in each technical discipline over contract period).

(D) Visual examples of previous work such as photographs of completed construction projects designed by the firm and copies of completed plans and specifications. (These may be provided at the interviews required by 12–4.1004–2(b)(6).)

(E) *Management approach.* A brief discussion of the project team organization, project management procedures, methods to be used in controlling construction cost estimates, quality control procedures, and the anticipated A–E/client relationship.

(F) *Firm's current workload.* For example, a list of on-going projects including their construction value (or A–E fee if construction value is not applicable) and percentage of completion.

(G) Percentage and number of minority and women employees in all job classifications and pay scales. Minorities are specified as being American Indian, Negro, Spanish Surnamed Americans, Orientals, Aleuts and Eskimos.

The project proposal should also include any changes to the information provided in the Standard Forms 254 and 255 that the firms may wish to make, particularly on proposed key personnel and consultants and relevant past work. The A–E firm should be advised not to submit price proposals at this time, or design sketches, drawings, and design data in connection with the proposed project. If an Administration or element of OST desires conceptual designs from A–E firms written approval shall be obtained from the Assistant Secretary for Administration prior to soliciting such proposals.

(6) Conduct interviews with the firms on the Pre-selection List. As part of the interview the Architect-Engineer firms shall be given an opportunity to make an oral presentation of their qualification and experience data, proposed project approach and any other relevant data. The project manager and other key project personnel and consultants proposed by a firm should participate in the interview.

(7) Whenever it is practical and advantageous, the A–E Evaluation Board should visit the offices of the A–E firms on the Pre-selection List to inspect their facilities and work environment, to meet members of the proposed project team, to see work in progress and additional examples of completed projects. These visits should be made in conjunction with the interviews referred to in § 12–4.1004–2(b)(6).

(8) Review the Standard Forms 254 and 255, the project proposals, and other experience and qualification data for each firm on the Pre-selection List and perform a systematic numerical evaluation rating and ranking of the firms using the applicable evaluation criteria in § 12–4.1004–3.

(9) Develop, in rank order, a listing of not less than three firms considered most highly qualified to perform the required services, based on the evaluation rating and ranking of the firms on the Pre-selection List, and prepare a report to the agency head (or his authorized representative) recommending these firms for negotiations. The report shall include in sufficient detail the extent of the evaluation and the considerations upon which the recommendations were based, and any other data and material developed by the A–E Evaluation Board which might be useful in the negotiations.

§ 12–4.1004–3 Evaluation criteria.

The following expands the evaluation criteria provided in the FPR. Each criteria factor should be weighted according to its order of importance with respect to the project under consideration.

(a) *Specialized experience.* Relevant recent experience of the firm (including joint venture or association) in projects comparable to the proposed project.

(b) *Capacity/capability.* (1) Relevant experience and capability of key project personnel, and key individual and outside consultants.

(2) Diversity of skills the firm proposes to apply to the project in order to perform all aspects of the work, such as planning, architectural design and civil, mechanical and electrical engineering.

(3) Total number of personnel the A–E firm employs in the technical disciplines required for the proposed project.

(4) Firm's current workload.

(c) *Technical ability and understanding of requirements.* (1) Technical approach.

(2) Understanding and experience in energy conservation design.

(3) Project schedule.

(4) Man-loading plan.

(5) Quality of examples of previous work.

(d) *Project organization and management.* (1) Project team organization.

(2) Project management procedures.

(3) Methods to be used in controlling construction cost estimates.

(4) Quality control procedures.

(5) Anticipated A–E/client relationship.

(e) *Past record of performance.* Past record of performance on contracts with DOT and other former clients in Government and private industry with respect to such factors as quality of work, ability to meet schedules, accuracy of cost estimates compared to actual bids and quotes, number and dollar amount of construction change orders, and A–E/Client relationship. The following evaluation criteria factors do not necessarily relate to the ability of an A–E firm to do the required work. However, they do reflect Department policy and therefore they should be used in the A–E evaluation process. They may be used separately from the other criteria in terms of bonus or penalty points to the basic numerical evaluation rating.

(f) *Volume of department-wide work previously awarded to the firm during the past 3 years.* The object of this factor is to promote the distribution of Department Architect-Engineering contracts to the maximum extent possible among all qualified Architect-Engineer firms. A list of A–E firms that have been awarded DOT contracts during the most recent past three year period will be distributed to all procurement offices by the Office of Installations and Logistics, OST, TAD–60.

(g) *Familiarity with and proximity to the site location of the project.*

(h) *Minority/Women Employment.* Percentage of minority employees in all job classifications and pay scales, noting the percentage of minorities in the immediate locality and general surrounding area. Minorities are specified as being American Indian, Negro, Spanish surnamed Americans, Orientals, Aleuts and Eskimos. In addition, the percentage of women in all job classifications and pay scales shall also be considered.

§ 12–4.1004–4 Action by the agency head or his authorized representative.

(a) The agency head (or his authorized representative) shall review the recommendations of the Architect-Engineer Evaluation Board. The recommendations of the Architect Engineer Evaluation Board will normally be accepted, unless the report does not adequately support the recommendations. If the recommendations are not accepted the Architect-Engineer Evaluation Board shall be required to reconvene until an acceptable set of recommendations is agreed upon.

(b) The accepted report shall serve as authorization for the contracting officer to commence negotiations with the A–E firm ranked number one by the A–E Evaluation Board.

§ 12–4.1004–5 Procedures for procurements estimated not to exceed $10,000.

When authorized by the agency head (or his authorized representative) the following procedure may be used in lieu of the procedures prescribed in §§ 12–4.1004–1, 12–4.1004–2, and 12–4.1004–4.

(a) The selection shall be accomplished by an informal evaluation board consisting of at least two members from the organization responsible for the work who are knowledgeable in the technical fields most significantly related to the proposed project. The Board shall follow the procedures prescribed in § 12–4.1002(b). However, the Board shall use its judgment in determining the extent of detailed qualification and past performance data needed to fully evaluate the A–E firms. The Board should at least obtain the Standard Forms 254, the firms' past record of performance and visual examples of previous projects.

(b) The Board's report, recommending at least three firms, in rank order, considered best qualified to perform the required services, shall be submitted to the contracting officer for review. If the report is acceptable it shall serve as authorization for the contracting officer to begin negotiations with the firm ranked number one.

§ 12–4.1005 Negotiation procedures.

§ 12–4.1005–1 General.

The limitation on Architect-Engineer fees of 6 percent of the estimated construction cost applies to all services that are an integral part of the production and delivery of plans, designs, drawings and specifications of a construction project. The limitation, however, does not apply to the cost of investigative and other services including but not limited to the following:

Development of program requirements (scope of work).
Determination of project feasibility.
Preparation of drawings of an existing facility, where current drawings are not available.
Subsurface investigations (soil borings).
Structural, electrical, and mechanical investigations of an existing building, where current information is not available.
Surveys: Topographic, boundary, utility.
Preparation of models, color renderings, photographs, or other presentation materials.
Travel and per diem for special presentations.
Supervision and inspection of construction.
Preparation of operating and maintenance manuals.
Master planning.

§ 12–4.1050 Release of information.

The rank order list of firms selected by the A–E Evaluation Board as most highly qualified is for the internal use of the Department, and such information shall at no time be made known to the firms under consideration or to any other non-governmental source. Information may be released by the contracting officer, unless precluded by security considerations, identifying the A–E selected for negotiation and describing the work in general terms. If negotiations are terminated without consummating a contract, the contracting officer may release such information and the name of the firm with which the Government will start new negotiations. When an award has been made, the contracting officer may release this information, giving special notice of the award to any firms interviewed by the A–E Evaluation Board.

§ 12–4.1051 Clauses for architect-engineer contracts.

The clauses for A–E contracts are set forth in FPR Subpart 1–16.7 and DOTPR Subpart 12–7.51.

§ 12–4.1052 Debriefing unsuccessful interviewed firms.

(a) After a contract is awarded unsuccessful firms that participated in the interviews shall be debriefed upon request of the firm. The purpose of the debriefing is to give firms information which may assist them in improving future presentations, and to provide assurance that the selection was made fairly and in accordance with regulations and the provisions of the solicitation.

(b) The debriefing shall inform the unsuccessful firms where they were weak or deficient. However point by point comparisons with other firms shall not be made nor shall the merits, technical standing or evaluation scoring of other firms be discussed.

Subpart 12–4.50—Utilization and Disposal of Personal Property Pursuant to Exchange/Sale Authority

§ 12–4.5001 General.

The procedures governing the exchange or sale of personal property are set forth in the Federal Property Management Regulations (FPMR) Part 101–46. Prior to any disposal action, Federal agencies shall be solicited to the extent required by FPMR 101–46.301. See also FPMR 101–46.202 for restrictions and limitations, and FPMR 101–46.402 for cash and exchange (trade-in) bids.

Subpart 12–4.51—Procurement of Tax-Free Spirits

§ 12–4.5100 Scope of subpart.

This subpart covers the procurement of tax-free spirits and specially denatured spirits.

§ 12–4.5101 Delegation of authority.

The Assistant Secretary for Administration and the Administrators of the Federal Aviation Administration, Federal Highway Administration, Federal Railroad Administration, Urban Mass Transportation Administration and the Commandant, U.S. Coast Guard have been delegated authority to execute Internal Revenue Service (IRS) application forms 1486 and 1444 to procure specially denatured spirits and tax-free spirits in accordance with sections 211.231 and 213.142 respectively, of Title 26 of the Code of Federal Regulations. The foregoing officials may redelegate this authority to one or more officials within their organizations but without power to further redelegate. Any redelegation of this authority shall be in the form of a letter addressed to the Director, Alcohol and Tobacco Tax Division, Internal Revenue Service, Washington, D.C. 20224.

§ 12–4.5102 Procedure.

(a) See § 211.233 of Title 26 for procurement of specially denatured spirits, and § 213.143 of Title 26 for procurement of tax-free spirits.

(b) If the application is to cover more than one geographical location; insert in Item 2, Form 1486 or 1444: "Various locations of the (insert name of Administration) as indicated by purchase order." IRS processes the application and, on the same form, issues the permit to procure. The application form may be signed only by an official named in 12–4.5101 or his designee. The permit remains valid until surrendered by the Administration or cancelled by IRS.

(c) The permit issued on Form 1444 authorizes procurement from any qualified distilled spirits plant. A listing of such plants is provided on IRS Document No. 5237. The list and revision

V 42 174 SEP 8 77 UMI

service may be obtained upon request to IRS, Alcohol and Tobacco Tax Division, 1111 Constitution Avenue NW., Washington, D.C. 20224.

PART 12–5—SPECIAL AND DIRECTED SOURCES OF SUPPLY

Subpart 12.50—Procurement Under the Economy Act From or Through Another Federal Agency

Sec.
12-5.5000 Scope of subpart.
12-5.5001 Authorization and policy relating to placing and filling orders.
12-5.5002 Execution of agreements with agency heads.

Subpart 12–5.51—Procurement of Printing and Related Supplies

12-5.5100 Printing and related supplies.

AUTHORITY: Sec. 205(c), 63 Stat. 389; 40 U.S.C. 486(c), 10 U.S.C. 2301-2314.

Subpart 12–5.50—Procurement Under the Economy Act From or Through Another Federal Agency

§ 12–5.5000 Scope of subpart.

This subpart deals with orders for supplies or services placed with another Government department or agency pursuant to the authority of the Economy Act of June 30, 1932, as amended (31 U.S.C. 686), except that it does not apply to any procurement covered by other subparts of this Part 12–5.

§ 12–5.5001 Authorization and policy relating to placing and filling orders.

(a) It is the policy of the Department of Transportation not to place Government agencies in direct competition with commercial sources. Accordingly, prior to soliciting bids or proposals from commercial sources, it shall be decided whether to obtain supplies or services from Government agencies. Invitations for bids and requests for proposals shall not be sent to Government agencies. Current market prices, recent procurement prices, or prices obtained by informational bids as provided in FPR 1–1.314 may be used to ascertain whether procurement can be effected more cheaply from commercial sources.

(b) Each procuring activity, when it is in the interest of the Government to do so, may place orders with any other Government department or agency for supplies or services that any such requisitioned department or agency may be in a position to furnish or perform or to obtain by contract.

(c) Where the Department procures commercial or industrial products or services from another Government agency, any authorization required for the furnishing of such products or services, in accordance with BOB Circular No. A–76, dated August 30, 1967, as revised by OMB Transmittal Memorandum No. 2 of October 18, 1976, shall be accomplished by the furnishing Government agency.

§ 12–5.5002 Execution of agreements with agency heads.

Execution of any written interdepartmental or interagency agreement which is to be signed by *the head* of the other department or agency is reserved to the Secretary, as provided in section 1.44(1) of the DOT Organization Manual (DOT 1100.23(A)).

Subpart 12–5.51—Procurement of Printing and Related Supplies

§ 12–5.5100 Printing and related supplies.

The Government Printing and Binding Regulations of the Congressional Joint Committee on Printing set forth specific prohibitions and regulations for the acquisition of printing, binding, blankwork, envelopes, paper, and related supplies.

PART 12–6—FOREIGN PURCHASES

Sec.
12-6.000 Scope.

Subpart 12–6.1—Buy American Act—Supply and Service Contracts

12-6.103 Exceptions.
12-6.103-2 Nonavailability in the United States.
12-6.104 Procedures.
12-6.104-4 Evaluation of bids and proposals.
12-6.105 Excepted articles, materials, and supplies.

Subpart 12–6.8—Balance of Payments Program

12-6.801 General.
12-6.801-50 Use of excess and near-excess foreign currencies.
12-6.806 Procedures.
12-6.806-2 Method of purchase:

Subpart 12–6.10—Omission of the Examination of Records Clause From Contracts With Foreign Contractors

12-6.1004 Determinations and findings.

Subpart 12–6.50—Purchases From Certain Communist Areas

12-6.5001 Restrictions.
12-6.5002 Contract provision.
12-6.5003 Exceptions.

AUTHORITY: Sec. 205(c), 63 Stat. 389; 40 U.S.C. 486(c), 10 U.S.C. 2301-2314.

§ 12–6.000 Scope.

This part includes restrictions and procedures affecting procurements of foreign-made items; and restrictions on purchases from communist countries or areas.

Subpart 12–6.1—Buy American Act—Supply and Service Contracts

§ 12–6.103 Exceptions.

§ 12–6.103–2 Nonavailability in the United States.

(a) Certain items determined to be exempt under the exception in FPR 1–6.103–2 are set forth in DOTPR 12–6.105. Supplies not listed may be excepted only after a written determination has been made by the contracting officer. Each determination shall include the following information:

(1) Description of the item(s) to be procured with specific information pertaining to special features, performance, versatility, etc.

(2) Unit, quantity, estimated cost (including duty, if any, separately shown).

(3) Country of origin, and name and address of prospective contractor, if available.

(4) Brief statement as to the necessity for the procurement.

(5) Statement of effort made to procure a similar item of domestic origin or statement that there is no domestic item which can be used as a reasonable substitute.

When a determination has been made that the restrictions of the Buy American Act are inapplicable for the end products being purchased, notification to this effect shall be included in this solicitation and contract.

(b) Notwithstanding the foregoing, procurement of foreign end products on the basis of "nonavailability," whether or not listed in DOTPR 12–6.105, shall be made only after a written determination has been made by the contracting officer and approved at a higher level in accordance with Administration procedures. Before granting such approval, or making such determination, the feasibility of foregoing the requirement or providing a United States substitute shall be considered.

(c) Notwithstanding paragraph (b) of this section, approvals and determinations may be made by the contracting officer covering individual procurements of spare and replacement parts for foreign manufactured items, if the procurement must be restricted to the original manufacturer or his supplier in accordance with FPR 1–3.213.

(d) Notwithstanding paragraph (b) of this section, approval is not required for:

(1) Purchases for resale in domestic commissaries of brand name subsistence items of foreign origin for which there are no substitutes of U.S. origin. All purchases of such brand name subsistence items of foreign origin shall be made from domestic concerns.

(2) Procurement of swords and scabbards.

(3) Procurement of books, pamphlets, newspapers, magazines, periodicals, and printed briefs and films not printed in the United States and for which domestic editions are not available.

(4) Procurement of bananas, tea, coffee, spices, herbs, sugar, cocoa, cream of tarter, tapioca, and coconut.

(e) The following is a format for the determination and findings of nonavailability:

DEPARTMENT OF TRANSPORTATION

Determination and findings of nonavailability under the Buy American Act regarding purchase of (item description).

FINDINGS

(Set forth the information required by DOTPR 12–6.103–2(a).)

DETERMINATION

Upon the basis of these findings, I hereby determine that the above supplies are not mined, produced, or manufactured at the present time in the United States in sufficient and reasonably available commercial quantities and of a satisfactory quality; and that the provisions of the Buy American Act (41 U.S.C. 10a–d) are inapplicable.

(Add appropriate approval when required by Administration procedures.)

Contracting Officer

Date

§ 12–6.104 Procedures.

§ 12–6.104–4 Evaluation of bids and proposals.

When a proposed award is required to be submitted to the head of the agency for decision pursuant to FPR 1–6.104–4 (b) or FPR 1–6.104–4 (c) (1) or (c) (2), the submission shall include a copy of each bid or offer being considered for award, the date the bids or offers expire, a copy of the abstract of bids or offers, and a statement justifying the proposed award.

§ 12–6.105 Excepted articles, materials, and supplies.

Pursuant to the Buy American Act, the Government has determined that the articles, materials, and supplies listed below are not mined, produced, or manufactured in the United States in sufficient and reasonably available commercial quantities of a satisfactory quality, or that it would be inconsistent with the public interest to apply the restrictions of the Act to such articles, materials, and supplies. When required to be incorporated into an end product or construction material manufactured in the United States, these items may be regarded as components of domestic origin for the purpose of determining the origin of such manufactured end product or construction material. However, the procurement of any of these items other than as components of domestic source end products or construction materials must be approved by the appropriate authority designated by the Administrations pursuant to DOTPTR 12–6.103–2 (b).

Acetylene black.
Asbestos, amosite
Bananas.
Beef extract.
Bismuth.
Brazil nuts, unroasted.
Cadmium, ores and flue dust.
Calcium cyanamide.
Capers.
Cashew nuts.
Chestnuts.
Chicle.
Chrome ore or chromite.
Cinchona bark.
Cobalt, in cathodes, rondelles, or other primary forms.
Cocoa beans.
Coconut and coconut meat, unsweetened, in shredded, desiccated, or similarly prepared form.
Coffee, raw or green bean.
Cork, wood or bark and waste.
Diamonds, industrial, stones.
Emetine, bulk.
Ergot, crude.
Fair linen, altar.
Fibers of the following types: Abac, agave, coir, flax, jute, and palmyra.
Goat and kid skins.
Graphite, natural.
Hand Sewing Needles.
Hog bristles for brushes
Hyoscine, bulk.
Ipecac, root.
Leather, Sheepskin, Hair Type.
Menthol, natural bulk.
Mica.
Nickel, primary, in ingots, pigs, shot, cathodes, or similar forms; nickel oxide and nickel salts.
Nitroguanidine (also known as picrite).
Olive oil.
Olives (green), pitted or stuffed in bulk.
Opium, crude.
*Petroleum, crude oil, unfinished oils and finished products.
Platinum and platinum group metals refined, as sponge, powder, ingots, or cast bars.
Pyrethrum flowers
Quartz crystals
Quebracho.
Radium salts.
Rosettes.
Rubber, crude and latex.
Rutile.
Silk, raw.
Sperm oil.
Spices and herbs in bulk.
Sugars, raw.
Talc, block, steatite.
Tapioca flour and cassava.
Tartar, crude, tartaric acid and cream of tartar in bulk.
Tea in bulk.
Thread, metallic (gold).
Tin.
Vanilla beans.
Venom, cobra.
Wax, carnauba.
Woods of the following species: Angelique, balsa, ekki, greenheart, lignum vitae, mahogany and teak.

Petroleum definitions, as used in this subpart:

(a) "Crude oil" means crude petroleum as it is produced at the wellhead and liquids (under atmospheric conditions) that have been recovered from mixtures of hydrocarbons which existed in a vaporous phase in a reservoir and that are not natural gas products.

(b) "Finished products" means any one or more of the following petroleum oils, or a mixture or combination of such oils, which are to be used without further processing except blending by mechanical means:

(1) Liquefied gases—hydrocarbon gases recovered from natural gas or produced from petroleum refining and kept under pressure to maintain a liquid state at ambient temperatures;

(2) Gasoline—a refined petroleum distillate which by its composition, is suitable for use as a carburant in internal combustion engines;

(3) Jet fuel—a refined petroleum distillate used to fuel jet propulsion engines;

(4) Naphtha—a refined petroleum distillate falling within a distillation range overlapping the higher gasoline and the lower kerosenes;

(5) Fuel oil—a liquid or liquefiable petroleum product burned for lighting or for the generation of heat or power and derived directly or indirectly from crude oil, such as kerosene, range oil, distillate fuel oils, gas oil, diesel fuel, topped crude oil, residues;

(6) Lubricating oil—a refined petroleum distillate or specially treated petroluem residue used to lessen friction between surfaces;

(7) Residual fuel oil—a topped crude oil or viscous residuum which, as obtained in refining or after blending with other fuel oil, meets or is the equivalent of Military Specification Mil–F–859 for Navy Special Fuel Oil and any other more viscous fuel oil, such as No. 5 or Bunker C;

(8) Asphalt—a solid or semi-solid cementitious material which gradually liquefies when heated, in which the predominating constituents are bitumins, and which is obtained in refining crude oil;

(9) Natural gas products—liquids (under atmospheric conditions), including natural gasoline, which are recovered by a process of absorption, adsorption, compression, refrigeration, cycling, or a combination of such processes, from mixtures of hydrocarbons that existed in a vaporous phase in a reservoir and which, when recovered and without processing in a refinery, otherwise fall within any of the definitions of products contained in (b) (2) through (5), inclusive, of this section.

(c) "Unfinished oils" means one or more of the petroleum oils listed in (b) above, or a mixture or combination of such oils, which are to be further processed other than by blending by mechanical means.

Subpart 12–6.8—Balance-of-Payments Program

§ 12–6.801 General.

§ 12–6.801–50 Use of excess and near-excess foreign currencies.

Where practicable, contracts and other obligations incurred in excess and near-excess currency countries should provide for payment in foreign currencies rather than U.S. dollars notwithstanding the appropriation or fund that will be used for payment. This should include contracts with U.S. contractors to the extent that the contractor may be expected to require such currencies for necessary expenses in the country involved.

§ 12–6.806 Procedures.

§ 12–6.806–2 Method of purchase.

In lieu of the authority cited in FPR 1–6.806–2, the following is applicable to Coast Guard procurement: Contracts entered into pursuant to conventional negotiation shall cite exceptions (2) through (17) of 10 U.S.C. 2304(a), as appropriate. Where such negotiation authority is not applicable or where contracts are entered into pursuant to the Balance of Payments Restricted Advertising method of procurement, 10 U.S.C. 2304(a)(1) shall be cited as negotiation authority.

Subpart 12–6.10—Omission of the Examination of Records Clause From Contracts With Foreign Contractors

§ 12–6.1004 Determinations and findings.

A determination and finding made by the Coast Guard shall cite 10 U.S.C. 2313(c) as authority for omission of the Examination of Records clause. Determinations and findings made by other Administrations shall cite 41 U.S.C. 254(c).

Subpart 12–6.50—Purchases From Certain Communist Areas

§ 12–6.5001 Restrictions.

Supplies originating from the following countries shall not be acquired for public use except as authorized by the

V 42 I 174 SEP 8 77 UMI

Secretary of the Treasury or his designee:

(a) *From China (except Formosa), North Korea, Cambodia, and Vietnam,* the items set forth in § 500.204 of Part 500 of Title 31 of the Code of Federal Regulations.

(b) *From Cuba,* any merchandise that is of Cuban origin, or is or has been located in or transported from or through Cuba, or is made or derived in whole or in part of any article, which is the growth, produce, or manufacture of Cuba (§ 515.204 of Part 515 of Title 31 of the Code of Federal Regulations).

§ 12–6.5002 Contact provision.

Instructions. The clause in § 12–7.151–18 shall be included in all contracts for supplies, services, or construction, where acceptance is to take place outside the United States, its possessions, or Puerto Rico. The clause need not be included in purchase orders for small purchases where there is reasonable assurance of compliance with § 12–6.5001.

§ 12–6.5003 Exceptions.

Requests for exceptions to this subpart shall be forwarded through Administration channels to the Director of Installations and Logistics, OST/TAD–60.

PART 12–7—CONTRACT CLAUSES

Sec.
12–7.000 Scope of part.

Subpart 12–7.1—Clauses for Fixed-Price Supply Contracts

12–7.100 Scope of subpart.
12–7.101 Applicability.

12–7.203–7 [Reserved]
12–7.203–8 [Reserved]
12–7.203–9 Negotiated overhead rates.
12–7.203–950 Negotiated overhead rates—indirect costs.
12–7.203–951 Audit—indirect costs (actual).
12–7.203–10 Make-or-buy program.
12–7.203–11 Advance payments.
12–7.203–12 Required source for jewel bearings.
12–7.203–13 General Services Administration supply sources.
12–7.203–14 Use of interagency motor pool vehicles and related services.
12–7.203–15 Interest.
12–7.203–16 [Reserved]
12–7.203–17 [Reserved]
12–7.203–18 Small business subcontracting program.
12–7.203–19 Labor surplus area subcontracting program.
12–7.203–20 Minority business enterprises subcontracting program.
12–7.203–21 Government property.
12–7.203–22 Preference for U.S. flag air carriers.
12–7.203–23 Cost accounting standards.
12–7.203–24 Privacy Act.
12–7.203–25 Use of U.S. flag commercial vessels.
12–7.204 Additional clauses.
12–7.204–1 Alterations in contract.
12–7.204–2 Approval of contract.
12–7.204–3 Date of incurrence of cost.
12–7.204–4 Notice regarding late delivery.
12–7.204–5 Insurance—Liability to third persons.
12–7.204–50 Insurance—Liability to third persons.
12–7.250 Required DOTPR clauses.
12–7.250–1 Gratuities.
12–7.250–2 New material.
12–7.250–3 Priorities, allocations, and allotments.
12–7.250–4 Interpretation or modification.
12–7.250–5 Dissemination of contract information.
12–7.250–6 Authorization and consent.
12–7.251 DOTPR clauses to be used when applicable.
12–7.251–1 Patent indemnity.
12–7.251–2 Filing of patent applications.
12–7.251–3 Reporting of royalties (foreign).
12–7.251–4 Refund of royalties.
12–7.251–5 Patent rights.
12–7.251–6 Rights in data.
12–7.251–7 Military security requirements.
12–7.251–8 Stop work orders.
12–7.251–9 Value engineering.
12–7.251–10 Multi-year procurement.
12–7.251–11 Renegotiation.
12–7.251–12 Background patents (license).

Subpart 12–7.3—Fixed-Price Research and Development Clauses

12–7.300 Scope of subpart.
12–7.301 Applicability.
12–7.302 Required clauses.
12–7.302–1 Definitions.
12–7.302–2 Payments.
12–7.302–3 Standards of work.
12–7.302–4 Inspection.
12–7.302–5 Assignment of claims.
12–7.302–6 Examination of records by Comptroller General.
12–7.302–7 Federal, state, and local taxes.
12–7.302–8 Utilization of small business concerns.
12–7.302–9 Default.
12–7.302–10 Termination for convenience of the Government.
12–7.302–11 Disputes.

12-7.651-15	Layout of work.
12-7.651-16	Value engineering incentive.

Subpart 12-7.50—Procurement of Mortuary Services

Sec.	
12-7.5000	Scope.
12-7.5001	Required clauses.
12-7.5001-1	Definitions.
12-7.5001-2	Payments.
12-7.5001-3	Assignment of claims.
12-7.5001-4	Federal, State, and local taxes.
12-7.5001-5	Termination for convenience of the Government.
12-7.5001-6	Default.
12-7.5001-7	Disputes.
12-7.5001-8	Convict labor.
12-7.5001-9	Contract Work Hours Standards Act—overtime compensation.
12-7.5001-10	Officials not to benefit.
12-7.5001-11	Covenant against contingent fees.
12-7.5001-12	Gratuities.
12-7.5001-13	Equal opportunity.
12-7.5001-14	Examination of records by Comptroller General.
12-7.5001-15	Requirements.
12-7.5001-16	Contract period.
12-7.5001-17	Area of performance.
12-7.5001-18	Specifications.
12-7.5001-19	Using activities.
12-7.5001-20	Delivery orders and invoices.
12-7.5001-21	Delivery and performance.
12-7.5001-22	Subcontracting.
12-7.5001-23	Additional default provision.
12-7.5001-24	Inspection.
12-7.5001-25	Group interment.
12-7.5001-26	Professional requirements.
12-7.5001-27	Facility requirements.
12-7.5001-28	Preparation history.
12-7.5001-29	Changes.
12-7.5001-30	Inconsistent provisions.
12-7.5001-31	Coordination.
12-7.5001-32	Preparation of remains at other than contractor's establishment.
12-7.5001-33	Major restorative art.
12-7.5001-34	Passenger car.

Subpart 12-7.51—Clauses for Architect-Engineer Contracts

Sec.	
12-7.5100	Scope.
12-7.5100-1	Amendment of Standard Form 253.
12-7.5101	Required clauses.
12-7.5101-1	Composition of contractor.
12-7.5101-2	Interpretation of modification
12-7.5101-3	Dissemination of contract information.
12-7.5101-4	Inspection.
12-7.5101-5	Notice of delays.
12-7.5101-6	Certification of drawings and other documents.
12-7.5101-7	Gratuities.
12-7.5102	Clauses to be used when applicable.
12-7.5102-1	Military security requirements.
12-7.5102-2	Audit and records.
12-7.5102-3	Price reduction for defective cost or pricing data.
12-7.5102-4	Subcontractor cost or pricing data.
12-7.5102-5	Architectural designs and data—Government rights (sole property).
12-7.5102-6	Renegotiation.
12-7.5103	Additional clauses.
12-7.5101-1	Method of payment.
12-7.5103-2	Preparation of specifications.
12-7.5103-3	Construction cost limitations.
12-7.5103-4	Building codes

Subpart 12-7.52—Clauses for Fixed-Price Vessel Repair, Alteration, or Conversion Contracts

Sec.	
12-7.5200	Scope of subpart.
12-7.5201	Required clauses.
12-7.5201-1	Delivery and shifting of vessel.
12-7.5201-2	Performance.
12-7.5201-3	Inspection and manner of doing work.
12-7.5201-4	Subcontracts.
12-7.5201-5	Lay days.
12-7.5201-6	Changes.
12-7.5201-7	Extras.
12-7.5201-8	Payments.
12-7.5201-9	Government-furnished property.
12-7.5201-10	Liability and insurance.
12-7.5201-11	Title.
12-7.5201-12	Discharge of liens.
12-7.5201-13	Federal, State, and local taxes.
12-7.5201-14	Default.

AUTHORITY: Sec 205(c), 63 Stat. 389; 40 U.S.C. 486(c), 10 U.S.C. 2301-2314.

§ 12-7.000 Scope of part.

This part sets forth all contract clauses for use in connection with the procurement of supplies and services.

Subpart 12-7.1—Clauses for Fixed Price Supply Contracts

§ 12-7.100 Scope of subpart.

This subpart sets forth uniform clauses for use in fixed price supply contracts.

§ 12-7.101 Applicability.

The clauses set forth or cited in this subpart shall be used when required, or as applicable or additional clauses in all fixed-price supply contracts cited in FPR 1-7.101.

§ 12-7.102-1 Definitions.

Insert the clauses set forth in FPR forth in FPR Subpart 1-7.102.

§ 12-7.102 Definitions.

Insert the clause set forth in FPR 1-7.102-1.

§ 12-7.102-2 Changes.

Insert the clause set forth in FPR 1-7.102-2.

12-7.102-3 Extras.

Insert the clause set forth in FPR 1-7.102-3.

§ 12-7.102-4 Variation in quantity.

Insert the clause set forth in FPR 1-7.102-4.

§ 12-7.102-450 Extent of quantity variation.

The following clause is prescribed for use in accordance with DOTPR 12-1.353.

V 42 174 SEP 8 77 UMI

EXTENT OF QUANTITY VARIATION

The permissible variation under the clause of the General Provisions entitled "Variation in Quantity" shall be limited to:

Increase (insert: ------ percent or none)
Decrease (insert: ------ percent or none)

This increase or decrease shall apply to ------. (Insert in the blank the designation(s) to which the percentages apply, such as (1) the total contract quantity; (2) Item 1 only; (3) each quantity specified in the delivery schedule of the "Time or Delivery" clause; (4) the total item quantity for each destination; (5) the total quantity of each item without regard to destination.)

(End of clause)

§ 12–7.102–5 Inspection.

Insert the clause set forth in FPR 1–7.102–5.

§ 12–7.102–6 Responsibility for supplies.

Insert the clause set forth in FPR 1–7.102–6.

§ 12–7.102–7 Payments.

Insert the clause set forth in FPR 1–7.102–7.

§ 12–7.102–8 Assignment of claims.

Insert the clause set forth in FPR1–30.703 under the conditions contained therein.

Subpart 12–7.1—Clauses for Fixed Price Supply Contracts

§ 12–7.102–9 [Reserved]

§ 12–7.102–10 Federal, State, and local taxes.

Insert the clauses cited in FPR 1–7.102–10 as prescribed therein.

§ 12–7.102–11 Default.

Insert the clause set forth in FPR 1–8.707 as prescribed in FPR 8–700–2(b)(1).

§ 12–7.102–12 Disputes.

Insert the clause set forth in FPR 1–7.102–12.

§ 12–7.102–13 [Reserved]

§ 12–7.102–14 Buy American Act.

Insert the clause set forth in FPR 1–6.104–5 as prescribed therein.

§ 12–7.102–15 Contract work hours and Safety Standards Act—overtime compensation

Insert the clause set forth in FPR 1–12.303 as prescribed in FPR 1–12.302.

§ 12–7.102–16 Equal opportunity.

Insert the clause set forth in FPR 1–12.803–2 as prescribed in FPR 1–12.803–1.

§ 12–7.102–17 Officials not to benefit.

Insert the clause set forth in FPR 1–7.102–17.

§ 12–7.102–18 Covenant against contingent fees.

Insert the clause set forth in FPR 1–1.503 as prescribed in FPR 1–1.501.

§ 12–7.102–19 Termination for convenience of the Government.

Insert the clause cited in FPR 1–7.102–19 as prescribed therein.

§ 12–7.102–20 Pricing of adjustments.

Insert the clause set forth in FPR 1–7.102–20.

§ 12–7.102–21 Employment of the handicapped.

Insert the clause set forth in FPR Temporary Regulation No. 38, May 1976.

§ 12–7.102–22 Payment of interest on contractor's claim.

Insert the clause set forth in FPR 1–1.322 as prescribed therein.

§ 12–7.102–23 Clean air and water.

Insert the clause set forth in FPR 1–1.2302–2 as prescribed therein.

§ 12–7.103 Clauses to be used when applicable.

§ 12–7.103–1 Clauses for fixed-price supply contracts involving construction.

Insert the clauses cited in FPR 1–7.103–1 under the conditions prescribed therein.

§ 12–7.103–2 Additional bond security.

Insert the clause set forth in FPR 1–7.103–2.

§ 12–7.103–3 Examination of records by the Comptroller General.

§ 12–7.103–23 Late offers and modifications or withdrawals.

Insert the provisions cited in FPR 1–7.103–23 under the conditions prescribed therein.

§ 12–7.103–24 Contracts with the Small Business Administration.

Insert the clause(s) cited in FPR 1–7.103–24 under the conditions prescribed therein.

§ 12–7.103–25 Supplementary tax clauses.

Insert the clause(s) cited in FPR 1–7.103–25 under the conditions prescribed therein.

§ 12–7.103–26 Preference for U.S. flag air carriers.

Insert the clause set forth in FPR 1–1.323–2 under the conditions prescribed therein.

§ 12–7.103–27 Cost accounting standards.

Insert the notices and clauses cited in FPR 1–7.103–27 under the conditions prescribed therein.

§ 12–7.103–28 Subcontracts.

Insert the clause set forth in FPR 1–7.103–27 under the conditions prescribed therein.

§ 12–7.103–29 Privacy Act.

Insert the clause set forth in FPR 1–1.327–5 as amended below under the conditions prescribed therein.

Substitute the following for FPR 1.327–5 (b):

(b) The following notification shall be included in every solicitation and in every contract when performance of work under the contract may involve the design, development, and/or operation of a system of records on individuals for an agency function.

PRIVACY ACT NOTIFICATION

Performance of work by the contractor under this procurement action may involve the design, development and/or operation of a system of records on individuals that is to be operated by the contractor to accomplish an agency function. When such work is to be performed, the contractor shall comply with the Privacy Act of 1974, Pub. L. 93–579, December 31, 1974 (5 U.S.C. 552a) and applicable agency regulations. Violations of the Act may involve the imposition of criminal penalties.

Substitute the following for FPR 1.327–5 (c):

(c) The following clause shall be included in every solicitation and in every contract when the performance of work thereunder may involve the design, development, or operation of a system of records on individuals that is to be operated by the contractor to accomplish an agency function, regardless of whether the system is the primary purpose of the contract.

PRIVACY ACT

(a) The contractor agrees: (1) To comply with the Privacy Act of 1974 (the Act) and the rules and regulations issued pursuant to the Act when performance under the contract involves the design, development, or operation of any system of records on individuals to be operated by the contractor in order to accomplish an agency function;

(2) To notify the Government when he anticipates operating a system of records in order to accomplish the requirements of this contract, if such system contains information about individuals which will be retrieved by the individual's name or other identifier assigned to the individual. A system of records subject to the Act may not be employed in the performance of this contract until the necessary approval and publication requirements applicable to the system have been carried out. The contractor agrees to correct, maintain, disseminate, and use such records in accordance with the requirements of the Act, and to comply with all applicable requirements of the Act;

(3) To include the Privacy Act Notification contained in this contract in every subcontract solicitation and in every subcontract when the performance of work under the proposed subcontract may involve the design, development, or operation of a system of records on individuals that is to be operated under the contract to accomplish an agency function; and

(4) To include this clause, including this paragraph, in all subcontracts under which work for this contract is performed or which is awarded pursuant to this contract when the performance of work under the subcontract may involve the design, development, or operation of such a system of records.

(b) For the purposes of the Act, when the contract involves the operation of a system of records on individuals to accomplish an agency function, the contractor and any employee of the contractor is considered to be an employee of the agency, and the requirements of the Act, including the civil and criminal penalties for violation of the Act, are applicable except that the criminal penalties shall not apply with regard to contracts effective prior to September 27, 1975. In addition, failure to comply with the provisions of the Act or of this clause will make this contract subject to termination for default as provided for in the general provisions of this contract.

(c) The terms used in this clause have the following meanings: (1) "Operation of a system of records" means performance of any of the activities associated with maintaining the system of records including the collection, use, and dissemination of records.

(2) "Record" means any item, collection, or grouping of information about an individual that is maintained by an agency, including, but not limited to, his education, financial transactions, medical history, and criminal or employment history and that contains his name, or the identifying number, symbol, or other identifying particular assigned to the individual, such as a finger or voice print, or a photograph.

(3) "System of records" on individuals means a group of any records under the control of any agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual.

(End of clause)

§ 12–7.103–30 Clauses for solicitations and contracts for automatic data processing (ADP) equipment, software, maintenance services, and supplies.

Insert the clauses cited in FPR 1–7.103–30 as prescribed therein.

§ 12–7.103–31 Use of U.S. flag commercial vessels.

Insert the clause prescribed by FPR 1–19.108–2 under the conditions set forth therein.

§ 12–7.104 Additional clauses.

Insert the clauses cited in FPR Subpart 1–7.104 if it is desired to cover the subject matter.

§ 12–7.104–1 Liquidated damages provisions.

Insert the provisions set forth in FPR 1–1.315–3 under the conditions prescribed in FPR 1–1.315.

§ 12–7.104–2 Changes to "make-or-buy" program.

Insert the clause set forth in FPR 1–3.902–3 in all contracts containing a "make or buy" program.

§ 12–7.104–50 Fast payment provisions.

In accordance with DOTPR 12–3.653 insert the following clause in all fast payment orders:

FAST PAYMENT PROCEDURE

(a) *General.* This is a fast payment order. Invoices will be paid on the basis of the Contractor's delivery to a post office, common carrier, or, in shipment by other means, to the point of first receipt by the Government.

(b) *Responsibility for supplies.* Title to the supplies shall vest in the Government upon delivery to a post office or common carrier for shipment to the specific destination. If shipment is by means other than post office or common carrier, title to the supplies shall vest in the Government upon delivery to the point of first receipt by the Government. Notwithstanding any other provision of the purchase order, the contractor shall assume all responsibility and risk of loss for supplies (i) not received at destination, (ii) damaged in transit, or (iii) not conforming to purchase requirements. The Contractor shall either replace, repair, or correct such supplies promptly at his expense, *Provided*, Instructions to do so are furnished by the Contracting Officer within ninety (90) days from the date title to the supplies vests in the Government.

(c) *Preparation of invoice.* (1) Upon delivery of supplies to a post office, common carrier, or in shipments by other means, the point of first receipt by the Government, the Contractor shall prepare an invoice in accordance with the instructions in this order, except that invoices under a blanket purchase agreement shall be prepared in accordance with the provisions of the agreement. In shipments by either post office or common carriers, the Contractor shall either (A) cite on his invoice the date of shipment, name and address of carrier, bill of lading number or other shipment document number, or (B) attach copies of such documents to his invoice as evidence of shipment. In addition the invoice shall be prominently marked "Fast Pay." In case of delivery by other than post office of common carrier, a receipted copy of the Contractor's delivery document shall be attached to the invoice as evidence of delivery.

(2) If the purchase price excludes the cost of transportation, the contractor shall enter the prepaid shipping cost on the invoice as a separate item. The cost of parcel post insurance will not be paid by the Government. If transportation charges are separately stated on the invoice, the contractor agrees to retain related paid freight bills or other transportation billings paid separately for a period of three years and to furnish such bills to the Government when requested for audit purposes.

V 42 174 SEP 8 77 UMI

(d) *Certification of invoice.* The contractor agrees that the submission of an invoice to the Government for payment is a certification that the supplies for which the Government is being billed have been shipped or delivered in accordance with shipping instructions issued by the ordering officer, in the quantities shown on the invoice, and that such supplies are in the quantity and of the quality designated by the cited purchase order.

(End of provisions)

§ 12–7.150 Required DOTPR clauses.

The following clauses shall be inserted in all fixed price supply contracts exceeding $10,000, except where they are clearly inappropriate for use (e.g., contracts for subsistence supplies). Additional clauses may be used which are considered by each Administration to be essential to its operations.

§ 12–7.150–1 Gratuities.

GRATUITIES

(a) The Government may, by written notice to the Contractor, terminate the right of the Contractor to proceed under this contract if it is found, after notice and hearings, by the agency head or his duly authorized representative, that gratuities (in the form of entertainment, gifts, or otherwise) were offered or given by the Contractor, or any agent or representative of the Contractor, to any officer or employee of the Government with a view toward securing a contract or securing favorable treatment with respect to the awarding or amending, or the making of any determinations with respect to the performing of such contract; *Provided*, That the existence of the facts upon which the agency head or his duly authorized representative makes such findings shall be in issue and may be reviewed in any competent court.

(b) In the event this contract is terminated as provided in paragraph (a) hereof, the Government shall be entitled (i) to pursue the same remedies against the Contractor as it could pursue in the event of a breach of the contract by the Contractor (ii) as a penalty in addition to any other damages to which it may be entitled by law, to exemplary damages in an amount (as determined by the agency head or his duly authorized representative) which shall be not less than three or more than ten times the cost incurred by the Contractor in providing any such gratuities to any such officer or employee.

(c) The rights and remedies of the Government provided in this clause shall not be exclusive and are in addition to any other rights and remedies provided by law or under this contract.

(End of clause)

§ 12–7.150–2 New materials.

NEW MATERIALS

Except as to any supplies or components which the contract specifically provides need not be new, all supplies and components to be provided under this contract shall be new (not used or reconditioned, and not of such age or so deteriorated as to impair their usefulness or safety), of current production, and of the most suitable grade for the purpose intended. If at any time during the performance of this contract the Contractor believes that the furnishing of supplies or components which are not new is necessary or desirable, he shall notify the Contracting Officer immediately, in writing, including the reasons therefor and proposing any consideration which will flow to the Government if authorization to use such supplies is granted.

(End of clause)

§ 12–7.150–3 Priorities, allocations, and allotments.

PRIORITIES, ALLOCATIONS, AND ALLOTMENTS

The Contractor shall follow the provisions of DMS Reg. 1 and all other applicable regulations and orders of the Business and Defense Services Administration in obtaining controlled materials and other products and materials required for the performance of this contract.

(End of clause)

§ 12–7.150–4 Interpretation or modification.

INTERPRETATION OR MODIFICATION

No oral statement of any person, and no written statement of anyone other than the Contracting Officer, or his authorized representative designated in accordance with section 12–1.402–50 of the DOT Procurement Regulations (41 CFR 12–1.402–50), acting within the limits of his authority specified in such designation, shall modify or otherwise affect any provision of the contract.

(End of clause)

§ 12–7.150–5 Notice of readiness for inspection.

NOTICE OF READINESS FOR INSPECTION

(a) If the contract provides for inspection at the Contractor's plant, the Contractor shall give the Contracting Officer at least 5 days' (unless a longer period is specified in the Schedule) written or telegraphic notice of readiness for inspection in cases where no security clearance is required for the Government Inspector. In cases where security clearance is required for the Government Inspector to obtain access to the Contractor's plant, the Contractor shall also advise the Contracting Officer and give at least 8 days' notice of readiness for inspection.

(b) In those cases where a Government Inspector is assigned to the plant for the purpose of conducting continuous inspections of production on the contract, and he is otherwise kept informed of the progress of production, the written notices specified in (a) above need not be given.

(End of clause)

§ 12–7.150–6 Definition of delivery terms.

DEFINITION OF DELIVERY ITEMS

The meaning of delivery terms used in this contract such as "f.o.b. origin", "f.o.b. destination", "f.a.s. vessel, port of shipment", and other delivery terms shall be as those terms are defined in subpart 1–19.3 of the Federal Procurement Regulations (41 CFR 1–19.3).

(End of clause)

12–7.150–7 Evidence of delivery.

EVIDENCE OF DELIVERY

When the contract delivery point is "f.o.b. origin", evidence of delivery shall be submitted with invoices. In the case of freight or express shipment, this evidence shall be in the form of memorandum copies of Bills of Lading duly receipted by the carrier. In the case of parcel post shipments this evidence shall be by Post Office Certificate of Mailing, Form 3817. If the invoice submitted for payment is not accompanied by evidence of delivery, discounts for prompt payment will be computed from date of receipt of such evidence of delivery, when the contract delivery point is other than "f.o.b. origin", evidence of delivery will be obtained from the consignee.

(End of clause)

12–7.150–8 Withholding payment for nondelivery of data.

When the contract requires data to be furnished, its timely delivery is important. The clause set forth below is designed to insure timely delivery of complete and current data. The clause provides for a withholding of a certain percentage of the contract price, but the contracting officer may specify a lesser amount in the schedule if circumstances warrant.

WITHHOLDING PAYMENT FOR NONDELIVERY OF DATA

(a) If technical data such as plans, drawings, reports, spare parts lists, repair parts lists, or the like, or instruction books (including manuscript or printer's copy), or any part thereof, are not delivered within the time specified by this contract or are deficient upon delivery, the Contracting Officer shall, at his discretion, withhold from each invoice a percentage of the contract price in accordance with the following table:

When total contract price is:

	Percentage to be withheld is—
Less than $250,000	10
$250,000 to $1,000,000	5
Over $1,000,00	2

(b) The withholding of any sums pursuant to this clause shall not be construed as, or constitute in any manner, a waiver by the Government of the Contractor's obligation to furnish the data required under this contract. In the event the Contractor fails to furnish these items, the Government shall have those rights and remedies provided by law and pursuant to this contract in addition to, and not in lieu of, the sums withheld in accordance with this clause.

(End of clause)

§ 12–7.150–9 Notice of delays.

NOTICE OF DELAYS

(a) Whenever the Contractor encounters any difficulty which is delaying or threatens to delay the timely performance of this contract (including actual or potential labor disputes), the Contractor shall immediately give notice thereof in writing to the Contracting Officer, stating all relevant information with respect thereto. Such notice shall not in any way constitute a basis for an extension of the delivery schedule or be construed as a waiver by the Government of any rights or remedies to which it is entitled by law or pursuant to provisions of this contract. Failure to give such notice, however, may be grounds for denial of any request for an extension of the delivery schedule because of such delay.

(b) The Contractor agrees to insert the substance of this clause, including this paragraph (b), in any subcontract hereunder; except that each such subcontract shall provide that in the event its timely performance is delayed or threatened by delay, the subcontractor shall immediately notify his next higher tier subcontractor, or the prime contractor, as the case may be, of all relevant information with respect thereto.

(End of clause)

12–7.150–10 Dissemination of contract information.

DISSEMINATION OF CONTRACT INFORMATION

The Contractor shall not publish, permit to be published, or distribute for public consumption, any information, oral or written, concerning the results or conclusions made pursuant to performance of this contract, without prior written consent of the Contracting Officer. (Two copies of any material proposed to be published or distributed shall be submitted to the Contracting Officer.)

(End of clause)

12–7.150–11 Authorization and consent.

Insert the following clause under the conditions prescribed in DOTPR 12–9.–151–1.

AUTHORIZATION AND CONSENT

The Government hereby gives its authorization and consent (without prejudice to any rights of indemnification) for all use and manufacture, in the performance of this contract or any part hereof or any amendment hereto or any subcontract hereunder (including any lower tier subcontract, of any invention described in and covered by a patent of the United States (i) embodied in the structure or composition of any article the delivery of which is accepted by the Government under this contract, or (ii) utilized in the machinery, tools, or methods the use of which necessarily results from compliance by the Contractor or the using subcontractor with (a) specifications or written provisions now or hereafter forming a part of this contract, or (b) specific written instructions given by the Contracting Officer directing the manner of performance. The entire liability to the Government for infringement of a patent of the United States shall be determined solely by the provisions of the indemnity clauses, if any, included in this contract or any subcontract hereunder (including any lower tier subcontract), and the Government assumes liability for all other infringement to the extent of the authorization and consent hereinabove granted.

(End of clause)

§ 12–7.150–12 Background patents (license).

Insert the following clause under the conditions prescribed in DOTPR 12–9.150.

BACKGROUND PATENTS (LICENSE)

(a) "Product" as used herein means a process, machine article of manufacture, or composition of matter the same as, or substantially the same as, that worked on under the contract.

(b) "Background patent" as used herein means any United States patent, under which the Contractor has the right to license others, and which covers the manufacture, use or sale of any product.

(c) When the Secretary determines:

(1) That a product is required by members of the public in the interest of the public health, safety, or welfare; and,

(2) That neither the Contractor, nor any other person deriving rights from his patents, has produced the product at a reasonable price, in sufficient, quantity, and at a level of quality to meet public needs;

the Contractor shall, on written application, issue appropriate licenses to others under any Background Patent on reasonable terms, such licenses to be restricted to the production, sale, and use of the product.

(d) when the Secretary has made the determination set forth in (c) above, the Contractor (or those deriving rights from the Contractor) shall not seek injunctive relief to enforce a Background Patent without:

(1) Previously advising the General Counsel, Office of the Secretary, Department of Transportation;

(2) Granting the Government the right to intervene in the injunction proceeding; and

(3) Disclosing the commitment set out in this clause to the court from which the injunction is sought.

(End of clause)

§ 12–7.151 DOTPR clauses to be used when applicable.

The following clauses shall be included in the contract when their use is appropriate.

§ 12–7.151–1 Patent indemnity.

In accordance with DOTPR 12–9.152–1 and DOTPR 12–9.152–3, insert the following clause or clauses under the conditions prescribed therein.

(a) *Patent indemnity.* If the amount of this contract is in excess of $10,000, the Contractor shall indemnify the Government and its officers, agents, and employees against liability, including costs, for infringement of any United States letters patent (except letters patent issued upon an application which is now or may hereafter be kept secret or otherwise withheld for issue by order of the Government) arising out of the manufacture or delivery of supplies or out of construction, alteration, modification, or repair of real property (hereinafter referred to as "construction work") under this contract, or out of the use or disposal by or for the account of the Government of such supplies or construction work. The foregoing indemnity shall not apply unless the Contractor shall have been informed as soon as practicable by the Government of the suit or action alleging such infringement, and shall have been given such opportunity as is afforded by applicable laws, rules, or regulations to participate in the defense thereof; and further, such indemnity shall not apply to : (i) an infringement resulting from compliance with specific written instructions of the Contracting Officer directing a change in the supplies to be delivered or in the materials or equipment to be used, or directing a manner of performance of the contract not normally used by the Contractor; (ii) an infringement resulting from addition to, or change in, such supplies or components furnished or construction work performed which addition or change was made subsequent to delivery or performance by the Contractor; or (iii) a claimed infringement which is settled without the consent of the Contractor, unless required by final decree of a court of competent jurisdiction.

(End of clause)

(b) *Waiver of indemnity.* Any provision of this contract to the contrary notwithstanding, the Government hereby authorizes and consents to use and manufacture, solely in the performance of this contract, of any invention covered by the United States patents identified and listed below, and waives indemnification by the Contractor with respect to such patents: (Identify the patents by number or by other means if more appropriate).

(End of clause)

§ 12–7.151–2 Filing of patent applications.

Insert the following clause under the conditions prescribed in DOTPR 12–9.154.

FILING OF PATENT APPLICATIONS

(a) Before filing or causing to be filed a patent application in the United States disclosing any subject matter of this contract, which subject matter is classified "Secret" or higher, the Contractor shall, citing the thirty (30) day provision below, transmit the proposed application to the Contracting Officer for determination whether, for reasons of national security, such application should be placed under an order of secrecy or sealed in accordance with the provisions of 35 U.S.C 181–188 or the issuance of a patent should be otherwise delayed under pertinent United States statutes or regulations; and the Contractor shall observe any instructions of the Contracting Officer with respect to the manner of delivery of the patent application to the United States Patent Office for filing, but the Contractor shall not be denied the right to file such patent application. If the contracting Officer shall not have given any such instructions within thirty (30) days from the date of mailing or other transmittal of the proposed application, the Contractor may file the application.

(b) The Contractor shall furnish to the Contracting Officer, at the time of or prior to the time when the Contractor files or causes to be filed a patent application in the United States disclosing any subject matter of this contract, which subject matter is classified "Confidential", a copy of such application for determination whether, for reasons of national security, such application should be placed under an order of secrecy or the issuance of a patent should be otherwise delayed under pertinent United States statutes or regulations.

(c) Where the subject matter of this contract is classified for reasons of security, the Contractor shall not file, or cause to be filed in any country, other than in the United States as provided in (a) and (b) of this clause, an application or registration for a patent containing any of said subject matter without first obtaining written approval of the Contracting Officer.

(d) When filing any patent application coming within the scope of this clause, the Contractor shall observe all applicable security regulations covering the transmission of classified subject matter, and shall also promptly furnish to the Contracting Officer the serial number, filing date, and name of country of any such patent application. When transmitting the application to the United States Patent Office, the Contractor shall by separate letter identify by agency and number the contract or contracts which require security classification markings to be placed on the application.

(e) The substance of this clause shall be included in all subcontracts which cover or are likely to cover classified subject matter.

(End of clause)

§ 12–7.151–3 Reporting of royalties (foreign).

Insert the following clause under the conditions prescribed in DOTPR 12–9.156 (d) (1).

REPORTING OF ROYALTIES (FOREIGN)

(a) If this contract is in an amount which exceeds fifty thousand United States dollars ($50,000), the Contractor shall report in writing to the Contracting Officer during the performance of this contract the amount of royalties paid or to be paid by the Contractor directly to others in the performance of this contract. The Contractor shall also (i) furnish in writing any additional information relating to such royalties as may be requested by the Contracting Officer, and (ii) insert a provision similar to this clause in any

V 42 I 174 SEP 8 77 UMI

subcontract hereunder which involves an amount in excess of the equivalent of fifty thousand United States dollars ($50,000).

(b) The term "royalties" as used herein refers to any costs or charges in the nature of royalties, license fees, patent or license amortization costs, or the like for the use of or for rights in patents or patent applications.

(End of clause)

§ 12–7.151–4 Refund of royalties.

Insert the following clause under the conditions prescribed in DOTPR 12–9.157.

REFUND OF ROYALTIES

(a) The contract price includes certain amounts for royalties payable by the Contractor or subcontractors or both, which amounts have been reported to the Contracting Officer.

(b) The term "royalties" as used in this clause refers to any costs or charges in the nature of royalties, license fees, patent or license amortization costs, or the like, for the use or for rights in patents and patent applications in connection with the performance of this contract or any subcontracts hereunder.

(c) The Contractor shall furnish to the Contracting Officer, before final payment under this contract, a statement of royalties paid or required to be paid in connection with the performance of this contract and subcontracts hereunder together with the reasons therefor.

(d) The Contractor will be compensated for royalties reported under (c) above only to the extent that such royalties were included in the contract price and are determined by the Contracting Officer to be properly chargeable to the Government and allocable to the contract. Therefore, to the extent that any royalties which are included in the contract price are not in fact paid by the Contractor or are determined by the Contracting Officer not to be properly chargeable to the Government and allocable to the contract, the contract price shall be reduced. Repayment or credit to the Government shall be made as the Contracting Officer directs.

(e) If, at any time within three (3) years subsequent to final payment under this contract, the Contractor for any reason is relieved in whole or in part from the payment of the royalties included in the final contract price as adjusted pursuant to paragraph (d) above, the Contractor shall promptly notify the Contracting Officer of that fact and shall reimburse the Government in a corresponding amount.

(f) The substance of this clause, including this paragraph (f), shall be included in any subcontract in which the amount of royalties reported during negotiation of the subcontract exceeds $250.

(End of clause)

§ 12–7.151–5 Rights in data—unlimited.

Insert the following clause under the conditions prescribed in DOTPR 12–9.201–1(a). Alterations in the clause may be made under the conditions prescribed in DOTPR 12–9.201–2.

RIGHTS IN DATA—UNLIMITED

(a) The term "subject data" as used herein means recorded information, whether or not copyrighted, that is delivered or specified to be delivered under this contract. The term includes graphic or pictorial delineations in media such as drawings or photographs; text in specifications or related performance or photographs; design-type documents; machine forms such as punched cards, magnetic tape, or computer memory printouts; and information retained in computer memory. Examples include, but are not limited to, engineering drawings and associated lists, specifications, standards, process sheets, manual, technical reports, catalog item identifications, and related information. The term does not include financial reports, cost analyses, and similar information incidental to contract administration.

(b) (1) The Government may duplicate, use, and disclose, in any manner and for any purpose whatsoever, and have others to so do, all subject data delivered under this contract.

(2) The Contractor agrees to and does hereby grant to the Government, and to its officers, agents and employees acting within the scope of their official duties, a royalty-free, non-exclusive, irrevocable license throughout the world, to publish, translate, deliver, perform, dispose of, and to authorize others to so do, all subject data now or hereafter covered by copyright.

(3) The Contractor shall report to the Contracting Officer promptly and in reasonably written detail, each notice or claim of copyright infringement with respect to all subject data delivered under this contract.

(c) Nothing contained in this clause shall imply a license to the Government under any patent or be construed as affecting the scope of any license or other right otherwise granted to the Government under any patent.

(d) The Contractor shall not affix any restrictive markings upon any subject data, and if such markings are affixed, the Government shall have the right at any time to modify, remove, obliterate or ignore any such markings.

(End of clause)

§ 12–7.151–6 Rights in data—title.

Insert the following clause under the conditions prescribed in DOTPR 12–9.201–1(b). Alterations in the clause may be made under the conditions prescribed in DOTPR 12–9.201–2.

RIGHTS IN DATA—TITLE

(a) The term "subject data" as used herein means recorded information, whether or not copyrighted, that is delivered or specified to be delivered under this contract. The term includes graphic or pictorial delineations in media such as drawings or photographs; text in specifications or related performance or design-type documents; machine forms such as punched cards, magnetic tape, or computer memory printouts; and information retained in computer memory. Examples include, but are not limited to, engineering drawings and associated lists, specifications, standards, process sheets, manuals, technical reports, catalog item identifications, and related information. The term does not include financial reports, cost analyses, and similar information incidental to contract administration.

(b) (1) The Government may duplicate, use, and disclose, in any manner and for any purpose whatsoever, and have others to so do, all subject data delivered under this contract.

(2) The Contractor agrees to and does hereby grant to the Government, and to its officers, agents and employees acting within the scope of their official duties, a royalty-free, non-exclusive, irrevocable license throughout the world (1) to publish, translate, reproduce, deliver, perform, use, and dispose of, in any manner, any and all data not first produced or composed in the performance of this contract but which is incorporated in the work furnished under this contract; and (2) to authorize others so to do.

(d) The Contractor shall indemnify and save and hold harmless the Government, its officers, agents and employees acting within the scope of their official duties against any liability, including costs and expenses, resulting from any willful or intentional violation by the Contractor of proprietary rights, copyrights, or right of privacy, arising out of the publication, translation, reproduction, delivery, performance, use, or disposition of any data furnished under this contract.

(e) Nothing contained in this clause shall imply a license to the Government under any patent or be construed as affecting the scope of any license or other right otherwise granted to the Government under any patent.

(f) Paragraphs (c) and (d) above are not applicable to material furnished to the Contractor by the Government and incorporated in the work furnished under the contract; *Provided*, Such incorporated material is identified by the Contractor at the time of delivery of such work.

(End of clause)

§ 12–7.151–7 Recovery of developmental costs.

Insert the following clause under the conditions prescribed in DOTPR 12–9.702.

RECOVERY OF DEVELOPMENTAL COSTS

(a) As may be determined by the contracting officer to be fair, reasonable and equitable, the contractor shall pay to the Government up to 5% of sums hereafter received by or credited to the Contractor or its privies (including subcontractors) on sales or leases (exclusive of sales or leases to the U.S. Government, either directly or indirectly through Government prime contractors or subcontractors) of any product which is substantially the same in design as, or which is directly derived from, that developed by the Contractor or any of its subcontractors in the performance of this contract.

(b) In selling or leasing the product identified in paragraph (a) above to the Government, either directly or indirectly through Government prime Contractors or subcontractors, the Contractor or its privies (including subcontractors) shall notify the purchaser or lessee in writing that the product was developed under a Department of Transportation contract containing a Recovery of Development Costs clause and that the purchase or lease price of such product is less than the price of such product when sold or leased to other than the Government by an amount no less than the Government's share under the Recovery of Developmental Costs clause. A copy of each such notice shall be sent to the Contracting Officer. In the event the product is sold or leased to the Government, the amount by which the sales or lease price was reduced by virtue of this clause shall be credited to the amount recoverable under this clause.

(c) As may be determined by the Contracting Officer to be fair, reasonable and equitable, the Contractor shall also pay to the Government up to 33% of all sums hereafter received by, or credited to, the Contractor or its privies (including subcontractors) as payments under technical agreements permitting others (1) to sell, lease, or manufacture the product identified in paragraph (a) above, or (2) to use any process which is substantially the same as, or which is directly derived from, that developed by the Contractor or any of its subcontractors in the performance of this contract.

(d) Recovery by the Government under this clause shall be limited to amounts paid and credited to the Contractor under this contract Payments to the Government under this clause shall not be so high as to destroy the Contractor's competitive position for the product involved, provided that the product is otherwise reasonably priced and efficiently and economically produced.

(e) The Contractor shall report to the Government all sales leases, licensing agreements royalties and receipts, which might reasonably be considered to be subject to this clause; and the Contractor shall promptly render accurate, certified accounts thereon to the Government at reasonable intervals

(End of clause)

§ 12–7.151–8 Government - furnished property.

(a) Except as provided in (b) and (c) below, insert the following clause in the contract when property will be furnished by the Government in the performance of this contract:

GOVERNMENT-FURNISHED PROPERTY

(a) *Property administration* The Contractor shall establish and administer a system to control, protect, preserve and maintain Government property in his possession or under his control or that of his subcontractors Such a system must be satisfactory to the Contracting Officer and in accordance with this clause and any other requirements of the contract.

(b) *Government-furnished property* (1) The Government shall deliver to the Contractor for use in connection with and under the terms of this contract, the property described as Government-furnished property in the Schedule or specifications, together with such related data and information as the Contractor may request and as may reasonably be required for the intended use of such property (hereinafter referred to as "Government-furnished property")

(2) The delivery or performance dates for the supplies or services to be furnished by the Contractor under this contract are based upon the expectation that Government-furnished property suitable for use will be delivered to the Contractor at the time stated in the Schedule or, if not so stated, in sufficient time to enable the Contractor to meet such delivery or performance dates.

(3) If the Schedule does not state a date when Government-furnished property will be delivered, the Contractor shall notify the Contracting Officer in writing of the date by which he requires such property to meet the contract delivery or performance dates. The Contractor shall allow a minimum of 30 days for delivery of Government-furnished property unless a different time is specified in the Schedule. If not received five days before the date it is required by the Contractor, the Contracting Officer shall be so notified.

(4) If Government-furnished property is not delivered to the Contractor by the date specified in the Schedule, or by the date specified by the Contractor pursuant to (3) above, the Contracting Officer shall, upon timely request made by the Contractor, make a determination of the delay, if any, occasioned the Contractor and shall equitably adjust the delivery or performance dates or the contract price, or both, and any other contractual provision affected by any such delay in accordance with the procedures of the "Changes" clause of this contract.

(5) In the event that Government-furnished property is received by the Contractor in a condition not suitable for intended use (except for such property furnished "as is" or otherwise specified), the Contractor shall, upon receipt thereof, notify the Contracting Officer of such fact and, as directed by the Contracting Officer, either (i) return such property at the Government's expense or otherwise dispose of the property, or (ii) effect repairs or modifications. Upon completion of (i) or (ii) above, the Contracting Officer upon request of the Contractor shall equitably adjust the delivery or performance dates or the contract price or both, and any other contractual provisions affected by the return or disposition, or the repair or modification, in accordance with the procedures of the "Changes" clause of this contract.

(6) The foregoing provisions for adjustment are exclusive and the Government shall not be liable to suit for breach of contract by reason of any delay in delivery of Government-furnished property or delivery of such property in a condition not suitable for its intended use.

(c) *Changes in Government-furnished property.* (1) By notice in writing, the Contracting Officer may (i) decrease the property provided or to be provided by the Government under this contract, or (ii) substitute other Government-owned property for property to be provided by the Government or to be acquired by the Contractor for the Government under this contract. The Contractor shall promptly take such action as the Contracting Officer may direct with respect to the removal and shipping of property covered by such notice.

(2) In the event of any decrease in or substitution of property pursuant to subparagraph (1) above, or any withdrawal of authority to use property provided under any other contract or lease, which property the Government had agreed in the Schedule to make available for the performance of this contract, the Contracting Officer, upon the written request of the Contractor or on his own initiative (if the substitution of property causes a decrease in the cost of performance), shall equitably adjust such contractual provisions as may be affected by the decrease substitution, or withdrawal, in accordance with the procedures provided for in the "Changes" clause of this contract.

(d) *Title to property.* Title to all property furnished by the Government shall remain in the Government. Title to Government property shall not be affected by the incorporation or attachment thereof to any property not owned by the Government, nor shall such Government property, or any part thereof, be or become a fixture or lose its identity as personalty by reason of affixation to any realty.

(e) *Use of Government-furnished property.* The Government-furnished property shall, unless otherwise provided herein or approved by the Contracting Officer, be used only for the performance of this contract.

(f) *Maintenance and repair of Government property.* The Contractor shall maintain and administer, in accordance with sound industrial practice, a program for the maintenance, repair, protection, and preservation of Government property, while in custody of the Contractor. In the event that any damage occurs to Government property the risk of which has been assumed by the Government under this contract, the Government shall replace such items or the Contractor shall make such repair of the property as the Government directs: *Provided, however,* That if the Contractor cannot effect such repair within the time required, the Contractor shall dispose of such property in the manner directed by the Contracting Officer. The contract price includes no compensation to the Contractor for the performance of any repair or replacement for which the Government is responsible, and an equitable adjustment will be made in any contractual provisions affected by such repair or replacement of Government property made at the direction of the Government in accordance with the procedures provided for in the "Changes" clause of this contract. Where replacement parts are provided at the expense of the Government, the parts which are displaced remain the property of the Government. Any repair or replacement for which the Contractor is responsible under the provisions of this contract shall be accomplished by the Contractor at his own expense.

(g) *Risk of loss.* Unless otherwise provided in this contract, the Contractor assumes the risk of, and shall be responsible for, any loss or damage to Government property provided under this contract upon its delivery to him or any of his subcontractors or upon passage of title thereto to the Government as provided in paragraph (d) hereof, except for reasonable wear and tear and except to the extent that such property is justifiably consumed in the performance of this contract. The Contractor shall not be liable for loss or destruction of or damage to Government property if such loss, destruction or damage is due to causes beyond the control and without the fault or negligence of the Contractor or any of his subcontractors.

(h) *Access.* The Government, and any persons designated by it, shall at all reasonable times have access to the premises wherein any Government property is located, for the purpose of inspecting the Government property, or inventorying the same, or removing any part or all of the same, or for determining compliance with terms of the contract.

(i) *Final accounting and disposition of Government property.* Upon the completion of this contract, or at such earlier dates as may be fixed by the Contracting Officer, the Contractor shall submit, in a form acceptable to the Contracting Officer, inventory schedules covering all items of Government property not justifiably consumed in the performance of this contract (including any resulting scrap) or not theretofore delivered to the Government, and shall prepare for shipment, deliver f.o.b. origin (unless otherwise provided in the contract), or dispose of the Government property, as may be directed or authorized by the Contracting Officer. The net proceeds of any such disposal shall be credited to the contract price or shall be paid in such other manner as the Contracting Officer may direct.

(j) *Notification.* The Contractor shall notify the Contracting Officer as soon as Government-furnished property is no longer required for performance of the contract. All shipments of Government-furnished property not delivered as an end item of the contract shall be effected only upon receipt of shipping instructions signed by the Contracting Officer or his duly authorized representative.

(k) *Restoration of Contractor's premises.* Unless otherwise provided herein, the Government: (1) May abandon any Government property in place, and thereupon all obligations of the Government regarding such abandoned property shall cease; (2) shall not be under any duty or obligation to restore or rehabilitate, or to pay the costs of the restoration or rehabilitation of, the Contractor's plant or any portion thereof which is affected by the abandonment or removal of any Government property; (3) shall be indemnified against all suits or claims arising out of the Government's failure to restore or rehabilitate the Contractor's property or the property of subcontractors, except for such damage

V 42 I 174 SEP 8 77 UMI

as may be occasioned by the negligence of the Government, its agents, its employees, or independent contractors.

(i) *Communications.* All communications issued pursuant to this clause shall be in writing.

NOTE.—If this contract is with other than a United States firm or individual, the terms "Government" or "Government-furnished", wherever they appear in the text, are defined as meaning "United States Government."

(End of clause)

(b) In negotiated fixed-price contracts, when the Contracting Officer determines it inappropriate to place liability on the contractor for loss, destruction, or damage to Government-furnished property (e.g., where the cost of insurance against the potential liability is so high as to be unjustified when the value of the property is compared to the contract price), paragraph (g) of the clause shall be deleted and the paragraph (g) set forth in ASPR 7-104.24(c) substituted therefor.

§ 12-7.151-9 Military security requirements.

Insert the following Military Security Requirements clause (ASPR 7-104.12) in the contract in accordance with instructions for its use in DOTPR 12-1.352:

MILITARY SECURITY REQUIREMENTS (1971 APR)

(a) The provisions of this clause shall apply to the extent that this contract involves access to information classified "Confidential," "Secret" or "Top Secret."

(b) The Contractor shall comply with (i) the Security Agreement (DD Form 441), including the attached Department of Defense Industrial Security Manual for Safeguarding Classified Information (DOD 5220.22-M); and (ii) any revisions thereto, notice of which has been furnished to the Contractor.

(c) If, subsequent to the date of this contract, the security classification or security requirements under this contract are changed by the Government as provided in this clause and the security costs or time required for delivery under this contract are thereby increased or decreased, the contract price, delivery schedule, or both and any other provision of the contract that may be affected shall be subject to an equitable adjustment by reason of such increased or decreased costs. Any equitable adjustment shall be accomplished in the same manner as if such changes were directed under the "Changes" clause of this contract.

(d) The Contractor agrees to insert in all subcontracts hereunder which involve access to classified information provisions which shall conform substantially to the language of this clause, including this paragraph (d) but excluding the last sentence of paragraph (c) of this clause.

(End of clause)

§ 12-7.151-10 Price redetermination (prospective).

When it is determined, in accordance with FPR 1-3.404-5, to use a fixed-price contract providing for prospective redetermination of price, insert the clause set forth in ASPR 7-109.2.

§ 12-7.151-11 Price redetermination (retroactive).

When it is determined, in accordance with FPR 1-3.404-7, to use a fixed-price contract providing for retroactive redetermination of price, insert the clause set forth in ASPR 7-109.3.

§ 12-7.151-12 Stop work order.

The following clause may be included in negotiated contracts when the contracting officer determines its use appropriate. Examples might include contracts under which work stoppage may be required for reasons such as advancements in the state of the art, production or engineering breakthroughs, or realignment of programs. In no event shall the clause be used routinely.

STOP WORK ORDER

(a) The Contracting Officer may, at any time, by written order to the Contractor, require the Contractor to stop all, or any part, of the work called for by this contract for a period of no longer than ninety (90) days after the order is delivered to the Contractor, and for any further period to which the parties may agree. Any such order shall be specifically identified as a Stop Work Order issued pursuant to this clause. Upon receipt of such an order, the Contractor shall forthwith comply with its terms and take all reasonable steps to minimize the incurrence of costs allocable to the work covered by the order during the period of work stoppage. Prior to the expiration of the period of the stop work order, or within any extension of that period to which the parties shall have agreed, the Contracting Officer shall either—

(1) Cancel the stop work order, or

(2) Terminate the work covered by such order as provided in the "Termination for Convenience" clause of this contract.

(b) If a stop work order issued under this clause is cancelled, or the period of the order or any extension thereof expires, the Contractor shall resume work. An equitable adjustment shall be made in the delivery schedule or contract price, or both, and the contract shall be modified in writing accordingly, if—

(1) The stop work order results in an increase in the time required for, or in the Contractor's cost properly allocable to, the performance of any part of this contract, and

(2) The Contractor asserts a claim for such adjustment within thirty (30) days after the end of the period of work stoppage: *Provided*, That, without prejudicing the right to reject any claim asserted after this time, if the Contracting Officer decides the facts justify such action, he may receive and act upon any such claim asserted at any time prior to final payment under this contract.

(c) Failure to agree to any adjustment under paragraph (b) of this clause shall be a dispute concerning a question of fact within the meaning of the "Disputes" clause of this contract.

(d) If a stop work order is not canceled and the work covered by such order is terminated for the convenience of the Government, the reasonable costs resulting from the stop work order shall be allowed in arriving at the termination settlement.

(End of clause)

§ 12-7.151-13 Value engineering clauses.

A value engineering incentive clause and/or a value engineering program requirement clause shall be included in the contract in accordance with the instructions for its use in DOTPR 12-1.5202-2 and DOTPR 12-1.5206.

(a) *Value engineering incentive clause.* (1) In accordance with DOTPR 12-1.5202 the following clauses are to be used in fixed price or fixed price with prospective price redetermination supply and service contracts:

VALUE ENGINEERING INCENTIVE

(a) *Application.* This clause applies to a contractor developed and documented Value Engineering Change Proposal (VECP) which

(i) Requires a change to this contract to implement the VECP, and

(ii) Reduces the overall costs to the agency without impairing essential functions or characteristics: *Provided*, That it is not based:

(A) Solely on a change in deliverable end item quantities; or

(B) A change in R&D end item or test quantities due solely to results of previous testing under this contract; or

(C) Solely on a change to the contract type.

(b) *Documentation.* As a minimum, the following information shall be submitted by the Contractor with each VECP:

(1) A description of the difference between the existing contract requirement and the proposed change, and the comparative advantages and disadvantages of each, justification when a function or characteristic of an item is being altered, and the effect of the change on the performance of the end item;

(ii) An analysis and itemization of the requirements of the contract which must be changed if the VECP is accepted and a recommendation as to how to make each such change (e.g., a suggested specification revision);

(iii) A separate detailed cost estimate for both the existing contract requirement and the proposed change to provide an estimate of the reduction in costs, if any, that will result from acceptance of the VECP, taking into account the costs of development and implementation by the Contractor (including any amount attributable to subcontracts in accordance with paragraph (h) below);

(iv) A prediction of any effects the proposed change would have on collateral costs to the agency such as Government furnished property costs, costs of related items, and costs of maintenance and operation;

(v) A statement of the time by which a contract modification accepting the VECP must be issued so as to obtain the maximum cost reduction, noting any effect on the contract completion time or delivery schedule; and

(vi) Identification of any previous submission of the VECP, including the dates submitted, the agencies involved, the numbers of the Government contracts involved, and the previous actions by the Government, if known.

(c) *Submission.* VECPs shall be submitted to the Contracting Officer (CO). VECPs shall be processed expeditiously; however, the Government shall not be liable for any delay in acting upon any VECP submitted pursuant to this clause. The Contractor has the right to withdraw, in whole or in part, any VECP not accepted by the Government within the period specified in the VECP.

(d) *Acceptance.* The Contracting Officer may accept, in whole or in part, by contract modification either before or within a reasonable time after performance has been completed under this contract, any VECP submitted pursuant to this clause. Until a contract modification applies a VECP to this contract, the Contractor shall remain obligated to perform in accordance with the terms of the existing contract. Contract modifications made pursuant to this clause will so state. The decision of the Contracting Officer as to the acceptance of any VECP under this contract (including the decision as to which clause is applicable to the proposal if this contract contains both a "Value Engineering Incentive" and a "Value Engineering Program Requirement" clause) shall be final and shall not be subject to the "Disputes" clause of this contract.

(e) *Sharing.* If a VECP submitted by the Contractor pursuant to this clause is accepted, the Contractor shall share in savings realized by the Government in accordance with the following provisions:

1. *Instant contract.* (i) *Definitions.* (A) Instant contract savings to the Contractor (ICS) is the unit cost reduction times the number of units affected in the instant contract. The proposed unit cost reduction includes estimated allowable contractor development and implementation costs (CC). The Contractor's development and implementation costs include any subcontractor development and implementation costs and any subcontractor incentive payments (see (h) below). For purposes of this clause, contractor development costs are those costs incurred after the Contractor has identified a specific VE project and prior to acceptance by the Government.

(B) Government Costs (GC) are those costs which directly result from development and implementation of the VECP, such as test and evaluation of the VECP, and any increased costs in DOT operations, maintenance, and logistics support.

(ii) *Calculations and actions.* (A) Calculate GC and ICS.

(B) If ICS exceeds GC, calculate fifty percent (50%) (Government share) of the sum of ICS and GC, i.e. (0.5 (ICS plus GC)), unless this is a VE Program Requirement Change (VEPRC), in which case calculate (0.75 ICS plus 0.25 GC). In either case, subtract the result from the contract price.

(C) If GC exceeds ICS, but acceptance of the VECP is still desirable due to concurrent or future savings, reduce the instant contract price by the amount of ICS and offset the amount by which GC exceeds ICS against concurrent or future savings.

(D) If the Contractor's cost of developing and implementing the VECP would result in an increase in the instant contract price, but the VECP is still desirable due to concurrent or future savings, equitably adjust the instant contract price in accordance with the "Changes" clause. In addition, offset the increase in the instant contract price and any GC against concurrent or future contract savings.

(E) See (e)(3)(ii) for those actions to be taken when a future contract is expected.

2. *Concurrent contracts.* (i) If the VECP accepted under this contract is also used on concurrent contracts of the purchasing office for essentially the same items, the Contractor shall be paid a share of any savings as calculated in (ii) below.

(ii) Calculations: (A) Determine the reduction in the price of each concurrent contract(s) as a result of incorporating the VECP.

(B) Subtract from the total amount in (A) any government costs (GC) not yet offset. (If GC was greater than ICS) in (e)(1)(ii) (C) or (D) above, and any increase in the instant contract price, i.e., if ICS was negative in (e)(1)(ii)(D). If the resulting number is positive, multiply it by fifty percent (50%) (25% if this is a VEPRC). Add this amount to the instant contract price.

3. *Future contracts.* Definition. The term unit cost reduction for future contract sharing shall be the unit cost reduction under this instant contract without deducting any cost of development or implementation.

(ii) If the VECP accepted under this contract is used on future purchases of essentially the same item by the purchasing office, or its successor, the Contractor shall share in the savings on all affected end items scheduled for delivery not later than three (3) years after acceptance of the first item incorporating the VECP, or until the originally scheduled delivery date of the last affected end item under the instant contract, whichever is later. When sharing on future contracts is expected, the Contractor shall be responsible for the following:

(A) Maintaining records adequate to support identification of the first delivered unit to which the VECP applies. These records are considered an intergral part of contract documentation and shall be maintained for a period of three years after final payment on the contract under which the VECP was accepted.

(B) Annotating the receiving report or invoice, which applies to the initial unit covered by the VECP with the following statement:

"This is the initial unit delivered which incorporates VECP No. -------- Contract Modification No. -------- dated --------."

(iii) Calculations. At the time each eligible future contract is awarded:

(A) Determine the number of units scheduled to be delivered prior to expiration of the contractor sharing period determined in (ii) above. Multiply this by the unit cost reduction as defined in (e)(3)(i).

(B) Subtract from the total amount in (A) any Government costs or instant contract increases not yet offset in (e)(1)(ii) (C) or (D) or in (e)(2)(ii)(B), or in other contracts awarded since acceptance of the VECP. If the resulting number is positive, multiply it by fifty percent (50%) (25% if this is a VEPRC) and add the result to the instant contract price.

4. *Collateral savings.* If an accepted VECP results in a measurable net reduction in the agency's overall documentable projected costs of maintenance, operation, logistic support or Government-furnished property, which exceeds any increase in costs attributable to incorporation of such VECP, including acquisition costs, the contract shall be increased by twenty percent (20%) of the projected net reduction in ascertainable collateral costs (i.e., savings determined to be realized during an average year of use of the item in which the change is incorporated) and, if applicable, of the actual savings accruing from a change or reduction of Government-furnished property under the instant contract. However, such increase representing the Contractor's share of collateral savings shall, in no event exceed the price of this contract or $100,000 whichever is greater. The determination of the amount of collateral savings, if any, will be made solely by the Government and shall not be subject to the "Disputes" clause of this contract. In all cases, degradation of performance, service life, or capability shall be a consideration in the determination of actual savings to the agency.

(f) Payment. The Contractor's concurrent and future contract shares should be paid upon modification of concurrent contracts or future contract award, or within six (6) months thereafter. However, any such payments are subject to the condition that to the extent the Government does not receive delivery of and accept all items on which the share is paid, the contractor shall reimburse the Government the proportionate share of the payments. If this clause is modified to provide for lump sum payments, such payments shall be made upon modification of the instant contract.

(g) Operation and maintenance contracts. If this is a contract for overhaul or maintenance (including repair, alteration, modification or modernization), the Contractor will be paid a share of future contract savings realized by the Government only on overhaul and maintenance of the designated items accomplished by purchase, under contract, by the designated purchasing office. Only collateral savings will be paid on application of accepted VECPs to overhaul and maintenance of items within Government resources.

(h) Subcontracts. The Contractor shall include appropriate VE arrangements in any subcontract of $100,000 or greater, and may include such arrangements in contracts of lesser value. To compute any adjustment in the contract price under paragraph (e)(1) above, the Contractor's cost of development and implementation of a VECP which is accepted under this contract shall include any development and implementation costs of a subcontractor and any VE incentive payments to a subcontractor, which clearly pertain to such VECP. However, no such payment or accrual to a subcontractor will be permitted, either as a part of the contractor's development or implementation costs or otherwise, to reduce the Government's share on collateral savings or additional purchases as contemplated by paragraph (e) (2), (3), or (4) of this clause.

(i) Data. The Contractor may restrict the Government's right to use any sheet of a VECP or of the supporting data, submitted pursuant to this clause, in accordance with the terms of following legend if it is marked on such sheet:

"This data furnished pursuant to the Value Engineering clause of contract ------- shall not be disclosed outside the Government, or duplicated, used, or disclosed, in whole or in part, for any purpose other than to evaluate a VECP submitted under said clause. This restriction does not limit the Government's right to use information contained in this data if it is or has been obtained, or is otherwise available, from the Contractor or from another source, without limitations. If such a VECP is accepted by the Government under said contract after the use of this data in such an evaluation, the Government shall have the right to duplicate, use, and disclose any data reasonably necessary to the full utilization of such VECP as accepted, in any manner and for any purpose whatsoever, and have others so do."

In the event of acceptance of a VECP, the Contractor hereby grants to the Government all rights to use, duplicate or disclose, in whole or in part, in any manner and for any purpose whatsoever, and to have or permit others to do so, any data reasonably necessary to fully utilize such VECP.

(j) Miscellaneous Provisions. (1) For purposes of sharing under paragraph (e)(1) above, the term "instant contract" shall not include any modifications of the instant contract, executed after acceptance of the particular VECP, by which the Government increases the quantity of any item, or adds any item, nor shall it include any extension of the instant contract through exercise of an option provided under this contract after acceptance of the VECP. Such modifications and extensions shall be considered "future contracts" within the provisions of paragraph (e)(3) of this clause.

(2) If this is an indefinite delivery type contract, the term "instant contract" for purposes of sharing under paragraph (e)(1) above shall include only those orders actually placed by the Government up to the time the particular VECP is accepted. All orders placed subsequent to the acceptance of the particular VECP shall be considered "future contracts" within the provisions of paragraph (e)(3) of this clause.

(3) If this clause is included in a basic ordering agreement, the term "instant contract", for purposes of sharing under paragraph (e)(1) above, shall be the order under which the particular VECP is approved. Other orders under the same agreement shall be considered either "concurrent contracts" (if awarded prior to acceptance of the VECP) or

V 42 174 SEP 8 77 UMI

"future contracts" (if awarded after acceptance of the VECP), within the provisions of paragraph (e)(2) or (e)(3) of this clause respectively.

(4) If this clause is included in a multi-year contract, "instant contract" for the purpose of sharing under paragraph (e)(1) above, shall be the funded contract at the time the VECP is approved, and items purchased under subsequent funding under this contract shall be treated under the future contract VE sharing provisions in paragraph (e)(3) of this clause. The sharing period shall be the entire life of the multi-year contract, or three (3) years after delivery of the first item incorporating the VECP, whichever, is longer.

(5) If this clause is included in a fixed price contract providing for prospective price redetermination, the term "instant contract" for purposes of sharing under paragraph (e)(1) above shall be that period for which firm prices have been established. The remaining periods under this contract shall be treated under the future contract VE sharing provisions in paragraph (e)(3) of this clause.

(6) Those portions of an accepted VECP which are rewardable under other performance incentive provisions of this contract shall be rewarded under the provisions of this clause to the extent that they are not rewarded under the other performance incentive provisions.

(7) The Contracting Officer may require the Contractor to provide written notification prior to risking significant expenditures for VECP effort.

(End of clause)

(2) *Fixed-price incentive (firm target) contracts.* Substitute the following "sharing" provisions for paragraph (e) of the clause in paragraph (a)(1) of this section:

(e) Sharing. If a VECP submitted by the Contractor pursuant to this clause and affecting any of the items described in paragraph (a) of the "Incentive Price Revision (Firm Target)" clause of this contract is accepted, the Contractor shall share in savings realized by the Government in accordance with the following provisions:

(1) Instant contract.

(i) Definitions.

(A) Instant contract savings to the Contractor (ICS) is the unit cost reduction times the number of units affected in the instant contract. The proposed unit cost reduction includes estimated allowable Contractor development and implementation costs (CC). The Contractor's development and implementation costs include any subcontractor development and implementation costs and any subcontractor incentive payments (see (h) below). For purposes of this clause, Contractor development costs are those costs incurred after the Contractor has identified a specific VE project and prior to acceptance by the Government.

(B) Government Costs (GC) are those which directly result from development and implementation of the VECP, such as test and evaluation of the VECP, and any increased costs in DOT operations, maintenance, and logistic support.

(ii) Calculations and actions.

(A) If there is a reduction in costs, reduce the total target cost of items affected by the VECP by ICS. If there is an increase in cost, see (E) below.

(B) If ICS exceeds GC, add 35% (20% if this is a VE Program Requirement Change (VEPRC)) of the excess to total target profit relating to such items.

(C) If GC exceeds ICS, but acceptance of the VECP is still desirable due to concurrent or future savings, do not adjust total target profit relating to such items, and offset the amount by which GC exceeds ICS against concurrent or future contract savings.

(D) Subtract 65% (80% if this is a VEPRC) of ICS from the maximum dollar limit on the total final price of such items.

(E) If the Contractor cost of developing and implementing the VECP would result in an increase in the instant contract target cost, but the VECP is still desirable due to concurrent or future savings, equitably adjust the total target cost, total target profit and maximum dollar limit on the total final price of the items affected by the VECP in accordance with the "Changes" clause. Offset this increase and any GC against concurrent or future savings.

(F) See (e)(3)(ii) for those actions to be taken when a future contract is expected.

(2) Concurrent contracts.

(i) If the VECP accepted under this contract is also used on concurrent contracts of the purchasing office for essentially the same items the Contractor shall be paid a share of any savings as calculated in (ii) below.

(ii) Calculations.

(A) Determine the reduction in the price of each concurrent contract(s) as a result of incorporating the VECP

(B) Subtract from the total amount in (A) any government costs not yet offset (if GC was greater than ICS) in (e)(1)(ii) (C) or (E) above, and any increase in the instant contract price, i.e., if ICS was negative in (e)(1)(ii)(E). If the resulting number is positive, multiply it by 35% (20% if VEPRC). Add this amount to the instant contract as a separate line item independent of the incentive sharing arrangement and without adjustment to any of the contract incentive parameters.

(3) Future contracts.

(i) Definition. The term unit cost reduction for future contract sharing shall be the unit cost reduction under this instant contract without deducting any cost of development or implementation.

(ii) If the VECP accepted under this contract is used on future purchases of essentially the same item by the purchasing office, or its successor, the Contractor shall share in the savings on all affected end items scheduled for delivery not later than 3 years after acceptance of the first item incorporating the VECP, or until the originally scheduled delivery date of the last affected end item under the instant contract, whichever is later. When sharing on future contracts is expected, the Contractor shall be responsible for the following:

(A) Maintaining records adequate to support identification of the first delivered unit to which the VECP applies. These records are considered an integral part of contract documentation and shall be maintained for a period of three years after final payment on the contract under which the VECP was accepted.

(B) Annotating the receiving report or invoice, which applies to the initial unit covered by the VECP with the following statement:

"This is the initial unit delivered which incorporates VECPP No. ----, Contract Modification No. ----, dated ----------."

(iii) Calculations. At the time each eligible future contract is awarded:

(A) Determine the number of units scheduled to be delivered prior to expiration of the Contractor sharing period determined in (ii) above. Multiply this by the unit cost reduction as defined in (e)(3)(i).

(B) Subtract from the total amount in (A) any government costs or instant contract increases not yet offset in (e)(1)(ii) (C) or (E) or in (e)(2)(ii)(B), or in other contracts awarded since acceptance of the VECP. If the resulting number is positive, multiply it by 35% (20% if VEPRC). Add this amount to the instant contract as a separate line item independent of the incentive sharing arrangement and without adjustment to any of the contract incentive parameters.

(4) Collateral savings. If an accepted VECP results in a measurable net reduction in the agency's overall documentable projected costs of maintenance, operation, logistics support or Government-furnished property, which exceeds any increase in costs attributable to incorporation of such VECP, including acquisition costs, the contract shall be increased by twenty percent (20%) of the projected net reduction in ascertainable collateral costs (i.e., savings determined to be realized during an average year of use of the item in which the change is incorporated), and, if applicable, of the actual savings accruing from a change or reduction of Government-furnished property under the instant contract. Add this amount to the instant contract as a separate line item independent of the incentive sharing arrangement and without adjustment to any of the contract incentive parameters. However, such increase representing the Contractor's share of collateral savings shall, in no event, exceed the price of this contract or $100,000, whichever is greater. The determination of the amount of collateral savings, if any, will be made solely by the Government and shall not be subject to the "Disputes" clause of this contract. In all cases, degradation of performance, service life, or capability shall be a consideration in the determination of actual savings to the agency.

(End of clause paragraph)

(3) *Fixed-price incentive (successive target) contracts.* Substitute the following "sharing" provision for paragraph (e) of the clause in paragraph (a)(1) of this section:

(e) Sharing. If a V submitted by the Contractor pursuant s clause and affecting any of the items described in paragraph (a) of the "Incentive Price Revision (Successive Target)" clause of this contract is accepted, the Contractor shall share in savings realized by the Government in accordance with the following provisions:

(1) Instant contract.

(i) Definitions.

(A) Instant contract savings to the Contractor (ICS) is the unit cost reduction times the number of units affected in the instant contract. The proposed unit cost reduction includes estimated allowable Contractor development and implementation costs (CC). The Contractor's development and implementation costs include any subcontractor development and implementation costs and any subcontractor incentive payments (see (h) below). For purposes of this clause, Contractor development costs are those costs incurred after the Contractor has identified a specific VE project and prior to acceptance by the Government.

(B) Government Costs (GC) are those costs which directly result from development and implementation of the VECP, such as test and evaluation of the VECP, and any increased costs in DOT operations, maintenance and logistics support.

(ii) Calculations and actions.

(A) If the VECP is accepted and applied to this contract before the establishment of a firm fixed price in accordance with paragraph (c) of the "Incentive Price Revision (Successive Targets)" clause of this contract:

(I) If there is a reduction in cost, reduce the then total target cost of items affected by the VECP by ICS. If there is an increase in cost see (V) below.

(II) If ICS exceeds GC, add 35% (20% if this is a VE Program Requirements change (VEPRC)) of the excess to the then target profit relating to such items (if a firm profit adjustment formula is established in accordance with paragraph (a) of the "Incentive Price Revision (Successive Targets)" clause of this contract, the above percentage may be modified for application to VE cost reduction proposals, submitted pursuant to this clause, which are accepted under this contract after the establishment of said formula).

(III) If GC exceeds ICS, but acceptance of the VECP is still desirable due to concurrent or future savings, do not adjust the then target profit, and offset the amount GC exceeds ICS against concurrent or future contract savings.

(IV) Subtract 65% (80% if this is a VEPRC) of ICS from the maximum dollar limit on the total final price of such items.

(V) If the Contractor cost of developing and implementing the VECP would result in an increase in the then instant contract target cost, but the VECP is still desirable due to concurrent or future savings, equitably adjust the then total target cost, the then target profit, and the then maximum dollar limit on the total final price of the items affected by the VECP in accordance with the "Changes" clause. Offset this increase and any GC against concurrent or future savings. (If a firm profit adjustment formula is established in accordance with paragraph (a) of the "Incentive Price Revision (Successive Targets)" clause of this contract, and the VECP significantly increases the target cost, the above percentage may be modified for application to the VECPs, submitted pursuant to this clause, which are accepted under this contract after the establishment of said formula.)

(B) If the VECP is accepted after the establishment of a firm fixed price in accordance with paragraph (c) of the "Incentive Price Revision (Successive Targets)" clause of this contract.

(I) Calculate GC and ICS.

(II) If ICS exceeds GC, calculate 50% (Government share) of the sum of ICS and GC, i.e., (.5 (ICS plus GC)), unless this is a VE Program Requirement change (VEPRC), in which case calculate (.75 ICS plus .25 GC). In either case, subtract the result from the contract price.

(III) If GC exceeds ICS, but acceptance of the VECP is still desirable due to concurrent or future savings, reduce the instant contract price by the amount of ICS and offset the amount by which GC exceeds ICS against concurrent or future savings.

(IV) If the Contractor's cost of developing and implementing the VECP would result in an increase in the instant contract price, but the VECP is still desirable due to concurrent or future savings, equitably adjust the instant contract price in accordance with the "Changes" clause. In addition, offset the increase in the instant contract price and any GC against concurrent or future contract savings.

(C) See (e)(3)(ii) for those actions to be take when a future contract is expected.

(2) Concurrent contracts.

(i) If the VECP accepted under this contract is also used on concurrent contracts of the purchasing office for essentially the same items, the Contractor shall be paid a share of any savings as calculated in (ii) below.

(ii) Calculations.

(A) Determine the reduction in the price of each concurrent contract(s) as a result of incorporating the VECP.

(B) Subtract from the total amount in (A) any Government costs (GC) not yet offset (if GC was greater than ICS) in (e)(1)(ii)(A) (III) or (V) or (e)(1)(ii)(B) (III) or (IV) above, and any increase in the then instant contract target cost, i.e., if ICS was negative in either (e)(1)(ii)(A)(V) or (e)(1)(ii)(B)(IV). If the resulting number is positive, and the VECP was accepted under paragraph (e)(1)(ii)(A) multiply it by 35% (20% if this is a VEPRC). Add this amount to the instant contract as a separate line item independent of the incentive sharing arrangement and without adjustment to any of the contract incentive parameters. If the resulting number is positive, but the VECP was accepted under paragraph (e)(1)(ii)(B), multiply it by 50% (25% if this is a VEPRC), and add this amount to the instant contract price.

(3) Future contracts.

(i) Definition. The term unit cost reduction for future contract sharing shall be the unit cost reduction under this instant contract without deducting any cost of development or implementation.

(ii) If the VECP accepted under this contract is used on future purchases of essentially the same item by the purchasing office, or its successor, the Contractor shall share in the savings on all affected end items scheduled for delivery not later than three years after acceptance of the first item incorporating the VECP, or until the originally scheduled delivery date of the last affected end item under the instant contract, whichever is later. When sharing on future contracts is expected, the Contractor shall be responsible for the following:

(A) Maintaining records adequate to support identification of the first delivered unit to which the VECP applies. These records are considered an integral part of contract documentation and shall be maintained for a period of three years after final payment on the contract under which the VECP was accepted.

(B) Annotating the receiving report or invoice, which applies to the initial unit covered by the VECP with the following statement:

"This is the initial unit delivered which incorporates VECP No. ----, Contract Modification No. ----, dated ----------."

(iii) Calculations, at the time each eligible future contract is awarded:

(A) Determine the number of units scheduled to be delivered prior to expiration of the Contractor sharing period determined in (ii) above. Multiply this by the unit cost reduction as defined in (e)(3)(i).

(B) Subtract from the total amount in (A) any Government costs or instant contract increases not yet offset in (e)(1)(ii)(A) (III) or (V), or (e)(1)(ii)(B) (III) or (IV), or in (e)(2)(ii)(B), or in contracts awarded since acceptance of the VECP. If the resulting number is positive, and the VECP was accepted under paragraph (e)(1)(ii)(A), multiply it by 35% (20% if this was a VEPRC). If the resulting number was positive, but the VECP was accepted under paragraph (e)(1)(ii)(B), multiply it by 50% (25% if this was a VEPRC. In either case, add the amount to the instant contract as a separate line item independent of the incentive sharing arrangement and without adjustment to any of the contracts incentive parameters.

(4) Collateral Savings. If an accepted VECP results in a measurable net reduction in the agency's overall documentable projected costs of maintenance, operation, logistic support or Government-furnished property, which exceeds any increase in costs attributable to incorporation of such VECP, including acquisition costs, the contract shall be increased by twenty percent (20%) of the projected net reduction in ascertainable collateral costs (i.e., savings determined to be realized during an average year of use of the item in which the change is incorporated), and, if applicable, of the actual savings accruing from a change or reduction of Government-furnished property under the instant contract. Add this amount to the instant contract as a separate line item independent of the incentive sharing arrangement and without adjustment to any of the contract incentive parameters. However, such increase representing the Contractor's share of collateral savings shall, in no event, exceed the price of this contract or $100,000, whichever is greater. The determination of the amount of collateral savings, if any, will be made solely by the Government and shall not be subject to the "Disputes" clause of this contract. In all cases, degradation of performance, service life, or capability shall be a consideration in the determination of actual savings to the agency.

(End of clause)

(4) *Lump sum method of payment for future contract sharing.* In accordance with § 12-1.5203-4 substitute the following provisions for paragraph (e)(3) "Future Contracts" of the clause in paragraph (a)(1) of this section for use of the Lump Sum Method of payment for future contract sharing:

(3) Future contracts (lump sum). (i) Definition. The term unit cost reduction for lump sum sharing purposes shall be the unit cost reduction under this instant contract without deducting any cost of development or implementation.

(ii) If a VECP accepted under this contract is expected to be used on future purchases of essentially the same item by the purchasing office, or its successor, the Contractor shall share in the savings on the purchases which the purchasing office estimates will be delivered not later than three years after acceptance of the first item incorporating the VECP, or until the originally scheduled delivery date of the last affected end item under the instant contract, whichever is later.

(iii) Lump sum base. The number of items the Government estimates will be delivered during the period specified in (ii) above is ----(insert the number of units).

(iv) Calculations and actions.

(A) Multiply the unit cost reduction in (i) by the number of units specified in (iii) above.

(B) Subtract from the total amount in (A) any Government costs (GC) not yet offset (if GC was greater than ICS) and any increase in the increase in the instant contract price, i.e., if ICS was negative, multiply it by the Contractor percentage share. Add this amount to the instant contract.

(End of clause paragraph)

(5) *Future contract sharing provisions.* With respect to the future contract sharing provisions paragraph (e)(3) of the clause in paragraph (a)(1) of this section, or as those provisions may be modified by the lump sum provisions in paragraph (a)(4) of this section, when, in the judgment of the Contracting Office, the unit costs under the instant contract will not be fairly representative of the unit costs to be expected under future contracts due for example to learning curve application (as will generally be the case with developmental or design contracts and may be the case with early production contracts), the definition in paragraph (e)(3)(i) shall be changed as follows:

(i) Definition. The term "unit cost reduction" for future contract purposes shall be the average amount of the decrease in unit cost of performance (without deducting any Contractor costs of development or implementation) which the Contracting Officer

V 42 174
SEP 8 77
UMI

estimates will result from utilization of the VECP on future purchases of the item. The item for design contracts will be the item to be produced as a result of the design process.

(End of clause paragraph)

(6) *Modification of sharing provisions applicable to incentive contracts.* When the sharing provisions applicable to incentive contracts are to be modified in accordance with 12-1.5203-1(c), clause paragraph (e) in paragraph (a)(2) or (a)(3) of this section, whichever is applicable, shall be further modified as follows:

(i) Modifications to clause paragraph (e) of paragraph (a)(2) of this section:

(A) Change clause paragraph (e)(1)(ii) to provide substantially as follows:

(ii) If the cost reduction proposal submitted pursuant to this clause involves an anticipated decrease in the cost of performance of this contract and is accepted by the Government, the parties agree that neither the target cost, target profit, nor ceiling price of the instant contract shall be adjusted by reason of the acceptance of such proposal. The new requirement will be incorporated into the contract by a contract modification which will state that it is made pursuant to this Value Engineering clause. When the cost of performance of this contract is increased as a result of the changes, the equitable adjustment increasing the contract price shall be in accordance with the "Changes" clause rather than under this clause, but the resulting contract modification will state that it is made pursuant to this clause.

(End of clause paragraph)

(B) Change clause paragraph (e)(2)(ii)(B) to provide substantially as follows:

(B) Subtract from the total amount in (A) any government costs not yet offset and any increase in the instant contract price. If the resulting number is positive, multiply it by 35% (20% if VEPRC) Add this amount to the instant contract as a separate line item independent of the incentive sharing arrangement and without adjustment to any of the contract incentive parameters.

(End of clause paragraph)

(C) Substitute the definition in paragraph (a)(5) of this section for the definition in clause paragraph (e)(3)(i).

(D) Change clause paragraph (e)(3)(iii)(B) to provide substantially as follows:

(B) Subtract from the total amount in (A) any government costs or instant contract increases not yet offset. If the resulting number is positive, multiply it by 35% (20% if VEPRC). Add this amount to the instant contract as a separate line item independent of the incentive sharing arrangement and without adjustment to any of the contract incentive parameters.

(End of clause paragraph)

(ii) Modifications to clause paragraph (e) of paragraph (a)(3) of this section.

(A) Change clause paragraph (e)(1)(ii)(A) to provide substantially as follows:

(A) If the cost reduction proposal submitted pursuant to this clause involves an anticipated decrease in the cost of performance of this contract and is accepted by the Government, the parties agree that neither the target cost, target profit, nor ceiling price of the instant contract shall be adjusted by reason of the acceptance of such proposal. The new requirement will be incorporated into the contract by a modification which will state that it is made pursuant to this Value Engineering clause. When the cost of performance of this contract is increased as a result of the changes, the equitable adjustment increasing the contract price shall be in accordance with the "Changes" clause rather than under this clause, but the resulting contract modification will state that it is made pursuant to this clause.

(End of clause paragraph)

(B) Change clause paragraph (e)(2)(ii)(B) to provide substantially as follows:

(B) Subtract from the total amount in (A) any government costs not yet offset and any increase in the instant contract price. If the resulting number is positive, multiply it by 35% (20% if VEPRC) Add this amount to the instant contract as a separate line item independent of the incentive sharing arrangement and without adjustment to any of the contract incentive parameters.

(End of clause paragraph)

(C) Substitute the definition in paragraph (a)(5) of this section for the definition in clause paragraph (e)(3)(i).

(D) Change clause paragraph (e)(3)(iii)(B) to provide substantially as follows:

(B) Subtract from the total amount in (A) any government costs or instant contract increases not yet offset. If the resulting number is positive, and the VECP was accepted before establishment of the firm fixed price under the instant contract, multiply it by 35 percent (20 percent if this was a VEPRC). If the resulting number is positive, but the VECP was accepted after establishment of the firm fixed price under the instant contract, multiply it by 50 percent (25 percent if this is a VEPRC). In either case, add the amount to the instant contract as a separate line item independent of the incentive sharing arrangement and without adjustment to any of the contract incentive parameters.

(End of clause paragraph)

(b) *Value engineering program requirement.* In accordance with § 12-1.5206 insert the following revised contract clause title and paragraph (a) of the clause in paragraph (a)(1) of this section:

VALUE ENGINEERING PROGRAM REQUIREMENT

(a) The Contractor shall engage in a value engineering program in accordance with requirements specified by the Contracting Officer, shall submit progress reports thereon as specified in the contract and shall submit to the Contracting Officer any value engineering change proposals (VECPs) resulting from the required program. This clause applies to all VECPs developed by the Contractor unless the Contracting Officer determines the proposal to be rewardable under the "Value Engineering Incentive" clause (if any) of this contract, which:

(1) Requires a change to this contract to implement the VECP, and

(ii) Reduce the overall costs to the cognizant agency, without impairing essential functions or characteristics, *Provided*, That they are not based:

(A) Solely on a change in deliverable end item quantities; or

(B) A change in R&D end item or test quantities due solely to results of previous testing under this contract; or

(C) Solely on a change to the contract type.

(End of clause paragraph)

Paragraphs (b) through (j) of the clause set forth in paragraph (a)(1) of this section above shall be included as part of the VE Program Requirements clause except that, the guidelines in paragraph (a)(2) through (a)(5) of this section shall also be applicable.

§ 12-7.151-14 Multi-year procurement.

In accordance with DOTPR 12-1.55 insert the following clauses:

LIMITATIONS OF PRICE AND CONTRACTOR OBLIGATIONS

(a) This clause applies only in the event this contract is awarded on the alternative basis for award described in the Schedule as "Multi-Year Procurement."

(b) Funds are available for performance of this contract in the amount specifically described in the Schedule, as available for contract performance. The amount of funds so described at the time of award is not considered sufficient for the contract performance required by and described in the Schedule for any Program Year other than the First Program Year. Upon availability to the Contracting Officer of additional funds sufficient for performance of the full requirements for the next succeeding Program Year, the Contracting Officer shall, not later than the date specified in the Schedule, unless a later date is agreed to by the parties, so notify the Contractor in writing and the amount of funds described in the Schedule as available for contract performance shall be modified accordingly. This procedure shall apply for each successive Program Year.

(c) The Government is not obligated to the Contractor for contract performance in any monetary amount in excess of that described in the Schedule or modifications thereto, as available for contract performance.

(d) The Contractor is not obligated to incur costs for the performance required for any Program Year after the first and until he has been notified in writing by the Contracting Officer of an increase in availability of funds in accordance with paragraph (b) of this clause. If so notified, the Contractor's obligation shall be increased only to the extent contract performance is required for the additional Program Year for which funds have been made available.

(e) In the event of termination pursuant to the "Termination for Convenience of the Government" clause of this contract, the term "total contract price" as used in that clause refers to the amount available for performance of this contract, as provided for in this clause, plus the applicable amount established as the cancellation ceiling, and the term "work under the contract" as used in that clause refers to the work under Program Year requirements for which funds have been made available. In the event of termination for default, the Government's rights under this contract shall apply to the entire multi-year requirements.

(f) Notification to the Contractor of an increase or decrease in the funds available for performance of this contract as a result of a clause other than this clause (e.g., exercise of an option for increased quantities or the "Changes" clause) shall not constitute the notification contemplated by paragraph (b) of this clause.

(End of clause)

CANCELLATION OF ITEMS

(a) This clause applies only in the event this contract is awarded on the alternative basis for award described in the Schedule as "Multi-Year Procurement."

(b) As used herein, the term "cancellation" means that the Government is canceling, pursuant to this clause, its Program Year requirements for items set forth in the Schedule for all Program Years subsequent to that in which notice of cancellation is provided. Such cancellation shall occur only if, by the date or within the time period specified in the Schedule, or such further time as may be agreed to, the Contracting Officer (i) notifies the Contractor that funds will not be available for contract performance for any subsequent Program Year; or (ii) fails to notify the Contractor that funds have been made available for performance of the Program Year requirement for the succeeding Program Year.

(c) Except for cancellation pursuant to this clause or for termination pursuant to the "Default" clause, any reduction by the Contracting Officer in the quantities called for under this contract shall be considered a termination in accordance with the "Termination for Convenience of the Government" clause of this contract.

(d) In the event of cancellation pursuant to this clause, the Contractor will be paid, as consideration therefor, a cancellation charge not to exceed the cancellation ceiling described and separately set forth in the Schedule as being applicable at the time of cancellation.

(e) The cancellation charge is intended to cover (1) only costs reasonably necessary for production which would have been equitably amortized in the unit prices for the entire multiyear contract period, but which, because of the cancellation, are not so amortized and (ii) a reasonable profit on such costs. The cancellation charge shall be computed and claim therefor made as would be applicable under the "Termination for Convenience of the Government" clause of this contract. The Contractor shall submit the claim promptly but in no event later than one year (1) from the date of notification of the nonavailability of funds, if issued pursuant to paragraph (b)(i), or (ii) from the date specified in the Schedule by which notification of the availability of additional funds for the next succeeding program year is required to be issued, whichever is earlier, unless one or more extensions in writing are granted by the Contracting Officer, upon request of the Contractor made in writing within such one year period or authorized extension thereof. The claim may include reasonable preproduction and other nonrecurring costs, incurred by the prime contractor or his subcontractor, applicable to and which normally would be amortized in all items to be furnished under the multi-year requirements, such as plant rearrangement, special tooling, preproduction engineering, initial rework, initial spoilage and pilot runs, as well as costs not amortized by the level contract unit price solely because the cancellation had precluded anticipated benefits of Contractor or subcontractor learning. The claim shall not include any amount for:

(1) Labor, materials, or other expenses incurred by the Contractor or its subcontractors for production of canceled items;

(2) Any item or cost for which payment has already been made to the Contractor; or

(3) Anticipated profit on the cancelled items.

(End of clause)

Where options are otherwise authorized, multiyear contracts may include an appropriate "Option to Increase Quantities" clause in which the period for exercise of the option is limited to the date set forth in the contract Schedule for notifying the contractor that funds are available for the requirements of the next succeeding program year. If such an option is included, the following paragraph (f) should be added to the clause set forth above.

(f) The Contractor agrees not to include in the price for option quantities any costs of a startup or nonrecurring nature, which costs have been fully provided for in the unit prices of the firm quantities of the Program Years, and further agrees that the prices offered for option quantities will reflect only those recurring costs, and a reasonable profit thereon, which are necessary to further the additional option quantities. Therefore, any quantities added to the original contract quantities through exercise of the Government option in the "Option to Increase Quantities" clause of this contract shall not be substracted from what would otherwise be considered the quantity canceled for the purpose of computing allowable cancellation charges.

(End of clause paragraph)

§ 12-7.151-15 Renegotiation.

Except where it has been determined that the contract is exempt from the Renegotiation Act of 1951, as amended, insert the following clause in contracts awarded by the Federal Aviation Administration:

RENEGOTIATION

(A) To the extent required by law, this contract is subject to the Renegotiation Act of 1951 (50 U.S.C. App. 1211, et seq.), as amended, and to any subsequent act of Congress providing for the renegotiation of contracts. Nothing contained in this clause shall impose any renegotiation obligation with respect to this contract or any subcontract hereunder which is not imposed by an act of Congress heretofore or hereafter enacted. Subject to the foregoing, this contract shall be deemed to contain all the provisions required by Section 104 of the Renegotiation Act of 1951, and by any such other act, without subsequent contract amendment specifically incorporating such provisions.

(B) The Contractor agrees to insert the provisions of this clause, including this paragraph, in all subcontracts, as that term is defined in Section 103g of the Renegotiation Act of 1951, as amended.

(End of clause)

§ 12-7.151-16 Lease of aircraft.

(a) In accordance with the conditions prescribed in DOTPR 12-10.450-1 insert the following clause:

LOSS OR DAMAGE TO LEASED AIRCRAFT

(a) The Government assumes all risk of loss of or damage (except normal wear and tear) to the leased aircraft during the term of this lease while the aircraft is in the possession of the Government.

(b) In the event of damage to the aircraft, the Government, at its option, shall make the necessary repairs with its own facilities or by contract, or pay the Contractor the reasonable cost of repair of the aircraft.

(c) In the event the aircraft is lost or damaged beyond repair, the Government shall pay to the Contractor a sum equal to the fair market value of the aircraft at the time of such loss or damage, which value may be specifically agreed to in the clause "Fair Market Value of Aircraft" less the salvage value of the aircraft. However, the Government may retain the damaged aircraft or dispose of it as it wishes. In that event, the Contractor will be paid the fair market value of the aircraft as stated in the clause.

(d) The Contractor certifies that the contract price does not include any cost attributable to hull insurance or to any reserve fund it has established to protect its interest in the aircraft. If, in the event of loss or damage to the leased aircraft, the Contractor receives compensation for such loss or damage in any form from any source, the amount of such compensation shall be credited to the Government in determining the amount of the Government's liability under this clause; except that this shall not apply to proceeds of insurance received (1) solely as advances on insurance pending determination of Government liability, or (2) for an increment of value of the aircraft beyond the value for which the Government is responsible.

(e) In the event of loss of or damage to the aircraft, the Government shall be subrogated to all rights of recovery by the Contractor against third parties for such loss or damage and the Contractor shall promptly assign such rights in writing to the Government. Except as the Contracting Officer may permit in writing, the Contractor shall neither release nor discharge any third party from liability for such loss or damage nor otherwise compromise or adversely affect the Government's subrogation rights hereunder. The Contractor shall cooperate with the Government in any suit or action undertaken by the Government against any such third party.

(f) Any failure to agree as to the responsibility of the Government under this clause shall, after a final finding and determination by the Contracting Officer, be considered a dispute within the meaning of the "Disputes" clause of this contract.

(g) The Contractor's rights under this clause are in addition to, and not in lieu of, any rights it may have under the Federal Tort Claims Act as amended (28 U.S.C. 2671, et seq.). However, any sum for which the Government may be liable under this clause shall be reduced by the amount of any award, compromise, or settlement for loss of, or damage to, the leased aircraft, obtained by or on behalf of the Contractor under said Act as amended.

(End of clause)

(b) In accordance with the conditions prescribed in DOTPR 12-10.450-2 insert the following clause:

FAIR MARKET VALUE OF AIRCRAFT

For purposes of the clause "Loss or Damage to Leased Aircraft," it is agreed that the fair market value of the aircraft to be used in the performance of this contract shall be the lesser of the two values set out in paragraphs (a) and (b) below:

(a) $----------- or

(b) If the contractor has insured the same aircraft against loss or destruction in connection with other operations, the amount of such insurance coverage on the date of the loss or damage for which the Government may be responsible under this contract.

(End of clause)

(c) In accordance with the conditions set forth in DOTPR 12-450-3 insert the following clause:

V 42 174 SEP 8 77 UMI

RISK AND INDEMNITIES

The Contractor hereby agrees to indemnify and hold harmless the Government, its officers and employees from and against all claims, demands, damages, liabilities, losses, suits and judgments (including all costs and expenses incident thereto) which may be suffered by, accrue against, be charged to or recoverable from the Government, its officers and employees by reason of injury to or death of any person other than officers, agents, or employees of the Government or by reason of damage to property of others of whatsoever kind (other than the property of the Government, its officers, agents or employees) arising out of the operation of the aircraft. In the event the Contractor holds or obtains insurance in support of this covenant, a Certificate of Insurance shall be delivered to the Contracting Officer.

(End of clause)

§ 12–7.151–17 Options.

(a) In accordance with DOTPR 12–1.50, insert a clause reading substantially as follows where the contract expresses the option quantity as an additional quantity of a specific line item:

OPTION FOR INCREASED QUANTITY

The Government may increase the quantity of supplies called for herein by the amount stated in the Schedule and at the unit price specified therein. The Contracting Officer may exercise this option, at any time within the period specified in the Schedule, by giving written notice to the Contractor. Delivery of the items added by the exercise of this option shall continue immediately after, and at the same rate as, delivery of like items called for under this contract unless the parties otherwise agree.

(End of clause)

(b) A clause substantially as follows may be used where it is intended to extend the services described in the schedule.

OPTION TO EXTEND SERVICES

The Government may require the Contractor to continue to perform any or all items of services under this contract within the limits stated in the Schedule. The Contracting Officer may exercise this option, at any time within the period specified in the Schedule, by giving written notice to the Contractor. The rates set forth in the Schedule shall apply to any extension made pursuant to this option provision.

(End of clause)

(c) A clause substantially as follows may be used to provide for continuing performance of the contract beyond its original term.

OPTION TO EXTEND THE TERM OF THE CONTRACT

This contract is renewable, at the option of the Government, by the Contracting Officer giving written notice of renewal to the Contractor within the period specified in the schedule; *Provided*, That the Contracting Officer shall have given preliminary notice of the Government's intention to renew at least 60 days before this contract is to expire. (Such preliminary notice will not be deemed to commit the Government to renewals). If the Governmeat exercises this option for renewal, the contract as renewed shall be deemed to include this option provision. However, the total duration of this contract, including the exercise of any options under this clause, shall not exceed ----------

(End of clause)

§ 12–7.151–18 Procurement from certain Communist areas.

Insert the clause set forth below under the conditions described in DOTPR 12–6.5002.

PROCUREMENT FROM CERTAIN COMMUNIST AREAS

Unless he first obtains the written approval of the Contracting Officer, the Contractor shall not acquire for use in the performance of this contract any supplies, however processed, which are or were located in or transported from or through China (excluding Formosa), North Korea, North Vietnam, or Cuba, or any services originating from sources within such countries. The Contractor agrees to insert the substance of this clause in all subcontracts hereunder.

(End of clause)

Subpart 12–7.2—Clauses for Cost-Reimbursement Type Supply Contracts

§ 12–7.200 Scope of subpart.

This subpart sets forth uniform contract clauses for use in cost reimbursement type supply contracts.

§ 12–7.201 Applicability.

The causes set forth in this subpart shall be used when required, or as applicable or additional clauses, in all cost reimbursement type supply contracts.

§ 12–7.202 Required clauses.

Insert the required clauses cited or set forth in FPR Subpart 1–7.202 in all cost reimbursement type supply contracts.

§ 12–7.202–1 Definitions.

Insert the clause set forth in FPR 1–7.102–1. Additional definitions may be inserted provided they are not inconsistent with the clause or the provisions of the FPR and these regulations.

§ 12–7.202–2 Changes.

Insert the clause in FPR 1–7.202–2. In the clause, the period of "thirty (30) days" within which any claim must be asserted may be varied in accordance with Administration procedures.

§ 12–7.202–3 Limitation of cost or funds.

Insert the appropriate clause set forth in FPR 1–7.202–3.

§ 12–7.202–4 Allowable cost, fee, and payment.

Except as provided in § 12–7.202–450, insert the clause set forth in FPR 1–7.202–4.

§ 12–7.202–450 Allowable cost, incentive fee, and payment.

(a) When, in accordance with FPR 1–3.405–4, incentive revision of the fee in a cost-reimbursement type supply contract is to be provided, insert the following clause. Additional instructions for use of the clause are provided after the clause.

ALLOWANCE COST, INCENTIVE FEE, AND PAYMENT

(a) (1) For the performance of this contract, the Government shall pay to the Contractor—(i) The cost thereof (hereinafter referred to as "allowable cost") determined by the Contracting Officer to be allowable in accordance with—

(A) Subpart 1–15.2, of Part 1–15 of the Federal Procurement Regulations as in effect on the date of this contract; and

(B) The terms of this contract; and

(ii) A fee determined as provided in this contract.

(2) The target cost and target fee of this contract are set forth in the Schedule and shall be subject to adjustment in accordance with (h) and (i) below. As used throughout this contract the term—

(i) "Target cost" means the estimated cost of this contract initially negotiated, adjusted in accordance with (h) below; and

(ii) "Target fee" means the fee which was initially negotiated on the assumption that this contract would be performed for a cost equal to the estimated cost of this contract initially negotiated, adjusted in accordance with (h) below.

(b) Once each month (or at more frequent intervals, if approved by the Contracting Officer), the Contractor may submit to an authorized representative of the Contracting Officer, in such form and reasonable detail as such representative may require, an invoice or voucher supported by a statement of cost incurred by the Contractor in the performance of this contract and claimed to constitute allowable cost.

(c) Promptly after receipt of each invoice or voucher and statement of cost, the Government shall except as otherwise provided in this contract, subject to the provisions of (d) below, make payment thereon as approved by the Contracting Officer. Normally, payment of fee shall be made to the Contractor as specified in the Schedule. However, when in the opinion of the Contracting Officer, the Contractor's performance or cost indicates that target will not be achieved, the Government shall pay on the basis of such lesser fee as is appropriate. Further, when the Contractor demonstrates that his performance or cost clearly indicates that he will earn a fee significantly in excess of target fee, the Government may, in the sole discretion of the Contracting Officer, pay on the basis of such higher fee as is appropriate. After payment of eighty-five percent (85%) of the applicable fee, the Contracting Officer may withhold further payment of fee until a reserve shall have been set aside in an amount which he considers necessary to protect the interests of the Government, but such reserve shall not exceed fifteen percent (15%) of the total applicable fee or one hundred thousand dollars ($100,000) whichever is less.

(d) At any time or times prior to final payment under this contract, the Contracting Officer may have the invoices or vouchers and statements of cost audited. Each payment theretofore made shall be subject to reduction for amounts included in the related invoice or voucher which are found by the Contracting Officer, on the basis of such audit, not to constitute allowable cost. Any payment may be reduced for overpayments, or increased for underpayments, on preceding invoices or vouchers.

(e) On receipt and approval of the invoice or voucher designated by the Contractor as the "completion invoice" or "completion voucher" and upon compliance by the Contractor with all the provisions of this contract (including without limitation, the provisions relating to patents and the provisions of (f) below), the Government shall promptly pay to the Contractor any balance of allowable cost, and any part of the fee, which has been withheld pursuant to (c) above or otherwise not paid to the Contractor. The completion invoice or voucher shall be submitted by the Contractor promptly following completion of the work under this contract but in no event later than one (1) year (or

such longer period as the Contracting Officer may in his discretion approve in writing) from the date of such completion.

(f) The Contractor agrees that any refunds, rebates, credits, or other amounts (including any interest thereon) accruing to or received by the Contractor or any assignee under this contract shall be paid by the Contractor to the Government to the extent that they are properly allocable to costs for which the Contractor has been reimbursed by the Government under this contract. Reasonable expenses incurred by the Contractor for the purpose of securing such refunds, rebates, credits, or other amounts shall be allowable costs hereunder when approved by the Contracting Officer. Prior to final payment under this contract, the Contractor and each assignee under this contract whose assignment is in effect at the time of final payment under this contract shall execute and deliver—

(i) An assignment to the Government, in form and substance satisfactory to the Contracting Officer, of refunds, rebates, credits, or other amounts (including any interest thereon) properly allocable to costs for which the Contractor has been reimbursed by the Government under this contract; and

(ii) A release discharging the Government, its officers, agents, and employees from all liabilities, obligations, and claims arising out of or under this contract, subject only to the following exceptions—

(A) Specified claims in stated amounts or in estimated amounts where the amounts are not susceptible of exact statement by the Contractor;

(B) Claims, together with reasonable expenses incidental thereto, based upon liabilities of the Contractor to third parties arising out of the performance of this contract; provided, that such claims are not known to the Contractor on the date of the execution of the release; and provided further, that the Contractor gives notice of such claims in writing to the Contracting Officer not more than six (6) years after the date of the release or the date of any notice to the Contractor that the Government is prepared to make final payment, whichever is earlier; and

(C) Claims for reimbursement of costs (other than expenses of the Contractor by reason of his indemnification of the Government against patent liability), including reasonable expenses incidental thereto, incurred by the Contractor under the provisions of this contract relating to patents.

Except as provided in (i) below, payments under the assignment and claims excepted from the release shall be subject to adjustment by reason of the adjustment of fee in accordance with (i) below.

(g) Any cost incurred by the Contractor under the terms of this contract which would constitute allowable cost under the provisions of this clause shall be included in determining the amount payable under this contract, notwithstanding any provisions contained in the specifications or other documents incorporated in this contract by reference, designating services to be performed or materials to be furnished by the Contractor at his expense or without cost to the Government.

(h) When the work under this contract (including any supplies or services which are ordered separately under, or otherwise added to, this contract) is increased or decreased by contract modification or when any equitable adjustment in the target cost is authorized under any other clause of this contract, equitable adjustments in the target cost, target fee, minimum fee, maximum fee or any or all of them, as appropriate shall be set forth in an amendment or supplemental agreement to this contract.

(i) The fee payable hereunder shall be the target fee increased by (insert Contractor's participation) cents for every dollar by which the total allowable cost is less than the target cost or decreased by (insert Contractor's participation) cents for every dollar by which the total allowable cost exceeds the target cost. In no event shall the fee be greater than ---- percent, nor less than ---- percent, of the target cost; and, except as provided in (j) below, within these limits such fee shall be subject to adjustment, by reason of increase or decrease of total allowable cost, on account of payments under the assignment required by (f) (i) above, and claims excepted from the release required by (f) (ii) above. If this contract is terminated in its entirety, the portion of the target fee payble shall not be subject to an increase or decrease as provided in this paragraph. The terminations shall be otherwise accomplished pursuant to other applicable provisions of this contract.

(j) For the purpose of the adjustment of the fee in accordance with (i) above, the term "total allowable cost" shall not include allowable costs arising out of:

(i) Any of the causes covered by the clause hereof entitled "Excusable Delays" to the extent they are beyond the control and without the fault or negligence of the Contractor or any subcontractor;

(ii) The taking effect, after the negotiation of the target cost of this contract, of a statute court decision, written ruling or regulation which results in the Contractor being required to pay or bear the burden of any tax or duty, or increase in the rate thereof;

(iii) Any direct cost attributed to the Contractor's assistance or participation in litigation as required by the Contracting Officer pursuant to a provision of this contract, including the furnishing of evidence and information requested pursuant to the clause hereof entitled "Notice and Assistance Regarding Patent and Copyright Infringement";

(iv) The procurement and maintenance of additional insurance not included in the target cost and required by the Contracting Officer or claims for reimbursement for liabilities to third persons pursuant to the clause hereof entitled "Insurance-Liability to Third Persons";

(v) Any claim, loss or damage resulting from a risk for which the Contractor has been relieved of liability pursuant to the clause hereof entitled "Government Property".

Except as otherwise specifically provided in this contract, all other allowable costs shall be included in the term "total allowable cost" for the purpose of the adjustment of the fee in accordance with (i) above.

(In the event the contract calls for spare parts or other supplies and services which are to be ordered under a provisioning document or Government option, the following provision (k) shall be included.)

(k) Compensation for supplies (including spare parts) and services which are to be furnished under this contract pursuant to a provisioning document or Government option shall be determined in accordance with the provisions of this clause notwithstanding any inconsistent provision in such provisioning document or Government option.

(End of clause)

(b) (1) In paragraph (f) (ii) (B) of the clause in FPR 1–7.202–4 and the foregoing clause the period of years may be increased to correspond with any statutory period of limitation applicable to claims of third parties against the contractor: *Provided*, That a corresponding increase is made in the period of retention of records required in paragraph (d) of the clause set forth in FPR 1–7.103–3.

(2) With respect to paragraph (c) of the clause set forth above, generally, the payment of fee provisions in the Schedule should be based on target fee.

(3) In the case of cost-sharing contracts and cost-reimbursement type supply contracts without fee—

(i) Insert the following sentence in lieu of the second sentence of paragraph (c) of the clause set forth above, except that, if the contract does not provide for cost-sharing, delete the parenthetical references to the Government's share:

After payment of an amount equal to eighty percent (80%) of (the Government's share of) the total estimated cost of performance of this contract set forth in the Schedule, the Contracting Officer may withhold further payment on account of allowable cost until a reserve shall have been set aside in an amount which he considers necessary to protect the interests of the Government, but such reserve shall not exceed one percent (1%) of (the Government's share of) such total estimated cost or one hundred thousand dollars ($100,000), whichever is less.

(ii) delete the words "and any part of the fixed fee" from paragraph (e) of the clause set forth in FPR 1–7.202–4.

(iii) in contracts which provide for cost-sharing, change paragraph (a) of the clause set forth in FPR 1–7.204–4 as follows:

(A) the allowability of costs incurred in the performance of this contract shall be determined by the Contracting Officer in accordance with—

(1) Subpart 1–15.2 of Part 1–15 of the Federal Procurement Regulations as in effect on the date of this contract; and

(2) the terms of this contract; and

(iv) Change the title of the clause set forth in FPR 1–7.202–4 to "Allowable Cost and Payment".

(4) The Contracting Officer shall determine to his satisfaction that the estimated cost of the contract initially negotiated does not include amounts for the contingencies identified in paragraph (j) of the clause set forth above.

(5) The amount to be withheld under paragraph (c) of the foregoing clause and the clause set forth in FPR 1–7.202–4 shall normally be the maximum authorized by the clause except that the Contracting Officer may, if he believes that such amount exceeds the amount necessary to protect the interests of the Government, review the status of all funds being withheld from the contractor under the particular contract concerned and under any other contracts with the Contractor. The Contracting Officer shall decide whether to reduce the rate of withholding or whether to release a portion of the amount already reserved under the contract, as appropriate.

§ 12–7.202–5 Inspection of supplies and correction of defects.

Insert the clause set forth in FPR 1–7.202–5.

§ 12–7.202–6 Assignment of claims.

Insert the clause set forth in FPR 1–30.703 under the conditions prescribed therein.

V 42 174 SEP 8 77 UMI

§ 12–7.202–7 Examination of records by Comptroller General.

Insert the clause set forth in FPR 1–7.103–3.

§ 12–7.202–8 Subcontracts.

Insert the clause set forth in FPR 1–7.202–8.

§ 12–7.202–9 [Reserved]

§ 12–7.202–10 Termination for default or convenience of the Government.

Insert the clause set forth in FPR 1–8.702 in accordance with conditions prescribed in FPR 1–8.700–2(a)(3) FPR 1–8.700–2(b)(2).

§ 12–7.202–11 Excusable delays.

Insert the clause set forth in FPR 1–8.708 under the conditions prescribed in FPR 1–8.700–2(c).

§ 12–7.202–12 Disputes.

Insert the clause set forth in FPR 1–7.102–12.

§ 12–7.202–13 [Reserved]

§ 12–7.202–14 Buy American Act.

Insert the clause set forth in FPR 1–6.104–5 under the conditions prescribed therein.

§ 12–7.202–15 Convict labor.

Insert the clause set forth in FPR 1–12.204 under the conditions prescribed in FPR 1–12.203.

§ 12–7.202–16 Contract Work Hours and Safety Standards Act—overtime compensation.

Insert the clause set forth in FPR 1–12.303 under the conditions prescribed in FPR 1–12.302.

§ 12–7.202–17 Walsh-Healey Public Contracts Act.

Insert the clause set forth in FPR 1–12.605 under the conditions prescribed in FPR 1–12.602.

§ 12–7.202–18 Equal opportunity.

Insert the clause set forth in FPR 1–12.803–2 under the conditions prescribed in FPR 1–12.803–1.

§ 12–7.202–19 Officials not to benefit.

Insert the clause set forth in FPR 1–7.102–17.

§ 12–7.202–20 Convenant against contingent fees.

§ 12–7.203–3 Notice to the Government of labor disputes.

Insert the clause set forth in FPR 1–7.203–3 wherever a work stoppage would result in delay in an urgent program.

§ 12–7.203–4 [Reserved]

§ 12–7.203–5 [Reserved]

§ 12–7.203–6 [Reserved]

§ 12–7.203–7 [Reserved]

§ 12–7.203–8 [Reserved]

§ 12–7.203–9 Negotiated overhead rates.

Insert the clause set forth in FPR 1–3.704 under the conditions prescribed therein.

§ 12–7.203–950 Negotiated overhead rates—indirect costs.

(a) In accordance with DOTPR 12–3.704–50, the following clause shall be used when the contractor's normal method of interim overhead reimbursement is based on billing rates approved by the Contracting Officer (normally through an exchange of correspondence) rather than on formally negotiated provisional rates:

INDIRECT COSTS (BILLING RATES)

Pending the establishment of final overhead rates as provided for in the clause entitled "Negotiated Overhead Rates", the Contractor shall be reimbursed for indirect costs on the basis of billing rates mutually agreed upon by the Contracting Officer and the Contractor.

(End of clause)

Prior to establishing or changing the billing rates, the Contracting Officer should seek the advice of the cognizant audit activity as to the acceptability of the billing rates proposed by the contractor.

(b) The following clause shall be used when the contractor's normal method of interim overhead reimbursement is based on negotiated provisional rates. The provisional rates will remain in effect until such time as the contract is amended. The rates shall be listed immediately below the clause along with the base of applications for each rate listed:

INDIRECT COSTS (PROVISIONAL RATES)

Pending establishment of final overhead rates as provided for in the clause entitled "Negotiated Overhead Rates", the Contractor shall be reimbursed for indirect costs on the basis of the negotiated provisional rates set forth below, which rates shall remain in effect until the contract is amended to incorporate either (a) final overhead rates for a specific period or periods or (b) revised negotiated provisional overhead rates as provided for in paragraph (e) of the clause of this contract entitled "Negotiated Overhead Rates".

(End of clause)

§ 12–7.203–951 Audit—indirect costs (actual).

Insert the following clause in accordance with DOTPR 12–3.704–51.

INDIRECT COSTS (ACTUAL)

In accordance with the "Allowable Cost, Fixed Fee, and Payment" clause of the contract, the contractor shall be paid his actual overhead cost. Allowable overhead cost will be determined in accordance with the principles set forth in Subpart 1–15.2 of the Federal Procurement Regulations. Any failure of the parties hereto to agree as to what constitutes actual overhead costs shall be considered a dispute covering a question of fact within the meaning of the clause of this contract entitled "Disputes".

(End of clause)

§ 12–7.203–10 Make-or-buy program.

Insert the clause set forth in FPR 1–3.902–3 under the conditions prescribed therein.

§ 12–7.203–11 Advance payments.

When advance payments are to be made in accordance with FPR Subpart 1–30.4, insert the appropriate provisions as prescribed in FPR 1–30.414–2.

§ 12–7.203–12 Required source for jewel bearings.

Insert the clause set forth in FPR 1–1.319 under the conditions prescribed therein.

§ 12–7.203–13 General Services Administration supply sources.

Insert the clause set forth in FPR 1–7.203–13 under the conditions set forth in FPR Subpart 1–5.9.

§ 12–7.203–14 Use of interagency motor pool vehicles and related services.

Insert the clause set forth in FPR 1–7.203–14 as prescribed therein.

§ 12–7.203–15 Interest.

Insert the clause set forth in FPR 1–7.203–15 as prescribed therein.

§ 12–7.203–16 [Reserved]

§ 12–7.203–17 [Reserved]

§ 12–7.203–18 Small business subcontracting program.

Insert the clause set forth in FPR 1–1.710–3(b) under the conditions prescribed therein.

§ 12–7.203–19 Labor surplus area subcontracting program.

Insert the clause set forth in FPR 1–1.805–3(b) under the conditions prescribed therein.

§ 12–7.203–20 Minority business enterprises subcontracting program.

Insert the clause set forth in FPR 1–1.1310–2(b) under the conditions prescribed therein.

§ 12–7.203–21 Government property.

Insert the clause set forth in FPR 1–7.203–21 when the Government is to furnish or the contractor is to acquire, Government property.

§ 12–7.203–22 Preference for U.S. flag air carriers.

Insert the clause set forth in FPR 1–1.322–2 under the conditions prescribed therein.

§ 12–7.203–23 Cost accounting standards.

Insert the notices and clauses cited in FPR 1–7.203–23 as prescribed therein.

§ 12–7.203–24 Privacy Act.

Insert the clause prescribed in FPR 1–1.327–5 as amended by DOTPR 12–7.103–29 under the conditions prescribed therein.

§ 12–7.203–25 Use of U.S. flag commercial vessels.

Insert the clause prescribed by FPR 1–19–108.2 under the conditions set forth therein.

§ 12–7.204 Additional clauses.

The following clauses may be inserted in cost-reimbursement type supply contracts when it is desired to cover the subject matter thereof:

§ 12–7.204–1 Alterations in contract.

Insert the clause set forth in FPR 1–7.204–1.

§ 12–7.204–2 Approval of contract.

Insert the clause set forth in FPR 1–7.204–2.

§ 12–7.204–3 Date of incurrence of costs.

Insert the clause set forth in FPR 1–7.204–3.

§ 12–7.204–4 Notice regarding late delivery.

Insert the clause set forth in FPR 1–7.204–4.

§ 12–7.204–5 Insurance—Liability to Third Persons.

Insert the clause set forth in 12–7.204–50 below in lieu of the clause set forth in FPR 1–7.204–5.

§ 12–7.204–50 Insurance—Liability to Third Persons.

Insert the following clause in cost-reimbursement type supply contracts pursuant to the general policies set forth in FPR Subpart 1–10.5.

INSURANCE—LIABILITY TO THIRD PERSONS

(a) The Contractor shall procure and thereafter maintain workmen's compensation, employer's liability, comprehensive general liability (bodily injury) and comprehensive automobile liability (bodily injury and property damage) insurance, with respect to performance under this contract, and such other insurance as the Contracting Officer may from time to time require with respect to performance under this contract: *Provided*, That the Contractor may with the approval of the Contracting Officer, maintain a self-insurance program: And provided further, That with respect to workmen's compensation the Contractor is qualified pursuant to statutory authority. All insurance required pursuant to the provisions of this paragraph shall be in such form, in such amount, and for such periods of time, as the Contracting Officer may from time to time require or approve, and with insurers approved by the Contracting Officer.

(b) The Contractor agrees, to the extent and in the manner required by the Contracting Officer, to submit for the approval of the Contracting Officer any other insurance maintained by the Contractor in connection with the performance of this contract and for which the Contractor seeks reimbursement hereunder.

(c) The Contractor shall be reimbursed: (1) For the portion allocable to this contract of the reasonable cost of insurance as required or approved pursuant to the provisions of this clause, and (2) for liabilities to third persons for loss of or damage to property (other than property (i) owned, occupied or used by the Contractor or rented to the Contractor or (ii) in the care, custody, or control of the Contractor), or for death or bodily injury, not compensated by insurance or otherwise, arising out of the performance of this contract, whether or not caused by the negligence of the Contractor, his agents, servants or employees: *Provided*, Such liabilities are represented by final judgments or by settlements approved in writing by the Government and expenses incidental to such liabilities, except liabilities (a) for which the Contractor is otherwise responsible under the express terms of the clause or clauses, if any, specified in the Schedule, or (b) with respect to which the Contractor has failed to insure as required or maintain insurance as approved by the Contracting Officer or (c) which results from willful misconduct or lack of good faith on the part of any of the Contractor's directors or officers, or on the part of any of its managers, superintendents, or other equivalent representatives, who has supervision or direction of (1) all or substantially all of the Contractor's business, or (2) all or substantially all of the Contractor's operations at any one plant or separate location in which this contract is being performed, or (3) a separate and complete major industrial operation in connection with the performance of this contract. The foregoing shall not restrict the right of the Contractor to be reimbursed for the cost of insurance maintained by the Contractor in connection with the performance of this contract, other than insurance required to be submitted for approval or required to be procured and maintained pursuant to the provisions of this clause: *Provided*, Such cost would constitute allowable cost under the clause of this contract entitled "Allowable Cost, Fixed Fee and Payment."

(d) The Contractor shall give the Government or its representatives immediate notice of any suit or action filed, and prompt notice of any claim made, against the Contractor arising out of the performance of this contract, the cost and expense of which may be reimbursable to the Contractor under the provisions of this contract, and the risk of which is then uninsured or in which the amount claimed exceeds the amount of coverage. The Contractor shall furnish immediately to the Government copies of all pertinent papers received by the Contractor. If the amount of the liability claimed exceeds the amount of coverage, the Contractor shall authorize representatives of the Government to collaborate with counsel for the insurance carrier, if any, in settling or defending such claim. If the liability is not insured or covered by bond, the Contractor shall, if required by the Government, authorize representatives of the Government to settle or defend any such claim and to represent the Contractor in or take charge of any litigation in connection therewith; *Provided*, That the Contractor may, at his own expense, be as-

V 42 174 SEP 8 77 UMI

sociated with the representatives of the Government in the settlement or defense of any such claim or litigation.

(End of clause)

§ 12–7.250 Required DOTPR clauses.

Insert the following DOTPR clauses in cost-reimbursement type supply contracts.

§ 12–7.250–1 Gratuities.

Insert the clause set forth in DOTPR 12–7.150–1.

§ 12–7.250–2 New material.

Insert the clause set forth in DOTPR 12–7.150–2.

§ 12–7.250–3 Priorities, allocations, and allotments.

Insert the clause set forth in DOTPR 12–7.150–3.

§ 12–7.250–4 Interpretation or modification.

Insert the clause set forth in DOTPR 12–7.150–4.

§ 12–7.250–5 Dissemination of contract information.

Insert the clause set forth in DOTPR 12–7.150–10.

§ 12–7.250–6 Authorization and consent.

Insert the clause set forth in DOTPR 12–7.150–11 in accordance with DOTPR 12–9.151–1.

§ 12–7.251 DOTPR clauses to be used when applicable.

The following DOTPR clauses shall be included in cost-reimbursement type supply contracts when applicable.

§ 12–7.251–1 Patent indemnity.

Insert the clause set forth in DOTPR 12–7.151–1 in accordance with instructions in DOTPR 12–9.152.

§ 12–7.251–2 Filing of patent applications.

Insert the clause set forth in DOTPR 12–7.151–2 in accordance with instructions in DOTPR 12–9.154.

§ 12–7.251–3 Reporting of royalties (foreign).

Insert the clause set forth in DOTPR 12–7.151–3 in accordance with instructions in DOTPR 12–9.156.

§ 12–7.251–4 Refund of royalties.

Insert the clause set forth in DOTPR 12–7.151–4 in accordance with instruction in DOTPR 12–9.157.

§ 12–7.251–5 Patent Rights.

When experimental, developmental, or research work may be performed under the contract, insert the appropriate patent rights clause set forth in FPR 1–9.1.

§ 12–7.251–6 Rights in data.

Insert the clause set forth in DOTPR 12–7.151–5 or DOTPR 12–7.151–6 in accordance with instructions in DOTPR 12–9.201–1.

§ 12–7.251–7 Military security requirements.

When required by DOTPR 12–1.352, insert the Military Security Requirements clause in DOTPR 12–7.151–9, modified by deleting paragraphs (c) and (d) and substituting the following:

(c) If, subsequent to the date of this contract, the security classifications or security requirements under this contract are changed by the Government as provided in this clause, and if such changes cause an increase or decrease in the estimated cost or time required for performance of this contract, the estimated cost, fee, delivery schedule, or any other provision of the contract that may be affected, shall be subject to an equitable adjustment. Any such equitable adjustment shall be accomplished in the manner set forth in the "Changes" clause of this contract.

(d) The Contractor agrees to insert, in all subcontracts hereunder which involve access to classified information, provisions which shall conform substantially to the language of this clause, including this paragraph (d) but excluding the last sentence of paragraph (c) of this clause. (1971 APR.)

(End of clause paragraphs)

§ 12–7.251–8 Stop work orders.

The clause set forth in DOTPR 12–7.151–12 may be included in any cost-reimbursement type contract under the conditions described therein: *Provided*, The clause is modified as follows:

(a) The words "the 'Termination for Convenience' clause of this contract" shall be changed to read "the 'Termination' clause of the contract"; and

(d) The words "an equitable adjustment shall be made in the delivery schedule or contract price, or both" shall be changed to read "an equitable adjustment shall be made in the delivery schedule, the estimated cost, the fee, or a combination thereof, and in any other provisions of the contract that may be affected."

(End of clause paragraphs)

§ 12–7.251–9 Value engineering.

(a) Use of a value engineering incentive clause: In accordance with DOTPR 12–1.5202–2 insert the value engineering incentive clause set forth in DOTPR 12–7.151–13(a) as modified in paragraph (b) or (c) of this section.

(b) Cost - Plus - Incentive - Fee Contracts: Substitute the following "Sharing" provision for paragraph (e) of the applicable clause in DOTPR 12–7.151–13 (a):

(e) Sharing. If a VECP submitted by the Contractor pursuant to this clause is accepted, the Contractor shall share in the savings realized by the Government in accordance with the following provision:

(1) Instant Contract. (i) Definitions: (A) Instant contract savings to the Contractor (ICS) is the unit cost reduction times the number of units affected in the instant contract. The proposed unit cost reduction includes estimated allowable Contractor development and implementation costs (CC). The Contractor's development and implementation costs include any subcontractor development and implementation costs and any subcontractor incentive payments (see (b) below). For purposes of this clause, Contractor development costs are those costs incurred after the Contractor has identified a specific value engineering project and prior to acceptance by the Government.

(B) Government costs (GC) are those costs which directly result from development and implementation of the VECP, such as test and evaluation of the VECP, and any increased costs in operations, maintenance, and logistic support.

(ii) Calculations and actions: (A) Reduce the target cost of items affected by the VECP by ICS. The estimated cost for "limitation of cost" or "limitation of funds" purposes (12–7.202–3), if different or separately stated, should also be reduced by the same amount.

(B) If ICS exceeds GC, add 35% (20% if this is a VE Program Requirement Change (VEPRC)) of the excess to minimum, target, and maximum fees relating to such items.

(C) If GC exceeds ICS, but acceptance of the VECP is still desirable due to concurrent or future savings, do not adjust minimum, target, or maximum fees, but offset the amount GC exceeds ICS against concurrent or future contract savings.

(D) If the Contractor cost of developing and implementing the VECP would result in an increase in the instant contract target cost, but the VECP is still desirable due to concurrent or future savings, equitably adjust the total target cost and fee in accordance with the "Changes" clause. Offset this increase and any GC against concurrent or future savings.

(2) Concurrent contracts. (i) If the VECP accepted under this contract is also used on concurrent contracts of the purchasing office for essentially the same items the Contractor shall be paid a share of any savings as calculated in (ii) below.

(ii) Calculations: (A) Determine the reduction in the price of each concurrent contract(s) as a result of incorporating the VECP.

(B) Subtract from the total amount in (A) any Government costs (GC) not yet offset (if GC was greater than ICS) in (e)(1)(ii) (C) or (D) above, and any increase in the instant contract target cost, i.e., if ICS was negative in (e)(1)(ii)(D). If the resulting number is positive, multiply it by 35% (20% if this is a VEPRC). Add this amount to the instant contract as a separate line item independent of the incentive sharing arrangement and without adjustment to any of the contract incentive parameters.

(3) Future contracts. (i) Definition. The term unit cost reduction for future contract sharing shall be the unit cost reduction under this instant contract without deducting any cost of development or implementation.

(ii) If the VECP accepted under this contract is used on future purchases of essentially the same item by the purchasing office, or its successor, the Contractor shall share in the savings on all affected end items scheduled for delivery not later than three years after acceptance of the first item incorporating the VECP, or until the originally scheduled delivery date of the last affected end item under the instant contract, whichever is later. When sharing on future contracts is expected, the Contractor shall be responsible for the following:

(A) Maintaining records adequate to support identification of the first delivered unit to which the VECP applies. These records are considered an integral part of contract documentation and shall be maintained for a period of three years after final payment on the contract under which the VECP was accepted.

(B) Annotating the receiving report or invoice, which applies to the initial unit covered by the VECP with the following statement: "This is the initial unit delivered which incorporates VECP No. ---------, Contract Modification No. ------, dated -------."

(iii) Calculations. At the time each eligible future contract is awarded:

(A) Determine the number of units scheduled to be delivered prior to expiration of the Contractor sharing period determined in (ii) above. Multiply this by the unit cost reduction as defined in (e)(3)(i).

(B) Subtract from the total amount in (A) any Government costs or instant contract increases not yet offset in (e)(1)(ii) (C) or (D), or in (e)(2)(ii)(B), or in other contracts awarded since acceptance of the VECP. If the resulting number is positive, multiply it by 35% (20% if this is a VEPRC). Add this amount to the instant contract as a separate line item independent of the incentive sharing arrangement and without adjustment to any of the contract incentive parameters.

(4) Collateral savings. If an accepted VECP results in a measurable net reduction in the agency's overall documentable projected costs of maintenance, operation, logistic support or Government-furnished property, which exceeds any increase in costs attributable to incorporation of such VECP, including acquisition costs, the contract shall be increased by twenty percent (20%) of the projected net reduction in ascertainable collateral costs (i.e., savings determined to be realized during an average year of use of the item in which the change is incorporated) and, if applicable, of the actual savings accruing from a change or reduction of Government-furnished property under the instant contract. Add this amount to the instant contract as a separate item independent of the incentive sharing arrangement and without adjustment to any of the contract incentive parameters. However, such increase representing the Contractor's share of collateral savings shall, in no event, exceed the price of this contract, or $100,000, whichever is greater. The determination of the amount of collateral savings, if any, will be made solely by the Government and shall not be subject to the "Disputes" clause of this contract. In all cases, degradation of performance, service life, or capability shall be a consideration in the determination of actual savings to the agency.

(End of clause paragraph)

(c) Cost-plus-fixed fee and cost-plus-award-fee contracts: Substitute the following "Sharing" provision for paragraph (e) of the applicable clause in § 12–7.151–13(a):

(e) Sharing. If a VECP submitted by the Contractor pursuant to this clause is accepted the Contractor shall share in savings realized by the Government in accordance with the following provisions:

(1) Instant contract. (i) Definitions: (A) Instant contract savings to the Contractor (ICS) is the unit cost reduction times the number of units affected in the instant contract. The proposed unit cost reduction includes estimated allowable Contractor development and implementation costs (CC). The Contractor's development and implementation costs include any subcontractor development and implementation costs and any subcontractor incentive payments (see (b) below). For purposes of this clause, Contractor development costs are those costs incurred after the Contractor has identified a specific value engineering project and prior to acceptance by the Government.

(B) Government Costs (GC) are those costs which directly result from development and implementation of the VECP, such as test and evaluation of the VECP, and any increased costs in operations, maintenance, and logistic support.

(ii) Calculations and actions: (A) If ICS exceeds GC, add 25% (15% if this a VE Program Requirements Change (VEPRC) of the excess to the contract fee), and reduce the estimated cost of the items affected by the VECP, for "limitation of cost" or "limitation of funds" purposes (12–7.202–3) by ICS.

(B) If GC exceeds ICS, but acceptance of the VECP is still desirable due to concurrent or future savings, do not adjust contract fee, but offset the amount GC exceeds ICS against concurrent or future savings.

(C) If the Contractor cost of developing and implementing the VECP would result in an increase in instant contract cost, but the VECP is still desirable due to concurrent or future savings, equitably adjust the estimated cost and fee in accordance with the "Changes" clause. Offset the increase and any GC against concurrent or future savings.

(2) Concurrent contracts. (i) If the VECP accepted under this contract is also used on concurrent contracts of the purchasing office for essentially the same items the Contractor shall be paid a share of any savings as calculated in (ii) below.

(ii) Calculations: (A) Determine the reduction in the price of each concurrent contract(s) as a result of incorporating the VECP.

(B) Subtract from the total amount in (A) any Government Costs (GC) not yet offset (if GC was greater than ICS) in (e)(1)(ii) (B) or (C) above, and any increase in the instant contract price, i.e., if ICS was negative in (e)(1)(ii)(C) If the resulting number is positive, multiply it by 25% (15% if this is a VEPRC). Add this amount to the contract fee.

(3) Future contracts. (i) Definition. The term unit cost reduction for future contract sharing shall be the unit cost reduction under this instant contract without deducting any cost of development or implementation.

(ii) If the VECP accepted under this contract is used on future purchases of essentially the same item by the purchasing office, or its successor, the Contractor shall share in the savings on all affected end items scheduled for delivery not later than three years after acceptance of the first item incorporating the VECP, or until the originally scheduled delivery date of the last affected end item under the instant contract, whichever is later. When sharing on future contracts is expected, the Contractor shall be responsible for the following:

(A) Maintaining records adequate to support identification of the first delivered unit to which the VECP applies. These records are considered an integral part of contract documentation and shall be maintained for a period of three years after final payment on the contract under which the VECP was accepted.

(B) Annotating the receiving report or invoice, which applies to the initial unit covered by the VECP with the following statement: "This is the initial unit delivered which incorporates VECP No. ---------, Contract Modification ---------, Dated---------."

(iii) Calculations. At the time each eligible future contract is awarded:

(A) Determine the number of units scheduled to be delivered prior to expiration of the Contractor sharing period determined in (ii) above. Multiply this by the unit cost reduction as defined in (e)(3)(i).

(B) Subtract from the total amount in (A) any Government costs or instant contract increases not yet offset in (e)(1)(ii) (B) or (C), or in (e)(2)(ii)(B), or in other contracts awarded since acceptance of the VECP. If the resulting number is positive, multiply it by 25% (15% if this is a VEPRC).

(4) Collateral savings. If an accepted VECP results in a measurable net reduction in the cognizant agency's overall documentable projected costs of maintenance, operation, logistic support or Government-furnished property, which exceeds any increase in costs attributable to incorporation of such VECP, including acquisition costs, the contract shall be increased by twenty percent (20%) of the projected net reduction in ascertainable collateral costs (i.e., savings determined to be realized during an average year of use of the item in which the change is incorporated) and, if applicable, of the actual savings accruing from a change or reduction of Government-furnished property under the instant contract. However, such increase representing the Contractor's share of collateral savings shall, in no event, exceed the price of this contract or $100,000, whichever is greater. The determination of the amount of collateral savings, if any, will be made solely by the Government and shall not be subject to the "Disputes" clause of this contract. In all cases, degradation of performance, service life, or capability shall be a consideration in the determination of actual savings to the agency.

(End of clause paragraph)

(d) When the sharing provisions applicable to incentive contracts are to be modified in accordance with § 12–1.5203–1(c), clause paragraph (e) in paragraph (b) of this section shall be further modified as follows:

(1) Change clause paragraph (e)(1)(ii) to provide substantially as follows:

(ii) If the cost reduction proposal submitted pursuant to this clause involves anticipated decrease in the cost of performance of this contract and is accepted by the Government, the parties agree that neither the target cost, target profit, nor ceiling price of the instant contract shall be adjusted by reason of the acceptance of such proposal. The new requirement will be incorporated into the contract by a contract modification which will state that it is made pursuant to this Value Engineering clause. When the cost of performance of this contract is increased as a result of the changes, the equitable adjustment increasing the contract price shall be in accordance with the Changes clause rather than under this clause, but the resulting contract modification will state that it is made pursuant to this clause.

(End of clause paragraph)

(2) Change clause paragraph (e)(2)(ii)(B) to provide substantially as follows:

(B) Subtract from the total amount in (A) any government costs not yet offset and any increase in the instant contract target cost. If the resulting number is positive, multiply it by 35% (20% if VEPRC). Add this amount to the instant contract as a separate line item independent of the incentive sharing arrangement and without adjustment to any of the contract incentive parameters.

(End of clause paragraph)

(3) Substitute the definition in 12–7.151–13(a)(5) for the definition in clause paragraph (e)(3)(i).

(4) Change the clause paragraph (e)(3)(iii)(B) to provide substantially as follows:

(B) Subtract from the total amount in (A) any government costs or instant contract increases not yet offset. If the resulting number is positive, multiply it by 35% (20% if VEPRC). Add this amount to the instant contract as a separate line item independent

V 42 174 SEP 8 77 UMI

of the incentive sharing arrangement and without adjustment to any of the contract incentive parameters.

(End of clause paragraph)

§ 12–7.251–10 Multi-year procurement.

The clauses set forth in DOTPR 12–7.151–14 shall be included in all contracts under the multi-year procurement method in accordance with instructions contained in DOTPR 12–1.55.

§ 12–7.251–11 Renegotiation.

Insert the clause set forth in DOTPR 12–7.151–15 in accordance with instructions contained therein.

§ 12–7.251–12 Background patents (license).

Insert the clause set forth in DOTPR 12–7.150–12 in accordance with the instructions contained in DOTPR 12–9.150.

Subpart 12–7.3—Fixed Price Research and Development Contracts

§ 12–7.300 Scope of Subpart.

This subpart sets forth uniform contract clauses for use in fixed-price research and development contracts. The clauses are also appropriate for use in fixed-price contracts for studies, tests, and reports.

§ 12–7.301 Applicability.

The clauses set forth in this subpart shall be used when required, or as applicable or additional clauses in all fixed-priced research and development contracts and as otherwise stipulated in FPR 1–7.301.

§ 12–7.302 Required clauses.

The clauses set forth or cited in this subpart 12–7.3 shall be inserted, as required, in all fixed-price research and development contracts.

§ 12–7.302–1 Definitions.

Insert the clause set forth in FPR 1–7.102–1. Additional definitions may be included provided they are not inconsistent with the clauses or the provisions of the FPR and these regulations.

§ 12–7.302–2 Payments.

Insert the clause set forth in FPR 1–7.302–2.

§ 12–7.302–3 Standards of work.

Insert the clause set forth in FPR 1–7.302–3.

§ 12–7.302–4 Inspection.

Insert the appropriate clause set forth in FPR 1–7.302–4 under the conditions prescribed therein.

§ 12–7.302–5 Assignment of claims.

Insert the clause set forth in FPR 1–30.703 under the conditions prescribed therein.

§ 12–7.302–6 Examination of records by Comptroller General.

Insert the clause set forth in FPR 1–7.103–3.

§ 12–7.302–7 Federal, State, and local taxes.

Insert the appropriate clause cited in FPR 1–7.302–7 as prescribed therein.

§ 12–7.302–8 Utilization of small business concerns.

Insert the clause set forth in FPR 1–1.710–3(a) under the conditions and in the manner prescribed therein.

§ 12–7.302–9 Default.

Insert the clause set forth in FPR 1–8.710 under the conditions prescribed in FPR 1–8.700–2(b)(3).

§ 12–7.302–10 Termination for convenience of the Government.

Insert the clause set forth in FPR 1–8.701 or FPR 1–8.704–1, as appropriate.

§ 12–7.302–11 Disputes.

Insert the clause set forth in FPR 1–7.102–12.

§ 12–7.302–12 [Reserved]

§ 12–7.302–13 Buy American Act.

Insert the clause set forth in FPR 1–6.104–5 under the conditions prescribed therein.

§ 12–7.302–14 Convict labor.

Insert the clause set forth in FPR 1–12.204 under the conditions prescribed in FPR 1–12.203.

§ 12–7.302–15 Walsh-Healey Public Contracts Act.

Insert the clause set forth in FPR 1–12.605 under the conditions prescribed in FPR 1–12.602.

§ 12–7.302–16 Contract Work Hours and Safety Standards Act—overtime compensation.

Insert the clause set forth in FPR 1–12.303 under the conditions prescribed in FPR 1–12.302.

§ 12–7.302–17 Equal Opportunity.

Insert the clause set forth in FPR 1–12.803–2 under the conditions prescribed in FPR 1–12.803–1.

§ 12–7.302–18 Officials not to benefit.

Insert the clause set forth in FPR 1–7.102–17.

§ 12–7.302–19 Covenant against contingent fees.

Insert the clause set forth in FPR 1–1.503 under the conditions prescribed in FPR 1–1.501.

§ 12–7.302–20 [Reserved]

§ 12–7.302–21 [Reserved]

§ 12–7.302–22 Notice and assistance regarding patent and copyright infringement.

Insert the clause set forth in FPR 1–7.103–4.

§ 12–7.302–23 Patents.

Insert the appropriate clause set forth in FPR 1–9.107 under the conditions contained in FPR Subpart 1–9.1.

§ 12–7.302–24 [Reserved]

§ 12–7.302–25 [Reserved]

§ 12–7.302–26 Utilization of labor surplus area concerns.

Insert the clause set forth in FPR 1–1.805–3(a) under the conditions prescribed therein.

§ 12–7.302–27 [Reserved]

§ 12–7.302–28 [Reserved]

§ 12–7.302–29 Pricing of adjustments.

Insert the clause set forth in FPR 1–7.102–20 under the conditions prescribed therein.

§ 12–7.302–30 Disabled veterans and veterans of the Vietnam era.

Insert the clause set forth in FPR Temporary Regulation 39 of July 1976 in all contracts which exceed $10,000.

§ 12–7.302–31 Utilization of minority business enterprises.

Insert the clause set forth in FPR 1–1.1310–2(a) under the conditions prescribed therein.

§ 12–7.302–32 Payment of interest on contractors' claims.

Insert the clause set forth in FPR 1–1.322(b) under the conditions prescribed therein.

§ 12–7.302–33 Employment of the handicapped.

Insert the clause set forth in FPR Temporary Regulation 38 of May 1976.

§ 12–7.302–34 Clean air and water.

Insert the clause prescribed by FPR 1–1.2302 under the conditions set forth therein.

§ 12–7.303 Clauses to be used when applicable.

§ 12–7.303–1 Clauses for fixed-price research and development contracts involving construction.

Insert the clauses cited in FPR 1–7.303–1 as prescribed therein.

§ 12–7.303–2 [Reserved]

§ 12–7.303–3 [Reserved]

§ 12–7.303–4 [Reserved]

§ 12–7.303–5 [Reserved]

§ 12–7.303–6 [Reserved]

§ 12–7.303–7 Government property.

Insert the appropriate clause set forth in FPR 1–7.303–7 under the conditions for its use prescribed therein.

§ 12–7.303–8 [Reserved]

§ 12–7.303–9 Notice to the Government of labor disputes.

Insert the clause set forth in FPR 1–7.203–3 under the conditions prescribed therein.

§ 12–7.303–10 [Reserved]

§ 12–7.303–11 [Reserved]

§ 12–7.303–12 Subcontracts.

Insert the clause set forth in FPR 1–7.303–12 under the conditions for its use prescribed therein.

§ 12–7.303–13 [Reserved]

§ 12–7.303–14 [Reserved]

§ 12–7.303–15 [Reserved]

§ 12–7.303–16 Price reduction for defective cost or pricing data.

Insert the appropriate clause set forth in FPR 1–3.814–1 under the conditions prescribed therein.

§ 12–7.303–17 [Reserved]

§ 12–7.303–18 [Reserved]

§ 12–7.303–19 [Reserved]

§ 12–7.303–20 [Reserved]

§ 12–7.303–21 Advance payments.

When advance payments are to be made in accordance with FPR Subpart 1–30.4, insert the appropriate provisions as prescribed in FPR 1–30.414–2.

§ 12–7.303–22 Workmen's compensation insurance (Defense Base Act).

Insert the clause set forth in FPR–1–10.402 under the conditions prescribed therein.

§ 12–7.303–23 Progress payments.

When progress payments are to be made in accordance with FPR 1–30.5, insert the appropriate provisions as prescribed in FPR 1–30.510.

§ 12–7.303–24 Required source for jewel bearings.

Insert the clause set forth in FPR 1–1.319 under the conditions prescribed therein.

§ 12–7.303–25 [Reserved]

§ 12–7.303–26 Interest.

Insert the clause set forth in FPR 1–7.203–15 under the conditions prescribed therein.

§ 12–7.303–27 Competition in subcontracting.

Insert the clause set forth in FPR 1–7.202–30 in accordance with conditions prescribed in FPR 1–7.303–27.

§ 12–7.303–28 Audit and records.

Insert the appropriate clause(s) set forth in FPR 1–3.814–2 under the conditions prescribed therein.

§ 12–7.303–29 Subcontractor cost and pricing data.

Insert the appropriate clause set forth in FPR 1–3.814–3 under the conditions prescribed therein.

§ 12–7.303–30 [Reserved]

§ 12–7.303–31 [Reserved]

§ 12–7.303–32 [Reserved]

§ 12–7.303–33 [Reserved]

§ 12–7.303–34 [Reserved]

§ 12–7.303–35 [Reserved]

§ 12–7.303–36 [Reserved]

§ 12–7.303–37 [Reserved]

§ 12–7.303–38 [Reserved]

§ 12–7.303–39 [Reserved]

§ 12–7.303–40 [Reserved]

§ 12–7.303–41 United States products and services (Balance of Payments Program).

Insert the clause set forth in FPR 1–6.806–4 under the conditions prescribed in FPR Subpart 1–6.8.

§ 12–7.303–42 [Reserved]

§ 12–7.303–43 [Reserved]

§ 12–7.303–44 Care of laboratory animals.

Insert the clause set forth in FPR 1–7.303–44 under the conditions prescribed therein.

§ 12–7.303–45 [Reserved]

§ 12–7.303–46 Insurance.

Insert the clause set forth in FPR 1–7.303–46 under the conditions prescribed therein.

§ 12–7.303–47 [Reserved]

§ 12–7.303–48 [Reserved]

§ 12–7.303–49 [Reserved]

§ 12–7.303–50 [Reserved]

§ 12–7.303–51 Minority business enterprises subcontracting program.

Insert the clause set forth in FPR 1–1.1310–2(b) under the conditions and in the manner prescribed therein.

§ 12–7.303–52 [Reserved]

§ 12–7.303–53 [Reserved]

§ 12–7.303–54 [Reserved]

§ 12–7.303–55 Cost accounting standards.

Insert the notices for solicitations and the clauses cited in FPR 12–7.303–55 as prescribed therein.

§ 12–7.303–56 [Reserved]

§ 12–7.303–57 [Reserved]

§ 12–7.303–58 Labor surplus area subcontracting program.

Insert the clause set forth in FPR 1–1.805–3(b) under the conditions and in the manner prescribed therein.

§ 12–7.303–59 Small business subcontracting program.

Insert the clause set forth in FPR 1–1.710–3(b) under the conditions and in the manner prescribed therein.

§ 12–7.303–60 [Reserved]

§ 12–7.303–61 [Reserved]

§ 12–7.303–62 [Reserved]

§ 12–7.303–63 Preference for U.S. flag air carriers.

Insert the clause set forth in FPR 1–1.323–2 under the conditions prescribed therein.

§ 12–7.303–64 Contracts with the Small Business Administration.

Insert the clauses cited in FPR 1–7.303–64 in accordance with conditions prescribed therein.

§ 12–7.303–65 Privacy Act.

Insert the clause prescribed by FPR 1–1.327–5 as amended by DOTPR 12–7.103–29 as set forth therein.

§ 12–7.303–66 Use of U.S. flag commercial vessels.

Insert the clause prescribed by FPR 1–19.108–2 under the conditions set forth therein.

§ 12–7.304 Additional clauses.

The following clauses may be inserted in fixed-price research and development contracts when it is desired to cover the subject matter.

§ 12–7.304–1 Changes.

Insert the clause set forth in FPR 1–7.304–1.

§ 12–7.304–2 Alterations in contract.

Insert the clause set forth in FPR 1–7.204–1.

§ 12–7.304–3 Approval of contract.

Insert the clause set forth in FPR 1–7.204–2.

§ 12–7.304–4 [Reserved]

§ 12–7.304–5 Notice regarding late delivery.

Insert the clause set forth in FPR 1–7.204–4.

§ 12–7.304–6 Key personnel.

Insert the clause set forth in FPR 1–7.304–6.

§ 12–7.304–7 Liquidated damages.

Insert the provisions cited in FPR 1–7.304–7 in accordance with conditions prescribed therein.

§ 12–7.304–8 Disposition of material.

Insert the provisions cited in FPR 1–7.304–8.

§ 12–7.304–9 Reports of work.

Insert the clause set forth in FPR 1–7.304–9.

§ 12–7.350 Required DOTPR Clauses.

Insert the following DOTPR clauses in all fixed-price research and development contracts except where they are clearly inappropriate for use (e.g., certain clauses with educational institutions). The clauses are also appropriate for use in fixed-price contracts for studies, tests, and reports.

§ 12–7.350–1 Gratuities.

Insert the clause set forth in DOTPR 12–7.150–1.

§ 12–7.350–2 Authorization and consent.

Insert the following clause in accordance with conditions prescribed in DOTPR 12–9.151–2.

AUTHORIZATION AND CONSENT

The Government hereby gives its authorization and consent for all use and manufacture of any invention described in and covered by a patent of the United States in the performance of this contract or any part

V 42 174 SEP 8 77 UMI

hereof or any amendment hereto or any subcontract hereunder (including any lower-tier subcontract).

(End of clause)

§ 12–7.350–3 Withholding payment for nondelivery of data.

Insert the clause set forth in DOTPR 12–7.150–8.

§ 12–7.350–4 Dissemination of contract information.

Insert the clause set forth in DOTPR 12–7.150–10.

§ 12–7.350–5 Priorities, allocations, and allotments.

Insert the clause set forth in DOTPR 12–7.150–3.

§ 12–7.350–6 Notice of delays.

Insert the clause set forth in DOTPR 12–7.150–9.

§ 12–7.350–7 New material.

Insert the clause set forth in DOTPR 12–7.150–2.

§ 12–7.350–8 Interpretation or modification.

Insert the clause set forth in DOTPR 12–7.150–4.

§ 12–7.350–9 Rights in data.

In accordance with DOTPR 12–9.201–1, insert the clause set forth in DOTPR 12–7.151–5 or DOTPR 12–7.151–6. Alterations in either clause may be made under the conditions prescribed in DOTPR 12–9.201–2.

§ 12–7.351 DOTPR clauses to be used when applicable.

The following clauses shall be included in the contract when their use is appropriate.

§ 12–7.351–1 Military security requirements.

Insert the Military Security Requirements clause set forth in DOTPR 12–7.151–9 in accordance with instructions for its use in DOTPR 12–1.352.

§ 12–7.351–2 Stop work orders.

Insert the clause set forth in DOTPR 12–7.151–12 in accordance with instructions contained therein.

§ 12–7.351–3 Renegotiation.

Insert the clause set forth in DOTPR 12–7.151–1 in accordance with instructions contained therein.

§ 12–7.351–4 Background patents (license).

Insert the clause set forth in DOTPR 12–7.150–12 in accordance with instructions contained in DOTPR 12–9.150.

§ 12–7.351–5 Filing of patent applications.

Insert the clause set forth in DOTPR 12–7.151–2 under the conditions prescribed in DOTPR 12–9.154.

§ 12–7.351–6 Reporting of royalties.

In accordance with DOTPR 12–9.156, insert the clause set forth in DOTPR 12–7.151–3.

§ 12–7.351–7 Refund of royalties.

In accordance with DOTPR 12–9.157, insert the clause set forth in DOTPR 12–7.151–4.

§ 12–7.351–8 Recovery of developmental costs.

Insert the clause set forth in DOTPR 12–7.151–7 in accordance with conditions contained in DOTPR 12–9.702.

§ 12–7.351–9 Value engineering.

A value engineering incentive clause substantially as set forth in DOTPR 12–7.151–13 shall be included in the contract in accordance with instructions for its use in DOTPR 12–1.5202–2.

Subpart 12–7.4—Clauses for Cost-Reimbursement Type Research and Development Contracts

§ 12–7.400 Scope of subpart.

This subpart sets forth uniform contract clauses for use in cost-reimbursement type research and development contracts.

§ 12–7.401 Applicability.

Applicability shall be in accordance with instructions set forth in FPR 1–7.401.

§ 12–7.402 Required clauses.

The clauses set forth or cited in this subpart 12–7.402 shall be inserted, as required, in all cost-reimbursement type research and development contracts.

§ 12–7.402–1 Definitions.

Insert the clause set forth in FPR 1–7.102–1. Additional definitions may be included provided they are not inconsistent with the clauses or the provisions in the FPR and these regulations.

§ 12–7.402–2 Limitation of cost or funds.

Insert the appropriate clause set forth in FPR 1–7.202–3(a) or FPR 1–7.402–2 in accordance with conditions prescribed in FPR 1–7.402–2. In the clause used, the period of "sixty (60) days" may be varied from 30 to 90 days and the percentage of "seventy-five percent (75%)" may be varied from 75 percent to 85 percent. Where a contract is of the installment type, the clauses may be appropriately modified.

§ 12–7.402–3 Allowable cost, fee, and payment.

Insert the clause set forth in FPR 1–7.202–4 in accordance with the conditions prescribed in FPR 1–7.402–3.

§ 12–7.402–4 Standards of work.

Insert the clause set forth in FPR 1–7.302–3.

§ 12–7.402–5 Inspection and correction of defects.

Insert the appropriate clause set forth in FPR 1–7.402–5 in accordance with instructions provided therein.

§ 12–7.402–6 Assignment of claims.

Insert the clause set forth in FPR 1–30.703 under the conditions prescribed therein.

§ 12–7.402–7 Examination of records by Comptroller General.

Insert the clause set forth in FPR 1–7.103–3. In the case of research and development contracts with nonprofit institutions and subcontracts thereunder, and pursuant to procedures approved by the Comptroller General, original documentary evidence in support of costs of the transportation of things will not be required pursuant to said clause.

§ 12–7.402–8 Subcontracts.

Insert the clause set forth in FPR 1–7.402–8.

§ 12–7.402–9 Utilization of small business concerns.

Insert the clause set forth in FPR 1–1.710–3(a) under the conditions prescribed therein.

§ 12–7.402–10 Termination for default or convenience of the Government.

Insert the clause set forth in FPR 1–8.702 in accordance with conditions prescribed in FPR 1–8.700–2(a)(3) and FPR 1–8.700–2(b)(2); or, insert the clause set forth in FPR 1–8.704–1 in accordance with conditions prescribed in FPR 1–8.700–2(a)(4).

§ 12–7.402–11 Disputes.

Insert the clause set forth in FPR 1–7.102–12.

§ 12–7.402–12 [Reserved]

§ 12–7.402–13 Buy American Act.

Insert the clause set forth in FPR 1–6.104–5 under the conditions prescribed therein.

§ 12–7.402–14 Convict labor.

Insert the clause set forth in FPR 1–12.204 under the conditions prescribed in FPR 1–12.203.

§ 12–7.402–15 Walsh-Healey Public Contracts Act.

Insert the clause set forth in FPR 1–12.605 under the conditions prescribed in FPR 1–12.602.

§ 12–7.402–16 Contract Work Hours and Safety Standards Act—overtime compensation.

Insert the clause set forth in FPR 1–12.303 under the conditions prescribed in FPR 1–12.302.

§ 12–7.402–17 Equal opportunity.

Insert the clause set forth in FPR 12.803–2 under the conditions prescribed in FPR 1–12.803–1.

§ 12–7.402–18 Officials not to benefit.

Insert the clause set forth in FPR 1–7.102–17.

§ 12–7.402–19 Covenant against contingent fees.

Insert the clause set forth in FPR 1–1.503 under the conditions prescribed in FPR 1–1.501.

§ 12–7.402–20 [Reserved]

§ 12–7.402–21 Notice and assistance regarding patent and copyright infringement.

Insert the clause set forth in FPR 1–7.103–4.

§ 12–7.402–22 Patents.

Insert the appropriate clause set forth in FPR 1–9.107 under the conditions prescribed in FPR Subpart 1–9.1.

§ 12–7.402–23 [Reserved]

§ 12–7.402–24 [Reserved]

§ 12–7.402–25 Government property.

Insert the clause set forth in FPR 1–7.203–21(a) or FPR 1–7.402–25(b) under the conditions prescribed in FPR 1–7.402–25.

§ 12–7.402–26 [Reserved]

§ 12–7.402–27 Utilization of labor surplus area concerns.

Insert the clause set forth in FPR 1–1.805–3(a) under the conditions prescribed therein.

§ 12–7.402–28 Payment for overtime premiums.

Insert the clause set forth in FPR 1–7.202–29 when payment for overtime premiums is to be made in accordance with FPR 1–12.102.

§ 12–7.402–29 Competition in subcontracting.

Insert the clause set forth in FPR 1–7.202–30.

§ 12–7.402–30 Audit and records.

Insert the clause cited in FPR 1–7.402–30 as prescribed therein.

§ 12–7.402–31 Price reduction for defective cost or pricing data.

Insert the clause set forth in FPR 1–3.814–1(a) under the conditions prescribed therein.

§ 12–7.402–32 Subcontractor cost and pricing data.

Insert the appropriate clause set forth in FPR 1–3.814–3 under the conditions prescribed therein.

§ 12–7.402–33 Utilization of minority business enterprises.

Insert the clause set forth in FPR 1–1.1310–2(a) under the conditions prescribed therein.

§ 12–7.402–34 Disabled veterans and veterans of the Vietnam Era.

Insert the clause set forth in FPR Temporary Regulation 39 of July 1976 in all contracts which exceed $10,000.

§ 12–7.402–35 Payment of interest on contractors' claims.

Insert the clause set forth in FPR 1–1.322(b) under the conditions prescribed therein.

§ 12–7.402–36 Employment of the handicapped.

Insert the clause set forth in FPR Temporary Regulation 38 of May 1976.

§ 12–7.402–37 Clean air and water.

Insert the clause prescribed by FPR 1–1.2302–2 under the conditions set forth therein.

§ 12–7.403 Clauses to be used when applicable.

§ 12–7.403–1 Clauses for cost-reimbursement type research and development contracts involving construction.

Insert the clauses cited in FPR 1–7.403–1 as prescribed therein.

§ 12–7.403–2 [Reserved]

§ 12–7.403–3 [Reserved]

§ 12–7.403–4 [Reserved]

§ 12–7.403–5 Excusable delays.

Insert the clause set forth in FPR 1–8.708 under the conditions prescribed in FPR 1–8.700–2(c).

§ 12–7.403–6 [Reserved]

§ 12–7.403–7 [Reserved]

§ 12–7.403–8 [Reserved]

§ 12–7.403–9 Negotiated overhead rates.

Insert the appropriate clause set forth in FPR 1–3.704 under the conditions prescribed therein.

§ 12–7.403–10 Notice to the Government of labor disputes.

Insert the clause set forth in FPR 1–7.203–3 under the conditions prescribed in the section.

§ 12–7.403–11 [Reserved]

§ 12–7.403–12 [Reserved]

§ 12–7.403–13 [Reserved]

§ 12–7.403–14 Make-or-buy-program.

Insert the clause set forth in FPR 1–3.902–3 under the conditions prescribed therein.

§ 12–7.403–15 [Reserved]

§ 12–7.403–16 [Reserved]

§ 12–7.403–17 [Reserved]

§ 12–7.403–18 [Reserved]

§ 12–7.403–19 [Reserved]

§ 12–7.403–20 Advance payments.

When advance payments are to be made in accordance with FPR Subpart 1–30.4, insert the appropriate provisions as prescribed in FPR 1–30.414–2.

§ 12–7.403–21 Workmen's compensation insurance (Defense Base Act).

Insert the clause set forth in FPR 1–10.402 under the conditions prescribed therein.

§ 12–7.403–22 Required source for jewel bearings.

Insert the clause set forth in FPR 1–1.319 under the conditions prescribed therein.

§ 12–7.403–23 General Services Administration supply sources.

Insert the clause set forth in FPR 1–7.203–13 under the conditions prescribed in FPR Subpart 1–5.9.

§ 12–7.403–24 Use of interagency motor pool vehicles and related services.

Insert the clause set forth in FPR 1–7.203–14 under the conditions prescribed in FPR Subpart 1–5.5.

§ 12–7.403–25 Interest.

Insert the clause set forth in FPR 1–7.203–15 under the conditions prescribed therein.

§ 12–7.403–26 [Reserved]

§ 12–7.403–27 [Reserved]

§ 12–7.403–28 [Reserved]

§ 12–7.403–29 [Reserved]

§ 12–7.403–30 [Reserved]

§ 12–7.403–31 [Reserved]

§ 12–7.403–32 [Reserved]

§ 12–7.403–33 [Reserved]

§ 12–7.403–34 [Reserved]

§ 12–7.403–35 [Reserved]

§ 12–7.403–36 United States products and services (Balance of Payments Program).

Insert the clause set forth in FPR 1–6.806–4 under the conditions prescribed in FPR Subpart 1–6.8.

§ 12–7.403–37 [Reserved]

§ 12–7.403–38 [Reserved]

§ 12–7.403–39 Care of laboratory animals.

Insert the clause set forth in FPR 1–7.303–44 under the conditions prescribed therein.

§ 12–7.403–40 [Reserved]

§ 12–7.403–41 [Reserved]

§ 12–7.403–42 [Reserved]

§ 12–7.403–43 [Reserved]

§ 12–7.403–44 [Reserved]

§ 12–7.403–45 [Reserved]

§ 12–7.403–46 [Reserved]

§ 12–7.403–47 [Reserved]

§ 12–7.403–48 [Reserved]

§ 12–7.403–49 [Reserved]

§ 12–7.403–50 Cost accounting standards.

Insert the notices and clauses cited in FPR 1–7.403–50 as prescribed therein.

§ 12–7.403–51 [Reserved]

§ 12–7.403–52 [Reserved]

§ 12–7.403–53 Small business subcontracting program.

Insert the clause set forth in FPR 1–1.710–3(b) under the conditions prescribed therein.

§ 12–7.403–54 Labor surplus area subcontracting program.

Insert the clause set forth in FPR 1–1.1310–2(b) under the conditions prescribed therein.

V 42 174 SEP 8 77 UMI

§ 12–7.403–55 Minority business enterprises subcontracting program.

Insert the clause set forth in FPR 1–1.1310–2(b) under these conditions prescribed therein.

§ 12–7.403–56 [Reserved]

§ 12–7.403–57 [Reserved]

§ 12–7.403–58 Preference for U.S. flag air carriers.

Insert the clause set forth in FPR 1–1.323–2 under the conditions prescribed therein.

§ 12–7.403–59 [Reserved]

§ 12–7.403–60 Privacy Act.

Insert the clause prescribed in FPR 1–1.327–5 as amended by DOTPR 12–7.103–29 under the conditions contained therein.

§ 12–7.403–61 Use of U.S. flag commercial vessels.

Insert the clause prescribed by FPR 1–19.108–2 under the conditions set forth therein.

§ 12–7.404 Additional clauses.

The following clauses may be inserted in cost-reimbursement type research and development contracts when it is desired to cover the subject matter thereof.

§ 12–7.404–1 Alterations in contract.

Insert the clause set forth in FPR 1–7.204–1.

§ 12–7.404–2 Approval of contract.

Insert the clause set forth in FPR 1–7.204–2.

§ 12–7.404–3 Date of incurrence of costs.

Insert the clause set forth in FPR 1–7.204–3.

§ 12–7.404–4 Notice regarding late delivery.

Insert the clause set forth in FPR 1–7.204–4.

§ 12–7.404–5 Changes.

Insert the clause set forth in FPR 1–7.404–5. In the clause, the period of "thirty (30) days" within which any claim for adjustment must be asserted may be varied in accordance with Administration procedures.

§ 12–7.404–6 Key personnel.

Insert the clause set forth in FPR 1–7.304–6.

§ 12–7.404–7 Disposition of material.

Insert the clause set forth in FPR 1–7.304–8.

§ 12–7.404–8 Reports of work.

Insert the clause set forth in FPR 1–7.304–9.

§ 12–7.404–9 Insurance—liability to third persons.

Insert the clause set forth in DOTPR 12–7.204–50 in lieu of FPR clause 1–7.204–5 prescribed in FPR 1–7.404–9. However, when the conditions contained in FPR 1–7.404–9 exist, the clauses set forth in the section shall be inserted with or in lieu of DOTPR 12–7.204–50.

§ 12–7.450 Required DOTPR clauses.

Insert the following DOTPR clauses in all cost-reimbursement type research and development contracts, except where their use is clearly inappropriate (e.g., certain clauses with educational institutions).

§ 12–7.450–1 Gratuities.

Insert the clause set forth in DOTPR 12–7.150–1.

§ 12–7.450–2 New material.

Insert the clause set forth in DOTPR 12–7.150–2.

§ 12–7.450–3 Priorities, allocations, and allotments.

Insert the clause set forth in DOTPR 12–7.150–3.

§ 12–7.450–4 Interpretation or modification.

Insert the clause set forth in DOTPR 12–7.150–4.

§ 12–7.450–5 Dissemination of contract information.

Insert the clause set forth in DOTPR 12–7.150–10.

§ 12–7.450–6 Authorization and consent.

Insert the clause set forth in DOTPR 12–7.150–11 in accordance with DOTPR 12–9.151–1

§ 12–7.450–7 Notice of delays.

Insert the clause set forth in DOTPR 12–7.150–9.

§ 12–7.450–8 Rights in data.

Insert the clause set forth in DOTPR 12–7.151–5 or DOTPR 12–7.151–6 in accordance with instructions in DOTPR 12–9.201–1.

§ 12–7.451 DOTPR clauses to be used when applicable.

The following DOTPR clauses shall be included in the contract when their use is appropriate.

§ 12–7.451–1 Recovery of developmental costs.

Insert the clause set forth in DOTPR 12–7.151–7 in accordance with conditions contained in DOTPR 12–9.702.

§ 12–7.451–2 Filing of patent applications.

Insert the clause set forth in DOTPR 12–7.151–2 in accordance with instructions in DOTPR 12–9.154.

§ 12–7.451–3 Reporting of royalties (foreign).

Insert the clause set forth in DOTPR 12–7.151–3 in accordance with instructions in DOTPR 12–9.156.

§ 12–7.451–4 Refund of royalties.

Insert the clause set forth in DOTPR 12–7.151–4 in accordance with instructions in DOTPR 12–9.157.

§ 12–7.451–5 Military security requirements.

When required by DOTPR 12–1.352, insert the clause set forth in DOTPR 12–7.151–9 and modifications thereto set forth in DOTPR 12–7.251–7.

§ 12–7.451–6 Stop work orders.

The clause set forth in DOTPR 12–7.151–12 may be included under the conditions described therein, provided the clause is modified as prescribed in DOTPR 12–7.251–8.

§ 12–7.451–7 Value engineering.

A value engineering incentive clause substantially as set forth in DOTPR 12–7.151–13, substituting the "Sharing" paragraph (e) in DOTPR 12–7.251–9 (b) or (c) for paragraph (e) of the clause in DOTPR 12–7.151–13, as applicable, shall be included in the contract in accordance with instructions for its use in DOTPR 12–1.5202–2.

§ 12–7.451–8 Renegotiation.

Insert the clause set forth in DOTPR 12–7.151–15 in accordance with instructions contained therein.

§ 12–7.451–9 Background patents (license).

Insert the clause set forth in DOTPR 12–7.150–12 in accordance with instructions contained in DOTPR 12–9.150.

Subpart 12–7.6—Clauses for Fixed-Price Construction Contracts

§ 12–7.600 Scope of subpart.

This subpart sets forth or cites contract clauses and notices for solicitations for use in fixed-price construction contracts.

§ 12–7.601 General.

The clauses and notices prescribed in FPR Subpart 1–7.6 shall be used in accordance with instructions set forth in FPR 1–7.601.

§ 12–7.602 Required clauses.

Subject to the exceptions in FPR 1–7.601, the following clauses shall be inserted in all advertised and negotiated fixed-price construction contracts. For convenience many of the required clauses have been included on standard forms which are prescribed for use in construction contracts by FPR Subpart 1–16.4.

§ 12–7.602–1 Definitions.

Insert the clause set forth in FPR 1–7.602–1. Additional definitions may be included provided they are not inconsistent with the clause or provisions of the FPR and these regulations.

§ 12–7.602–2 Specifications and drawings.

Insert the clause set forth in FPR 1–7.602–2.

§ 12–7.602–3 Changes.

Insert the clause set forth in FPR 1–7.602–3.

§ 12–7.602–4 Differing site conditions.

Insert the clause set forth in FPR 1–7.602–4, and incorporate physically or by reference the provisions of FPR 1–18.117 in contracts which include this clause until such time as an amendment of the clause has been effected.

§ 12–7.602–5 Termination for default—damages for delay—time extensions.

In accordance with FPR 1–8.700–2(b)(4) and (5), insert the clause set forth in either FPR 1–8.709–1 or FPR 1–8.709–2 as appropriate.

§ 12–7.602–6 Disputes.

Insert the clause set forth in FPR 1–7.602–6.

§ 12–7.602–7 Payments to contractor.

Insert the clause set forth in FPR 1–7.602–7.

§ 12–7.602–8 Assignment of claims.

Insert the clause set forth in FPR 1–30.703 under the conditions prescribed therein.

§ 12–7.602–9 Material and workmanship.

Insert the clause set forth in FPR 1–7.602–9.

§ 12–7.602–10 [Reserved]

§ 12–7.602–11 Inspection and acceptance.

Insert the clause set forth in FPR 1–7.602–11.

§ 12–7.602–12 Superintendance by contractor.

Insert the clause set forth in FPR 1–7.602–12.

§ 12–7.602–13 Permits and responsibilities.

Insert the clause set forth in FPR 1–7.602–13.

§ 12–7.602–14 Conditions affecting the work.

Insert the clause set forth in FPR 1–7.602–14.

§ 12–7.601–15 Other contracts.

Insert the clause set forth in FPR 1–7.602–15.

§ 12–7.602–16 Patent indemnity.

Insert the clause set forth in FPR 1–7.602–16.

§ 12–7.602–17 Additional bond security.

Insert the clause set forth in FPR 1–7.602–17.

§ 12–7.602–18 Covenant against contingent fees.

Insert the clause set forth in FPR 1–1.503 under the conditions prescribed in FPR 1–1.501.

§ 12–7.602–19 Officials not to benefit.

Insert the clause set forth in FPR 1–7.102–17.

§ 12–7.602–20 Buy American Act.

Insert the clause set forth in FPR 1–18.605.

§ 12–7.602–21 Convict labor.

Insert the clause set forth in FPR 1–12.204 under the conditions prescribed in FPR 1–12.203.

§ 12–7.602–22 Equal opportunity.

Insert the clause set forth in FPR 1–12.803–2, except as provided in FPR 1–12.804–1.

§ 12–7.602–23 Labor standards provisions.

Insert the clauses set forth in FPR 1–18.703 as provided in FPR 1–18.701–1. The clauses are listed in FPR 1–7.602–23.

§ 12–7.602–24 [Reserved]

§ 12–7.602–25 [Reserved]

§ 12–7.602–26 Utilization of small business concerns.

Insert the clause set forth in FPR 1–1.710–3(a) under the conditions described therein.

§ 12–7.602–27 Federal, State, and local taxes.

Insert the clause in FPR 1–11.401–1 or FPR 1–11.401–2 and, when appropriate, insert the supplementary clause in FPR 1–11.401–3(a), in accordance with the conditions prescribed in those sections.

§ 12–7.602–28 [Reserved]

§ 12–7.602–29 Termination for convenience of the Government.

In accordance with the requirements of FPR 1–8.700–2, insert the appropriate clause set forth in FPR 1–8.703 or FPR 1–8.705–2.

§ 12–7.602–30 Pricing of adjustments.

Insert the clause set forth in FPR 1–7.102–20 under the conditions described therein.

§ 12–7.602–31 Use and possession prior to completion.

Insert the clause set forth in FPR 1–7.602–31.

§ 12–7.602–32 Suspension of work.

Insert the clause set forth in FPR 1–7.602–32.

§ 12–7.602–33 Utilization of minority business enterprises.

Insert the clause set forth in FPR 1–1.1310–2(a) under the conditions described therein.

§ 12–7.602–34 Disabled veterans and veterans of the Vietnam era.

Insert the clause set forth in FPR Temporary Regulation 39 of July 1976 in all contracts which exceed $10,000.

§ 12–7.602–35 Payment of interest on contractors' claims.

Insert the clause set forth in FPR 1–1.322(b) under the conditions described therein.

§ 12–7.602–36 Shop drawings.

Insert the clause set forth in FPR 1–7.602–36.

§ 12–7.602–37 Employment of the handicapped.

Insert the clause set forth in FPR Temporary Regulation 38 of May 1976.

§ 12–7.602–38 Clean air and water.

Insert the clause set forth in FPR 1–1.2302–2 under the conditions described therein.

§ 12–7.603 Clauses to be used when applicable.

§ 12–7.603–1 [Reserved]

§ 12–7.603–2 [Reserved]

§ 12–7.603–3 [Reserved]

§ 12–7.603–4 [Reserved]

§ 12–7.603–5 [Reserved]

§ 12–7.603–6 [Reserved]

§ 12–7.603–7 Examination of records by Comptroller General.

The clause set forth in FPR 1–7.103–3 shall be included in all negotiated contracts in excess of $10,000, under the conditions described therein.

§ 12–7.603–8 [Reserved]

§ 12–7.603–9 [Reserved]

§ 12–7.603–10 [Reserved]

§ 12–7.603–11 Price reduction for defective cost or pricing data.

Insert the appropriate clause set forth in FPR 1–3.814–1 under the conditions described therein.

§ 12–7.603–12 Workmen's compensation insurance (Defense Base Act).

In accordance with the requirements of FPR 1–10.402 insert the clause set forth therein.

§ 12–7.603–13 [Reserved]

§ 12–7.603–14 Advance payments.

When advance payments are to be made in accordance with FPR Subpart 1–30.4, insert the appropriate provisions as prescribed in FPR 1–30.414–2.

§ 12–7.603–15 Performance of work by contractor.

The clause set forth in FPR 1–18.104 is prescribed for use under the conditions described therein.

§ 12–7.603–16 [Reserved]

§ 12–7.603–17 [Reserved]

§ 12–7.603–18 [Reserved]

§ 12–7.603–19 Use of U.S. Flag Commercial Vessels.

Insert the clause prescribed by FPR 1–19.108–2 under the conditions set forth therein.

§ 12–7.603–20 Audit and records.

Insert the clause set forth in FPR 1–3.814–2 under the conditions described therein.

§ 12–7.603–21 Subcontractor cost and pricing data.

Insert the appropriate clause set forth in FPR 1–3.814–3 under the conditions described therein.

V 42 I 174 SEP 8 77 UMI

§ 12–7.603–22 Contracts with the Small Business Administration (Special 8 (a) Contract).

(a) Insert the clause set forth in FPR 1–1.713–4(g)(1) in contracts with the Small Business Administration awarded pursuant to section 8(a) of the Small Business Act (15 U.S.C. 637(a)).

(b) Insert the clause set forth in FPR 1–1.713–4(h) in subcontracts which will be executed by the Small Business Administration with its subcontractors.

§ 12–7.603–23 Small business subcontracting program.

Insert the clause set forth in FPR 1–1.710–3(b) under the conditions described therein.

§ 12–7.603–24 Minority business enterprises subcontracting program.

Insert the clause set forth in FPR 1–1.1310–2(b) under the conditions described therein.

§ 12–7.603–25 Late bids and modifications or withdrawals.

Insert the provisions cited in FPR 1–7.603–25 in solicitations under the conditions prescribed therein.

§ 12–7.603–26 Preference for U.S. flag air carriers.

Insert the clause set forth in FPR 1–1.323–2 under the conditions described therein.

§ 12–7.603–27 Cost accounting standards.

Insert the notices for solicitations set forth in FPR 1–3.1203(a)(3), (h)(2), and (i)(2) and the clauses set forth in FPR 1–3.1204–1 and FPR 1–3.1204–2 under the conditions contained in FPR Subpart 1–3.12.

§ 12–7.603–28 Subcontracts.

Insert the clause set forth in FPR 1–7.103–28 under the conditions contained in the section.

§ 12–7.604 Additional clauses.

§ 12–7.604–1 Liquidated damages.

Insert the clause set forth in FPR 1–18.110 under the conditions prescribed therein.

§ 12–7.650 Required DOTPR clauses.

§ 12–7.650–1 Gratuities.

Insert the clause set forth in DOTPR 12–7.150–1.

§ 12–7.650–2 Protection of existing vegetation, structures, utilities, and improvements.

Use with Standard Form 19 or 23A.

PROTECTION OF EXISTING VEGETATION, STRUCTURES, UTILITIES, AND IMPROVEMENTS

(a) The Contractor will preserve and protect all existing vegetation (such as trees, shrubs, and grass) on or adjacent to the site of work which is not to be removed and which does not unreasonably interfere with the construction work. Care will be taken in removing trees authorized for removal to avoid damage to vegetation to remain in place. Any limbs or branches of trees broken during such operations or by the careless operation of equipment or by workmen, shall be trimmed with a clean cut and painted with an approved tree pruning compound, as directed by the Contracting Officer.

(b) All existing utilities, communications facilities, and other improvements, including but not limited to conduit, pipe, wiring, or cable (hereinafter referred to as "improvements"), whether above or below ground, shall be protected by the Contractor from damage or destruction. The Contractor shall ascertain from the drawings and specifications the location of any concealed improvements, at or near the site of the work. Any destruction of or damage to existing improvements, above or below ground, shall be promptly repaired, restored, or replaced at the direction of the Contracting Officer. The directions of the Contracting Officer may require complete replacement of conduits, pipes, wiring, cables, or similar improvements where original installation was made under a requirement for continuous, unspliced lengths. The Contracting Officer has the right to have the necessary corrective work performed by the Contractor at his expense, or by others and charge the cost thereof to the Contractor. If concealed improvements are encountered and they are not shown on the drawings or specifications, the provisions of the "Differing Site Conditions" clause of this contract shall apply.

(End of clause)

§ 12–7.650–3 Operations and storage areas (use with SF–23A).

OPERATIONS AND STORAGE AREAS

(a) All operations of the Contractor (including storage of materials) upon Government premises shall be confined to areas authorized or approved by the Contracting Officer. The Contractor shall hold and save the Government, its officers and agents, free and harmless from liability of any nature occasioned by his operations.

(b) Temporary buildings (storage sheds, shops, offices, etc.) may be erected by the Contractor only with the approval of the Contracting Officer, and shall be built with labor and materials furnished by the Contractor without expense to the Government. Such temporary buildings and utilities shall remain the property of the Contractor and shall be removed by him at his expense upon the completion of the work. With the written consent of the Contracting Officer, such buildings and utilities may be abandoned and need not be removed.

(c) The Contractor shall, under regulations prescribed by the Contracting Officer, use only established roadways or construct and use such temporary roadways as may be authorized by the Contracting Officer. Where materials are transported in the prosecution of the work, vehicles shall not be loaded beyond the loading capacity recommended by the manufacturer of the vehicle or prescribed by any Federal, State or local law or regulation. When it is necessary to cross curbing or sidewalks, protection against damage shall be provided by the Contractor and any damaged roads, curbings, or sidewalks shall be repaired by, or at the expense of the Contractor.

(End of clause)

§ 12–7.650–4 Modification proposals—price breakdown (use with SF–23A).

MODIFICATION PROPOSALS—PRICE BREAKDOWN

The Contractor, in connection with any proposal he makes for contract modification, shall furnish a price breakdown, itemized as required by the Contracting Officer. Unless otherwise directed, the breakdown shall be in sufficient detail to permit an analysis of all material, labor, equipment, subcontract, and overhead costs, as well as profit, and shall cover all work involved in the modification, whether such work was deleted, added or changed. Any amount claimed for subcontracts shall be supported by a similar price breakdown. In addition, if the proposal includes a time extension, a justification therefor shall also be furnished. The proposal together with the price breakdown and time extension justification, shall be furnished by the date specified by the Contracting Officer.

(End of clause)

§ 12–7.650–5 Work schedule (use with SF–19).

WORK SCHEDULE

The Contractor shall, within 10 days from date of award of contract (unless a different time is specified in the contract), furnish to the Contracting Officer, in triplicate, a schedule showing the proposed dates on which the major phases of the work will be started and completed. Acceptance of the schedule by the Contracting Officer shall not excuse the Contractor for any delay in completing the work.

(End of clause)

§ 12–7.650–6 Cleaning up (use with SF–23A).

CLEANING UP

The contractor shall at all times keep the construction area, including storage areas used by him, free from accumulations of waste material or rubbish and prior to completion of the work remove from the premises any rubbish and all tools, scaffolding, equipment, and material not the property of the Government. Upon completion of the construction the Contractor shall leave the work and premises in a clean, neat and workmanlike condition satisfactory to the Contracting Officer.

(End of clause)

§ 12–7.650–7 Additional definitions (use with SF–23A).

ADDITIONAL DEFINITIONS

(a) Wherever in the specifications or upon the drawings the words "directed", "required", "ordered", "designated", "prescribed", or words of like import are used, it shall be understood that the "direction", "requirement", "order", "designation", or "prescription", of the Contracting Officer is intended and similarly the words "approved", "acceptable", "satisfactory" or words of like import shall mean "approved by" or "acceptable to", or "satisfactory to" the Contracting Officer, unless otherwise expressly stated.

(b) Where "as shown", "as indicated", "as detailed", or words of similar import are used, it shall be understood that the reference is made to the drawings accompanying this contract unless stated otherwise. The word "provided" as used herein shall be understood to mean "provided complete in place", that is "furnished and installed".

(End of clause)

§ 12–7.650–8 Safety requirements (use with SF–23A).

SAFETY REQUIREMENTS

(a) The Contractor shall provide safety controls for protection to the life and health of employees and other persons; for prevention of damage to property, materials, supplies, and equipment; and for avoidance of work interruptions in the performance of this contract; and the Contractor shall comply with any accident prevention or safety requirements included or referenced in this contract.

(b) The Contractor will maintain an accurate record of, and will report to the Contracting Officer in the manner and on the forms prescribed by the Contracting Officer, exposure data and all accidents resulting in death, traumatic injury, occupational disease, and damage to property, materials, supplies and equipment incident to work performed under this contract.

(c) The Contracting Officer will notify the Contractor of any noncompliance with the foregoing provisions and the action to be taken. The Contractor shall, after receipt of such notice, immediately take corrective action. Such notice, when delivered to the Contractor or his representative at the site of the work, shall be deemed sufficient for the purpose. If the Contractor fails or refuses to comply promptly, the Contracting Officer may issue an order stopping all or part of the work until satisfactory corrective action has been taken. No part of the time lost due to any such stop orders shall be made the subject of claim for extension of time or for excess costs or damages by the Contractor.

(d) Compliance with the provisions of this clause by subcontractors will be the responsibility of the Contractor.

(End of clause)

§ 12–7.650–9 Contracting officer's representative (use with SF–23A).

CONTRACTING OFFICER'S REPRESENTATIVE

The Contracting Officer may designate Government personnel to act as his authorized representatives for one or more contract administration functions not involving a change in the scope, price, terms, or conditions of the contract. Such designation will be in writing, set forth elsewhere in the contract or by separate letter signed by the Contracting Officer, and will contain specific instructions as to the extent to which the representative may take action for the Contracting Officer. Such designation will not contain authority to sign contractual documents, nor will it authorize the designee to order contract changes, modify contract terms, or create any liability on the part of the Government different from that set forth in the contract.

(End of clause)

§ 12–7.650–10 Contract time—notice to proceed (use with SF–23A).

CONTRACT TIME—NOTICE TO PROCEED

(a) Provided the contract is not terminated pursuant to paragraph 4, Standard Form 22, "Instructions to Bidders", if in the opinion of the Contracting Officer, the Contractor's delay in executing formal contract documents or furnishing performance or payment bonds causes a delay in the issuance of the notice to proceed, the time to complete the work as specified in the contract, may be reduced to reflect such delay.

(b) The Contractor shall perform no work under this contract until the required contract documents and bonds have been furnished. Thereafter, work at other than the contract site may be undertaken. The Contractor shall perform no work at the contract site except pursuant to a notice to proceed given by the Contracting Officer.

(c) Notice to proceed may be issued by the Government at its convenience. Any right of the Contractor to price adjustment because of unreasonable delay on the part of the Government in issuing notice to proceed shall be determined in accordance with the clause titled "Suspension of Work".

(End of clause)

§ 12–7.650–11 Rights in shop drawings use with SF–23A).

RIGHTS IN SHOP DRAWINGS

(a) Shop drawings for construction means drawings, submitted to the Government by the Construction Contractor, subcontractor or any lower tier subcontractor pursuant to a construction contract, showing in detail (i) the proposed fabrication and assembly of structural elements and (ii) the installation (i.e., form, fit, and attachment details) of materials or equipment. The Government may duplicate, use, and disclose in any manner and for any purpose shop drawings delivered under this contract.

(b) This clause, including this paragraph (b), shall be included in all subcontracts hereunder at any tier.

(End of clause)

§ 12–7.650–12 Notice of delays (use with SF–23A).

Insert the clause set forth in DOTPR 12–7.150–9.

§ 12–7.650–13. Priorities, allocations, and allotments (use with SF–23A).

Insert the clause set forth in DOTPR 12–7.150–3.

§ 12–7.650–14 Dissemination of contract information (use with SF–23A).

Insert the clause set forth in DOTPR 12–7.150–10.

§ 12–7.650–15 Guarantee (use with SF–23A).

GUARANTEE

(a) Unless otherwise provided in the contract, the Contractor guarantees all work performed and materials and equipment delivered to be in accordance with contract requirements and free from defective or inferior materials, equipment and workmanship for one year from the date of final acceptance of the contract work by the Government. The guarantee provided for in this clause shall not extend to or apply to Government-furnished material or equipment except as to such work as may be performed thereon by the Contractor.

(b) Upon receipt of notice from the Contracting Officer that work, material, or equipment furnished under this contract has failed to meet the contract guarantee, the contractor shall promptly return to the site of the work and at his expense (1) place in satisfactory condition in every particular all such guaranteed work, correcting all defects therein, (2) restore to a satisfactory condition the building or site or any equipment or contents thereof which, in the opinion of the Contracting Officer, are affected or damaged as a result of the use of material, equipment or workmanship which are inferior, defective or not in accordance with the terms of the contract, and (3) restore to a satisfactory condition any work, materials and equipment disturbed in fulfilling the guarantee.

(c) In any case where in fulfilling the requirements of the contract or of any guarantee, embraced in or required thereby, the Contractor disturbs any work guaranteed under another contract, he shall restore such disturbed work to a condition satisfactory to the Contracting Officer and guarantee such restored work to the same extent as it was guaranteed under such other contract.

(d) Should the Contractor fail to proceed promptly to comply with the terms of a guarantee under this contract, the Contracting Officer may cause corrective action to be taken by others and the Contractor shall promptly reimburse the Government its cost incurred thereby, or in lieu of taking corrective action, the Contracting Officer may cause the Contractor to pay to the Government an amount of money commensurate with what the corrective action would cost.

(End of clause)

§ 12–7.650–16 General conduct of work (use with SF–19).

GENERAL CONDUCT OF WORK

(a) The Contractor shall comply with any accident prevention or safety requirements included or referenced in this contract, and shall take any additional protective measures deemed necessary by the Contracting Officer.

(b) All operations of the Contractor (including storage of materials) shall be confined to areas authorized by the Contracting Officer. If the use of temporary buildings is authorized by the Contracting Officer, such buildings shall be removed by the Contractor at his expense upon completion of the work.

(c) The Contractor shall keep the construction area free from waste material or rubbish. Upon completion of the work, he shall remove his equipment, tools, and material, and leave the premises in a clean, neat, and orderly condition.

(d) The Contractor shall, under regulations prescribed by the Contracting Officer, use only established roadways or construct and use such temporary roadways as may be authorized by the Contracting Officer.

(End of clause)

§ 12–7.650–17 Contractor inspection system (use with SF–23A).

CONTRACTOR INSPECTION SYSTEM

The Contractor shall (i) maintain an adequate inspection system and perform such inspections as will assure that the work performed under the contract conforms to contract requirements, and (ii) maintain and make available to the Government adequate records of such inspection.

(End of clause)

§ 12–7.650–18 Information regarding Buy American Act (use with SF–23A).

INFORMATION REGARDING BUY AMERICAN ACT

(a) The Buy American Act (41 U.S.C. 10a–10d) generally requires that only domestic construction material be used in the performance of this contract. (See the clause entitled "Buy American" in Standard Form 23A, General Provisions, Construction Contract.) This requirement does not apply to the following construction material or components:

Acetylene black
Asbestos, amosite
Bismuth
Cadmium, ores and flue dust
Chrome ore or chromite
Cork, wood or bark and waste
Graphite, natural
Mica
Rubber, crude and latex
Wax, carnauba
Woods of the following species: angelique, balsa, ekki, greenheart, lignum vitae, mahogany and teak

(b)(1) Furthermore, bids or proposals offering use of additional nondomestic construction material may be acceptable for award if the Government determines that use of comparable domestic construction material is impracticable or would unreasonably increase the cost or that domestic construction material (in sufficient and reasonably available commercial quantities and of a satisfactory quality) is unavailable. Reliable evidence shall be furnished justifying such use of additional nondomestic construction material.

(2) Where it is alleged that use of domestic construction material would unreasonably increase the cost:

(i) Data shall be included, based on a reasonable canvass of suppliers, demonstrating

V 42 I 174
SEP 8 77
UMI

that the cost of each such domestic construction material would exceed by more than 6 percent the cost of comparable nondomestic construction material (All costs of delivery to the construction site shall be included, as well as any applicable duty)

(ii) For evaluation purposes, 6 percent of the cost of all additional, nondomestic construction material, which qualifies under paragraph (1) above, will be added to the bid or proposal

(3) When offering additional nondomestic construction material bids or proposals may also offer at stated prices, any available comparable domestic construction material, so as to avoid the possibility that failure of a nondomestic construction material to be acceptable under (1) above will cause rejection of the entire bid

(End of clause)

§ 12–7.651 Clauses to be used when applicable.

§ 12–7.651–1 Notice and assistance regarding patent and copyright infringement.

In accordance with DOTPR 12–9 153, insert the clause set forth in FPR 1–7 - 103–4

§ 12–7.651–2 Authorization and consent.

Insert the clause set forth in DOTPR 12–7 150–11 in accordance with the instructions for its use in DOTPR 12–9 - 151–1.

§ 12–7.651–3 Military security requirements.

Insert the Military Security Requirements clause set forth in DOTPR 12–7 - 151–9 in accordance with the instructions for its use in DOTPR 12–1 352

§ 12–7.651–4 Performance of work by contractor.

Insert the clause set forth in FPR 1–18 104 in accordance with the instructions for its use

§ 12–7.651–5 Government-furnished property.

When property will be furnished by the Government, insert the following clause in the contract

GOVERNMENT-FURNISHED PROPERTY

(a) *Title, use, and quantities* Any property to be furnished by the Government as listed elsewhere in this contract under the heading "Government-Furnished Property List" hereafter referred to as "GFPL") is for use only in connection with the performance of the work hereunder Title to all such property shall remain vested in the Government The property shall be furnished in the quantities shown, with the exception of items marked "as required" which will be furnished in whatever quantities are required to complete the work All additional quantities of the items on this list and any other property required to complete the work will be furnished by the Contractor

(b) *Point of delivery* The Government shall deliver this property to the Contractor at the point(s) specified in the GFPL The Contractor shall at no expense to the Government inspect, unload, load and make further delivery of the property at the job site The Contractor shall be responsible for payment of any demurrage and storage charges accruing more than 5 days after his receipt of notice to proceed.

(c) *Time of delivery* Any property to be furnished by the Government shall be delivered to the Contractor in sufficient time to enable him to perform the work without delay The Contractor will be given advance notice of expected delivery dates if they are not already shown on the GFPL If the property is not delivered to the Contractor by the 5th day subsequent to the expected delivery date, he shall notify the Contracting Officer within 3 days thereafter The Contractor shall acknowledge receipt thereof in writing to the Contracting Officer and if there are shortages or defective property in any shipment, the contractor shall notify the Contracting Officer within 24 hours after delivery of shipment or in the case of concealed defects and shortages, within 3 days after they are discovered In either event, the Contracting Officer will take appropriate action to rectify the matter In the absence of information from the Contractor to the contrary within the periods specified above, the Government will consider that all property has been delivered to the Contractor on time and in good condition and he will be held responsible thereafter for any shortages and defective property that may later be discovered, or for any damages incurred through inadequate protection No claim for adjustments in the time and price for performance of the contract ("Suspension of Work" and the "Termination For Default-Damages For Delay-Time Extensions" clause) shall be allowed for failure of the Government to furnish property unless the Contractor reports the delinquent deliveries within the periods specified above Notifications to the Contracting Officer are in addition to the requirements under the above-cited clauses for making timely notifications to the Contracting Officer if time and price adjustments are desired

(d) *Surplus* In accordance with instructions furnished by the Contracting Officer, upon completion of the work any unused property shall be prepared for shipment and be delivered by the Contractor to the nearest appropriate common carrier or Government storage point in the locality of the work

(End of clause)

§ 12–7.651–6 Physical data.

All the information concerning local conditions pertaining to the performance of the contract work, which has been made available to the contractor should be referenced into the contract by completing the clause set forth below Wherever test borings, analyses, or hydrographic data are to be made available to the contractor, the wording of this special clause should be such as only to inform the contractor as to the source of the data and where it may be examined

PHYSICAL DATA

Information and data furnished or referred to below are furnished for the Contractor's information However it is expressly understood that the Government will not be responsible for any interpretation or conclusion drawn therefrom by the Contractor

(a) The physical conditions indicated on the drawings and in the specifications are the result of site investigations by (insert investigational methods used, such as surveys, auger borings, core borings, test pits, probings, test runnels, etc.)

(b) *Weather conditions* (Insert summary of weather records and warnings)

(c) *Transportation facilities* (Insert the summary of transportation facilities accessible to project, availability and limitations)

(d) (Insert other pertinent information)

(End of clause)

§ 12–7.651–7 Variations in estimated quantities contracts.

Insert the following clause in contracts containing estimated quantity items in accordance with DOTPR 12–18 201–50

VARIATION IN ESTIMATED QUANTITIES CONTRACTS

Where the quantity of a pay item in this contract is an estimated quantity and where the actual quantity of such pay item varies more than fifteen percent (15%) above or below the estimated quantity stated in this contract, an equitable adjustment in the contract price shall be made upon demand of either party The equitable adjustment shall be based upon any increase or decrease in costs due solely to the variation above one hundred fifteen percent (115%) or below eighty-five percent (85%) of the estimated quantity If the quantity variation is such as to cause an increase in the time necessary for completion the Contracting Officer shall upon receipt of a written request for an extension of time within ten (10) days from the beginning of such delay or within such further period of time which may be granted by the Contracting Officer prior to the data of final payment of the contract, ascertain the facts and make such adjustment for extending the completion date as in his judgment the findings justify

(End of clause)

§ 12–7.651–8 Availability and use of utility services.

Insert the following clause in contracts for performance at Government installations when it is determined that one or more utility systems and supplies are adequate for the needs and use of both the Government and the contractor and it is advantageous to the Government to furnish such utility services

AVAILABILITY AND USE OF UTILITY SERVICES

(a) The Government will make available to the Contractor from existing outlets and supplies, all reasonably required amounts of utilities as specified in the Schedule or specifications Except as otherwise provided in the schedule or specifications, each utility shall be charged to or paid for by the Contractor at prevailing rates charged to the Government or, where the utility is produced by the Government, at reasonable rates as determined by the Contracting Officer

(b) Utilities furnished the Contractor without charge shall be carefully conserved The Contractor at his own expense and in a workmanlike manner satisfactory to the Contracting Officer shall install and maintain all necessary temporary connections and distribution lines and if necessary to determine charges, all meters required to measure the amount of each utility used, and he shall remove the same prior to final acceptance of the construction

(End of clause)

§ 12–7.651–9 Misplaced material.

Insert the following clause in all contracts involving work near or on navigable waterways

MISPLACED MATERIAL

Should the Contractor during the progress of the work, lose, dump, throw overboard, sink, or misplace any material, plant, machinery, or appliance, which in the opinion of the Contracting Officer may be dangerous to or obstruct navigation, the Contractor shall recover and remove the same with the utmost dispatch. The Contractor shall give immediate notice, with description and location of such obstructions, to the Contracting Officer or inspector, and when required shall mark or buoy such obstructions until the same are removed. Should he refuse, neglect, or delay compliance with the above requirements, such obstructions may be removed by the Contracting Officer, and the cost of such removal may be deducted from any money due or to become due the Contractor, or may be recovered under his bond. The liability of the Contractor for the removal of a vessel wrecked or sunk without fault or negligence shall be limited to that provided in Sections 15, 19, and 20 of the River and Harbor Act of March 3, 1899. (33 U.S.C. 410 et seq.)

(End of clause)

§ 12–7.651–10 Signal lights.

Insert the following clause in all contracts requiring the use of marine equipment.

SIGNAL LIGHTS

The Contractor shall display signal lights and conduct his operations in accordance with the General Regulations of the Department of the Army and of the Coast Guard government lights and day signals to be displayed by towing vessels with tows on which no signals can be displayed, vessels working on wrecks, dredges, and vessels engaged in laying cables or pipe or in submarine or bank protection operations, lights to be displayed on dredge pipe lines, and day signals to be displayed by vessels of more than 65 feet in length moored or anchored in a fairway or channel, and the passing by other vessels of floating plant working in navigable channels, as approved by the Secretary of the Army (33 C.F.R. 201.1–201.16) and the Commandant, U.S. Coast Guard (33 C.F.R. 80.18–80.31a and 33 C.F.R. 95.51–95.70).

(End of clause)

§ 12–7.651–11 Time extensions for delays to elements of the work.

The following clause shall be inserted in contracts in which there are separate completion dates for various items of work and liquidated damages are provided for:

TIME EXTENSIONS

Notwithstanding any other provisions of this contract, any time extensions for changes in the work depend upon the extent, if any, by which the changes cause delay in the completion of the various elements of construction. The contract modification making such time extension will provide for an extension of contract completion date only for those specific elements so delayed and will not alter the contract completion dates for other portions of the work. This contract modification may further provide for an equitable readjustment of liquidated damages pursuant to the new completion schedule.

(End of clause)

§ 12–7.651–12 Progress charts and requirements for overtime work.

Insert the following clause in contracts having a performance time of four weeks or more.

PROGRESS CHARTS AND REQUIREMENTS FOR OVERTIME WORK

(a) The Contractor shall, within 10 days from date of award of contract (unless a different time is specified in the contract), submit to the Contracting Officer for approval a practicable schedule, showing the order in which the Contractor proposes to carry on the work, the date on which he will start the several salient features (including procurement of materials, plant and equipment) and the contemplated dates for completing the same. The schedule shall be in the form of a progress chart of suitable scale to indicate appropriately the percentage of work scheduled for completion at any time. The Contractor shall enter on the chart the actual progress at such intervals as directed by the Contracting Officer, and shall immediately deliver to the Contracting Officer three copies thereof. If the Contractor fails to submit a progress schedule within the time herein prescribed, the Contracting Officer may withhold approval of progress payment estimates until such time as the Contractor submits the required progress schedule.

(b) If, in the opinion of the Contracting Officer, the Contractor falls behind the progress schedule, the Contractor shall take such steps as may be necessary to improve his progress and the Contracting Officer may require him to increase the number of shifts, or overtime operations, days of work, or the amount of construction plant, or all of them, and to submit for approval such supplementary schedule or schedules in chart form as may be deemed necessary to demonstrate the manner in which the agreed rate of progress will be regained, all without additional cost to the Government.

(c) Failure of the Contractor to comply with the requirements of the Contracting Officer under this provision shall be grounds for determination by the Contracting Officer that the Contractor is not prosecuting the work with such diligence as will insure completion within the time specified. Upon such determination the Contracting Officer may terminate the Contractor's right to proceed with the work, or any separable part thereof, in accordance with the clause of the contract entitled "Termination for Default-Damages for Delay-Time Extensions."

(End of clause)

§ 12–7.651–13 Special precautions for work at operating airports.

Insert the following clause in contracts when work is to be performed at an operating airport:

SPECIAL PRECAUTIONS FOR WORK AT OPERATING AIRPORTS

(a) When work is to be performed at an operating airport the Contractor must arrange his work schedule so as not to interfere with flight operations. Such operations will take precedence over construction convenience. Any operations of the Contractor which would otherwise interfere with or endanger the operations of aircraft shall be performed only at times and in the manner directed by the Contracting Officer. The Government will make every effort to reduce the disruption of the Contractor's operation.

(b) Unless otherwise specified by local regulations, all areas in which construction operations are underway shall be marked by yellow flags during daylight hours and by red lights at other times. The red lights along the edge of the construction areas within the existing aprons shall be the electric type of not less than 100 watts intensity placed and supported as required. All other construction markings on roads and adjacent parking lots may be either electric or battery type lights. These lights and flags shall be placed so as to outline the construction areas and the distance between any two flags or lights shall not be greater than 25 feet. The Contractor shall provide adequate watch to maintain the lights in working condition at all times other than daylight hours. The hour of beginning and the hour of ending of daylight will be determined by the Contracting Officer

(c) All equipment and materials in the construction areas or when moved outside the construction area shall be marked with airport safety flags during the day, and when directed by the Contracting Officer, with red obstruction lights at night. All equipment operating on the apron, taxiway, runway and intermediate areas after darkness hours shall have clearance lights in conformance with instructions from the Contracting Officer. No construction equipment shall operate within 50 feet of aircraft undergoing fuel operations. Open flames are not allowed on the ramp except at times authorized by the Contracting Officer.

(d) Trucks and other motorized equipment entering the airport or construction area shall do so only over routes determined by the Contracting Officer. Use of runaways, aprons, taxiways or parking areas as truck or equipment routes will not be permittted unless specifically authorized for such use. Flagmen shall be furnished by the Contractor at points on apron and taxiway for safe guidance of his equipment over these areas to assure right of way to aircraft. Areas and routes used during the contract must be returned to their original condition by the Contractor. The maximum speed allowed on the Airport shall be as established by the airport management. Vehicles shall be operated so as to be under safe control at all times, weather and traffic conditions considered. Vehicles must be equipped with head and tail lights during the hours of darkness.

(End of clause)

§ 12–7.651–14 Quantity surveys.

(a) Except as provided in paragraph (b) of this section, insert the following clause in contracts containing unit price items where the specifications provide for payment based on surveys.

QUANTITY SURVEYS

(a) The Government shall make original and final surveys and make computations to determine the quantities of work performed or finally in place.

(b) The Contractor shall make such surveys and computations as are necessary to determine the quantities of work performed or placed during each period for which a progress payment is to be made. All original field notes, computations and other records for the purpose of layout and progress surveys shall be recorded in duplicating field books, the original pages of which shall be furnished promptly in ring binders to the representatives of the Contracting Officer at the site of the work and shall be used by the Contracting Officer to the extent necessary in determining the proper amount of progress payments due the Contractor. Unless waived by the Contracting Officer in each specific case, quantity surveys made by the Contractor shall be made under the direction of a representative of the Contracting Officer.

(End of clause)

(b) When Government personnel may not be available; it may be advisable to require the contractor to make original and final quantity surveys as well as progress surveys. In this case, the following clause may be used in place of the clause in paragraph (a) of this section, with the approval of the head of the procuring activity or his designee.

QUANTITY SURVEYS

(a) The Contractor shall make such surveys and computations as are necessary to

V 42 174 SEP 8 77 UMI

determine the quantities of work performed or placed during each period for which a progress payment is to be made. The Contractor shall also make original and final surveys. The Government will make such computations as are necessary to determine the quantities of work performed or finally in place. Unless waived by the Contracting Officer in each specific case, quantity surveys made by the Contractor shall be made under the direction of a representative of the Contracting Officer.

(b) All original field notes, computations and other records of the Contractor for the purposes of layout, original, progress and final surveys shall be recorded in duplicating field books, the original pages of which shall be furnished promptly in ring binders to the representative of the Contracting Officer at the site of the work and shall be used by the Contracting Officer to the extent necessary in determining the proper amounts of progress and final payments.

(End of clause)

§ 12-7.651-15 Layout of work.

The following clause is authorized for use in construction contracts where appropriate.

LAYOUT OF WORK

The Contractor shall lay out his work from Government established base lines and bench marks indicated on the drawings and shall be responsible for all measurements in connection therewith. The Contractor shall furnish, at his own expense, all stakes, templates, platforms, equipment, tools, and materials and labor as may be required in laying out any part of the work from the base lines and bench marks established by the Government. The Contractor will be held responsible for the execution of work to such lines and grades as may be established or indicated by the Contracting Officer. It shall be the responsibility of the Contractor to maintain and preserve all stakes and other marks established by the Contracting Officer until authorized to remove them. If such marks are destroyed, by the Contractor or through his negligence, prior to their authorized removal, they may be replaced by the Contracting Officer at his discretion. The expense of replacement will be deducted from any amounts due or to become due the Contractor.

(End of clause)

§ 12-7.651-16 Value engineering incentive.

When required by the instructions for its use in DOTPR 12-1.5202-2, insert the value engineering incentive clause set forth below:

VALUE ENGINEERING INCENTIVE

(a) Application. This clause applies to a Contractor developed and documented Value Engineering Change Proposal (VECP) which:

(i) Requires a change to this contract to implement the VECP; and

(ii) Reduces the contract price without impairing essential function or characteristics, provided that it is not based solely on a change in deliverable end item quantities.

(b) Documentation. As a minimum, the following information shall be submitted by the Contractor with each VECP:

(1) A description of the difference between the existing contract requirement and the proposed change, and the comparative advantages and disadvantages of each; justification where function or characteristics of a work item is being altered; and the effect of the change on the performance of the end item;

(ii) An analysis and itemization of the requirements of the contract which must be changed if the VECP is accepted and a recommendation as to how to make each such change (e.g., a suggested specification revision);

(iii) A separate detailed cost estimate for both the existing contract requirement and the proposed change to provide an estimate of the reduction in costs, if any, that will result from acceptance of the VECP, taking into account the costs of development and implementation by the Contractor (including any amount attributable to subcontracts in accordance with paragraph (f) below);

(iv) A prediction of any effects the proposed change would have on related costs to the agency such as Government furnished property costs, and costs of maintenance and operation;

(v) A statement of the time by which a change order adopting the VECP must be issued so as to obtain the maximum cost reduction during the remainder of this contract, noting any effect on the contract completion time or delivery schedule; and

(vi) Identification of any previous submission of the VECP, including the dates submitted, the agencies involved, the numbers of the Government contracts involved, and the previous actions by the Government, if known.

(c) Submission. To expedite a determination, VECPs shall be submitted to the Resident Engineer at the worksite with a copy to the Contracting Officer. Proposals shall be processed expeditiously; however, the Government shall not be liable for any delay in acting upon any proposal submitted pursuant to this clause. The Contractor has the right to withdraw, in whole or in part, any VECP at any time prior to acceptance by the Government.

(d) Acceptance. The Contracting Officer may accept, in whole or in part, by contract modification any VECP submitted pursuant to this clause. The Contracting Officer may accept the VECP even though an agreement on price reduction has not been reached, by issuing the Contractor a notice to proceed with the change. Until a notice to proceed is issued or a contract modification applies a VECP to this contract, the Contractor shall remain obligated to perform in accordance with this contract. Contract modifications made pursuant to this clause will so state. The decision of the Contracting Officer as to the acceptance of any VECP under this contract shall be final and shall not be subject to the "Disputes" clause of this contract.

(e) Sharing. If a VECP submitted by the Contractor pursuant to this clause is accepted, the contract price shall be adjusted without regard to profit in accordance with the following provisions:

(i) Definition:

(A) Instant contract savings to the Contractor (ICS) are the estimated reduction in the Contractor's cost of performance resulting from the acceptance of the VECP. The proposed cost reduction includes estimated allowable Contractor development and implementation costs (CC). The Contractor's development and implementation costs include any subcontractor development and implementation costs (see (f) below). For purposes of this clause, Contractor development costs are those costs incurred after the Contractor has identified a specific VE project and prior to acceptance and implementation by the Government.

(B) Government Costs (GC) are those DOD costs which directly result from development and implementation of the VECP, such as test and evaluation of the VECP.

(ii) Calculations and Actions. Multiply ICS by 45% and GC by 55%. Add these two results, e.g., (.45 ICS plus .55 GC) and subtract from the contract price.

(f) Subcontracts. The Contractor shall include appropriate VE arrangements in any subcontract of $50,000 or greater, and may include such arrangements in contracts of lesser value. To compute any adjustment in the contract price under paragraph (e) above, the Contractor's cost of development and implementation of a VECP which is accepted under this contract shall include any development and implementation costs of a subcontractor, and any VE incentive payments to a subcontractor, which clearly pertain to such VECP. However, no such payment or accrual to a subcontractor will be permitted, either as part of the Contractor's development or implementation costs or otherwise, to reduce the Government's share.

(g) Data. The Contractor may restrict the Government's right to use any sheet of a VECP or of the supporting data, submitted pursuant to this clause, in accordance with the terms of the following legend if it is marked on such sheet:

"This data furnished pursuant to the Value Engineering Incentive clause of contract ---------- shall not be disclosed outside the Government, or dpulicated, used, or disclosed, in whole or in part, for any purpose other than to evaluate a VECP submitted under said clause. This restriction does not limit the Government's right to use information contained in this data if it is or has been obtained, or is otherwise available, from the Contractor or from another source, without limitations. If such a VECP is accepted by the Government under said contract after the use of this data in such an evaluation, the Government shall have the right to duplicate, use, and disclose any data reasonably necessary to the full utilization of such VECP as accepted, in any manner and for any purpose whatsoever, and have others so do."

In the event of acceptance of a VECP, the Contractor hereby grants to the Government all rights to use, duplicate or disclose, in whole or in part, in any manner and for any purpose whatsoever, and to have or permit others to do so, any data reasonably necessary to fully utilize such VECP.

(End of clause)

Subpart 12-7.50—Clauses for Procurement of Mortuary Services

§ 12-7.5000 Scope.

This subpart sets forth uniform contract clauses for use in mortuary services contracts.

§ 12-7.5001 Required clauses.

The following clauses shall be included in procurement of mortuary services contracts, except where clearly inappropriate.

§ 12-7.5001-1 Definitions.

Insert the clause set forth in FPR 1-7.102-1.

§ 12-7.5001-2 Payments.

Insert the clause set forth in FPR 1-7.102-7.

§ 12-7.5001-3 Assignment of claims.

Insert the clause set forth in FPR 1-30.703.

§ 12-7.5001-4 Federal, State and local taxes.

Insert the clause set forth in FPR 1-11.401-1.

§ 12-7.5001-5 Termination for convenience of the Government.

Insert the clause set forth in FPR 1-8.705.1.

§ 12-7.5001-6 Default.

Insert the clause set forth in FPR 1-8.707.

§ 12-7.5001-7 Disputes.

Insert the clause set forth in FPR 1-7.102-12.

§ 12-7.5001-8 Convict labor.

Insert the clause set forth in FPR 1-12.203.

§ 12-7.5001-9 Contract Work Hours Standards Act—overtime compensation.

Insert the clause set forth in FPR 1-12.203.

§ 12-7.5001-10 Officials not to benefit.

Insert the clause set forth in FPR 1-7.102-17.

§ 12-7.5001-11 Covenant against contingent fees.

Insert the clause set forth in FPR 1-1.503.

§ 12-7.5001-12 Gratuities.

Insert the clause set forth in DOTPR 12-7.150-1.

§ 12-7.5001-13 Equal opportunity.

Insert the clause set forth in FPR 1-12.803-2 under the conditions and in the manner prescribed therein.

§ 12-7.5001-14 Examination of records by Comptroller General.

Insert the clause set forth in FPR 1-7.103-3 in negotiated contracts.

§ 12-7.5001-15 Requirements.

REQUIREMENTS

(a) This is a requirements contract for the supplies or services specified in the Schedule, and for the period set forth in this contract. Delivery of supplies or performance of services shall be made only as authorized by orders issued in accordance with the clause entitled "Delivery Orders and Invoices". The quantities of supplies or services specified herein are estimates only and are not purchased hereby. Except as may be otherwise provided herein, in the event the Government's requirements for supplies or services set forth in the Schedule do not result in orders in the amounts or quantities described as "estimated" or "maximum" in the Schedule, such event shall not constitute the basis for an equitable price adjustment under this contract.

(b) The Government shall order from the Contractor all the supplies, services, and transportation set forth in the Schedule which are required to be purchased by the Government activity named herein, and the Contractor shall furnish to the Government such supplies, services, and transportation as may be ordered by the Contracting Officer. The Government, however, reserves the right not to order supplies and services under this contract in instances where the body is removed from the area for medical, scientific, or other cogent reason. In the event of an epidemic or other emergency, the Contractor shall not be required to provide services in excess of the capacity of his facilities.

(End of clause)

§ 12-7.5001-16 Contract period.

CONTRACT PERIOD

Any contract awarded as a result of bids submitted under this Invitation for Bids shall extend from ---------- through ----------.

(End of clause)

§ 12-7.5001-17 Area of performance.

AREA OF PERFORMANCE

(a) The area of performance is specified elsewhere in this contract. This contract includes taking possession of the remains at the place where they are located, transporting them to the Contractor's place of preparation and transporting them thereafter to a place designated by the Contracting Officer. The Contractor shall not be entitled to reimbursement for transportation when both the place where the remains were located and the delivery point are within the area of performance.

(b) If remains are located outside the area of performance, the Government may call on the Contractor or obtain the services elsewhere. If the Government calls on the Contractor, the Contractor shall be paid the amount per mile indicated in the Schedule for the number of miles required to transport the remains by a reasonable route from the point where located to the boundary of the area of performance. If the Government elects to have the remains brought into the area of performance by some other means, it may require the Contractor to perform after the remains are within the area of performance.

(c) The Government may require the Contractor to deliver remains to any point within one hundred (100) miles of the area of performance. In this case the Contractor shall be paid the amount per mile indicated in the Schedule for the number of miles required to transport the remains by a reasonable route from the boundary of the area of performance to the delivery point.

(End of clause)

§ 12-7.5001-18 Specifications.

SPECIFICATIONS

Armed Services Specifications, Care of Deceased Personnel, hereinafter referred to as "Specification" are attached hereto and made a part of this contract.

(End of clause)

§ 12-7.5001-19 Using activities.

USING ACTIVITIES

Contracting Officers of the following activities may order services and supplies under this contract:

(End of clause)

§ 12-7.5001-20 Delivery orders and invoices.

DELIVERY ORDERS AND INVOICES

Delivery orders for supplies or services shall be issued by the Contracting Officer and shall set forth (i) the supplies or services being ordered, (ii) the quantities to be furnished, (iii) delivery or performance dates, (iv) place of delivery or performance, (v) packing and shipping instructions, and (vi) the address to which invoices for services rendered under this contract shall be sent. Amendments to delivery orders may be made by the Contracting Officer issuing the order. Each delivery order or change order shall cite the funds from which payment for the supplies or services ordered shall be made.

(End of clause)

§ 12-7.5001-21 Delivery and performance.

DELIVERY AND PERFORMANCE

(a) Except as otherwise herein provided, the Contractor shall furnish the material ordered and perform the services specified in each case as promptly as possible but in no event later than thirty six (36) hours after the Contractor has received notification to remove the remains, exclusive of the time necessary for the Government to inspect and check results of preparation. The Government may, at no additional charge, require the Contractor to hold the remains for an additional period not to exceed seventy-two (72) hours from the time the remains are casketed and final inspection completed.

(b) In no case will shipment be made until the Contractor certifies that the remains will be in an acceptable state of preservation upon final delivery. The Contractor shall not be responsible for notifying the consignee of time of arrival of shipped remains.

(End of clause)

§ 12-7.5001-22 Subcontracting.

SUBCONTRACTING

No contract shall be made by the Contractor with any other party for furnishing any of the work or services herein contracted for without the written approval of the Contracting Officer. This provision does not apply to contracts of employment between the Contractor and his personnel.

(End of clause)

§ 12-7.5001-23 Additional default provision.

ADDITIONAL DEFAULT PROVISION

(a) This clause supplements the "Default" clause of this contract.

(b) This contract may be terminated for default by written notice without the ten (10) day notice specified under paragraph (a) (ii) of the "Default" clause if during the performance of this contract:

(1) The Contractor, through circumstances reasonably within his control or that of persons in his employ, performs any act or acts under or in connection with this contract, or fails in the performance of any service under this contract, and such acts or failures may reasonably be considered to reflect discredit upon the Coast Guard in fulfilling its responsibility for proper care of remains;

(2) The Contractor, either by his own act or through persons in his employ, solicits relatives or friends of the deceased to purchase supplies or services not provided for under this contract (the Contractor may furnish supplies or arrange for services not provided for under this contract, only where such other supplies or services are voluntarily requested, selected and paid for by the representatives of the deceased);

(3) The services, or any part thereof, to be performed under this contract are, without the written authorization of the Contracting Officer, performed by an individual, partnership, corporation, or other person or business association whatsoever, other than the Contractor to whom this contract is awarded, his employees and members of the firm;

(4) The Contractor refuses to perform the services required for any particular remains; or

(5) The Contractor advertises in any way that he has a contract for mortuary services with the Government.

(c) All other provisions of the "Default" clause shall apply to a termination made pursuant to this "Additional Default Provision" clause.

(End of clause)

§ 12-7.5001-24 Inspection.

INSPECTION

All services, material, and workmanship shall be subject to inspection and test by representatives of the Government. For this purpose, the Contractor shall allow inspectors and other representatives of the Con-

V 42 I 174
SEP 8 77
UMI

tracting Officer free access to the plant and operations at all reasonable times and shall furnish such facilities, supplies and services, as may be required.

(End of clause)

§ 12–7.5001–25 Group interment.

GROUP INTERMENT

Payments to the Contractor for supplies and services provided for remains to be interred as a group shall be made on the basis of the number of caskets furnished rather than on the basis of the number of persons in the group.

(End of clause)

§ 12–7.5001–26 Professional requirements.

PROFESSIONAL REQUIREMENTS

The Contractor shall meet all State and local licensing requirements and shall furnish the highest quality of professional services. Preparation and transportation of remains shall be performed in accordance with all applicable Federal, State, and local health laws, statutes, and regulations. The Contractor shall obtain and furnish all necessary health department and shipping permits at no additional cost to the Government, and shall insure that all necessary health department permits are in order for disposition of the remains.

(End of clause)

§ 12–7.5001–27 Facility requirements.

FACILITY REQUIREMENTS

The Contractor's building shall have complete facilities for maintaining the highest standards of solemnity, reverence, and assistance to the family, and for prescribed ceremonial services. The preparation room shall be clean, sanitary, and adequately equipped. The Contractor shall have, or be able to obtain, catafalques, church trucks and equipment for Protestant, Catholic, and Jewish services. The funeral home, furnishings, grounds and surroundings area shall be carefully maintained so as to present a clean well-kept appearance.

(End of clause)

§ 12–7.5001–28 Preparation history.

PREPARATION HISTORY

For each body prepared, or in the case of group interment for each casket handled, the Contractor shall state briefly the results of the embalming process on a certificate furnished by the Contracting Officer.

(End of clause)

§ 12–7.5001–29 Changes.

The Contracting Officer may at any time, by a written order, and without notice to the sureties, if any, make changes in or additions to specifications, issue additional instructions, require modified or additional work or services within the scope of the contract, and change the place of delivery, method of shipment, or the amount of Government-furnished property. If any such change causes an increase or decrease in the cost, or in the time required for, the performance of this contract, an equitable adjustment shall be made in the contract price, or time of performance, or both, and the contract shall be modified in writing accordingly. Any claim by the Contractor for adjustment under this clause must be asserted within thirty (30) days from the date of receipt by the Contractor of the notification of change; *provided*, however, that the Contracting Officer, if he decides that the facts justify such action, may receive and act upon any such claim asserted at any time prior to final payment under this contract. Failure to agree to any adjustment shall be a dispute concerning a question of fact within the meaning of the "Disputes" clause of this contract. However, nothing in this clause shall excuse the Contractor from proceeding with the contract as changed.

(End of clause)

§ 12–7.5001–30 Inconsistent provisions.

INCONSISTENT PROVISIONS

In the event of any inconsistency in the provisions of any of the parts of this contract, the following order shall control: the Schedule; the contract clauses; and the Specifications as in effect on the date of this contract.

(End of clause)

§ 12–7.5001–31 Coordination.

COORDINATION

Necessary coordination shall be effected with the Contractor's funeral director on all funeral arrangements, which shall include the time remains will be ready for inspection, viewing and shipment, time and place of religious services, time and place of interment and shipping schedules, and final disposition of remains.

(End of clause)

§ 12–7.5001–32 Preparation of remains at other than contractor's establishment.

PREPARATION OF REMAINS AT OTHER THAN CONTRACTOR'S ESTABLISHMENT

Preparation of remains at a place other than the Contractor's establishment shall require the concurrence of the Contracting Officer.

(End of clause)

§ 12–7.5001–33 Major restorative art.

MAJOR RESTORATIVE ART

The Contractor shall advise the Contracting Officer promptly of any need for major restorative art technique (restoration of facial contours, such as nose, ears, mouth, chin, etc.) required for any remains prepared under this contract to permit the viewing of remains at final destination, and upon the direction of the Contracting Officer, shall perform such restoration. The cost of such restoration shall be allowed as approved by the Contracting Officer.

(End of clause)

§ 12–7.5001–34 Passenger car.

PASSENGER CAR

When a passenger car is required to transport members of the immediate family to the funeral service and, if necessary, to the selected terminal and return, the cost shall be allowed as approved by the Contracting Officer.

(End of clause)

Subpart 12–7.51—Clauses for Architect-Engineer Contracts

§ 12–7.5100 Scope.

This subpart set forth contract clauses for use in fixed-price architect-engineer contracts in addition to those prescribed in the April 1975 edition of Standard Form 253 (see FPR 1–16.701).

§ 12–7.5100–1 Amendment of Standard Form 253.

The following clauses shall be used with Standard Form 253 (1975 Edition) pending the publication of a new edition of the form: (1) the clause Disabled Veterans and Veterans of the Vietnam Era set forth in FPR Temporary Regulation No. 39 effective July 26, 1976; (2) the clause Employment of the Handicapped set forth in FPR Temporary Regulation No. 38 of May 1976; and (3) the Clean Air and Water clause set forth in FPR 1–1.2302–2.

§ 12–7.5101 Required clauses.

§ 12–7.5101–1 Composition of contractor.

COMPOSITION OF CONTRACTOR

If the Contractor hereunder is comprised of more than one legal entity, each entity shall be jointly and severally liable hereunder.

(End of clause)

§ 12–7.5101–2 Interpretation or modification.

Insert the clause set forth in DOTPR 12–7.150–4.

§ 12–7.5101–3 Dissemination of contract information.

Insert the clause set forth in DOTPR 12–7.150–10, substituting "Architect-Engineer" for "Contractor."

§ 12–7.5101–4 Inspection.

INSPECTION

The Government, through any authorized representative, may at all reasonable times, inspect or otherwise evaluate the work being performed hereunder and the premises in which it is being performed. If any inspection or evaluation is made by the Government on the premises of the Architect-Engineer or subcontractor, the Architect-Engineer shall provide and shall require his subcontractors to provide all reasonable facilities and assistance for the safety and convenience of the Government representatives in the performance of their duties. All inspections and evaluations shall be performed in such a manner as will not unduly delay the work.

(End of clause)

§ 12–7.5101–5 Notice of delays.

Insert the clause set forth in DOTPR 12–7.150–9, substituting "Architect-Engineer" for "Contractor".

§ 12–7.5101–6 Certification of drawings and other documents.

CERTIFICATION OF DRAWINGS AND OTHER DOCUMENTS

The Architect-Engineer or his authorized representative shall sign the original tracings of all drawings and the first page of all specifications, estimates, or similar documents under the Architect-Engineer's printed name and over the affixed replica of his professional seal or his registration certificate number, including the State or jurisdiction of issuance.

(End of clause)

§ 12–7.5101–7 Gratuities.

Insert the clause set forth in DOTPR 12–7.150–1, substituting "Architect-Engineer" for "Contractor".

§ 12–7.5102 Clauses to be used when applicable.

The following clauses shall be included in the contract when their use is appropriate.

§ 12–7.5102–1 Military security requirements.

Insert the Military Security Requirements clause set forth in DOTPR 12–7.151–9 in accordance with the instructions for its use in DOTPR 12–1.352.

§ 12–7.5102–2 Audit and records.

Insert the clause set forth in FPR 1–3.814–1(a) in accordance with the instructions for its use.

§ 12–7.5102–3 Price reduction for defective cost or pricing data.

Insert the clause set forth in FPR 1–3.814–1(a) in accordance with the instructions for its use.

§ 12–7.5102–4 Subcontractor cost or pricing data.

Insert the clause set forth in FPR 1–3.814–3(a) in accordance with the instructions for its use.

§ 12–7.5102–5 Architectural designs and data—Government rights (sole property).

Where the purpose of a contract for architect-engineer services is to obtain a unique architectural design of a building, a monument, or construction of a similar nature, which for artistic, esthetic or other special reasons the Government does not want duplicated by anyone else, the Government may desire to acquire exclusive control of the data pertaining to such design. The clause set forth in FPR 1–16.703(d) shall be used only in those cases where the contracting officer determines for the foregoing reasons that it is desirable to maintain exclusive control over the design and data.

§ 12–7.5102–6 Renegotiation.

Insert the clause set forth in DOTPR 12–7.151–15 in accordance with the instructions for its use.

§ 12–7.5103 Additional clauses.

The following clauses shall be included in the contract when it is deemed necessary or desirable to cover the subject matter thereof. The clauses may be modified, when necessary, to adapt to special situations.

§ 12–7.5103–1 Method of payment.

METHOD OF PAYMENT

(a) Estimates shall be made monthly of the amount and value of the work and services performed by the Architect-Engineer under this contract, such estimates to be prepared by the Architect-Engineer and accompanied by such supporting data as may be required by the Contracting Officer.

(b) Upon approval of such estimate by the Contracting Officer payment upon properly certified vouchers shall be made to the Architect-Engineer as soon as practicable of 90% of the amount as determined above, less all previous payments; *Provided, however*, That if the Contracting Officer: determines that the work is substantially complete and that the amount of retained percentages is in excess of the amount considered by him to be adequate for the protection of the Government, he may at his discretion release to the Architect-Engineer such excess amount.

(c) Upon satisfactory completion by the Architect-Engineer and acceptance by the Contracting Officer of the work required by the contract, the Architect-Engineer will be paid the unpaid balance of any money due under the contract.

(d) As a precedent to final payment under the contract, the Architect-Engineer shall execute and deliver to the Contracting Officer a release of all claims against the Government arising under or by virtue of this contract, other than such claims, if any, as may be specifically excepted by the Architect-Engineer from the operation of the release in stated amounts to be set forth therein.

(End of clause)

§ 12–7.5103–2 Preparation of specifications.

PREPARATION OF SPECIFICATIONS

The Architect-Engineer shall make reference to applicable Federal specifications, if available, for items and materials used. If Federal specifications are not available, the Architect-Engineer shall reference specifications prepared by recognized professional manufacturer or construction societies, or furnish descriptions of the items or materials containing all the fundamental properties and all the essential requirements to be met by the items or materials. When an item or material cannot be described because of its technical construction or composition or because it is a proprietary item, the name of one, and if available, several, suitable commercial products shall be included as part of the required description, followed by the words "or equal." If it is determined that one and only one brand of item or material will meet the requirement, the Architect-Engineer shall so state and shall give full justification for that determination. Specifications will not duplicate, contradict or over the same subject matter contained in the general and special provisions to be used with the construction contract. A complete set of construction contract general and special provisions will be furnished to the Architect-Engineer by the Contracting Officer.

(End of clause)

§ 12–7.5103–3 Redesign Responsibility.

(a) Insert the following clause in all Architect-Engineer contracts except (1) those involving projects for which the Head of the Procuring Activity or his designee determines that cost limitations are secondary to performance considerations and that additional funding can be expected if necessary, and (2) those for the design of a standard structure which is not intended for a specific location site.

DESIGN WITHIN FUNDING LIMITATIONS (1971 APR)

(a) The Architect-Engineer shall accomplish the design services required under this contract so as to permit the award of a contract, pursuant to standard Department of Transportation procedures, for the construction of the facilities designed at a price that does not exceed the estimated construction contract price set forth in this contract. When bids or proposals for the construction contract are received which exceed such estimated price, the Architect-Engineer shall perform such redesign and other services as are necessary to permit contract award within such funding limitation. These additional services shall be performed at no increase in the price of this contract. However, the Architect-Engineer shall not be required to perform such additional services at no cost to the Government if the unfavorable bids or proposals are the result of conditions beyond his reasonable control.

(b) The Architect-Engineer will promptly advise the Contracting Officer if he finds that the project being designed will exceed or is likely to exceed the funding limitations and he is unable to design a usable facility within these limitations. Upon receipt of such information, the Contracting Officer will review the Architect-Engineer's revised estimate of construction cost. The Contracting Officer may, if he determines that the estimated construction contract price set forth in this contract is so low that award of a construction contract not in excess of such estimate is improbable, authorize a change in scope or materials as required to reduce the estimated construction cost to an amount within the estimated construction contract price set forth elsewhere in the contract, or he may adjust such estimated construction contract price. When bids or proposals are unreasonably delayed, the Government shall increase the estimated construction contract price by a percentage representing the increase in the level of building construction costs during the period between the estimated bid opening date and the actual bid opening date. The percentage of increase shall be determined by averaging the building construction cost indices for that period as published by the Engineering News Record Building Cost Index, the Associated General Contractors of America Construction Cost Index; and, E. H. Boeckh and Associates, and this estimate shall be used in lieu of the architect-engineer's estimate to determine compliance with the funding limitation

(End of clause)

(b) Whenever the clause set forth in paragraph (a) of this section is included in a contract, the following statement shall be inserted in the description of the work to be performed by the Architect-Engineer.

The estimated construction contract price for the project described herein is $ _____.

The figure to be inserted in this statement is to be established at the beginning of contract negotiations by agreement between the Architect-Engineer and the Government. Such estimated construction contract price shall take into account any statutory or other limitations and exclude any allowances for Government supervision and overhead and any amounts set aside by the Government for contingencies. In negotiating the figure to be inserted, the Contracting Officer should make available to the Architect-Engineer the information upon which the Government has based its initial estimate and any subsequently acquired information which may affect the construction cost.

§ 12–7.5103–4 Building codes.

BUILDING CODES

The Architect-Engineer shall plan and design this project in accordance with the building ordinances, codes, and regulations of the county and political subdivision in which the project is to be constructed insofar as they are binding upon the United States Government. The project shall also be planned and designed in compliance with the latest edition of the American National Building Code as recommended by the Board of Fire Underwriters.

(End of clause)

Subpart 12–7.52—Clauses for Fixed-Price Vessel Repair, Alteration or Conversion Contracts

§ 12–7.5200 Scope of subpart.

This subpart is applicable only to the Coast Guard. It sets forth or cites contract clauses to be used for fixed-price vessel repair, alteration or conversion contracts and where necessary provides instructions for their use.

§ 12–7.5201 Required clauses.

The clauses set forth or cited in this section shall be included in fixed-price

V 42 174 SEP 8 77 UMI

vessel repair, alteration or conversion contracts which are formally advertised and to be performed within the United States, its possessions, or Puerto Rico. Unless inappropriate, the clauses should also be included in negotiated contracts and contracts to be performed outside the United States.

§ 12–7.5201–1 Delivery and shifting of vessel.

DELIVERY AND SHIFTING OF VESSEL

The Government shall deliver the vessel to the Contractor at his place of business. Upon completion of the work the Government shall accept delivery of the vessel at the Contractor's place of business. The Contractor shall provide, at no additional charge, upon 24 hours' advance notice, a tug or tugs and docking pilot, acceptable to the Contracting Officer, to assist in handling the vessel between (to and from) the Contractor's plant and the nearest point in a waterway regularly navigated by vessels of equal or greater draft and length. While the vessel is in the hands of the Contractor, any necessary towage, cartage, or other transportation between ship and shop or elsewhere, which may be incident to the work herein specified, shall be furnished by the Contractor without additional charge to the Government.

(End of clause)

§ 12–7.5201–2 Performance.

PERFORMANCE

(a) The Contractor shall make the necessary arrangements for receiving the vessel on the specified date, such arrangements to be satisfactory to the Contracting Officer or his duly authorized representative.

(b) The Contractor shall promptly commence the work required by the contract and shall diligently prosecute same to completion to the satisfaction of the Contracting Officer.

(c) Except as otherwise provided in this contract, the Contractor shall furnish all necessary material, labor, services, equipment, supplies, power, accessories, facilities and such other things and services as are necessary for accomplishing the work specified in this contract subject to the rights reserved in the Government under the "Government-furnished Property" clause of the contract.

(d) The Contractor shall without charge and without specific requirement therefor:

(1) Make available at the plant to personnel of the vessel, while in drydock or on a marine railway, toilet and similar facilities acceptable to the Contracting Officer as adequate in number and sanitary standards. For cutters or boats fitted with pollution Abatement Systems, provide for disposal of shipboard waste (non-oily) by installing a portable hose between the cutter's or boat's weather deck sewage overboard discharge connection and, either a shore-side holding facility, sewage treatment plant, or a municipal sewage system. Directing of shipboard waste to waters covered by the Federal Water Pollution Control Act, as amended, will not be allowed. In freezing conditions the contractor will provide protection to the hook up system.

(2) Supply and maintain, in such condition as the Contracting Officer may reasonably require, suitable brows and gangways from the pier, drydock or marine railway to the vessel (access to vessel shall be lighted by the Contractor during all periods of darkness).

(3) Treat salvage, scrap, or other ship's material of the Government resulting from performance of work as though they were items of Government-furnished property in accordance with provisions of the "Government-furnished Property" clause of this contract.

(4) Perform, or pay the cost of, any repairs, reconditioning or replacements necessary as a result of the use by the Contractor of any of the vessel's machinery, equipment or fittings including, but not limited to, winches, pumps, rigging, or pipelines.

(e) The Contractor shall conduct dock and sea trials of the vessel as required by the specifications. During such trials the vessel shall be under the control of the vessel's commander and crew with representatives of the Contractor and the Government on board to determine whether or not the work done by the Contractor has been satisfactorily performed. Dock and sea trials not specified herein which the Contractor requires for his own benefit shall not be undertaken by the Contractor without prior notice to and approval of the Contracting Officer; any such dock trials shall be conducted at the expense of the Contractor, and any such sea trials shall be conducted at the risk and expense of the Contractor.

(End of clause)

§ 12–7.5201–3 Inspection and manner of doing work.

INSPECTION AND MANNER OF DOING WORK

(a) All work and material shall be subject to the approval of the Contracting Officer or his duly authorized representative. Work shall be performed in accordance with the plans and specifications of this contract as modified by any change order issued under the "Changes" clause in this contract.

(b) Unless otherwise specifically provided for herein, all operational practices of the Contractor and all workmanship and material, equipment and articles used in the performance of work thereunder shall be in accordance with American Bureau of Shipping Rules for Building and Classing Steel Vessels, U.S. Coast Guard Marine Engineering Regulations and Material Specifications (Subchapter J, 46 CFR), U.S. Coast Guard Electrical Engineering Regulations (Subchapter J, 46 CFR), U.S. Coast Guard Navigation and Vessel Inspection Circular No. 4–60 (Part IV—Notes on Repair), and U.S.P.H.S., Handbook on Sanitation in Vessel Construction, in effect at the time of the Contractor's submission of bid (or acceptance of the contract, if negotiated), and the best commercial maritime practices except where Navy specifications are specified, in which case such standards of material and workmanship shall be followed. Where the detailed specifications do not require a Navy standard, and the requirements are not clearly or specifically covered by one of the aforementioned standards, the Contracting Officer or his designated representative shall prescribe a Navy or industrial standard for the work wherever applicable, and the decision shall be final: *Provided*, however, that where the requirements of the representative for development of detailed drawings, selection of materials and equipment, standards of workmanship, which are not specifically required in the specifications result in a change in unit price, total contract price, quantity, quality, or delivery schedule, the Contracting Officer will be advised accordingly and the Contractor will not proceed with the work until specifically directed to do so by the Contracting Officer.

(c) All material and workmanship shall be subject to inspection and test at all times during the Contractor's performance of the work to determine their quality and suitability for the purpose intended and compliance with the contract. In case any material or workmanship furnished by the Contractor is found prior to redelivery of the vessel to be defective, or not in accordance with the requirements of the contract, the Government, in addition to its rights under any "Guaranty" clause which may be contained in this contract, shall have the right prior to redelivery of the vessel to reject such material or workmanship, and to require its correction or replacement by the Contractor at the Contractor's cost and expense. If the Contractor fails to proceed promptly with the replacement or correction of such material or workmanship, as required by the Contracting Officer, the Government may, by contract or otherwise, replace or correct such material or workmanship and charge to the Contractor the excess cost occasioned the Government thereby. The Contractor shall provide and maintain an inspection system acceptable to the Government covering the work specified in the contract. Records of all inspection work by the Contractor shall be kept complete and available to the Government during the performance of the contract and for a period of sixty days after completion of all work required by the contract.

(d) No welding, including tack welding and brazing, shall be permitted in connection with repairs, completions, alterations, or additions to hulls, machinery, or components of vessels, by a welder or procedure not qualified in accordance with MIL–STD–248C. Procedure qualifications tests shall be conducted in accordance with the requirements of MIL–STD–248C.

(e) The Contractor shall exercise reasonable care to protect the vessel from fire, and the Contractor shall maintain a reasonable system of inspection over the activities of welders, burners, riveters, painters, plumbers and similar workers, particularly where such activities are undertaken in the vicinity of the vessel's magazines, fuel oil tanks or storerooms containing flammable materials. A reasonable number of hose lines shall be maintained by the Contractor ready for immediate use on the vessel at all times while the vessel is berthed alongside the Contractor's pier or in drydock or on a marine railway. All tanks under alteration or repair shall be cleaned, washed and steamed out or otherwise made safe by the Contractor if and to the extent necessary, and the Contracting Officer shall be furnished with a "gas-free" or "safe-for-hotwork" certificate before any hotwork is done on a tank. Unless otherwise provided in this contract, the Contractor shall at all times maintain a reasonable fire watch about the vessel, including a fire watch on the vessel while work is being performed thereon.

(f) The Contractor shall place proper safeguards and/or effect such safety precautions as necessary, including suitable and sufficient lighting, for the prevention of accidents or injury to persons or property during the prosecution of work under this contract and/or from time of receipt of the vessel until acceptance of work performed by the Government.

(g) Except as otherwise provided in this contract, when the vessel is in the custody of the Contractor or in drydock or on a marine railway and the temperature becomes as low as 35 degrees Fahrenheit, the Contractor shall keep all pipelines, fixtures, traps, tanks, and other receptacles on or hooked up to the vessel drained to avoid damage from freezing, or if this is not practical, the vessels shall be kept heated to prevent such damage. It shall be the Contractor's responsibility to insure adequate circulation in the firemain water supply to prevent freezing of the water lines. The vessel's stern tube and propeller hubs shall be protected from frost damage by applied heat through the use of a salamander or other proper means.

(h) The work shall, whenever practicable, be performed in such manner as not to interfere with the berthing and messing of

civilian or military personnel attached to the vessel, and provisions shall be made so that personnel assigned shall have access to the vessel at all times, it being understood that such personnel will not interfere with the work or the Contractor's workmen. The Contractor shall provide messing and sanitary facilities for his employees, subcontractors and agents separate from the vessel.

(i) The Government does not guarantee the correctness of the dimensions, sizes and shapes given in any sketches, drawings, plans or specifications prepared or furnished by the Government. The Contractor shall be responsible for the correctness of the shape, sizes and dimensions of parts to be furnished hereunder, other than those furnished by the Government.

(j) The Contractor shall at all times keep the site of the work on the vessel free from accumulation of waste material or rubbish caused by his employees or the work, and at the completion of the work shall remove all rubbish from and about the site of the work and shall leave the work in its immediate vicinity "broom clean," unless more exactly specified in this contract.

(k) Any question regarding or rising out of the interpretations of plans and specifications of this contract or any discrepancies between the plans and specifications shall be determined by the Contracting Officer or his duly authorized representative; *provided*, however, that any interpretations or determinations by the authorized representative which affect the price or delivery time specified in this contract must be approved in writing by the Contracting Officer prior to proceeding with the requirements of such interpretations or determinations.

(l) While in drydock or on a marine railway, the commanding officer of the vessel, if then in commission, shall be responsible for the proper closings of openings to the ship's bottom upon which no work is being done by the Contractor. The Contractor shall be responsible for the closing before the end of working hours, of all valves and openings upon which work is being done by its workmen when such closing is practicable. The Contractor shall keep the commanding officer cognizant of the closure status of all valves and openings upon which the Contractor's workmen have been working.

(End of clause)

§ 12–7.5201–4 Subcontracts.

SUBCONTRACTS

(a) Nothing contained in the contract shall be construed as creating any contractual relationship between any subcontractor and the Government. The divisions or sections of the specifications are not intended to control the Contractor in dividing the work among subcontractors or to limit the work performed by any trade.

(b) The Contractor shall be responsible to the Government for acts and omissions of his own employees, and of subcontractors and their employees. He shall also be responsible for the coordination of the work of the trades, subcontractors, and material men.

(c) The Contractor shall, without additional expense to the Government, employ specialty subcontractors where required by the specifications.

(d) The Government or its representatives will not undertake to settle any differences between the Contractor and his subcontractors, or between subcontractors.

(End of clause)

§ 12–7.5201–5 Lay days.

LAY DAYS

(a) Lay day time will be paid by the Government at the Contractor's stipulated bid price for this item of the contract when the vessel remains on the dry dock or Marine Railway as a result of any change that involves work in addition to that required under the basic contract.

(b) No cost for lay day time shall be paid until all accepted items of the basic contract for which a price was established by the Contractor and for which docking of the vessel was required have been satisfactorily completed.

(c) Days of hauling out and floating, whatever the hour, shall not be paid as lay day time, and days when no work is performed by the Contractor shall not be paid as lay day time.

(d) Payment of lay day time shall constitute complete compensation for all cost except for the direct cost of performing the changed work.

(End of clause)

§ 12–7.5201–6 Changes.

Insert the clause set forth in FPR 1–7.602–3.

§ 12–7.5201–7 Extras.

Insert the clause set forth in FPR 1–7.102–3.

§ 12–7.5201–8 Payments.

PAYMENTS

Unless otherwise specified, the Contractor shall be paid, upon the submission of proper invoice or vouchers, the prices stipulated herein for supplies delivered and accepted or services rendered and accepted, less deductions, if any, as herein provided

(End of clause)

§ 12–7.5201–9 Government-furnished property.

Insert the clause set forth in DOTPR 12–7.151–8 in accordance with conditions prescribed therein.

§ 12–7.5201–10 Liability and insurance.

LIABILITY AND INSURANCE

(a) The Contractor shall exercise reasonable care and use his best efforts to prevent accidents, injury or damage to all employees, persons and property, in and about the work, and to the vessel or part thereof upon which work is done.

(b) The Contractor shall be responsible for and make good at his own cost and expense any and all loss of or damage of whatsoever nature to the vessel (or part thereof), its equipment, moveable stores and cargo, and Government-owned material and equipment for the repair, completion, alteration of or addition to the vessel in the possession of the Contractor, whether at the plant or elsewhere, arising or growing out of the performance of the work, except where the Contractor can affirmatively show that such loss or damage was due to causes beyond the Contractor's control, was proximately caused by the fault or negligence of agents or employees of the Government acting within the scope of their authority, or which loss or damage the Contractor by exercise of reasonable care was unable to prevent; provided, that the Contractor shall not be responsible for any such loss or damage discovered after redelivery of the vessel unless (i) such loss or damage is discovered within sixty (60) days after redelivery of the vessel and (ii) such loss or damage is affirmatively shown to have been the result of the fault or negligence of the Contractor. To induce the Contractor to perform the work for the compensation provided, it is specifically agreed that the Contractor's aggregate liability on account of loss of or damage to the vessel (or part thereof), its equipment, movable stores and cargo and said Government-owned materials and equipment shall in no event exceed the sum of $300,000, and the Government assumes as to the Contractor the risk of loss or damage (including, but not limited to, loss or damage from negligence of whatsoever degree of the Contractor's servants, employees, agents or subcontractors but specifically excluding loss or damage from willful misconduct or lack of good faith on the part of any of the Contractor's directors, officers and any of his managers, superintendents or other equivalent representatives who have supervision or direction of (i) all or substantially all of the Contractor's business or (ii) all or substantially all of the Contractor's operation at any one plant) to the vessel (or part thereof), its equipment, movable stores and cargo and said Government-owned materials and equipment in excess of $300,000, *Provided*, however, that as to such risk assumed and borne by the Government, the Government shall be subrogated to any claim, demand or cause of action against third persons which exists in favor of the Contractor, and the Contractor shall, if required, execute a formal assignment or transfer of claims, demands or causes of action: *Provided, further*, that nothing contained in this paragraph shall create or give rise to any right, privilege or power in any person except that Contractor, nor shall any person (except the Contractor be or become entitled thereby to proceed directly against the Government, or join the Government as a co-defendant in any action against the Contractor brought to determine the Contractor's liability or for any other purpose.

(c) The Contractor indemnifies and holds harmless the Government, its agencies and instrumentalities, the vessel and its owners, against all suits, actions, claims, costs or demands (including, without limitation, suits, actions, claims, costs or demands resulting from death, personal injury, and property damage) to which the Government, its agencies and instrumentalities, the vessel or its owner may be subject or put by reason of damage or injury (including death) to the property or person of any one other than the Government, its agencies, instrumentalities and personnel, the vessel or its owner, arising or resulting in whole or in part from the fault, negligence, wrongful act or wrongful omission of the Contractor, or any subcontractor, his or their servants, agents or employees; *Provided*, That the Contractor's obligation to indemnify under this paragraph (c) shall not exceed the sum of $300,000 on account of any one accident or occurrence in respect of any one vessel. Such indemnity shall include, without limitation, suits, actions, claims, costs or demands of any kind whatsoever, resulting from death, personal injury or property damage occurring during the period of performance of work on the vessel or within 60 days after redelivery of the vessel; and with respect to any such suits, actions, claims, costs, or demands resulting from death, personal injury or property damage occurring after the expiration of such period, the rights and liabilities of the Government and the Contractor shall be as determined by other provisions of this contract and by law; *Provided, however*, That such indemnity shall apply to death occurring after such period which results from any personal injury received during the period covered by the Contractor's indemnity as provided herein.

(d) The Contractor shall, at his own expense, procure, and thereafter maintain such casualty, accident and liability insurance, in such forms and amounts as may be approved by the Contracting Officer, insuring the performance of his obligations under paragraph (c) of this clause. In addition,

V 42 174 SEP 8 77 UMI

the Contractor shall at his own expense procure and thereafter maintain such ship repairer's legal liability insurance as may be necessary to insure the Contractor against his liability as ship repairer in the amount of $300,000 or the value of the vessel as determined by the Contracting Officer, whichever is the lesser, with respect to each vessel on which work is performed; provided, that, in the discretion of the Contracting Officer, no such insurance need be procured whenever the contract requires work on parts of a vessel only and such work is to be performed at a plant other than the site of the vessel. Further, the Contractor shall procure and maintain in force Workmen's Compensation Insurance (or its equivalent) covering his employees engaged on the work and shall insure the procurement and maintenance of such insurance by all subcontractors engaged on the work. The Contractor shall provide such evidence of such insurance as may be, from time to time, required by the Contracting Officer.

(e) No allowance shall be made the Contractor in the contract price for the inclusion of any premium expense or charge for any reserve made on account of self insurance for coverage against any risk assumed by the Government under this clause.

(f) As soon as practicable after the occurrence of any loss or damage the risk of which the Government has assumed, written notice of such loss or damage shall be given by the Contractor to the Contracting Officer, which notice shall contain full particulars of such loss or damage. If claim is made or suit is brought thereafter against the Contractor as a result or because of such event, the Contractor shall immediately deliver to the Government every demand, notice, summons or other process received by him or his representatives. The Contractor shall cooperate with the Government and, upon the Government's request, shall assist in effecting settlements, securing and giving evidence, obtaining the attendance of witnesses and in the conduct of suits; and the Government shall pay to the Contractor the expense, other than the cost of maintaining the Contractor's usual organization, incurred in so doing. The Contractor shall not, except at his own cost, voluntarily make any payment, assume any obligation or incur any expense other than shall be imperative for the protection of the vessel or vessels at the time of said occurrence of such event.

(End of clause)

§ 12–7.5201–11 Title.

TITLE

Unless title to materials and equipment acquired or produced for, or allocated to, the performance of this contract shall have vested previously in the Government by virtue of other provisions of this contract, title to all materials and equipment to be incorporated in any vessel or part thereof, or to be placed upon any vessel or part thereof in accordance with the requirements of the contract, shall vest in the Government upon delivery thereof at the plant or such other location as may be specified in the Contract for the performance of the work: *Provided, however*, That the provisions of this clause or other provisions of this contract shall not be construed as relieving the Contractor from the full responsibility for all such Contractor-furnished materials and equipment or the restoration of any damaged work or as a waiver of the right of the Government to require the fulfillment of all the terms of this contract, it being expressly understood and agreed that the Contractor shall assume without limitation the risk of loss for any such materials and equipment until such time as all work is completed and accepted by the Government and the vessel is redelivered to the Government. Upon completion of the contract, or with the approval of the Contracting Officer at any time during the performance of the contract, all such Contractor-furnished materials and equipment not incorporated in any vessel or part thereof, or not placed upon any vessel or part thereof, in accordance with the requirements of the contract, shall become the property of the Contractor, except those materials and equipment the cost of which has been reimbursed by the Government to the Contractor.

(End of clause)

§ 12–7.5201–12 Discharge of liens.

DISCHARGE OF LIENS

The Contractor shall immediately discharge or cause to be discharged any lien or right in rem of any kind, other than in favor of the Government, which at any time exists or arises in connection with work done or materials furnished under this contract with respect to the machinery, fittings, equipment or materials for any vessel. If any such lien or right in rem is not immediately discharged, the Government may discharge or cause to be discharged such lien or right at the expense of the Contractor.

(End of clause)

§ 12–7.5201–13 Federal, State, and local taxes.

Insert the clause set forth in FPR 1–11.401–1(c).

§ 12–7.5201–14 Default.

Insert the clause set forth in FPR 1–8.707.

§ 12–7.5201–15 Delays.

DELAYS

When during the performance of this contract, the Contractor is required to delay work on a vessel temporarily, due to orders or actions of the Government respecting stoppage of work to permit shifting the vessel, stoppage of hot work to permit bunkering, stoppage of work due to embarking or debarking passengers, and loading or discharging cargo, and the Contractor is not given sufficient advance notice or is otherwise unable to avoid the incurring of additional costs on account thereof, an equitable adjustment shall be made in the price of the contract pursuant to the "Changes" clause.

(End of clause)

§ 12–7.5201–16 Termination for convenience of the Government.

(a) Insert the clause set forth in FPR 1–8.705–2 in contracts not exceeding $10,000.

(b) Insert the clause set forth in FPR 1–8.703 in contracts exceeding $10,000.

§ 12–7.5201–17 Disputes.

Insert the clause set forth in FPR 1–7.102–12.

§ 12–7.5201–18 Patent indemnity.

In accordance with DOTPR 12–9.152–1 and DOTPR 12–9.152–3, insert the clause or clauses set forth in DOTPR 12–7.151–1 under the conditions prescribed therein.

§ 12–7.5201–19 Authorization and consent.

Insert the clause set forth in DOTPR 12–7.150–11 in accordance with DOTPR 12–9.151–1.

§ 12–7.5201–20 Notice and assistance regarding patent and copyright infringement.

Insert the clause set forth in FPR 1–7.103–4 under the condition described therein.

§ 12–7.5201–21 Buy American Act.

Insert the clause set forth in FPR 1–6.104–5 under the conditions prescribed therein.

§ 12–7.5201–22 Convict labor.

Insert the clause set forth in FPR 1–12.204 under the conditions prescribed in FPR 1–12.203.

§ 12–7.5201–23 Contract Work Hours and Safety Standards Act—overtime compensation.

Insert the clause set forth in FPR 1–12.303 under the conditions prescribed in FPR 1–12.302.

§ 12–7.5201–24 Walsh-Healey Public Contracts Act.

Insert the clause set forth in FPR 1–12.605 under the conditions prescribed in FPR 1–12.602.

§ 12–7.5201–25 Department of Labor Safety and Health Regulations for Ship Repairing.

DEPARTMENT OF LABOR SAFETY AND HEALTH REGULATIONS FOR SHIP REPAIRING

Attention of the Contractor is directed to Pub. L. 85–742, approved August 23, 1958 (72 Stat. 835, 33 U.S.C. 941), amending section 41 of the Longshoremen's and Harbor Worker's Compensation Act and to the Safety and Health Regulations for Ship Repairing promulgated thereunder by the Secretary of Labor (29 CFR Part 1501). These regulations apply to all ship repair and related work, as defined in the regulations, performed under this contract on the navigable waters of the United States including any drydock or marine railway. Nothing contained in this contract shall be construed as relieving the Contractor from any obligations which it may have for compliance with the aforesaid regulations.

(End of clause)

§ 12–7.5201–26 Equal opportunity.

Insert the clause set forth in FPR 1–12.803–2 under the conditions prescribed in FPR 1–12.803–1.

§ 12–7.5201–27 Officials not to benefit.

Insert the clause set forth in FPR 1–7.102–17.

§ 12–7.5201–28 Covenant against contingent fees.

Insert the clause set forth in FPR 1–1.503 under the conditions prescribed in FPR 1–1.501.

§ 12–7.5201–29 Additional bond security.

Insert the clause set forth in FPR 1–7.103–2.

§ 12–7.5201–30 Interpretation or modification.

Insert the clause set forth in DOTPR 12–7.150–4.

§ 12–7.5201–31 Notice of delays.

Insert the clause set forth in DOTPR 12–7.150–9.

§ 12–7.5201–32 Gratuities.

Insert the clause set forth in DOTPR 12–7.150–1.

§ 12–7.5201–33 Examination of records by Comptroller General.

Insert the clause set forth in FPR 1–7.103–3.

§ 12–7.5201–34 Utilization of small business concerns.

Insert the clause set forth in FPR 1–1.710–3(a) under the conditions prescribed therein.

§ 12–7.5201–35 Utilization of labor surplus area concerns.

Insert the clause set forth in FPR 1–1.805–3(a) under the conditions described therein.

§ 12–7.5201–36 Assignment of claims.

Insert the clause set forth in FPR 1–30.703 under the conditions contained therein.

§ 12–7.5201–37 Definitions.

Insert the clause set forth in FPR 1–7.102–1.

§ 12–7.5202 Clauses to be used when applicable.

The following clauses shall be included in the contract when their use is appropriate. Other clauses may be used if considered essential and not inconsistent with or in limitation of clauses in this subpart.

§ 12–7.5202–1 Price reduction for defective cost or pricing data.

Insert the appropriate clause set forth in FPR 1–3.814–1 under the conditions described therein.

§ 12–7.5202–2 Audit and records.

Insert the appropriate clause set forth in FPR 1–3.814–2 under the conditions described therein.

§ 12–7.5202–3 Subcontractor cost and pricing data.

Insert the appropriate clause set forth in FPR 1–3.814–3 under the conditions described therein.

§ 12–7.5202–4 Military security requirements.

Insert the clause set forth in DOTPR 12–7.151–9 under the conditions and in the manner prescribed in DOTPR 12–1.352.

§ 12–7.5202–5 Guaranty.

(a) The clause set forth below shall be used where general guaranty provisions are deemed desirable by the contracting officer (for modifications see paragraph (b) of this section).

GUARANTY

In case any work done or materials furnished by the Contractor under this contract on or for any vessel or the equipment thereof shall, within 60 days from date of delivery of the vessel by the Contractor, prove defective or deficient, such defects or deficiencies shall, as required by the Government, be corrected and repaired by the Contractor or at his expense to the satisfaction of the Contracting Officer: *Provided, however*, That with respect to any individual work item incomplete at the delivery of the vessel the guarantee period shall run from the date of completion of such item. The Government shall, if and when practicable, afford the Contractor an opportunity to effect such corrections and repairs himself, but when, because of conditions or the location of the vessel or for any other reason, it is impracticable or undesirable to return it to the Contractor, or the Contractor fails to proceed promptly with any such repairs as directed by the Contracting Officer, such corrections and repairs shall be effected at the Contractor's expense at such other locations as the Government may determine. Where corrections and repairs are to be effected by other than the Contractor, due to nonreturn of the vessel to him, the Contractor's liability may be discharged by an equitable deduction in the price of the job. The Contractor's liability under this clause shall however, in no event extend beyond the correction of such defects or deficiencies or payment for the cost thereof: *Provided, however*, That nothing in this clause shall be deemed to limit or relieve the Contractor of his responsibilities as set forth in the clause entitled "Liability and Insurance" and the clause entitled "Inspection" of this contract. At the option of the Contracting Officer, defects and deficiencies may be left in their then condition, and an equitable deduction from the contract price, as agreed by the Contractor and Contracting Officer, shall be made therefore. If the Contractor and Contracting Officer fail to agree upon the equitable deduction from the contract price to be made, the dispute shall be determined as provided in the "Disputes" clause of this contract.

(End of clause)

(b) When inspection and acceptance tests will afford full protection to the Government in ascertaining conformance to specification and the absence of defects and deficiencies, no guaranty provision for that purpose shall be included in the contract. In certain instances, the contracting officer may desire to include a provision in a contract for a guaranty period of more than 60 days. In such instances, where after full inquiry, it has been determined that such longer guaranty period will not involve increased costs, the longer guaranty period may be substituted for the 60 days specified in the guaranty clause. Where the full inquiry discloses that such longer guaranty period will involve, or is reasonably expected to involve, increased costs, such fact, and the reason for the need of such longer period shall be set forth in letter form to the Commandant (F), requesting approval for use of a guaranty period in excess of 60 days.

§ 12–7.5202–6 Priorities, allocations, and allotments.

Insert the clause set forth in DOTPR 12–7.150–3.

§ 12–7.5202–7 Index for specifications.

Insert the following clause, when appropriate.

INDEX FOR SPECIFICATIONS

If an index or table of contents is furnished in connection with specifications, it is understood that such index or table of contents is for convenience only. Its accuracy and completeness is not guaranteed, and it is not to be considered as part of the specifications. In case of discrepancy between the index or table of contents and the specifications, the specifications shall govern.

(End of clause)

PART 12–9—PATENTS, DATA, COPYRIGHTS, AND RECOVERY OF DEVELOPMENTAL COSTS

Subpart 12–9.1—Patents

Sec.

12–9.100 Scope of Subpart.
12–9.100–50 Description of terms.
12–9.100–50–1 Patents.
12–9.100–50–2 Data.
12–9.107–350 DOT policy on data, patent, rights, and recovery of developmental costs.
12–9.107–450 Patent Rights clauses.
12–9.107–451 Pre-award Patent Rights Demonstration Checklist.
12–9.150 Background patents (license).
12–9.151 Authorization and consent.
12–9.151–1 Authorization and consent in contracts for supplies or services.
12–9.151–2 Authorization and consent in contracts for research and development.
12–9.152 Patent indemnification of Government by contractor.
12–9.152–1 Patent indemnification in formally advertised contracts—commercial status predetermined.
12–9.152–2 Patent indemnification in negotiated contracts.
12–9.152–3 Waiver of indemnity by the Government.
12–9.153 Notice and assistance.
12–9.154 Classified contracts.
12–9.154–1 Classified contracts — contracting officer's duties.
12–9.155 Register of Government rights in inventions.
12–9.156 Reporting of royalties—anticipated or paid.
12–9.157 Refund of royalties.
12–9.158 Adjustment of royalties.

Subpart 12–9.2—Rights in Data

12–9.200 Scope of subpart.
12–9.201 Rights in data.
12–9.201–1 Selection of appropriate rights in data clause.
12–9.201–2 Alteration of clause.

Subpart 12–9.7—Recovery of Developmental Costs

12–9.700 Scope of subpart.
12–9.701 General.
12–9.702 Recovery of developmental costs.

AUTHORITY: Sec. 205(c), 63 Stat. 389; 40 U.S.C. 486(c), 10 U.S.C. 2301–2314.

Subpart 12–9.1—Patents

§ 12–9.100 Scope of Subpart.

This part sets forth policies, instructions, and contract clauses pertaining to patents, data, copyrights, and the recovery of developmental costs, in the conduct of experimental, developmental, or research work, or in connection with the procurement of supplies and services.

§ 12–9.100–50 Description of terms.

§ 12–9.100–50–1 Patents.

Patents are rights in inventions, protected by Federal law in the case of those issued in the United States. A patent is a Government grant that lasts for seventeen years. During that time it gives the inventor, or his assignee, the right to exclude anyone else from making, using, or selling the patented invention. The patent holder thus has a property right, which is, in effect, a monopoly. He may sell or assign the patent; he may grant licenses to practice the invention; and,

V 42 174 SEP 8 77 UMI

if his patent is infringed, he is protected by law. He may obtain an injunction restraining the infringement, against anyone but the Government or persons acting on behalf of the Government, and he may also receive damages from anyone (including the Government under 28 U.S.C. 1498(a)) for the economic injury already sustained.

§ 12–9.100–50–2 Data.

(a) The term "data" means recorded information, whether or not copyrighted, that may be acquired with a procurement. The term includes graphic or pictorial delineations in media such as drawings or photographs; text in specifications or related performance or design-type documents; machine forms such as punched cards, magnetic tape, computer memory printouts; and information retained in computer memory. Examples of recorded information include, but are not limited to, engineering drawings and associated lists, specifications, standards, process sheets, manuals, technical reports, catalog item identifications, and related information.

(b) The owner of "data" may have an economic interest in intellectual property rights such as a copyright or trade secret. If the data is copyrighted, it is protected by law. The owner may restrain copyright infringement by obtaining an injunction against anyone but the Government or persons acting on behalf of the Government, and he may also receive damages from anyone (including the Government under 28 U.S.C. 1498 (b)) for the economic injury already sustained. In the case of trade secrets, the owner's rights are governed by the contractual relationship between him and the person to whom he discloses it (28 U.S.C. 1498 does not apply to trade secrets).

§ 12–9.107–350 DOT policy on data, rights, and recovery of developmental costs.

It is DOT policy in negotiating contracts under which the Government pays a part or all of the costs of research or development, to acquire for the benefit of the United States, rights to data and patent rights, based on the criteria set forth in the Presidential Memorandum and the Statement of Government Patent Policy, and to recover the Government's contribution toward such research and development through royalties to the Government upon commercial exploitation of the products developed.

§ 12–9.107–450 Patent Rights clauses.

Use of Patent Rights clauses in contracts is governed by FPR 1–9.107 and § 12–9.107–451. Contracting Officers shall consult Patent Counsel for advice and interpretation of these sections.

§ 12–9.107–451 Pre-award Patent Rights Documentation Checklist.

In addition to the procedures of FPR 1–9.107–4, the "Pre-award Patent Rights Documentation Checklist" set forth below shall be used in determining the appropriate Patent Rights clause to be incorporated in a request for proposals in procurements involving experimental, developmental, or research work. The Checklist shall be made a part of the contract file.

(Authorized for local reproduction)

PRE-AWARD PATENT RIGHTS DOCUMENTATION CHECKLIST

Procurement Identification: _____
Purpose of Proposed Procurement: _____

1. Is a principal purpose of the proposed contract, either by itself or as one of a series of directly related contracts to create, develop or improve an end item intended for use in the civilian economy?[3] (See FPR 1–9.107–3(a)(1)). Yes____ No____
If "Yes", identify the end item and briefly describe its intended use in the civilian economy.

2. Is a principal purpose of the proposed contract, either by itself, or as one of a series of directly related contracts to create, develop or improve an end item which will be required for use by the general public by a Government regulation? Yes____ No____
If "Yes", identify the end item and cite applicable regulation. (See FPR 1–9.107–3(a)(1)).

3. Is a principal purpose of the contract exploration into a field directly concerned with public health, public safety, or public welfare (as distinguished from items predominantly of military concern)?[4] (See FPR 1–9.107–3(a)(2)). Yes____ No____
If "Yes", identify such principal purpose of the contract and briefly describe its relationship to the public health, or public safety, or public welfare.

4. Is the contract for procurement in a field of science or technology in which there has been little significant experience outside of work funded by the Government?[3] (See FPR 1–9.107–3(a)(3)). Yes____ No____
If "Yes", briefly describe such field.

5. Is the contract for procurement in a field of science or technology in which the Government has been the principal developer of the field?[5] (See FPR 1–9.107–3(a)(3)). Yes____ No____
If "Yes", briefly describe such field.

6. If the answer to either 4 or 5 is "Yes", would the contractor be likely to get a preferred or dominant commercial position in that field if he were permitted to acquire title to inventions made under the contract? (See FPR 1–9.107–3(a)(3)). Yes____ No____
Explain the answer.

7. Does the contract require that the contractor both (i) provide services for operation of a Government-owned research or production facility and (ii) perform experimental, developmental or research work at that facility? (See FPR 1–9.107–3(a)(4)(i)). Yes____No____

8. Does the contract require the contractor to coordinate and direct the work of others (as distinguished from the normal contractor relationship) which might result in a potential organizational conflict of interest? (See FPR 1–9.107–3(a)(4)(ii)). Yes____No____
If "Yes", explain briefly why such a potential conflict of interest is considered to exist.

_____
(Typed Name, Office and Signature of Person Completing This Form)

The Patents Rights Acquisition by the Government Clause, FPR 1–9.107–5(a), will ____ will not ____ be used in the solicitation. (Give reasons for determination.)

_____
(Typed Name and Signature of Contracting Officer or Representative)

[3] The contract or series of contracts need not necessarily require delivery of the end item. The end item may be a product, a process, or data.

[4] Examples in the public welfare category would include weather modification or control.

[5] The mere fact that the Government has been or is the principal funder or developer of a specific piece of hardware does not necessarily make the Government the principal funder or developer in a field of science or technology which encompasses the piece of hardware.

§ 12–9.150 Background patents (license).

(a) Insert the clause set forth in § 12–7.150–12 in all contracts requiring a "Patent Rights—Acquisition by the Government" or "Patent Rights—Deferred" clause (either long or short form).

(b) Insert the clause in supply contracts when the Department buys the product for test or evaluation purposes and where as a result of the Government's efforts, a commercial market for the product may be created or enhanced.

(c) The clause need not be used in supply contracts:

(1) Where the product to be tested (or evaluated) is substantially complete for the commercial purpose for which it is being tested (or evaluated), or

(2) Where the prospective contractor's monetary contribution to the program resulting in the development of the hardware is substantially greater than the Government's monetary contribution, or

(3) Where the commercial market for the product existed prior to, or will not be created primarily as a result of, the Government's test or evaluation.

(d) The Contracting Officer may alter the clause to suit a particular situation. However, any such alteration must accord with DOT policy requiring, whenever investment of public funds in a program which may create or enhance the market for a product required in the interest of public health, safety, or welfare, that the Government receive assurance that the product will be available at reasonable prices, and in sufficient quantity and quality to meet the public needs. To this end, the contractor must agree to license the manufacture and sale of any such product under any patents under which he has the right to grant such licenses, such license to be restricted to use on products to which the contract relates.

§ 12–9.151 Authorization and consent.

(a) Under 28 U.S.C. 1498, any suit for infringement of a United States patent based on the manufacture or use by or for the United States of an invention described in and covered by a patent of the United States by a contractor or by a subcontractor (including lower-tier subcontractors) can be maintained only against the Government in the Court of Claims and not against the contractor or subcontractor, in those cases where the Government has authorized or consented to the manufacture or use of the patented invention. Accordingly, to insure that work by a contractor or subcontractor under a Government contract may not be enjoined by reason of patent infringement, authorization and consent shall be given as herein provided. The liability of the Government for damages in any such suit against it may, however, ultimately be borne by the contractor or subcontractor in accordance with the terms of any patent indemnity clause also included in the contract, and an authorization and consent clause does not detract from any patent indemnification commitment by the contractor or subcontractor. Therefore, both a patent indemnity clause and an authorization and consent clause may be included in the same contract.

(b) Contracts shall not include any provision whereby the Government expressly agrees to indemnify the contractor against liability for patent infringement.

(c) An authorization and consent clause shall not be used in contracts where both complete performance and delivery are to be used outside the United States, its possessions, or Puerto Rico.

§ 12–9.151–1 Authorization and consent in contracts for supplies or services.

The contract clause set forth in § 12–7.150–11 may be included in all contracts for supplies or services (including construction or architect-engineering work), except:

(a) When prohibited by § 12–9.151(c); or

(b) In contracts for experimental, developmental, or research work in which the clause cited in § 12–9.151–2 is required.

§ 12–9.151–2 Authorization and consent in contracts for research and development.

Greater latitude in the use of patented inventions may by necessary in a contract for experimental, developmental, or research work than in a contract for supplies. Unless prohibited by § 12–9.151(c) the clause set forth in § 12–7.350–2 of this chapter shall be included in all contracts calling exclusively for experimental, developmental, or research work and may be included in contracts calling for both supplies and experimental, developmental or research work where the latter work is a primary purpose of the contract. In all other contracts for both supplies and experimental, developmental, or research work, the Authorization and Consent clause cited in § 12–9.151–1 shall be used. If the clause set forth in § 12–7.350–2 of this chapter is included in a contract, the clause cited in § 12–9.151–1 shall not be included.

§ 12–9.152 Patent indemnification of Government by contractor.

In order that the Government may be reimbursed for liability for patent infringement arising out of or resulting from the performance of construction contracts or contracts for supplies which normally are or have been sold or offered for sale to the public in the commercial open market or which are the same as such supplies with a relatively minor modification thereof, a clause providing for indemnification of the Government is to be included in such contracts in accordance with the instructions set forth below. A patent indemnity clause shall not be used in contracts:

(a) Where the Authorization and Consent clause cited in § 12–9.151–2 applicable to research and development contracts is authorized, except that in contracts calling also for supplies of the kind described above, a patent indemnity clause may be used with respect to such supplies;

(b) Where the contract is for supplies which clearly are not or have not been sold or offered for sale to the public in the commercial open market. However, even in the foregoing instance, a patent indemnity clause may be included where (1) in the case of contracts to be awarded by formal advertising it is desired to obtain an indemnity as to specific components or spare parts so sold or offered for sale, in which case the clause shall be modified pursuant to § 12–9.152–1(b); or (2) in the case of contracts to be awarded either by formal advertising or negotiation, a patent owner contends that the prospective procurement would infringe his patent and the low bidder or offeror is willing to indemnify the Government as to such patent either (i) without increase in price on the basis that the patent is invalid or not infringed, or (ii) for other good reasons.

(c) Where both performance and delivery are to be outside the United States, its possessions, or Puerto Rico, unless the contract indicates that the supplies are ultimately to be shipped into the United States, its possessions, or Puerto Rico, in which case the instructions of § 12–9.152–1 or § 12–9.152–3 are applicable; or

(d) Where the contract is for an amount of $10,000 or less, except that, as a matter of administrative convenience, the clause need not be deleted where it is a part of a standard form being used for contracts of $10,000 or less, since it is self-deleting as to such contracts.

§ 12–9.152–1 Patent-indemnification in formally advertised contracts—commerical status predetermined.

(a) Except as prohibited by § 12–9.152, the clause set forth in 12–7.151–1(a) of this chapter is appropriate in formally advertised construction contracts and shall be included in formally advertised contracts for supplies when it has been determined in advance of issuing the invitation for bids that the supplies (or such supplies apart from relatively minor modifications to be made thereto) normally are to have been sold or offered for sale for any supplier to the public in the commercial open market.

(b) Where a supply contract calls in part for specific components or spare parts which normally are or have been sold or offered for sale by any supplier to the public in the commercial open market, or such items with relatively minor modifications, the Patent Indemnity clause cited in paragraph (a) of this section shall be modified by adding to the end of the clause either of the following sentences:

The foregoing shall apply to the following: (Specifically identify the items to be excluded from the Patent Indemnity clause)

or

The foregoing shall not apply to the following: (Specifically identify the items to which the Patent Indemnity clause applies).

§ 12–9.152–2 Patent indemnification in negotiated contracts.

(a) A patent indemnity clause is not required to be included in negotiated contracts, but may be included (1) in negotiated construction contracts, (2) as authorized in § 12–9.152(b)(2), and (3) in negotiated contracts for supplies where such supplies normally are or have been sold or offered for sale to the public in the commercial open market, or are such supplies with relatively minor modifications made thereto. Ordinarily, the Contracting Officer, in consultation with the contractor, should be able to determine whether the supplies being purchased normally are on sale or have been sold or offered for sale to the public in the commercial open market.

(b) Subject to the foregoing and to the prohibitions in § 12–9.152 the clause cited in § 12–9.152–1(a) is approved for use in negotiated contracts for construction work or supplies.

(c) Where a supply contract calls in part for specific components or spare parts which normally are or have been sold or offered for sale to the public in the commercial open market, or such items with relatively minor modifications, the patent indemnity clause cited in § 12–9.152–1(a) shall be modified by adding to the end of the clause either of the following sentences:

The foregoing shall apply to the following: (Specifically identify the items to be excluded from the Patent Indemnity clause)

or

The foregoing shall not apply to the following: (Specifically identify the items to which the Patent Indemnity clause applies).

§ 12–9.152–3 Waiver of indemnity by the Government.

In the event that it is desired to exempt one or more specified United States patents from the patents indemnity clause cited in § 12–9.152–1, authority shall first be obtained from the head of the agency and the clause set forth in § 12–7.151–1(b) of this chapter shall be included in the contract, in addition to the patent indemnity clause.

V 42 174 SEP 8 77 S
UMI

§ 12–9.153 Notice and assistance.

The Government should be notified by the contractor of all claims of infringement in connection with the performance of a Government contract which come to the contractor's attention. The contractor should also assist the Government, to the extent of evidence and information in the possession of the contractor, in connection with any suit against the Government, or any claims against the Government made before suit has been instituted, on account of any alleged patent or copyright infringement arising out of or resulting from the performance of the contract. Accordingly, the clause set forth in FPR 1–7.103–4 shall be included in all contracts in excess of $10,000 for supplies, construction, or experimental, developmental, or research work; provided, that the clause shall not be included in contracts:

(a) Where both performance and delivery are to be outside the United States, its possessions, or Puerto Rico, unless the contract indicates that the supplies are ultimately to be shipped into the United States, its possessions, or Puerto Rico; or

(b) Of $10,000 or less, except that as a matter of administrative convenience, the clause need not be deleted when it is a part of a standard form being used for such contracts, since it is self-deleting.

§ 12–9.154 Classified contracts.

Unauthorized disclosure of classified subject matter, whether in patent applications or resulting from the issuance of a patent, may be a violation of 18 U.S.C. 791 *et seq.* (Espionage and Censorship) and related statutes and may be contrary to the interests of national security. Accordingly, the clause set forth in § 12–7.151–2 of this chapter shall be included in every classified contract and every contract which covers or is likely to cover classified subject matter.

§ 12–9.154–1 Classified contracts—contracting officer's duties.

(a) Upon receipt from the contractor of a patent application, not yet filed, which has been submitted by the contractor in compliance with paragraphs (a) or (b) of the clause cited in § 12–9.154, the contracting officer shall ascertain the proper security classification of the patent application. Upon a determination that the application contains classified material, the contracting officer shall inform the contractor of any instructions deemed necessary or advisable relating to transmittal of the application to the United States Patent Office in accordance with procedures in the Department of Defense Industrial Security Manual for Safeguarding Classified Information. If the material is classified "Secret" or higher, the contracting officer shall make every effort to notify the contractor of the determination within 30 days pursuant to paragraph (a) of the clause.

(b) In the case of all applications filed under the provisions of this paragraph, the contracting officer, upon receiving the application serial number, the filing date, and the information furnished by the contractor under paragraph (d) of the clause, shall promptly submit that information to personnel having cognizance of patent matters in order that necessary steps may be taken to ensure the security of the application.

(c) A request for the approval referred to in paragraph (c) of the clause cited in § 12–9.154 must be considered and acted upon promptly in order to avoid the loss of valuable patent rights of the Government or the contractor.

§ 12–9.155 Register of Government rights in inventions.

(a) Licenses, assignments, or other documents evidencing any rights of the Government in inventions shall be reviewed to assure that each such document fully confirms the rights to which the Government is entitled.

(b) The original and a copy of each such document shall be forwarded to the activity designated by administration regulations for receiving such documents. This latter activity shall forward the originals of all licenses, assignments, or other documents evidencing any rights of the Government in or under any patents or applications for patents to the Commissioner of Patents for recording in accordance with Executive Order No. 9424 of February 18, 1944.

§ 12–9.156 Reporting of royalties—anticipated or paid.

(a) (1) The term "royalties", as used in this section, refers to any costs or charges in the nature of royalties, license fees, patent or license amortization costs, or the like, for the use of or for rights in patents or patent applications.

(2) To determine whether royalties anticipated or actually paid under Government contracts are excessive, improper, or inconsistent with rights which the Government may possess in particular inventions, patents, or patent applications, the Department shall require royalty information and reports as prescribed below. See 12–9.158, for action to be taken to reduce or eliminate excessive or improper royalties.

(3) Royalty information should not be required in formally advertised contracts. When it is expected that work may be performed in the United States, its possessions, or Puerto Rico, any solicitation which may result in a negotiated contract for which royalty information is desired, or for which cost or pricing data are obtained, shall contain a special provision substantially as follows:

ROYALTY INFORMATION

When the response to this solicitation contains costs or charges for royalties totalling more than $1,000, the following information shall be furnished with the offer, proposal, or quotation on each separate item of royalty or license fee:

(i) Name and address of licensor;
(ii) Date of license agreement;
(iii) Patent numbers, patent application serial numbers of other basis on which the royalty is payable;
(iv) Brief description, including any part or model numbers of each contract item or component on which the royalty is payable;
(v) Percentage or dollar rate of royalty per unit;
(vi) Unit price of contract item;
(vii) Number of units; and
(viii) Total dollar amount of royalties.

DD Form 783, Royalty Report, is approved for use in furnishing the above information. In addition, if specifically requested by the Contracting Officer prior to execution of the contract, a copy of the current license agreement and identification of applicable claims of specific patents shall be furnished.

(End of provision)

(b) If the work is to be performed in the United States, its possessions or Puerto Rico, then upon receipt of an offer, proposal, or quotation which includes a charge for royalties, the contracting officer shall, prior to award of the contract, forward the information called for by paragraph (a) of this section to the office having cognizance of patent matters for the procuring activity concerned. The cognizant office shall promptly advise the contracting officer of appropriate action. The contracting officer shall then take action with respect to such royalties, with due regard to all pertinent factors relating to the proposed procurement.

(c) Where subcontract work is to be performed in the United States, its possessions, or Puerto Rico, the contracting officer, when considering approval of a subcontract, shall require the same information and take the same action with respect to such subcontracts in relation to royalties as required for prime contracts under paragraph (b) of this section. However, approval need not be withheld pending receipt of advice in regard to such royalties from the office having cognizance of patent matters.

(d) (1) In negotiated contracts to be performed outside the United States, its possessions and Puerto Rico, regardless of the place of delivery, the clause set forth in § 12–7.151–3 of this chapter shall be included.

(2) The contracting officer shall forward a copy of each positive royalty report received in accordance with the clause cited in (d) (1) of this section to the office having cognizance of patent matters for the procuring activity concerned.

§ 12–9.157 Refund of royalties.

When a fixed-price-type contract is negotiated under circumstances which make it questionable whether or not substantial amounts of royalties will have to be paid by the contractor or his subcontractors, such royalties may be included in the target or contract price, with provision made in the contract that the Government will be reimbursed the amount of such royalties if they are not paid. Such circumstances might include, for example, either a pending anti-trust action by the Government or pending or prospective litigation challenging the validity of a patent or patents or the enforceability of an agreement upon which the contractor or subcontractor bases the asserted obligation to pay the royalties to be included in the target or contract price. In the event the contracting officer determines that a refund of royalties clause should be included, the clause set forth in § 12–7.151–4 of this chapter shall be used in firm fixed-price contracts. It shall be appropriately modified for use in incentive contracts.

§ 12–9.158 Adjustment of royalties.

If at any time the contracting officer has reason to believe that any royalties paid, or to be paid, under an existing or prospective contract or subcontract are inconsistent with Government rights, excessive, or otherwise improper, he shall promptly report the facts to the office having cognizance of patent matters for the procuring activity concerned. The cognizant office shall review the royalties thus reported and such royalties as are reported under §§ 12–9.156 and 12–9.157. In coordination with the contracting officer, the cognizant office shall:

(a) Take prompt action to protect the Government against payment of royalties on supplies or services (1) with respect to which the Government has a royalty-free license, or (2) at a rate in excess of the rate at which the Government is licensed, or (3) when the royalties in whole or in part otherwise constitute an improper charge; and

(b) In appropriate cases obtain a refund pursuant to a "Refund of Royalties" clause or enter into negotiation for a reduction of royalties.

Subpart 12–9.2—Rights in Data

§ 12–9.200 Scope of subpart.

This subpart prescribes Rights in Data clauses and sets forth instructions for their use.

§ 12–9.201 Rights in data.

Insert the contract clause set forth in § 12–7.151–5 or § 12–7.151–6 of this chapter in accordance with § 12–9.201–1.

§ 12–9.201–1 Selection of appropriate rights in data clause.

(a) *Rights in data—unlimited.* The "Rights in Data—Unlimited" clause set forth in § 12–7.151–5 of this chapter shall be used where data (other than financial reports, cost analyses, and similar information incidental to contract administration) is specified to be delivered under the contract and such data is incidental to or a byproduct of the contract.

(b) *Rights in data—title.* (1) The "Rights in Data—Title" clause set forth in § 12–7.151–6 of this chapter shall be used in contracts where data (other than that incidental to contract administration) is specified to be delivered under the contract and the preparation of such data is the principal object or end item of the contract e.g., contracts for: (i) The production of motion pictures with or without accompanying sound; (ii) the preparation of motion picture scripts, musical compositions, sound tracks, translations, and the like; (iii) work pertaining to training or career guidance; (iv) survey of Government establishments; (v) works pertaining to the instructions or guidance of Government officers and employees in the discharge of their official duties; (vi) study contracts in which the principal end item is a final report; and (vii) contracts calling for the preparation of software.

(2) When the "Rights in Data—Title" clause is used in research contracts with academic institutions, the last sentence of paragraph (b) shall be deleted from the clause.

§ 12–9.201–2 Alteration of clause.

In particular situations, (e.g., where the contractor contends that certain data is "proprietary"), the contracting officer may alter either of the Data clauses, set forth in §§ 12–7.151–5 and 12–7.151–6 of this chapter. In all cases, however, the contracting officer shall obtain the advice of cognizant patent counsel before approving any such alteration.

Subpart 12–9.7—Recovery of Developmental Costs

§ 12–9.700 Scope of subpart.

This subpart prescribes a Recovery of Developmental Costs clause and sets forth instructions for its use.

§ 12–9.701 General.

(a) It is DOT policy to recover the Department's contributions toward research and development through royalties to the Government upon commercial exploitation of the products development thereby. To carry out this policy, the contract clause cited in § 12–9.702 shall be inserted in the contract in accordance with the instructions for its use. However, royalties are not paid unless the commercial product developed under the contract is profitably sold. Also, royalties cannot be so high as to price the product out of the market, and the royalties cease when the Government gets its money back.

(b) This development cost recovery program is based, first, on the established Government policy, that, where a direct beneficiary of a Government action can be identified, that beneficiary, and not the general taxpayer, should pay the cost of providing the benefit conferred. When a product developed with Government funds is sold, there are two identifiable beneficiaries—the user and the company that makes the sale. The royalty program gets the cost back to the general taxpayer from these beneficiaries.

(c) A second justification for the program is the need to protect the developing company's competitors. When the Government provides support to the development of a commercial product, the company that gets the development contract is given an advantage over its competitors who might have to develop a competing product with their own funds. These competitors have to spread their development costs over the sales of their product. With the Government paying his development costs, the original development contractor generally has very little development costs to recover. This could put the company helped by the Government in a position to make an unconscionable high profit, to undersell his competitors, or prevent them from entering the market. None of these results seems a fair or reasonable by-product of a Government-financed development effort.

§ 12–9.702 Recovery of developmental costs.

Instructions for use of clause. The clause set forth in § 12–7.151–7 of this chapter shall be included in all contracts exceeding $50,000 for design, research, development, test, or experimental work where a product (e.g., equipment or other items of hardware) is to be furnished as an end item. It may be included in other types of contracts and in contracts of $50,000 or less if appropriate. The contracting officer may alter the clause to suit a particular situation (e.g., when the contract includes quantity production or when the hardware being developed will be placed into operative use, the amount recoverable under the clause may be reduced by the fair market value of such hardware). However, any such alterations must be in accordance with the policy set forth in DOTPR 12–9.100–51.

PART 12–10—BONDS AND INSURANCE

Subpart 12–10.1—Bonds

Sec.
12–10.109 Execution and administration of bonds.

Subpart 12–10.2—Sureties on Bonds

12–10.205 Consent of surety.

Subpart 12–10.3—Insurance—General

12–10.305 Procedures to be followed in the event of loss or damage to Government property.

Subpart 12–10.4—Insurance Under Fixed-Price Contracts

12–10.400 Scope of subpart.
12–10.450 Contracts for lease of aircraft.
12–10.450–1 Loss or damage of leased aircraft clause.
12–10.450–2 Fair market value of aircraft clause.
12–10.450–3 Risks and indemnities.

AUTHORITY: Sec. 205(c), 63 Stat. 389; 40 U.S.C. 486(c), 10 U.S.C. 2301–2314.

Subpart 12–10.1—Bonds

§ 12–10.109 Execution and administration of bonds.

(a) *Execution.* When required by Instruction Number 2 of the standard bond forms, the evidence of authority of a principal's representative shall be a duly executed power of attorney reciting that the individual executing the bond or consent of surety is authorized to do so. A corporation, in lieu of such power of attorney may submit a "Certificate as to Corporate Principal" in the format prescribed in paragraph (c) of this section.

(b) *Administration.* When a contractor is performing his contract in such a manner as to lead to default, timely notification to the surety may result in action by the surety that will avoid a default. Therefore, on all such contracts, the surety shall be promptly notified of any failure by the contractor to perform (see FPR 1–8.602–4(a)).

(c) *Certificate as to corporate principal.* When a certificate as to Corporate Principal is to be furnished, the following format shall be used:

V 42 I 174 SEP 8 77 UMI

CERTIFICATE AS TO CORPORATE PRINCIPAL

I, _____
(Name printed)
certify that I am the _____
(Office held)
of the corporation named as principal in the (performance) (and) (payment) bond(s); that _____ who signed the said bond(s) on behalf of the said corporation principal was then _____
(Capacity in which bond was executed)
of said corporation; that I know his signature and that his signature thereto is genuine; and that said bond(s) was (were) duly signed, sealed, and attested for and in behalf of said corporation by authority of its governing body.

_____ (Affix Corporate Seal)

(d) *Name of principal.* When a partnership is a principal on a bond, the names of all the members of the firm shall be listed in the bond following the name of the firm and the phrase "a partnership composed of." If a principal is a corporation, the state of incorporation must appear.

CONSENT OF SURETY AND INCREASE OF PENALTY

Modification No. _____, dated _____, Contract No. _____

The surety (co-surety) hereby consents (consent) to the foregoing contract modification and agrees (agree) that its (their) bond or bonds shall apply and extend to the contract as thereby modified or amended. The principal and the surety (co-sureties) further agree that on and after the execution of this consent, the penalty of the aforementioned performance bond or bonds is hereby increased by _____ dollars ($_____) and the penalty of the aforementioned payment bond or bonds is hereby increased by _____ dollars ($_____), *Provided*, however, that the increase of the liability of each co-surety resulting from this consent shall not exceed the sums set forth below:

Name of surety	Increase in liability limit under performance bond	Increase in liability limit under payment bond

_____ (Signature of individual principal)[1] (SEAL) (Date of execution)
(Type name of individual principal)
(Business address)
(Corporate principal)[1] (Date of execution)
(Business address)
By _____ (Affix corporate seal)
(Signature of person executing)
(Type name and title of person executing)
(Corporate surety)
(Business address)
By _____ (Affix corporate seal)
(Signature of person executing)
(Type name and title of person executing)
(Add similar signature blocks for cosureties).

[1] This consent of surety and increase of penalty shall be executed by the principal or his authorized representative concurrent with the execution of the attached modification to which it pertains. If the individual who signs the consent is signing in a representative capacity (e.g., attorney in fact), but is not a member of the firm, partnership, or joint venture, or an officer of the corporation involved a power of attorney or certificate as to corporate principal, as appropriate, shall be submitted with the consent.

(e) *Date of bond.* A performance or payment bond other than an annual bond shall not antedate the contract to which it pertains.

(f) *Continuation sheet.* The Standard Form 25–B (Continuation Sheet) is prescribed for use when there are more than seven sureties on a bid, performance, or payment bond. It shall also be used when there are co-sureties on an annual bid or performance bond.

(g) *Recording and filing.* Bonds shall be filed with the related original contract or the contract file shall be cross-referenced to the file containing the applicable bonds.

Subpart 12–10.2—Sureties on Bonds

§ 12–10.205 Consent of surety.

The following form of Consent of Surety and Increase of Penalty is authorized for contract modifications to all types of contracts that provide for an increase in the penal sums of bonds previously given by the original surety or sureties.

Subpart 12–10.3—Insurance—General

§ 12–10.305 Procedures to be followed in the event of loss or damage to Government property.

Upon the happening of loss of or damage to any Government property, concerning which the contractor is relieved of responsibility by contract provision, the procedure shall be as prescribed in the applicable "Government Property" clause of the contract.

Subpart 12–10.4—Insurance Under Fixed-Price Contracts

§ 12–10.400 Scope of subpart.

This subpart is applicable only to the Federal Aviation Administration.

§ 12–10.450 Contracts for lease of aircraft.

The clauses in § 12–7.151–16 of this chapter shall, unless otherwise indicated by the specific instructions for their use, be inserted in any contract for the lease of aircraft (including aircraft used in out-service flight training).

§ 12–10.450–1 Loss or damage to leased aircraft clause.

Use of clause. Insert the clause in § 12–7.151–16(a) of this chapter except that the clause need not be inserted in the contract:

(a) When the hourly rental rate does not exceed $250 and the total rental cost for any single transaction is not in excess of $2,500 or

(b) Where the cost of hull insurance does not exceed 10% of the contract rate, or

(c) When the lessor's insurer does not grant a credit for uninsured hours, thereby preventing the lessor from granting the same to the Government.

§ 12–10.450–2 Fair market value of aircraft clause.

When the fair market value of the aircraft can be determined, insert the clause in § 12–7.151–16(b) of this chapter.

§ 12–10.450–3 Risks and indemnities.

(a) *Background.* Section 504 of the Federal Aviation Act of 1958 provides "* * * no lessor of any such aircraft * * * under a bona fide lease of thirty days or more, shall be liable * * * by reason of his interest as lessor or owner of the aircraft * * * for any injury to or death of persons, or damage to or loss of property * * * *unless such aircraft * * * is in the actual possession or control of such person* at the time of such injury, death, damage or loss." (Underscoring supplied.) On short-term or intermittent-use leases, however, the owner may be liable for damage caused by operation of the aircraft. It is usual for the aircraft owner to retain insurance covering this liability during the term of such lease. Such insurance can, often for little or no increase in premium, be made to cover the Government's exposure to liability as well. In order to take advantage of this coverage, the Risks and Indemnities clause prescribed in paragraph (b) of this section is used.

(b) *Risks and indemnities clause.* Insert the clause in 12–7.151–16(c) of this chapter in any contract for out-service flight training, or the lease of aircraft where the Government will have exclusive use of the aircraft for a period of less than thirty days.

(c) *Contract schedule provision.* Any contract for out-service flight training shall include a provision in the Schedule stating substantially that the contractor's personnel shall, at all times during the course of the training, be in command of the aircraft, and that at no time shall other personnel be permitted to take command of the aircraft.

PART 12–16—PROCUREMENT FORMS

Sec.
12–16.000 Scope of part.

Subpart 12–16.4—Forms for Advertised Construction Contracts

12–16.401 Forms prescribed.
12–16.450 Other forms.

Subpart 12–16.8—Miscellaneous Forms

12–16.800 Scope of subpart.
12–16.804–3 Standard Form 37, Report on Procurement by Civilian Executive Agencies.
12–16.850 Small purchase summary.
12–16.851 Procurement request forms.
12–16.852 Determination of prospective contractor responsibility.
12–16.853 Contractor's request for progress payment.
12–16.854 Preconstruction conference agenda and checklist.
12–16.855 Contractor's release.
12–16.856 Labor forms.
12–16.856–1 Labor standards interviews.
12–16.856–2 Employee claim for wage restitution.
12–16.856–3 Summary of labor standards investigation report.
12–16.856–4 Summary of underpayments.
12–16.856–5 Establishment of additional wage rates.

AUTHORITY: Sec. 205(c), 63 Stat. 389; 40 U.S.C. 486(c), 10 U.S.C. 2301–2314.

§ 12–16.000 Scope of part.

This part prescribes and illustrates forms for use by all procurement offices in the Department in connection with the procurement of supplies and services, including construction.

Subpart 12–16.4—Forms for Advertised Construction Contracts

§ 12–16.401 Forms prescribed.

In addition to the standard forms prescribed for use in FPR 1–16.401, Standard Form 30 shall be used to amend a construction solicitation or modify a construction contract.

§ 12–16.450 Other forms.

DOT forms prescribed for use in connection with construction contracts are prescribed or referenced in DOTPR subpart 12–16.8.

Subpart 12–16.8—Miscellaneous Forms

§ 12–16.800 Scope of subpart.

This subpart prescribes miscellaneous forms for use in procurement. The forms are illustrated in DOTPR subpart 12–16.9.

§ 12–16.804–3 Standard Form 37, Report on Procurement by Civilian Executive Agencies.

The semiannual SF–37 required by FPR 1–16.804–3(f) shall be submitted to the Office of Installations and Logistics, TAD–60, by May 1 and November 1, for consolidation and submission to the General Services Administration.

§ 12–16.850 Small purchase summary.

DOT Form F 4230.1 titled "Small Purchase Summary" is an optional form which may be used to satisfy the small purchase documentation requirements set forth in FPR 1–3.603–2.

§ 12–16.851 Procurement request forms.

(a) *General.* The procurement request forms listed in paragraph (c) below shall be used to request the procurement of supplies, services, or construction, and may be used, if appropriate, to request items obtained through FEDSTRIP, MILSTRIP, or similar single- or multi-line requisitioning methods.

(b) *Description of forms.* The forms are issued in units of "PAD". Each pad contains 100 sheets of "no carbon required" type paper.

(c) *Forms.* The procurement request forms are DOT Form F 4200.1.1 for use by the Coast Guard, DOT Form F 4200.1 for use by all other Administrations, and DOT Form F 4200.2 (Continuation Sheet) for use by the Federal Aviation Administration.

§ 12–16.852 Determination of prospective contractor responsibility.

DOT Form F 4220.1 titled "Determination of Prospective Contractor Responsibility" shall be used as prescribed in DOTPR 12–1.1204–1.

§ 12–16.853 Contractor's request for progress payment.

DOT Form F 4220.2 titled "Contractor's Request for Progress Payment" shall be used as prescribed in DOTPR 12–30.519.

§ 12–16.854 Preconstruction conference agenda and checklist.

DOT Form F 4220.3 titled "Preconstruction Conference Agenda and Checklist" shall be used as prescribed in DOTPR 12–18.151.

§ 12–16.855 Contractor's release.

DOT Form F 4220.4 titled "Contractor's Release" shall be used to obtain a release from the contractor for:

(a) All cost type contracts.

(b) Construction contracts, where a release is required by the contracting officer (see paragraph (e) of Clause 7 of Standard Form 23–A).

(c) Any other type of contract when the contracting officer determines its use appropriate.

§ 12–16.856 Labor forms.

§ 12–16.856–1 Labor standards interviews.

DOT Form F 4220.5 shall be used to record the results of interviews with contractor employees working at the construction site. (Sec. 5.6(a)(3) of the Labor Department regulations (29 C.F.R.) requires Federal agencies to make such investigations as are deemed necessary to insure compliance with the labor standards provisions contained in the contract. These investigations include interviews with employees to ascertain whether laborers and mechanics are being or have been properly classified and paid.)

§ 12–16.856–2 Employee claim for wage restitution.

DOT Form F 4220.7 shall be used by contractor employees to file claim for unpaid wages when contract funds have been transferred to the General Accounting Office to cover such underpayment. (Even though contract funds have been transferred to GAO to cover the underpayment, GAO requires that a claim be submitted before it will make payment directly to the employee. See Comptroller General Decision B–3368 of 3/19/57.)

§ 12–16.856–3 Summary of labor standards investigation report.

DOT Form F 4220.6 shall be used as the first page of reports on special labor standards investigations to summarize the findings of the investigation.

§ 12–16.856–4 Summary of underpayments.

DOT Form F 4220.8 shall be used to summarize the findings of wage underpayment and liquidated damages and shall be included in the investigation report when a special labor standards investigation is made.

§ 12–16.856–5 Establishment of additional wage rates.

(a) Except as provided in paragraph (b) of this section, DOT Form F 4220.10 shall be used by the contractor to obtain the contracting officer's approval or disapproval of the contractor's proposed classification and wage rate for any category of laborers or mechanics not listed in the contract wage determination but needed in performance of the contract work. Procedures shall be established to assure contracting officer approval of additional classifications and rates prior to their use by the contractor.

(b) FHWA Form PR–1140 may be used by the Federal Highway Administration for direct Federal contracts and Federal-aid contracts in lieu of DOT Form F 4220.10.

PART 12–17—EXTRAORDINARY CONTRACTURAL ACTIONS TO FACILITATE THE NATIONAL DEFENSE

Subpart 12–17.1—General

Sec.
12–17.101 Authority.

Subpart 12–17.2—Requests for Contractual Adjustment

12–17.205 Processing cases.

AUTHORITY: Sec. 205(c), 63 Stat. 389; 40 U.S.C. 486(c), 10 U.S.C. 2301–2314.

V 42 I 174 SEP 8 77 UMI

Subpart 12–17.1—General

§ 12–17.101 Authority.

The Department of Transportation Contract Appeals Board has been authorized by the Secretary to exercise the authority granted by the Act of August 28, 1958 (Pub. L. 85–804).

Subpart 12–17.2—Requests for Contractural Adjustment

§ 12–17.208 Processing cases.

A contractor's request for adjustment shall be coordinated with legal counsel and processed within each Administration in accordance with its procedures.

PART 12–18—PROCUREMENT OF CONSTRUCTION

Subpart 12–18.1—General Provisions

Sec.

12–18.108 Government estimate
12–18.109 Disclosure of size of construction projects.
12–18.110 Liquidated damages.
12–18.112 Construction contracts with design-engineers (A–E).
12–18.151 Preconstruction conference.

Subpart 12–18.2—Formal Advertising

12–18.201–50 Types of contracts.
12–18.202 Preinvitation notices.
12–18.203–51 Fee for plans and specifications.
12–18.203–52 Inquiries from bidders.

Subpart 12–18.3—Negotiations

12–18.301 Limitation on authority to negotiate contracts.
12–18.301–50 Coast Guard negotiation citations.

AUTHORITY: Sec. 205(c), 63 Stat. 389; 40 U.S.C. 486(c), 10 U.S.C. 2301–2314.

Subpart 12–18.1—General Provisions

§ 12–18.108 Government estimate.

After all bids have been read and recorded, the Government estimate shall, when required to be prepared in accordance with FPR 1–18.108, be read and recorded in the same detail as the invitation for bids. If the procurement is by negotiation, cost breakdown figures in the Government estimate may be disclosed during negotiations but only to the extent deemed necessary for arriving at a fair and reasonable price: *Provided*, That the overall amount of the Government estimate is not disclosed.

§ 12–18.109 Disclosure of size of construction projects.

For purposes of disclosing the size of construction projects, the estimated cost thereof shall be stated in ranges, such as the following:

"under $25,000"
"between $25,000 and $100,000"
"between $100,000 and 250,000"
"between $250,000 and $500,000"
"between $500,000 and $1,000,000"
"between $1,000,000 and $2,500,000"
"between $2,500,000 and $5,000,000"
"between $5,000,000 and $10,000,000"
"over $10,000,000."

§ 12–18.110 Liquidated damages.

Liquidated damages provisions are generally appropriate in construction contracts in accordance with the provisions of FPR 1–1.315–2(a). However, inclusion of liquidated damages provisions may be inappropriate in situations such as a construction contract consisting of repairs, alteration or improvements, where any delay in the completion would still permit the user to continue its normal function in an uninterrupted manner without resulting in added expense to the Government.

§ 12–18.112 Construction contracts with design-engineers (A–E).

No contract for construction of a project shall be awarded to a firm or person that designed the project except with approval of the Secretary. The A–E shall be informed of this restriction prior to the commencement of negotiations for his services.

§ 12–18.151 Preconstruction conference.

(a) When the contracting officer considers such action warranted, he shall arrange a preconstruction conference with the contractor and such subcontractors as the contractor may designate to assure that there is a clear understanding of the contract requirements (including labor standards provisions) and of the rights and obligations of the parties.

(b) DOT Form F 4220.3 titled "Preconstruction Conference Agenda and Checklist", or a similar checklist, shall be used as the agenda of or checklist for the preconstruction conference.

Subpart 12–18.2—Formal Advertising

§ 12–18.201–50 Types of contracts.

When unit prices are used, the Variation in Estimated Quantities clause set forth in DOTPR 12–7.651–7 shall be included in the contract.

§ 12–18.202 Preinvitation notices.

Standard Form 20 may be used as preinvitation notice providing it is clearly identified as such.

§ 12–18.203–51 Fee for plans and specifications.

When a flat, nonrefundable fee is to be charged in accordance with DOTPR 12–2.203–1(b), a statement reading substantially as follows shall be included in the solicitation:

Nonrefundable fee for plans and specifications. A fee of $_____ is required for the plans and specifications referenced in this solicitation. Send check or money order to _____. The fee is not refundable. Plans and specifications need not be returned.

§ 12–18.203–52 Inquiries from bidders.

A statement similar to the following shall be included in each solicitation:

For information call (insert name, telephone number). Submit written requests in accordance with paragraph 1 of Standard Form 22.

Subpart 12–18.3—Negotiations

§ 12–18.301 Limitation of authority to negotiate contracts.

§ 12–18.301–50 Coast Guard negotiations.

For limitation of Coast Guard authority to negotiate construction contracts see DOTPR 12–3.252

PART 12–26—CONTRACT MANAGEMENT

Subpart 12–26.4—Novation Agreements and Change of Name Agreements

Sec

12–26.450 Processing novation agreements and change of name agreements.

AUTHORITY: Sec. 205(c), 63 Stat. 389; 40 U.S.C. 486(c), 10 U.S.C. 2301–2314.

Subpart 12–26.4—Novation Agreements and Change of Name Agreements

§ 12–26.450 Processing novation agreements and change of name agreements.

(a) When only one Administration or the Office of the Secretary of Transportation has outstanding contracts with the contractor or contractors seeking a novation or change of name agreement, the documents pertaining thereto shall be forwarded to the appropriate addressee in (b) below. This addressee may authorize the procuring activity of its Administration (or OST) having the largest unsettled (unbilled plus billed but unpaid) dollar balance with the contractor or contractors to process and execute the agreement.

(b) When more than one Administration (including OST) has outstanding contracts with the contractor or contractors seeking a novation or change of name agreement, a single agreement covering all such contracts shall be executed by the Administration having the largest unsettled (Unbilled plus billed but unpaid) dollar balance with the contractor or contractors. Such agreements shall be executed by a duly authorized official of the appropriate office listed herein.

Federal Aviation Administration, Director, Logistics Service, 800 Independence Avenue SW., Washington, D.C. 20591.
Federal Highway Administration, Office of Associate Administrator for Administration, 400 7th Street SW., Washington, D.C. 20590.
U.S. Coast Guard, Commandant (G–F), 400 7th Street SW., Washington, D.C. 20590.
Federal Railroad Administration, Office of Associate Administrator for Administration, 400 7th Street SW., Washington, D.C. 20590.
St. Lawrence Seaway Development Corporation, Administrative Services Officer, 800 Independence Avenue SW., Washington, D.C. 20591.
Office of the Secretary of Transportation, Director of Administrative Operations, 400 7th Street SW., Washington, D.C. 20590.
Transportation Systems Center, Office of Administration, Kendall Square, Cambridge, Mass. 02142.
Urban Mass Transportation Administration, Director, Office of Procurement and Third Party Review, 400 7th Street SW., Washington, D.C. 20590.
National Highway Traffic Safety Administration, Office of Associate Administrator for Administration, 400 7th Street SW., Washington, D.C. 20590.

(c) The Administration processing a proposed novation agreement shall promptly provide notice of the proposed agreement, including the list of contracts as required by FPR 1–26.402(c)(2) to the other Administrations (and OST, if applicable) having contracts with the contractor or contractors concerned. Such notice shall be transmitted to the appropriate addressee listed in (b) above. Within 30 days after receipt of such notice, the Administration(s) may submit comments to the processing Administration, which comments shall be considered prior to execution of the proposed agreement. The absence of comment from an Administration within 30 days after its receipt of notice of a proposed novation agreement shall be construed as approval by that Administration. When only a single Administration is concerned, the procuring activity processing a proposed novation agreement shall give similar notice of it to all other interested procuring activities in that Administration.

(d) Where substantial alterations or additions to the formats set forth in FPR 1–26.402 and FPR 1–26.403 are considered appropriate by the Administration processing the proposed agreement, that Administration shall coordinate the agreement with the other Administrations prior to execution. Any objection shall be resolved before the agreement is executed.

(e) A signed copy of the executed novation agreement or change of name agreement shall be forwarded to the contractor, a signed copy shall be retained in the Administration executing the agreement, and where more than one Administration is involved, two copies of the agreement shall be distributed to the appropriate addressee listed in DOTPR 12–26.450(b).

(f) After execution and distribution of an agreement, an administative change (Standard Form 30) shall be prepared by the processing activity incorporating a summary of the agreement and attaching thereto a complete list of the contracts affected. For single Administration agreements, three copies of the Standard Form 30 shall be furnished for each contract to the procuring activities concerned, and for multi-Administration agreements, to the appropriate addressee listed in DOTPR 12–26.450(b).

PART 12–30—CONTRACT FINANCING

Subpart 12–30.5—Progress Payments Based on Costs

Sec.

12–30.519 Contractor's request.

AUTHORITY: Sec. 205(c), 63 Stat. 389; 40 U.S.C. 486(c), 10 U.S.C. 2301–2314.

Subpart 12–30.5—Progress Payments Based on Costs

§ 12–30.519 Contractor's request.

All invoices for progress payments described in FPR 1–30.519 shall be supported by DOT Form F 4220.2 titled "Contractor's Request for Progress Payment" (or, at the contractor's option, he may submit DOD Form 1195), with any other information that may be reasonably required.

Subpart 12–50.4—Procurement of Mortuary Services

12–50.400 Scope of subpart.
12–50.401 Procurement by contract.
12–50.402 Area of performance.
12–50.403 Solicitation provision.
12–50.404 Schedule format.
12–50.405 Contract clauses.
12–50.406 Procurement by purchase order.

AUTHORITY: Sec. 205(c), 63 Stat. 389; 40 U.S.C. 486(c), 10 U.S.C. 2301–2314.

§ 12–50.000 Scope of part.

This Part deals generally with the obtaining of services by contract, and specifically with certain types of contracts which can properly be classified as service contracts. It does not cover the services of individuals obtained by direct appointment or through normal Civil Service employment procedures, nor does it cover the obtaining of services by grant.

Subpart 12–50.1—Technical Support Services

§ 12–50.100 Scope of subpart.

Guidance and instructions for the procurement of non-personal technical support services are set forth in DOT Order 4200.13 included in DOTPR 12–99.

Subpart 12–50.2—[Reserved]

Subpart 12–50.3—Procurement of Expert or Consultant Services

§ 12–50.300 Scope of subpart.

This subpart sets forth policy and procedures for the procurement by contract, pursuant to 5 U.S.C. 3109, of expert or consultant services from individuals and from firms. This subpart does not govern employment of individual experts or consultants by excepted appointment; the requirements for such employment are set forth in personnel regulations of the Civil Service Commission and of the Department.

§ 12–50.301 Negotiation authority.

Contracts with individuals or firms for expert and consultant services are usually negotiated, normally under the authority of 41 U.S.C. 252(c)(4), or 10 U.S.C. 2304(a)(4), as applicable.

§ 12–50.302 Definition of experts and consultants.

(a) The term "experts" means those persons who are exceptionally qualified in a particular field, by education or by experience, to perform some specialized service. The term "consultants" means those persons whose advice and counsel are sought on matters of Departmental interest. These terms also include firms meeting the foregoing definitions.

(b) Stenographic reporting services are included in the term "expert or consultant services" for purposes of procurement by contract under this subpart.

§ 12–50.303 Policy.

(a) The proper use of experts and consultants is a legitimate and economical way to improve Government services and operations. Activities of the Department can be strengthened by utilizing the highly specialized knowledge and skills of such individuals. Accordingly, the services of experts and consultants may be used at any organizational level to help managers achieve maximum effectiveness and economy in their operations.

(b) The following are examples of services which may be procured from experts or consultants by contract:

(1) Specialized opinion unavailable in the Department;

(2) Outside points of view, to avoid too limited judgment, on critical administrative or technical issues;

(3) Advice on developments in industrial and other research;

(4) For especially important projects, opinions of noted experts which are highly important to the success of an undertaking;

(5) The advisory participation of citizens to develop or implement Government programs that by their nature or by statute call for citizen participation;

(6) The services of specialists (experts) who are not needed full-time, who cannot serve regularly or full-time, or whose full-time employment is uneconomical to the Government.

§ 12–50.304 Limitations on use of expert or consultant authority.

(a) Authority to employ experts or consultants, whether by contract or by appointment, is limited to Secretarial officers and heads of Operating Administrations. They shall not be used to perform duties which can be performed by regular employees, to fill positions which call for full-time continuing employees,

V 42 174 SEP 8 77 UMI

or to circumvent competitive civil service procedures and Classification Act pay limits. The prior approval of the Deputy Secretary is required for any expert or consultant contract or series of contracts with the same individual or firm that will reimburse him for a total of more than 10 days' work in any consecutive 12-month period.

(b) The nature of the duties to be performed must be temporary (not more than one year) or intermittent (not cumulatively more than 130 working days in any consecutive 12-month period), and no contract shall be entered into for longer than one year at a time.

(c) Expert or consultant services shall not be used when existing facilities of the Department are adequate or when personnel with the necessary skills can be obtained through normal civil service appointment procedures. Procurement of expert or consultant services shall not be used as a means of circumventing manpower space ceilings or the limit on the daily rate that experts or consultants may be paid under section 9(b) of the DOT Act.

§ 12–50.305 Justification to enter into contracts.

(a) All contracts to be entered into pursuant to 5 U.S.C. 3109 or other statutory authority for expert or consultant services must be justified in writing and the justification signed by the appropriate Secretarial officer or head of Operating Administration. Ordinarily each contract shall be separately authorized. However, when the justification can appropriately be made with respect to a class of contracts, the authorizing official may execute a blanket authority for that class of contracts.

(b) Each justification shall authorize a contract or class of contracts to be entered into during a stated period not to exceed one year. A justification may be issued during one fiscal year to authorize a contract or class of contracts to be entered into during the following fiscal year, provided the determinations are reasonably expected to hold true at the time the contract or contracts are to be entered into.

(c) Each justification shall contain the following:

(1) A brief description of the services authorized to be procured, the estimated time of performance and the estimated cost;

(2) Determination with respect to the particular contract or class of contracts that:

(i) The duties to be performed are of a temporary or intermittent nature;

(ii) The existing facilities of this Department are inadequate to furnish the services; and

(iii) It is not feasible to obtain personnel with the necessary skills from other Federal agencies or through normal civil service appointment procedures.

§ 12–50.306 Contracts with individual experts or consultants.

§ 12–50.306–1 Method and amount of payment.

The contract may provide for compensation at rate for time actually worked (e.g., amount per day, per week, per month, etc.), or it may provide for performance of a specific task at a fixed price, or it may provide for nominal compensation. The amount of rate of payment will be determined on a case-by-case basis, taking into account (among any other relevant factors) the relative importance of the duties to be performed, the stature of the individual in his specialized field, comparable pay for positions under the Classification Act or other Federal pay systems, rates paid by private employers, and rates previously paid other experts or consultants for similar work. Compensation at a per diem rate will be no more than that permitted by statutory authority and normally no less than $55. In addition, the contract may provide for such expenses as would be authorized for a Government employee, including actual transportation and per diem in lieu of subsistence while the expert or consultant is traveling between his home or place of business and his official duty station. However, no more than one round-trip to the official duty station shall be provided unless the services are rendered on an intermittent basis.

§ 12–50.306–2 Benefits.

No benefits shall be accorded the contractor which are not specifically provided for in the written contract.

§ 12–50.306–3 Taxes.

Where the individual is to render services, the compensation generally is subject to FICA (Social Security), FUTA (Unemployment), and federal income withholding tax. It may also be necessary to report or withhold state income tax under 5 U.S.C. 5517. The contracting officer shall take appropriate steps in coordination with the cognizant personnel office to have deductions and reports made where required by law.

§ 12–50.306–4 Conflict of interest.

The contracting officer shall assure himself that individual experts or consultants who are to render services under contract, familiarize themselves with Executive Order 11222, May 8, 1965, Part III, "Standards of Ethical Conduct for Special Government Employees," 30 FR 6469 (1965), and that they comply with it and with Departmental regulations implementing it.

§ 12–50.306–5 Administrative treatment.

Individual experts or consultants who are to render personal services under contract are charged against personnel ceilings in the same way as experts and consultants employed by excepted appointment. Also, the cognizant personnel office must maintain certain records on individual experts and consultants who render personal services. Therefore, the contracting officer shall effect necessary coordination with the cognizant personnel office before award of a contract for expert or consultant services, and may also designate the appropriate personnel officer as his representative for the purpose of obtaining necessary data from the contractor for tax withholding purposes, for suitability investigation under Executive Order 10450 and for administering applicable conflict of interest provisions.

§ 12–50.307 Contracts with firms for expert or consultant services.

Contracts with firms for expert or consultant services ordinarily need deal only with rights and obligations as between the Government and the firm, and need not deal with the question of compensation by the firm of the individuals it assigns to the work or with any other rights or obligations as between the firm and these individuals.

§ 12–50.308 Contracts for stenographic reporting services.

Stenographic reporting services normally are provided by Federal Government employees appointed under the usual civil service procedures. However, these services may be procured by contract from individuals or firms pursuant to 5 U.S.C. 3109, or other statutory authority where there are variable requirements or insufficient qualified personnel, and necessity or economy to the Government demands procurement by contract. Such contracts normally shall be written on an end-product basis and payment made according to delivered items (e.g., number of copies of transcript, words per page, etc.), and the contractor ordinarily shall be required to furnish the necessary material (typewriter, paper, bindings, etc.). These contracts are subject to all provisions of this subpart.

§ 12–50.309 Modification of contracts.

When supplemental agreements or change orders are required which substantially change the basis upon which the justification was made, such as to revise substantially the scope of work or time limitations, or to apply additional funds, authorization shall be requested in the same way and is subject to the same limitations as authorization to procure the total services by contract would have required in the first place.

Subpart 12–50.4—Procurement of Mortuary Services

§ 12–50.400 Scope of subpart.

This subpart is applicable only to the Coast Guard. It sets forth procurement procedures peculiar to contracts for mortuary services (the care of remains) of Coast Guard personnel.

§ 12–50.401 Procurement by contract.

(a) Where an existing contract for the care of remains is not available for Coast Guard use, procurement of such services shall be formally advertised except where negotiation is authorized, consistent with limitations and requirements set forth in Chapter 12B of the Coast Guard Personnel Manual.

(b) The contract format, terms and conditions, and clauses set forth in this subpart are appropriate for inclusion in a requirements type contract. They should be altered as deemed necessary by the contracting officer to fit a different contract type or procurement situation.

§ 12–50.402 Area of performance.

Each contract for care of remains shall clearly define the geographical area covered by the contract. The area shall be determined by the activity entering into the contract in accordance with the following general guidelines. It shall be an area using political boundaries, streets, and other features as demarcation lines. Generally, this should be a size roughly equivalent to the contiguous metropolitan or municipal area enlarged to include the activities served. In the event the area of performance best suited to the needs of a particular contract is not large enough to include a carrier terminal commonly used by people within such area, the contract area of performance shall specifically state that it includes such terminal as a pickup or delivery point.

§ 12–50.403 Solicitation provision.

Invitations for bids for mortuary services contracts shall contain the provision set forth below. This provision shall be appropriately modified for use in requests for proposals.

AWARD TO SINGLE BIDDER

Subject to the provisions contained herein, award shall be made to a single bidder. Bids must include unit prices for each item listed in order that bids may be properly evaluated. Failure to do this shall require rejection of the entire bid. Bids shall be evaluated on the basis of the estimated quantities shown and award shall be made to that responsive/responsible bidder whose total aggregate price is low.

§ 12–50.404 Schedule format.

Set forth below is an example of a Schedule format suitable for use in solicitations:

Item No.	Supplies, services, and transportation	Estimated Quantity	Unit	Unit price	Amount
1	For a type I casket, standard size, supplies and services in accordance with specifications		Each		
2	For a type II casket, standard size, supplies and services in accordance with specifications		do		
3	For a shipping case, standard size, in accordance with specifications. (For use with item 1 or 2 above.)		do		
4	For a type I casket, exceeding standard size, supplies and services in accordance with specifications		do		
5	For a type II casket, exceeding standard size, supplies and services in accordance with specifications		do		
6	For shipping case, exceeding standard size, in accordance with specifications. (To be used with item 4 or 5 above.)		do		
7	For transportation of remains, in accordance with specifications and as provided for in pars. (b) and (c) of the area of performance clause of this contract		Loaded mile		

§ 12–50.405 Contract clauses.

The clauses in DOTPR 12–7.50 shall, if appropriate, be included in contracts.

§ 12–50.406 Procurement by purchase order.

Where no contract for mortuary services exists and the use of a purchase order is appropriate, such services shall be obtained by use of DD Form 1155 and DD Form 1155r, in accordance with the following instructions:

(a) The "Changes" clause (paragraph 17 of DD Form 1155r) shall be deleted and the "Changes" clause in DOTPR 12–7.5001–29 shall be substituted therefor.

(b) The "Additional Default Provision" clause in DOTPR 12–7.5001–23 shall be included in the purchase order except it shall be amended:

(1) By changing paragraph (a) thereof to read: "(a) This clause supplements the 'Termination for Default' clause of this contract."

(2) By changing the first sentence of paragraph (b) thereof to read: "This contract may be terminated for default by written notice if during the performance of this contract:".

(c) The following clauses shall also be included in the purchase order:

(1) The "Specifications" clause in DOTPR 12–7.5001–18.

(2) The "Delivery and Performance" clause in DOTPR 12–7.5001–21.

(3) The "Subcontracting" clause in DOTPR 12–7.5001–22.

(4) The "Inspection" clause in DOTPR 12–7.5001–24.

(5) The "Professional Requirements" clause in DOTPR 12–7.5001–26.

(6) The "Facility Requirements" in DOTPR 12–7.5001–27.

(7) The "Preparation History" clause in DOTPR 12–7.5001–28.

AUTHORITY: Sec. 205(c), 63 Stat. 389; 40 U.S.C. 486(c), 10 U.S.C. 2301–2314.

§ 12–60.000 Scope of part.

This part establishes the Department of Transportation Contract Appeals Board, prescribes its functions and procedures, provides for the appointment of a chairman and members of the Board, and authorizes the members of the Board to act.

Subpart 12–60.1—Contract Appeals Board

§ 12–60.101 Establishment.

A Department of Transportation Contract Appeals Board ("Board") is established. The Secretary of Transportation ("Secretary") appoints and terminates the appointments of the members of the Board, and designates one of them as chairman. The Board is responsible directly to the Secretary.

§ 12–60.102 Qualifications of members.

Each member of the Board must be a qualified attorney who is admitted to practice before the highest court of a State or the District of Columbia, and shall be a civilian employee of a commissioned officer of the Department.

§ 12–60.103 Authority and duties of the Board and its members.

(a) The Board acts for the Secretary in hearing and deciding:

(1) Appeals by contractors from decisions made by contracting officers under contracts which provide for such an appeal to the Secretary; and

(2) Other matters as directed by the Secretary.

(b) In each case, the Board shall make a final decision which is impartial, fair, and just to the parties and is supported by the record of the case and the law. The member or members assigned to hear an appeal have authority to act for the Board in all matters with respect to such appeal, except that the final decision is made by a majority of a panel of Board members designated by the chairman for that purpose. No member may act for the Board or participate in a decision if he has participated directly in any aspect of the award or administration of the contract involved.

V 42 174 SEP 8 77 UMI

§ 12–60.104 Authority and duties of the chairman.

The chairman is delegated authority over and is responsible for:

(a) The internal organization and administration of the Board;

(b) The receipt and custody of all papers and material relating to contract appeals;

(c) The assignment of a member or members of the Board to act for the Board in each appeal and the assignment of the panel of Board members to decide each appeal;

(d) The designation of an acting chairman during his absence, disqualification, or disability; and

(e) The promulgation of additional or supplemental rules of procedure, not inconsistent with those established by the Secretary.

Subpart 12–60.2—Contract Appeal Procedures

§ 12–60.201 General.

(a) It is the intent of the rules in this part to provide for the just and inexpensive determination of appeals without unnecessary delay. It is the objective of the Board's preliminary procedures to encourage full disclosure of relevant and material facts, and to discourage surprise. Each specified time limitation is a maximum, and should not be fully exhausted if the action described can be accomplished in a shorter period. The Board may extend any time limitation (except the time specified in the contract for filing the notice of appeal) for good cause.

(b) For the purposes of this part—

(1) "The parties" means the appellant and the contracting officer;

(2) "Appellant" means the contractor who appeals; and

(3) "Contracting officer" means the Government contracting officer whose decision is appealed, or his successor.

(c) Ordinarily, the appellant has the burden of proof.

§ 12–60.202 Notice of appeal.

An appeal from a decision of a contracting officer is made by sending a written notice of appeal to the contracting officer addressed to the Secretary. The notice shall be mailed or filed within 30 days after the date of receipt of the contracting officer's decision, unless a different time is provided in the contract. The contractor shall sign the notice, identify the contract involved and the decision appealed from, and state that he is appealing from that decision. A general letter of complaint objecting to some action may be considered not to be a notice of appeal. The notice should be in triplicate, specify the part or parts of the decision from which the appeal is taken, and should state the reason why those parts are erroneous. The notice of election referred to in § 12–60.205, and the complaint referred to in § 12–60.208, may be filed with, or as part of, the notice of appeal.

§ 12–60.203 Forwarding of appeals.

Upon receiving a notice of appeal, the contracting officer shall endorse on the original and the copies the date of mailing, or the date of receipt if otherwise filed. He shall immediately send the notice and one copy to the Board for docketing. The Board shall promptly advise the appellant and the contracting officer of the receipt of the original notice of an appeal (whether received from the contracting officer or otherwise), and shall furnish the appellant a copy of the rules in this part and advise him of his option of procedures.

§ 12–60.204 Duties of the contracting officer.

(a) Within 30 days after the first written notice to him that an appeal has been taken, the contracting officer shall send to the Board an appeal file, consisting of the originals or true copies of the following:

(1) The findings of fact and the decision from which the appeal is taken, and the letters or other documents of claim in response to which the decision was issued;

(2) The contract and pertinent specifications, plans, drawings, modifications, change orders, and amendments;

(3) All correspondence between the parties relating to the dispute;

(4) Transcripts of any testimony taken in connection with the dispute, and any affidavits or statements of any witnesses that were considered by the contracting officer in reaching his decision; and

(5) Any additional data that the contracting officer may consider pertinent.

(b) The contracting officer shall retain a complete copy of the appeal file, except for voluminous exhibits of which the appellant has identical copies, or which the appellant has had the opportunity to inspect. At the time the file is sent to the Board he shall so notify the appellant, provide him with a listing of its contents, and advise him that he may examine it at the office of the contracting officer or the Board. As soon as possible the appellant should suggest to the Board any additional documentation he considers pertinent for inclusion in the appeal file. The Board may order the inclusion of the suggested material.

§ 12–60.205 Appellant's election as to procedure.

(a) The appellant may elect to have the appeal considered upon:

(1) The written record, without oral hearing (§ 12–60.206);

(2) A conference hearing (§ 12–60.207); or

(3) A hearing under the Board's regular procedure.

(b) The appellant shall notify the chairman of the Board of his election within 30 days after the date he receives the contracting officer's notice of transmittal of the appeal file under § 12–60.204.

(c) For good cause, at the timely request of the contracting officer or on the Board's own motion, the Board may direct that the parties follow either the conference hearing procedure or the regular procedure if the appellant has elected to have the appeal considered upon the written record; or it may direct that the parties follow the regular procedure if the appellant has elected to have the appeal considered under the conference hearing procedure.

§ 12–60.206 Procedure for submission on written record.

If the appeal is considered on the written record, the pleadings specified in § 12–60.208 are not required. The appellant may submit to the Board any additional relevant material for the record within 45 days after the date he receives the contracting officer's notice of transmittal of the appeal file under § 12–60.204. The contracting officer shall submit any answering material within 30 days after the date he receives the material submitted by the appellant. Thereafter the record shall be settled as provided in § 12–60.221 after at least 15 days notice to the parties by the Board. The Board may permit the record to be supplemented by oral argument and by briefs.

§ 12–60.207 Conference hearing procedure.

(a) *General.* This procedure provides a means for hearing and deciding appeals which is more expeditious and informal than the regular procedure set forth in the rules in this part. It may be of particular value when the appellant regards only limited additional testimony and oral argument as necessary to sustain his case on the written record.

(b) *Pleadings and issues.* Under the conference hearing procedure, pleadings are not required. The issues are those raised by the appellant's claim letter and the contracting officer's decision or those identified at a prehearing conference.

(c) *The hearing.* The hearing consists of an informal conference at which the evidence is presented and discussed by the witnesses. The presiding Board member controls the course of the hearing. He may vary the order or presentation so that all evidence on a particular issue is received at the same time and he may refuse to receive any evidence or argument on matters not directly in issue or any repetitive, irrelevant, prejudicial, or improper material. The presiding Board member may also develop facts, obtain admissions, stipulations, and concessions through questioning parties and witnesses.

(d) *Evidence and arguments—how presented.* Evidence and argument is presented by the witnesses and the parties without regard to the formal order of proof. The technical rules of evidence do not apply, but the Board may refuse to consider any statements or documents which are not of sufficient probative weight as to be considered "substantial" evidence. Although witnesses are not separately and sequentially examined and cross-examined, questioning and cross-questioning may be permitted when needed to get relevant information on the record or to test the credibility of witnesses. Evidence and argument may be limited to matters directly in issue.

(e) *Other rules.* All of the rules in this part, except §§ 12–60.208 and 12–60.216 apply to appeals considered under the conference hearing procedure.

§ 12–60.208 Pleadings.

(a) Unless he elects to have the appeal considered on the written record or under the conference hearing procedure, the appellant shall, within 30 days after receipt of the contracting officer's notice of transmittal of the appeal file under § 12–60.204, file with the Board an original and two copies of a complaint setting forth a concise statement of each of his claims, alleging the basis, with appropriate reference to contract provisions, for each claim, and the dollar amount claimed. If the Board orders a complaint to be filed, the complaint shall be filed within the time specified in the Board's order.

(b) Within 30 days after the date of receipt of the complaint, the contracting officer shall file with the Board an original and two copies of an answer, setting forth a concise statement of his defense to each claim asserted by the appellant.

(c) Although no particular form or formality is required, the complaint and answer shall fulfill the generally recognized requirements for pleading.

§ 12–60.209 Motions.

(a) Motions are made by filing an original and two copies thereof, together with any supporting papers, with the Board. Motions may also be made upon the record, in the presence of the other party, at a prehearing conference or hearing. The Board shall consider any timely motion:

(1) For extension of time or to cure defaults;

(2) To require that a pleading be made more definite and certain, or for leave to amend a pleading;

(3) To dismiss for lack of jurisdiction; to dismiss for failure to prosecute; or to grant summary relief because a pleading does not raise a justifiable issue;

(4) For discovery, for interrogatories to a party, and for the taking of depositions;

(5) To reopen a hearing; or to reconsider a decision; or

(6) For any other appropriate order.

(b) The Board may, on its own motion, initiate any such action by notice to the parties. Unless a longer time is allowed by the Board, a party who receives a motion shall file any answering material within 20 days after the date of receipt. The Board shall make an order on each motion that is appropriate and just to the parties, and upon conditions that will promote efficiency in disposing of the appeal. The Board may permit oral hearing or argument on motions, and may require the presentation of briefs. Motions to reconsider a decision must be made within 30 days after the date of receipt of the decision.

§ 12–60.210 Prehearing conference.

(a) The Board may, upon the request of either party, or upon its own motion, require the parties to appear for a prehearing conference to consider—

(1) Simplification or clarification of the issues;

(2) Stipulations and admissions;

(3) Limitations on the evidence and the number of witnesses whose testimony is to be presented;

(4) Possibility of agreement on any of the issues in dispute; and

(5) Any other matter that may aid in the disposition of the appeal.

(b) The presiding Board member shall reduce results of the conference to writing. The results are a part of the record.

§ 12–60.211 Service of papers.

Except for the appeals file, a copy of each document and each communication to the Board shall be served upon the other party at the time it is filed with or sent to the Board. Service of papers shall be made personally or by mail.

§ 12–60.211–1 Notation: copy to other party.

Except for the appeals file, each written communication to the Board from or on behalf of the contracting officer or the appellant shall include a notation or statement that a copy has been served on or sent to the other party. The letter to the Board transmitting the appeal file shall indicate that a copy of the letter and a list of the documents have been sent to the appellant.

§ 12–60.212 Depositions and discovery.

(a) *Depositions.*

(1) After an appeal has been docketed, the Board may, for good cause, order the taking of the testimony of any person, by deposition upon oral examination or written interrogatories. A party's application for the order shall specify whether the deposition is for (i) the purpose of discovery, or (ii) use as evidence.

(2) The taking of evidentiary depositions will not ordinarily be ordered unless it appears that it is impracticable to present the witness' testimony at the hearing of the appeal, or unless a hearing has been waived and the case submitted or the written record pursuant to § 12–60.206. Testimony taken by deposition shall not be considered part of the evidence in the hearing of an appeal unless and until it is offered and received in evidence. It shall not ordinarily be received in evidence if the witness can testify personally at the hearing, except that depositions may be used to contradict or impeach the testimony of witnesses.

(b) *Inspection of documents.* For good cause, the Board may order any party to produce and permit the inspection and copying or photographing of designated documents, not privileged, regarding any matter that is relevant to the appeal.

(c) *Admission of facts.* For good cause shown, the Board may permit a party to serve upon the opposing party a request for the admission of specified facts.

(d) *Orders of the Board.* The time, place and manner of taking depositions, producing documents or making admissions under this section shall be governed by the order of the Board.

§ 12–60.213 Prehearing briefs.

Either party may file a prehearing brief, and the Board may require both parties to submit prehearing briefs. Such a brief should be filed at least 15 days before the date set for hearing.

§ 12–60.214 Notice of hearing; where and when held.

Hearings are held in Washington, D.C., except that, upon request seasonably made and upon good cause shown, the Board in its discretion may set the hearing at another location. Hearings are scheduled by the Board with due consideration to the regular order of appeals, the desires of the parties, the requirement for just and inexpensive determination of appeals without unnecessary delay, and other pertinent factors. The parties shall be given at least 15 days notice of the time and place set for hearings.

§ 12–60.215 Unexcused absence of a party.

The unexcused absence of a party at the time and place set for hearing does not delay the hearing. In such a case, the hearing proceeds and the case is considered to be submitted on the written record by the absent party, as provided in § 12.60.206.

§ 12–60.216 Nature of hearings.

Hearings shall be as informal as may be reasonable and appropriate under the circumstances. Subject to the discretion of the presiding Board member as to the extent and manner of the presentation of such evidence, the appellant and the contracting officer may offer any relevant evidence that would be admissible under the generally accepted rules of evidence applied in the courts of the United States in nonjury trials. In general, admissibility depends on relevancy and materiality. Letters or copies thereof, affidavits, or other evidence may be admitted in the discretion of the presiding Board member. The weight to be attached to evidence presented in any particular form is within the discretion of the Board, after considering the circumstances of the particular case. The Board may in any case require evidence in addition to that offered by the parties.

§ 12–60.217 Examination of witnesses.

Witnesses before the Board may be examined orally under oath or affirmation. If the testimony of a witness is not given under oath the Board shall warn the witness that his statements are subject to sections 287 and 1001 of Title 18, United States Code, and any other provisions of law imposing penalties for knowingly making false representations

V 42 174 SEP 8 77 UMI

in connection with claims against the United States.

§ 12–60.218 Copies of papers.

A true copy may be substituted for any book, record, paper or other document that has been received in evidence. If this is done, an identical copy shall be furnished to the other party.

§ 12–60.219 Posthearing briefs.

Posthearing briefs may be submitted upon such terms as may be agreed upon by the parties, or as may be directed by the presiding Board member.

§ 12–60.220 Transcript of proceedings.

Unless the Board otherwise orders, testimony and argument at hearings shall be reported verbatim. Any party to a hearing may buy a transcript of the proceedings at rates fixed by contract between the Board and the reporter, or equivalent rates if the proceedings are reported by an employee of the United States.

§ 12–60.221 Settling the record.

(a) A case which is heard is ready for decision upon receipt of transcript, or upon receipt of briefs when briefs are to be submitted.

(b) A case submitted on the record pursuant to § 12–60.206 is ready for decision when the parties are so notified by the Board. At any time before the date that such a case is ready for decision, either party may, upon good cause shown, supplement the record with documents and exhibits that the Board considers relevant and material.

(c) The Board may, upon its own motion, call upon either party, with appropriate notice to the other, for evidence that it considers relevant and material. The weight attached to any evidence or record is within the discretion of the Board. Either party may at any stage of the proceeding, on notice to the other party, question by objection the relevance or materiality of material in the record or offered into the record.

(d) The Board record consists of the appeal file described in § 12–60.204 and any additional material filed with or heard by the Board, except material which the Board strikes or excludes.

(e) This record is at all times available for inspection by either party, upon reasonable prior arrangement, at the office of the Board. Copies of material in the record may, if practicable, be furnished to the appellant upon payment of the established fees for reproduction.

§ 12–60.222 Representation of parties.

An individual appellant may prosecute his appeal in person; a corporation, by an officer; a partnership or joint venture, by a member; and any appellant may be represented by an attorney. The contracting officer is represented by Government counsel.

§ 12–60.223 Settlement.

A dispute may be settled at any time before the decision by the filing of a written notice by the appellant withdrawing his appeal or by written stipulation between the appellant and the contracting officer, settling the dispute. Proceedings may be suspended while the parties are considering settlement.

§ 12–60.224 Decisions.

Written decisions of the Board shall be forwarded simultaneously to both parties. The rules of the Board and all final orders and decisions are open for public inspection at the offices of the Board in Washington, D.C. Decisions of the Board are made upon the record.

PART 12–70—GOVERNMENT PROPERTY

Sec.
12–70.000 Scope of Part.

Subpart 12–70.1—General

12–70.101 Definitions.
12–70.101–1 Property.
12–70.101–2 Government property.
12–70.101–3 Provide.
12–70.101–4 Material.
12–70.101–5 Non-expendable.
12–70.101–6 Plant Equipment.
12–70.101–7 Facilities.
12–70.101–8 Nonseverable.
12–70.101–9 Excess and residual contract inventory.
12–70.102 Use for or by contractors of test facilities owned and operated by the government.
12–70.103 Government property contract clauses.
12–70.104 Control of government property.
12–70.105 Disposition of excess and residual contract inventory.

Subpart 12–70.2—Furnishing Government Material to Contractors

12–70.201 Policy.
12–70.202 Procedure.
12–70.203 Changing the amount of material to be furnished by the government.

Subpart 17–70.3—Providing Government Facilities to Contractors

12–70.301 Policy.
12–70.302 Providing government facilities when disposal is limited.
12–70.303 Offers to furnish government facilities.
12–70.304 Changing government facilities to be provided.

Subpart 12–70.4—Use of Government Facilities in the Possession of Contractors or Subcontractors

12–70.401 Policy.
12–70.402 Use of facilities under the cognizance of another department or agency.
12–70.403 Use by another department or agency of facilities under the cognizance of DOT.

Subpart 12–70.5—Property Administration

Sec.
12–70.501 General.
12–70.502 Responsibilities of the contracting officer.
12–70.503 Actions requiring approval of the contracting officer.
12–70.504 Assignment of responsibility for property administration.
12–70.505 Responsibilities of the property administrator.
12–70.506 DOTPR Supplement 1—Manual for Control of Property in Possession of Contractors.
12–70.507 Records of government property.
12–70.508 Contract property control file.
12–70.509 Evaluation and approval of contractor's property control system.
Sec.
12–70.510 Review of contractor's property control system during contract performance.

Subpart 12–70.6—Vesting of Title to Equipment Under Research Contracts

12–70.601 General.
12–70.602 Conditions of transfer.
12–70.603 Contracts performed at government installations.

Subpart 12–70.7—Disposition of Excess and Residual Contract Inventory

12–70.701 General.
12–70.702 Application of FPR, FPMR and other DOT regulations.
12–70.703 Reports of contract inventory.
12–70.704 Disposition methods and priorities.

Subpart 12–70.8—Contract Closure

12–70.801 Actions by the property administrator.

Subpart 12–70.9—Contract Clauses, Government Property

12–70.901 Contract clauses.

AUTHORITY: Sec. 205(c), 63 Stat. 389; 40 U.S.C. 486(c), 10 U.S.C. 2301–2314.

§ 12–70.000 Scope of Part.

This part sets forth the policies of the Department of Transportation with respect to providing property for use by contractors in connection with procurement by the components of the Department of Transportation, prescribes responsibilities and procedures pertinent thereto, and references applicable contract clauses. This part does not apply to property to which the Government has acquired a lien or title solely as a result of partial, advance, or progress payments. When lien or title is acquired solely as a result of such payments, the provisions of the partial, advance, or progress payments clauses shall apply, including any modifications to such clauses as may be contained in the contract.

Subpart 12–70.1—General

§ 12–70.101 Definitions.

As used in this part, the following terms have the meaning stated below. Additional definitions applicable to property administration are set forth in DOTPR Supplement 1—"Manual for Control of Property in Possession of Contractors."

§ 12–70.101–1 Property.

Includes all property, both real and personal. For the purpose of this part, it consists of two separate categories—material and facilities.

§ 12–70.101–2 Government property.

Means all property owned by or leased to the Government or acquired by the Government under the terms of a contract. However, the term "Government property" does not include property to which the Government has acquired a lien or title solely as a result of partial, advance, or progress payments. Government property includes both Government-furnished property and contractor-acquired property as defined below:

(a) Government-furnished property is property in the possession of, or acquired directly by, the Government and subsequently delivered or otherwise made available to the contractor; and

(b) Contractor-acquired property is property procured or otherwise provided by the contractor for the performance of a contract, title to which is vested in the Government.

§ 12–70.101–3 Provide.

As used in the context of such phrases as "Government property provided to the contractor" and "Government-provided property", means either to furnish, as in "Government-furnished property", or to acquire, as in "contractor-acquired property."

§ 12–70.101–4 Material.

Means property which may be incorporated into or attached to an end item to be delivered under a contract or which may be consumed or expended in the performance of a contract. It includes, but is not limited to, raw and processed material, parts, components, assemblies, and small tools and supplies which may be consumed in normal use in the performance of a contract. It also includes items of a nonexpendable nature with a unit acquisition cost of less than $50, unless the Government has designated any such items to be classified as plant equipment.

§ 12–70.101–5 Non-expendable.

Means items of Government personal property which:

(a) Have a unit acquisition cost of $50.00 or more, and

(b) Have a life expectancy of one year or more, and

(c) Retain their identity when put into use, and

(d) Are not consumed in the performance of work on the contract.

§ 12–70.101–6 Plant equipment.

Means personal property of a nonexpendable nature (consisting of equipment, machine tools, test equipment, furniture, vehicles, and accessory and auxiliary items) used or capable of use in the manufacture of supplies or in the performance of services or for any administrative or general plant purpose.

§ 12–70.101–7 Facilities.

Means property (other than material) for production, maintenance, research, development, or test, including real property and rights therein, buildings, structures, improvements, and plant equipment.

§ 12–70.101–8 Nonseverable.

When related to Government facilities, means that such property cannot be removed after erection or installation without substantial loss of value or damage thereto, or to the premises where installed.

§ 12–70.101–9 Excess and residual contract inventory.

"Excess and residual contract inventory" means:

(a) Any property acquired by and in the possession of a contractor or subcontractor (including Government-furnished property) under a contract pursuant to the terms of which title is vested in the Government, and in excess of the amounts needed to complete full performance under the entire contract; and

(b) Any property which the Government is obligated to or has an option to take over under any type of contract as a result either of any changes in the specifications or plans thereunder or of the termination of such contract (or subcontract thereunder), prior to completion of the work, for the convenience or at the option of the Government.

§ 12–70.102 Use for or by contractors of test facilities owned and operated by the Government.

(a) The on-site use for or by contractors of existing Government-owned test facilities located at installations owned and operated by the Government may be authorized in connection with the performance of Government contracts only when:

(1) there is no commercial test capability adequate for the testing needs, or

(2) substantial cost savings will result from use of the Government-owned test facilities.

(b) Whenever any such use is authorized, adequate consideration comparable to commercial charges, if any, shall be obtained under any affected contract.

§ 12–70.103 Government property contract clauses.

When Government property is provided under a contract, the contract shall contain the appropriate Government Property clause as referenced in Subpart 12–70.9 of this part.

§ 12–70.104 Control of government property.

The control of Government property shall be in accordance with DOTPR Supplement 1—Manual for Control of Property in Possession of Contractors. Each contract under which Government property is provided shall incorporate this Manual by reference.

§ 12–70.105 Disposition of excess and residual contract inventory.

Excess and residual contract inventory shall be disposed of in accordance with the procedures contained in Subpart 12–70.7 of this part.

Subpart 12–70.2—Furnishing Government Material to Contractors

§ 12–70.201 Policy.

It is the general policy of the Department of Transportation that contractors will furnish all material required for the performance of Govenment contracts. However, the Government may furnish material to a contractor when it is determined to be in the best interest of the Government by reason of economy, standardization, the expediting of production, or other appropriate circumstances.

§ 12–70.202 Procedure.

(a) Material to be furnished by the Government shall be set forth in the solicitation in sufficient detail to permit evaluation by prospective contractors.

(b) Where material is to be furnished by the Government, the contract shall state whether the requisitioning documentation is to be prepared by the contractor or the procuring activity. When the responsibility is placed upon the contractor, such documentation shall be prepared in accordance with the instructions provided by the procuring activity.

§ 12–70.203 Changing the amount of material to be furnished by the government.

(a) At any time after a contract has been entered into, whether as a result of formal advertising or negotiation, the contract may be bilaterally modified to provide for the furnishing of Government material or to increase the amount to be furnished, provided there is adequate consideration for such modification.

(b) When it is anticipated that substantial quantities of Government material will become available for the contract by transfer from another contract or otherwise, the contract may provide that a unilateral increase in the amount of material to be furnished by the Government may be ordered by the contracting officer, and that the contract shall be equitably adjusted therefor.

(c) Unilateral decreases in or substitutions for the material specified under a contract to be provided by the Government may be ordered by the contracting officer, subject to the equitable adjustment of the contract, in accordance with the provisions of the applicable Government Property clause(s) and other terms of the contract.

Subpart 12–70.3—Providing Government Facilities to Contractors

§ 12–70.301 Policy.

(a) It is the policy of the Department of Transportation that contractors will furnish all facilities required for the performance of Government contracts. Facilities will not be provided to a contractor, nor will competitive solicitations offer to provide such property, except as follows:

(1) For use in a Government-owned, contractor-operated plant operated on a cost-plus-fixed-fee basis; or

(2) When the Contracting Officer determines in writing that (i) the contract cannot be fulfilled by any other practical means, or (ii) it is in the public interest.

(b) New facilities will not be provided by the Government where an economical, practical and appropriate alternative exists. Examples include:

(1) Procuring from sources not requiring Government-owned facilities;

(2) Requiring the contractor to make full utilization of subcontractors possessing adequate and available capacity;

(3) Having the contractor rent facilities from commercial sources; and

(4) Using existing Government-owned facilities.

(c) Prospective contractors who propose to use Government facilities, including property offered for use in the solicitation as well as property already

V 42 174 SEP 8 77 UMI

in possession of the contractor or his subcontractors, will be required to identify such property in their bids or proposals. Unless prior written approval has been obtained by the procurement Contracting Officer, prospective contractors who propose to use Government facilities already in possession of the contractor or his subcontractors under other contracts will be required to submit written approval for the use of such property from the contracting officer cognizant of such property.

§ 12–70.302 Providing government facilities when disposal is limited.

(a) *Nonseverable property.* Government facilities, other than foundations and similar improvements necessary for the installation of plant equipment, shall not be installed or constructed on land not owned by the Government in such fashion as to be nonseverable, unless the Head of a Procuring Activity determines in writing that such location is necessary, and:

(1) The contract under which such property is provided contains a provision for reimbursing the Government for the fair value of the property at the completion or termination of the contract or within a reasonable time thereafter (for example, in appropriate cases, such a provision may require the contractor to purchase the property at a value to be determined by appraisal, or at a price equal to its acquisition cost less depreciation at a specified rate considering its estimated useful life, or may require the contractor to reimburse the Government for its scrap or salvage value if the Head of a Procuring Activity determines that its estimated useful life will not extend beyond the expiration of the contract or the completion of the work for which the property was provided);

(2) The Government has an option to acquire the underlying land; or

(3) The contract under which such property is provided contains an alternate provision that the Head of the Procuring Activity considers to be adequate to protect the interests of the Government therein. (The authority of the Head of the Procuring Activity under this paragraph may not be delegated.)

(b) *Property Subject to Patent or Other Proprietary Rights.* If patent or other proprietary rights of a contractor may restrict the disposal of Government facilities, the condition in either subparagraph (a) (1) or (a) (3) of this section shall be satisfied before such property is provided.

§ 12–70.303 Offers to furnish government facilities.

(a) Generally, where Government facilities are offered for use in a competitive procurement, the solicitation should provide that the user will assume all costs related to making the property available, to avoid the need for separate evaluation of such costs. Where this is not feasible, or it is otherwise in the Government's interest, the Government may assume such costs provided they are included in the evaluation of bids or proposals.

(b) When a solicitation contains an offer to furnish Government facilities (including an offer to use Government property already in the possession of a prospective contractor), and when the furnishing and use of such property will result in either direct and measurable costs to the Government or direct and measurable savings to the Government, then:

(1) Such costs or savings will be set forth in the solicitation;

(2) The manner in which such costs or savings will be applied in the evaluation of bids or proposals will be set forth in the solicitation; and

(3) Such costs or savings will be considered in the evaluation of bids and proposals.

(c) Government facilities may be offered on an "as is" basis in solicitations for fixed-price type contracts, whether such property is in storage or in the possession of a contractor, provided that the property can be inspected by bidders or proposers prior to the submission of their offers. In such cases, the solicitation will state:

(1) The availability and location of the property, and the conditions under which it may be inspected;

(2) That the property will be offered in its current condition, f.o.b. present location;

(3) That bidders or proposers must satisfy themselves that the property is suitable for their use;

(4) That any costs of transporting, installing, modifying, repairing, or otherwise making the property suitable for use shall be borne by the successful bidder or proposer; and

(5) The bidders or proposers to whom the property is offered, if it is not to be offered to all.

(d) If it is not feasible to make Government facilities available to all bidders or proposers, solicitations offering to furnish such property may limit the offer accordingly.

§ 12–70.304 Changing Government facilities to be provided.

The amount of Government facilities specified under a contract to be provided may be increased by a bilateral modification of the contract. Such increases will be made only when approved in accordance with the policies prescribed in this Subpart 12–70.3 and when the Government receives adequate consideration therefor. Unilateral decreases in or substitutions for the Government property specified under a contract to be provided by the Government may be ordered by the contracting officer, subject to the equitable adjustment of the contract, in accordance with the appropriate Government property clause and other terms of the contract.

Subpart 12–70.4—Use of Government Facilities in the Possession of Contractors or Subcontractors

§ 12–70.401 Policy.

It is the policy of the Department of Transportation to put Government facilities which are in the possession of a contractor or subcontractor to the greatest possible use in the performance of Government contracts or subcontracts. Facilities over which DOT has cognizance and which are in the possession of a contractor or subcontractor will not be authorized for use except for the performance of Government contracts or subcontracts, unless other use of such property is specifically authorized by law or other DOT regulation. When a contractor is authorized to use facilities over which DOT has cognizance for the performance of Government contracts or subcontracts, no charge will be made for such use. However, the Contracting Officer having cognizance of the prime contract must determine that the Government will receive adequate consideration for the use of the property through reduced costs for the supplies or services or otherwise.

§ 12–70.402 Use of facilities under the cognizance of another department or agency.

When a DOT procurement contracting officer has obtained approval for the use by a contractor or subcontractor of Government facilities over which another department or agency has cognizance, and regulations of such department or agency require that the contractor be charged for such use, then the contract will provide for the payment of such charge. It is the responsibility of the contracting officer of the department or agency having cognizance of the property to collect for such charges.

§ 12–70.403 Use by another department or agency of facilities under the cognizance of DOT.

When a contracting officer of another department or agency requests approval for the use by a contractor or subcontractor of facilities over which DOT has cognizance, it is the responsibility of the requesting contracting officer to make any evaluations or other contractual determinations required relative to the furnishing of Government property to a contractor. When the DOT contracting officer cognizant of the property has determined that the property can be made available for the requested use, approval for such use will be granted.

Subpart 12–70.5—Property Administration

§ 12–70.501 General.

This subpart sets forth responsibilities and procedures to:

(a) Assure performance of property control to protect the interests of the Government;

(b) Assure uniformity in the administration of contract provisions relating to Government property; and

(c) Meet management data requirements of the Government.

§ 12–70.502 Responsibilities of the Contracting Officer.

The Contracting Officer is responsible for:

(a) Assuring that all contracts which provide for the use of Government property include necessary provisions relative to the use, control, and disposition of such property, including the appropriate Government Property clause and DOT PR Supplement 1—Manual for Control of Property in the Possession of Contractors;

(b) Performing, or arranging for the performance of, all actions required to effect and carry out the provisions of the contract and this part relative to Government property;

(c) Providing necessary direction to the contractor, either directly or through an authorized representative of the contracting officer, on all matters pertaining to Government property;

(d) Obtaining from the contractor all required reports and other management data; and

(e) Cooperating with and assisting the appropriate DOT accounting office in all matters pertaining to the financial accounting for Government property.

§ 12–70.503 Actions Requiring Approval of the Contracting Officer.

The actions listed below (and which are subject to other applicable provisions of this part) require the written approval of the Contracting Officer, except that the actions set forth in paragraphs (e) and (f) of this section may be approved by an authorized representative of the Contracting Officer who has been designated as such in writing. The contractor will be notified in writing when an authorized representative has been so designated. No other person will be permitted to approve these actions on behalf of the Government—

(a) Providing Government property to a contractor when providing such property has not been previously authorized in the contract.

(b) Changing the amount of Government property specified to be provided in a contract.

(c) Authorizing the use by a contractor of Government property provided under one contract for work under another contract, unless the latter contract specifically authorizes such use.

(d) Relieving a contractor of responsibility for Government property due to loss, damage, destruction, or unreasonable wear or deterioration or unjustifiable consumption in the performance of the contract.

(e) Directing the removal of Government property from the custody of a contractor, the transfer of Government property to another contract or to another contractor (but only when such transfer has been authorized pursuant to paragraph (a), (b), or (c) of this section), or the disposal of Government property.

(f) Approving a contractor's property control system.

§ 12–70.504 Assignment of responsibility for Property Administration.

The Contracting Officer may delegate to another individual the authority to administer the contract requirements and obligations relative to Government property. The individual to whom this authority is delegated will be designated in writing as the Property Administrator for the contract, and the contractor will be notified of such designation in writing. In selecting a Property Administrator, the Contracting Office will consider the qualifications of the individual in terms of training, education, and experience in property matters. When a specific individual has not been designated as Property Administrator, the Contracting Officer is the Property Administrator.

§ 12–70.505 Responsibilities of the Property Administrator.

A designated Property Administrator should be assigned the responsibilities and duties set forth below. This listing is provided for guidance and is not intended to be inclusive or exclusive. Any responsibilities of the Contracting Officer relative to Government property which are not assigned to a Property Administrator remain with the Contracting Officer—

(a) Establishing and maintaining a property control file for each contract.

(b) Evaluating and approving the contractor's property control system.

(c) Reviewing the contractor's property control system during contract performance, to the extent required by § 12–70.510.

(d) Advising the Contracting Officer as to the contractor's noncompliance with approved procedures.

(e) Resolving property administration matters with the contractor's management and with Government procurement, property, accounting, and audit personnel.

(f) Obtaining assistance in property matters from other Government personnel in such technical areas as accounting, audit, disposal, quality assurance, engineering, and pricing.

(g) Providing necessary direction to the contractor on matters pertaining to Government property, including authorization for the commingling of Government and contractor property.

(h) Assisting the servicing DOT accounting office in matters pertaining to financial accounting for Government property.

(i) Analyzing the use or consumption of Government property by the contractor to determine reasonableness of consumption and proper utilization.

(j) Preparing written determinations, for the Contracting Officer's signature, for relieving the contractor of responsibility for Government property due to loss, damage, destruction, or unreasonable wear or deterioration or unjustifiable consumption in the performance of the contract.

(k) Effecting the removal of Government property from the custody of a contractor, the transfer of Government property to another contract or to another contractor, and the disposal of Government property.

(l) Certifying to the Contracting Officer that all Government property provided under a completed or terminated contract has been properly accounted for and disposition effected.

§ 12–70.506 DOTPR Supplement 1—Manual for control of property in possession of contractors.

This manual sets forth basic requirements to be observed by contractors in establishing and maintaining control over Government property provided for performance of contracts with the Department. The manual supplements provisions of the contract that apply to Government property, but does not supersede them. The contract provisions will govern in the event of any conflict with the manual. If there is evidence that Government property will be required in performance of a contract, the Contracting Officer will reference the manual in the solicitation and make it available on request. The manual will be incorporated by reference in all contracts which provide for the use of Government property and will be issued to the contractor at time of award if not previously provided.

§ 12–70.507 Records of government property.

(a) Records of Government property established and maintained by the contractor pursuant to the terms of the contract will be designated and utilized as the official contract records. Exceptions to this policy may be authorized by the Contracting Officer for those contracts in which contract administration is retained by the procurement office involving Government property (1) furnished to a contractor for repair or servicing and return to the shipping organization or (2) furnished to a contractor for use on a Government installation. In such cases, the property will be accounted for as a suspense item within the Government property account designated by the procurement office, and the Government property clause will be appropriately modified.

(b) Maintenance of official records for DOT financial accounting purposes is the responsibility of the DOT accounting activity that provides accounting service to the procurement office responsible for the contract. The Property Administrator will ensure that the servicing accounting activity is provided copies of documents necessary to maintain financial accounting for Government property, including: (1) Government shipments, (2) notices of contractor acquisitions, (3) physical inventory reports, (4) transfers and disposals, and (5) contractors annual financial property reports as specified in DOTPR Supplement 1.

(c) Each procurement office having contracts involving Government property will maintain a consolidated and current listing of all such contracts. This listing is to be primarily used for the purpose of verifying that contractors submit the annual reports prescribed in DOTPR Supplement 1. The Property Administrator will take prompt action to obtain any delinquent reports and will assist the accounting activity as necessary in effecting reconciliation between contractor property reports and the DOT financial accounts.

V 42 174 SEP 8 77 UMI

(d) When contracts involving property are reported for inclusion in the DOT Contract Information System, the procurement office will ensure that input to the system includes the required property code.

§ 12–70.508 Contract property control file.

Upon award of a contract, the Property Administrator will establish a Contract Property Control File which will include as a minimum:

(a) copy of the contract or extract of provisions thereof establishing requirements for property administration (except when the Property Control File is maintained as an adjunct to the contract working file);

(b) letters designating authorized representatives of the Contracting Officer for property matters;

(c) report of initial review, evaluation, and approval of the contractors property control system;

(d) record of visits, property system examinations and analyses, and appropriate work papers;

(e) documents evidencing the furnishing of Government property;

(f) contractor's receipts for Government furnished property;

(g) contractor's notices of acquisitions of contractor purchased or fabricated Government property as prescribed in DOTPR Supplement 1;

(h) contractor's physical inventory and financial property reports as prescribed in DOTPR Supplement 1;

(i) documents evidencing the removal of Government property from the custody of the contractor, the transfer of Government property to another contract or another contractor, and the disposal of Government property;

(j) documents evidencing relief of the contractor from responsibility for Government property due to loss, damage, destruction, or unreasonable wear or deterioration or unjustifiable consumption in the performance of the contract;

(k) any other correspondence affecting the status of Government property under the contract; and

(l) statement of closure of the contract property account.

§ 12–70.509 Evaluation and approval of contractor's property control system.

(a) The choice of the methods to be used for evaluation and approval of the contractors property control system is a matter of judgment by the Property Administrator, predicated on the nature and amount of Government property involved in any particular contract. Regardless of the methods used, it is the responsibility of the Property Administrator to determine that the contractor's system will meet the requirement of DOTPR Supplement 1 and other contract requirements as appropriate.

(b) It is normal contractor practice to provide for the control of property by means of written procedures that communicate the organization's standards, techniques, and instructions to operational personnel for uniform application. However, depending on the number of contractor employees and the nature, quantity, and value of the property, a contractor may not need written procedures for effective management of Government property. In such cases, the Property Administrator, if he agrees that written procedures are not required, will evaluate the adequacy of the contractor's system on the basis of the contractor's explanation of his controls and prepare a brief description of the applicable procedures for inclusion in the Contract Property Control File.

(c) Upon completing his evaluation of the contractor's system, the Property Administrator will prepare a written summary of his findings to support approval of the system or requirement for corrective action prior to such approval. The Property Administrator will forward to the contractor a listing of any deficiencies found as a result of the evaluation. The contractor will be requested to indicate within 30 days his willingness to correct the deficiencies or to forward to the Property Administrator a statement of his position thereon.

(d) When the Property Administrator is not successful in obtaining compliance with contract requirements, he will advise the Contracting Officer. If the Contracting Officer concurs with the Property Administrator, he will advise the contractor in writing of the changes or additions required in his property control system and will establish a schedule for accomplishment of the corrective actions. The contractor will be informed that approval of his property control sysem will be withheld (or withdrawn if previously approved) unless corrective action is accomplished within the specified period. Such notice will also advise the contractor that in the event approval of his property control system is withheld (or withdrawn if previously approved) his liability for loss or damage may be increased. If the contractor fails to make satisfactory progress for correction of the deficiencies in accordance with the schedule, the Contracting Officer will advise him in writing, with a copy to the Property Administrator, that approval of his property control system is, as the case may be, withheld or withdrawn.

(e) When the contractor's property control system is acceptable, the Property Administrator will so advise the contractor in writing. When the contract involves Government property at subcontractor plants or prime contractor secondary locations, and the controls for the property at such locations have been determined to be adequate, the approval will be expanded to include the procedures governing Government property at such locations.

§ 12–70.510 Review of Contractor's Property Control System During Contract Performance.

(a) While the contractor has an incurred obligation to comply, it is incumbent upon the Government to ensure that the contractor does in fact comply with the property control requirements of the contract. The preferred method for carrying out this responsibility is the periodic conduct by the Government of system reviews at the contractor's premises. The need for and frequency of such reviews should be based on case-by-case determinations, considering the particular circumstances relative to a given contract or contractor. When the Property Administrator feels that a system review is necessary, then he must arrange for the conduct of such a review by an appropriate means.

(b) Notwithstanding the requirements of paragraph (a) of this section, it is the continuing responsibility of the Property Administrator to be alert to any indications that the contractor's property control system may be deficient. Examples of such indications are as follows:

(1) Failure of the contractor to acknowledge receipt of Government furnished property;

(2) Failure of the contractor to provide notices of contractor acquisitions of Government property when the contract provides for such acquisition;

(3) Failure of the contractor to submit the annual physical inventory and financial property reports specified in DOTPR Supplement 1;

(4) Discrepancies in contractor's records and weaknesses in control as reflected by the contractor's physical inventory reports;

(5) Contractor's financial property reports do not reconcile with DOT financial control accounts;

(6) Andlysis of contractor's costs indicates consumption of material in excess of that considered reasonable;

(7) Inability of the contractor to furnish property listings when requested to do so; or

(8) Analysis of contractor's request for relief of responsibility due to loss or damage indicates inadequate control.

(c) When the Property Administrator has reason to believe that the contractor's property control system is deficient or inadequate, the Property Administrator must take prompt action to obtain correction of such problems. In some cases, discussions with the contractor may suffice. In other cases, it may be necessary to arrange for an on-site system review as discussed in paragraph (a) of this section. Another alternative is to request the conduct of an audit by the appropriate Government contract audit activity. If the situation demands, the procedures set forth in § 12–70.509(d) of this part will be applied.

(d) Records and accounts of Government property will be audited by the Government as frequently as conditions warrant or as may be specifically requested by the Contracting Officer. Audits may take place at any time during the performance of the contract, upon completion or termination of the contract, or at any time thereafter. Audits will include records maintained by the contractor and Government-maintained records for the property involved. Government personnel and the contractor are required to make all property records, including correspondence related thereto, available to the auditors.

Subpart 12–70.6—Vesting of Title to Equipment Under Research Contracts

§ 12–70.601 General.

(a) In accordance with the provisions of 42 U.S.C. 1892, DOT is authorized to transfer title to equipment acquired with research contract funds to nonprofit institutions of higher education and to other nonprofit organizations whose primary purpose is the conduct of scientific research. This statutory authority must be implemented by express provision in the Special Provisions of contracts with eligible contractors, permitting the Contracting Officer to transfer to the contractor title to equipment acquired with research contract funds at any time during the term of the contract or upon its completion or termination. The contract will reserve the right to require the contractor to transfer title to equipment costing $1,000 or more per unit to the Government or to a third party named by the Government, where the third party is eligible under existing statutes. The reservation will provide that the right may be exercised at any time prior to final payment under the contract.

(b) Title to equipment not acquired with research contract funds will not be transferred but will remain vested in the Government.

§ 12–70.602 Conditions of transfer.

In research contracts with eligible institutions and organizations, the Contracting Officer may, upon his own initiative or upon the request of the contractor, transfer title to equipment at any time during the term of the contract or upon its completion or termination. All transfers of title must be based upon a written determination by the Contracting Officer that transfer with respect to the specific items of equipment is consistent with the best interests of the Department. Until such time as title has been transferred, the property will be administered and controlled as "Government property" in accordance with this part and DOTPR Supplement 1. Upon transfer, such equipment ceases to be "Government property"; however, the transfer of title will be subject to the terms and conditions of the contract and the requirements described in DOTPR Supplement 1.

§ 12–70.603 Contracts performed at government installations.

Notwithstanding the provisions of § 12–70.602 of this part, when the contractor is performing at a Government installation and there will be a continuing need for the equipment at that location following completion of the contract, title to such equipment will not be vested in or transferred to the contractor.

Subpart 12–70.7—Disposition of Excess and Residual Contract Inventory

§ 12–70.701 General.

(a) Disposition of excess and residual contract inventory (hereinafter referred to as "contract inventory") must be accomplished in a timely manner and in accordance with statutory and regulatory requirements. Regulations governing the disposition of contract inventory are:

(1) Federal Procurement Regulations (FPR), Part 1–8;

(2) Federal Property Management Regulations (FPMR), Parts 101–43 through 101–45;

(3) DOT Procurement Regulations (DOTPR); and

(4) Other DOT regulations as referenced herein.

All actions taken by Contracting Officers with respect to disposition of contract inventory must be in strict conformance with the above cited regulations.

(b) Contracting Officers will issue disposition instructions expeditiously upon receipt of acceptable contract inventory reports. Contracts involving Government property cannot be closed out until all residual property has been accounted for and/or disposed of and the Government property file of the contract specifically noted to that effect.

(c) The disposal of nonseverable property will be governed by the provisions set forth in DOTPR § 12–70.302.

§ 12–70.702 Application of FPR, FPMR and other DOT regulations.

(a) FPR Subpart 1–8.5 sets forth policies and procedures for the disposition of termination inventory and may also be used for the disposition of contract inventory generally. Pursuant to the authority contained in FPR 1–8.000, FPR Subpart 1–8.5 will be utilized by the Department for the disposition of contract inventory generally.

(b) FPR Subpart 1–8.5 incorporates by reference various requirements and procedures of the FPMR pertaining to disposition of Government property, some of which are optional in nature insofar as contract inventory is concerned. However, it is the policy of the Department, with respect to paragraphs (e) through (h) of § 12–70.704 to effect disposition of contract inventory in accordance with the same requirements and procedures set forth in the FPMR for disposition of other Government excess or surplus property.

(c) The reporting and screening of contract inventory for possible redistribution within DOT will be accomplished in the same manner, and to the same extent, as required for other types of excess property. Procedures applicable to such reporting and screening will be prescribed in issuances published under the Department's internal management directives system.

§ 12–70.703 Reports of contract inventory.

Requirements and procedures for the submission of contract inventory reports by contractors are set forth in DOTPR Supplement 1. Procedures applicable to the processing of such reports by Contracting Officers are set forth in FPR Subpart 1–8.5.

§ 12–70.704 Disposition methods and priorities.

Subject to the Government exercising its rights to require delivery of any items of contract inventory to satisfy known Government requirements, contract inventory will be disposed of by the following methods in the priority indicated:

(a) Purchase or retention of contractor acquired property at cost by prime contractor or subcontractors (see FPR Subpart 1–8.5);

(b) Return of contractor acquired property to suppliers (see FPR Subpart 1–8.5);

(c) Reassignment within the procuring activity (see § 12–70.702(c));

(d) Redistribution within DOT (see § 12–70.702(c));

(e) Utilization by other Government agencies (see FPMR Parts 101–32 and 101–43);

(f) Donation to eligible donees (see FPMR Part 101–44);

(g) Sale—including purchase at less than cost by prime or subcontractor (see FPMR Part 101–45);

(h) Abandonment or destruction (see FPMR Part 101–45).

Subpart 12–70.8—Contract Closure

§ 12–70.801 Actions by the property administrator.

(a) Upon completion or termination of a contract, the Property Administrator must monitor the actions of the contractor and the Government with respect to the return, transfer, or other disposition of Government property. Prior to closing of the contract, the Property Administrator will determine that:

(1) All Government property provided under the contract has been properly accounted for;

(2) Disposition of Government property has been properly accomplished and documented;

(3) Adjustment documents, including request of the contractor for relief from responsibility, have been processed to completion;

(4) Proceeds from disposals or other property transactions, including adjustments, have been properly credited to the contract or paid to the Government as directed by the Contracting Officer;

(5) All questions as to title to property fabricated or acquired under the contract have been resolved and appropriately documented; and

(6) The Contract Property Control File is complete and ready for retirement.

(b) Upon completion of the above actions, the Contract Property Control File will be annotated accordingly and retired with the contract file.

Subpart 12–70.9—Contract Clauses, Government Property

§ 12–70.901 Contract clauses.

Contract clauses and guidance as to their use in specific types of contracts may be found in the following sections:

(a) 12–7.151–8 Fixed Price Supply Contracts,

V 42 174 SEP 8 77 UMI

(b) 12-7.203-21 Cost Reimbursement Type Supply Contracts.

(c) 12-7.303-7 Fixed Price Research and Development Contracts.

(d) 12-7.402-25 Cost Reimbursement Type Research and Development Contracts.

(e) 12-7.651-5 Fixed Price Construction Contracts.

(f) 12-7.5201-9 Fixed Price Vessel Repair, Alteration or Conversion Contracts.

PART 12-99—DEPARTMENT ORDERS

§ 12-99.000 Scope of part.

This Part contains the following Departmental orders and notices which pertain to procurement:

DOT 1210.5	DOT Public Affairs Management Manual (02/06/74) Chapter I, "Release of Information".
DOT 1340.5B	Contracts Information System (01/12/73).
DOT 4000.1A	Logistics and Certain Logistics-Related Reporting Requirements (05/09/72).
DOT 4200.4	Unsolicited Contract Proposals (12/27/67).
DOT 4200.5	Debarred Bidder's List (01/15/68).
DOT 4200.6C	Field Contract Inspection Staffs (06/23/75).
DOT 4220.1A	Authority to Make Contractual Commitments (09/25/68).
DOT 4220.1A	Prefixes for Department of Transportation Contract Numbers (04/05/71).
DOT 4400.3	Establishment of Department of Transportation Procurement Regulations (06/15/68).
DOT 4200.9	Approval of Acquisition of Major Systems (09/07/72).
DOT 4200.10	Sole Source Review and Approval (09/07/72).
DOT 4200.11	Source Selection (09/07/72).
DOT 4200.12	Review of Proposed Contract Awards (09/07/72).

Exhibit A—Property Condition Codes

Part 1—Introduction

S1-100 *General.*

(a) This Manual sets forth the basic requirements to be followed by contractors in establishing and maintaining control over Government property provided pursuant to the terms of contracts with the Department of Transportation. To to extent of any inconsistency between this Manual and the terms of the contract under which the Government property is provided the terms of the contract will govern. The contractor shall be directly responsible for and accountable for all Government property in accordance with the provisions of the contract, including property provided under such contract which may be in the possession or control of a subcontractor.

(b) Pursuant to the terms of a contract, the Government may acquire a lien or title to property upon the making of partial, advance, or progress payments to the contractor. Property to which the Government has acquired a lien or title solely as a result of such payments will not be subject to the provisions of this Manual. When lien or title is acquired solely as a result of such payments, the provisions of the partial, advance, or progress payments clauses will apply, including any modifications to such clauses as may be contained in the contract.

(c) The contractor shall establish and maintain a system (in accordance with the provisions of this Manual) to control, protect, preserve, and maintain all Government property. This system shall be reviewed and, if satisfactory, approved in writing by the assigned Property Administrator. The contractor shall maintain and make available such records as are required by Part 3 of this Manual and must account for all Government property until relieved of responsibility therefor in accordance with Part 2 of this Manual. Liability for loss, damage, or excessive use of property in a given instance will necessarily depend upon all the circumstances surrounding the particular case and must be considered and determined in accordance with the provisions of the contract. The contractor shall furnish all necessary data to substantiate any request for discharge from responsibility.

(d) The contractor shall require any of his subcontractors who are provided Government property under the prime contract to comply with the provisions of this Manual. Procedures for assuring subcontractor compliance shall be included in the contractor's approved property control system.

(e) In the event any portion of the contractor's property control system is found to be inadequate upon review by the Property Administrator, any necessary corrective action shall be accomplished by the contractor prior to approval of the system.

(f) When Government property is disclosed to be in the possession or control of the contractor but not provided in accordance with the provisions of any contract, the contractor shall, as promptly as possible, (1) record such property according to the established property control procedure, and (2) furnish the Property Administrator with all known circumstances and factual data pertaining to its receipt and a statement as to whether there is a need for retention of such property.

(g) The Contractor shall report to the Property Administrator all Government property in excess of the amounts needed to complete full performance under the contract pursuant to which it was provided, or other existing contracts which authorize the use of such property, within 30 days after disclosure of the condition.

S1-101 *Definitions.*

As used in the Manual: (a) "Accessory item" means an item which facilitates or enhances the operation of equipment but which is not essential for its operation, such as remote control devices.

(b) "Auxiliary item" means an item without which the basic unit of equipment cannot operate, such as motors for pumps and machine tools.

(c) "Capital property" means real property and capitalized equipment.

(d) "Capitalized equipment" means personal property of a nonexpendable nature having a unit acquisition cost of $200 or more.

(e) "Custodial records" means written memoranda or identifying checks of any description or type used to control items issued from tool cribs, tool rooms, stockrooms, etc., such as requisitions, issue hand receipts, tool checks, stock record books, etc.

(f) "Discrepancies incident to shipment" means all deficiencies incident to shipment of Government property to or from a contractor's facility whereby differences exist between the property purported to have been shipped and the property actually received. Such deficiencies include, but are not limited to, loss, damage, destruction, improper status and condition coding, error in identity or classification, and improper consignment.

(g) "Educational or other nonprofit organization" means any corporation, foundation, trust, or other institution operated for scientific or educational purposes, not organized for profit, not any part of the net earnings of which inures to the profit of any private shareholder or individual.

(h) "Government property" means all property, both real and personal, owned by or leased to the Government or acquired by the Government under the terms of a contract. However, the term "Government property" does not include property to which the Government has acquired a lien or title solely as a result of partial, advance, or progress payments. Government property includes both Government-furnished property and contractor-acquired property as defined below:

(1) Government-furnished property is property in the possession of, or acquired directly by, the Government and subsequently delivered or otherwise made available to the contractor.

(2) Contractor-acquired property is property procured or otherwise provided by the contractor for the performance of a contract, title to which is vested in the Government.

(i) "Individual item record" means a separate card for or document utilized to account for one item of property.

(j) "Material" means property which may be incorporated into or attached to an end item to be delivered under a contract or which may be consumed or expended in the performance of a contract. It includes, but is not limited to, raw and processed material, parts, components, assemblies, and small tools and supplies which may be consumed in normal use in the performance of a contract. It also includes items of a nonexpendable nature with a unit acquisition cost of less than $50, unless the Government has designated any such items to be classified as noncapitalized equipment.

(k) "Noncapitalized equipment" means personal property of a nonexpendable nature having a unit acquisition cost of $50 or more but less than $200, and other items of personal property regardless of cost when so designated by the Government.

(l) "Nonexpendable" means items of Government personal property which:

(1) Have a unit acquisition cost of $50.00 or more;

(2) Have a life expectancy of one year or more;

(3) Retain their identity when put into use; and

(4) Are not consumed in the performance of work on the contract.

(m) "Property account" means the official records of the Government property provided to a contractor which are established and maintained under the provisions of this Manual. Separate property accounts will be maintained on an individual contract basis.

(n) "Property Administrator" means the individual designated, in writing, by appropriate authority to administer the contract requirements and obligations relative to Government property. He is an authorized representative of the Contracting Officer. When a specific individual has not been designated as Property Administrator, the Contracting Officer is the Property Administrator.

(o) "Provide" as used in the context of such phrases as "Government property provided to the contractor" and "Government-provided property," means either to furnish, as in "Government-furnished property," or to acquire, as in "contractor-acquired property."

(p) "Real property" for purposes of accounting classification means:

(1) Land and rights therein;
(2) Ground improvements;
(3) Utility distribution systems;
(4) Buildings; and
(5) Structures.

(q) "Salvage" means property which because of its worn, damaged, deteriorated or incomplete condition, or specialized nature, has no reasonable prospect of sale or use as serviceable property without major repairs or alterations, but which has some value in excess of its scrap value.

(r) "Scrap" means property that has no reasonable prospect of being sold except for the recovery value of its basic material content.

(s) "Stock record" means a perpetual inventory form of record which shows, by nomenclature, the quantities received and issued and the balances on hand.

(t) "Utility distribution system" means a system (including distribution and transmission lines, substations, and installed equipment forming an integral part of the system), by which gas, water, steam, electricity, sewage, or other utility services are transmitted between:

(1) Outside of the building or structure in which the services are used, and

(2) The point of origin or disposal, or the connection with some other system.

S1-102 *Segregation or Commingling of Government Property and Contractor's Property.*

Ordinarily, Government property, particularly material, should be segregated and kept physically separate from contractor-owned property at all times. However, when advantageous to the Government and consistent with the contractor's authority to use such property, the property may be commingled:

(1) When the Government property is clearly identified and recorded as Government property; or

(2) When scrap of a uniform nature is produced from both Government-owned and contractor-owned materials and physical segregation is impracticable, or when scrap produced from Government-owned materials is insignificant in consideration of the cost of segregation and control; or

(3) When otherwise approved by the Property Administrator.

S1-103 *Written Property Control Procedures.*

It is normal contractor practice to provide for the control of property by means of written procedures that communicate the organization's standards, techniques, and instructions to operational personnel for uniform application. However, depending on the number of contractor employees and the nature, quantity, and value of the property, a contractor may not have a need for written procedures for effective management of Government property. Immediately after the award of an initial contract involving property, the contractor shall forward to the Property Administrator the name, title, address, and telephone number of the contractor's representative to contact for review and discussion of the proposed property control system. If the Property Administrator determines that written property control procedures are not required, the contractor will be so advised.

S1-104 *Audit of Property Control System and Accounts.*

The contractor's Government property control system and accounts will be audited by the Government as frequently as conditions warrant. Audits may take place at any time during the performance of the contract, upon completion or termination of the contract, or at any time thereafter, during the period the contractor is required to retain such records. The contractor shall make all such records, including correspondence related thereto, available to the auditors.

Part 2—Contractor's Responsibility

S1-200 *General.*

This part covers to the extent not otherwise provided in the contract: (1) The duties and responsibilities of the contractor with respect to Government property; (2) the obligations of the contractor with respect to the control of Government property, both physically and administratively; and (3) the liability of the contractor for Government property lost, damaged, or destroyed, or for which the contractor is otherwise unable to account.

S1-201 *Assumption of Responsibility.*

A contractor is responsible for all Government property in his possession or control in accordance with the terms of the contract, including property provided under such contract which may be in the possession or control of a subcontractor. Sources from which Government property may be furnished or acquired are as follows:

(a) *Shipments from Government Activities or Other Sources.* Government property may be shipped to a contractor from agencies of DOT, other Government activities, other contractors, or suppliers. For the purpose of this Manual, the contractor becomes responsible for such property upon delivery of the property into his custody or control. The Government will furnish the contractor with copies of documents necessary to permit the contractor's property records to accurately reflect the transaction.

(b) *Direct Purchase by the Contractor.* For purposes of property control within the scope of this Manual, it will be considered that property purchased by the contractor, for which reimbursement is to be requested, becomes Government property upon its receipt by the contractor. However, this provision will not be deemed to alter or modify contractual provisions relating to passage of title. Direct purchases will be subject to a determination by the contracting officer that the items are allocable to the contract involved and are reasonably necessary therefor.

(c) *Withdrawal from Contractor-Owned Stores.* For purposes of property control, within the scope of this Manual, property withdrawn from contractor-owned stores, for direct charge to the contract, will be considered Government property at the time of approval of the claim for reimbursement, or at the time of issuance for use of such property for the performance of the contract, whichever is earlier.

(d) *Contract Provisions, Termination, Contract Changes.* Pursuant to specific contractual provisions or as a result of termination of a contract, or change orders issued under a contract, the Government may acquire title to property. For purposes of property control, such property will, unless otherwise provided by the contract, be considered Government property upon acceptance of title by the Government.

S1-202 *Evidence of Receipts of Government Property.*

Immediately upon receipt of any Government-furnished property the contractor shall sign and return the Government transfer document to the Property Administrator. For contractor-acquired capital property, the contractor shall submit reports in accordance with S1-203 of this Manual.

S1-203 *Report of Property Purchased or Fabricated.*

As a condition to reimbursement of costs incurred in the purchase or fabrication of capital property, the contractor shall submit itemized reports of such purchases or fabrications. Each item shall be adequately described, including unit cost. Reports shall be provided by the contractor not later than the time he submits his application for payment (public voucher) for the property. Upon request of the Government, the contractor shall submit supporting data for any material cost or noncapitalized equipment included in the voucher.

S1-204 *Discrepancies Incident to Shipment.*

(a) *Government - Furnished Property.* When overages, shortages, or damages are discovered upon receipt of Government-fur-

V 42 174 SEP 8 77 UMI

nished property, the contractor shall provide a statement of the condition and the apparent causes to the Property Administrator. When the quantity or description of property received by a contractor differs from the quantity or description denoted as shipped on the Government transfer document, only that quantity, or property, actually received shall be recorded on the official records of the contractor.

(b) *Contractor - Acquired Property.* The contractor shall take all actions necessary to adjust shortages, overages, or damages in shipment of contractor-acquired property from a vendor or supplier except in those instances where the shipment has moved via Government bill of lading and carrier liability is indicated. In the latter event, the contractor shall report the instance in accordance with paragraph (a) of this section.

S1-205 *Relief from Responsibility.*

Subject to specific instructions of the Contracting Officer, and unless otherwise provided for in the contract, the contractor will be relieved of his property control responsibility for Government property by the following:

(1) *Consumption of Property in the Performance of the Contract.* To the extent that the Property Administrator determines that property has been consumed or expended for proper purpose and in reasonable amounts in the performance of the contract;

(2) *Shipment of Government Property from a Contractor's Facility.* When Government property is shipped from the contractor's facility (except when shipment is to a subcontractor or other location of the contractor) pursuant to the instructions of the Contracting Officer or the Property Administrator;

(3) *Retention by the Contractor.* When the contractor retains, with Contracting Officer approval, Government property for which the Government has received consideration;

(4) *Sale of Property.* For Government property sold pursuant to instructions of the Contracting Officer or the Property Administrator, provided that proceeds from such sale have been received by or credited to the Government;

(5) *Determination by the Contracting Officer.* For Government property which is lost, damaged, destroyed, or consumed in excess of that normally anticipated in a manufacturing, processing, or research operation, and for which the Contracting Officer has determined the extent of liability, if any, of the contractor; *Provided,* That:

(i) Such determination is furnished to the contractor in writing;

(ii) The Government has been reimbursed where required by the determination; and

(iii) Proper disposition of property rendered unserviceable by damage has been accomplished, and appropriate cross-reference is recorded on the determination as to the shipping documents or other documents evidencing disposal; and

(6) *Transfer of Title.* When title to equipment has been transferred to the contractor in accordance with 42 U.S.C. 1892 and thereby ceases to be Government property. However, certain obligations attach to contractor-owned property acquired with contract funds as set forth in Part 7 of this Manual.

S1-206 *Contractor's Liability.*

(a) *Property Discrepancies.* Subject to the terms of the contract, the contractor may be liable when shortages of Government property are disclosed or when Government property is lost, damaged, or destroyed or when there is evidence of unreasonable wear or deterioration or unjustifiable consumption in the performance of the contract.

(b) *Report Requirements.* The contractor shall report all cases of loss, damage, or destruction of Government property in his possession or control to the Property Administrator as soon as such facts become known or when requested by the Property Administrator. The report shall contain all factual data as to the circumstances surrounding such loss, damage, or destruction. A similar report shall be furnished when completed products or end items are lost, damaged, or destroyed while such property is in the possession or control of the contractor. Any loss that may be due to theft must be reported immediately to the local police and the nearest field office of the Federal Bureau of Investigation by the contractor or subcontractor.

(c) *Subcontractor's Liability.* The contractor shall require any of his subcontractors having Government property in their possession or control, which is accountable under the contract, to report to him all instances of loss, damage, or destruction of such Government property. Further procedures shall be in accordance with that prescribed in paragraphs (a) and (b) of this section.

Part 3—Records of Government Property

S1-300 *General.*

This part establishes minimum requirements for records to be established and maintained by the contractor for Government property in his possession or control.

(a) *Policy.* It is the Government's policy to rely upon contractor property control records and to designate and use such records as the official contract records unless an exception has been authorized due to special circumstances. The contractor shall establish and maintain adequate control records, either manual or mechanized, in accordance with the requirements of this Manual for all Government property provided under a contract, including property provided under such contract as may be in the possession or control of a subcontractor. When the subcontractor has a property control system approved by the Government for Government property provided under the subcontractor's own prime contracts, the contractor will utilize records created and maintained in accordance with such approved system unless otherwise directed by the Property Administrator.

(b) *Financial Control System.* The contractor's property control system shall provide financial accounts for Government property (capital and noncapital) in the contractor's possession or control, as prescribed in S1-309(a) of this Manual. The system shall be subject to internal control standards and be supported by property records in the manner described in this Part 3.

(c) *Property Records.* The official records shall be kept in such condition that at any stage of completion of the work under a contract the status of Government property can be readily ascertained.

(1) Separate property records for each contract shall be maintained. Contractors shall furnish the Property Administrator with the name and title of the individual who will have cognizance over all Government property in the contractor's possession and who will be responsible for maintenance of property records.

(2) Property records of the same type which would have been established for components if acquired separately shall be established for such usable components which are permanently removed from items of Government property, as a result of modification, or otherwise.

(3) The contractor's property control system shall contain an adequate locator system or techniques to permit the location of any item of Government property within a reasonable period of time after request therefor.

S1-301 *Pricing.*

Except as provided in paragraph (a) of this section, the contractor's property control system shall contain the unit acquisition price for each item of Government property recorded therein. It is a recognized practice of many contractors to record the unit acquisition price of property on other than the quantitative inventory record, thus requiring the use of supplementary records to ascertain unit prices. Under such circumstances, the supplementary records containing such information shall be identified and recognized as a portion of the official property records.

(a) *Contractor-Acquired and Contractor-Fabricated Property.* The unit acquisition price of contractor-acquired and contractor-fabricated property shall be determined in accordance with the system established by the contractor in conformance with generally accepted accounting principles and consistently applied. Generally, it is desired that separate unit prices be applied to work-in-process items fabricated or acquired by the contractor. However, if the contractor's accounting system is acceptable and if the maintenance of detailed cost records results in excessive accounting cost or is otherwise impracticable considering all circumstances, group pricing may be used for work-in-process inventory. Processed material, fabricated parts, components, assemblies, etc., charged to the contractor's work-in-process inventory, including items in temporary storage while awaiting processing, may be considered as work-in-process for the purpose of compliance with this requirement. Nothing in the foregoing lessens the requirement for quantitative property controls for work-in-process necessary for the proper protection of the Government's interest.

(b) *Government-Furnished Property.* The unit acquisition price of Government-furnished property will be determined by the Government and furnished to the contractor. Transportation and installation costs will not be considered as part of the unit price for this purpose. Normally, the unit price of Government-furnished property will be provided on the transfer document covering shipment of the property to the contractor. In the event the unit price is not provided on the document, action will be taken through the Property Administrator to obtain the information.

S1-302 *Records of Material.*

All Government material furnished to the contractor, as well as other material to which title has passed to the Government by reason of allocation from contractor-owned stores or purchase by the contractor for direct charge to a Government contract or otherwise, shall be recorded in accordance with the contractor's property control system, as follows:

(a) *Material Issued Directly Upon Receipt.* (1) Fixed-Price Contracts. In the case of Government-furnished material which is issued directly by the contractor upon receipt so as to be considered consumed under the contract, the documents evidencing receipt and issue maintained by the contractor will be accepted as property control records.

(2) Cost-Type Contracts. For material, whether Government-furnished or contractor-acquired, issued by the contractor directly so as to be considered consumed under the contract, the Government invoices, contractor's purchase documents, or other documentary evidence of acquisition and issue will be accepted as adequate property records.

(b) *Material Maintained in Stocks.* For material maintained by the contractor in stocks or stores, the contractor's property control system shall be such as to provide the following information:

(1) Contract number or equivalent code designation;

(2) Nomenclature or description of item (including National Stock Number when available);

(3) Quantity received;

(4) Quantity issued;

(5) Balance on hand;

(6) Posting reference;

(7) Date received or issued;

(8) Unit price; and

(9) Disposition action taken.

(c) *Consolidated Stock Record.* When a contractor has more than one Government contract under which Government material is provided, a consolidated record for material may be authorized by the Property Administrator; *Provided,* The total quantity of any item is allocated to each contract by contract number and each requisition of material from contractor-owned stores is charged to the contract on which the material is to be used. The supporting document or issue slip shall show the contract number or equivalent code designation to which the issue is charged.

(d) *Custodial Records.* Custodial records shall be maintained for sensitive items, tool crib items, guard force items, protective clothing, and other items for the use of individuals in the performance of their work under the contract.

S1-303 Records of Noncapitalized Equipment.

Except where individual item records are necessary for effective control, calibration, or maintenance, summary stock records may be maintained for noncapitalized equipment. The contractor's property control system shall be such as to provide the following minimum information:

(1) Contract number or equivalent code designation;

(2) Noun name of the item;

(3) Manufacturer and model/part number (including National Stock Number when available);

(4) Quantity received;

(5) Balance on hand;

(6) Posting reference and date of transaction;

(7) Unit price;

(8) Location; and

(9) Disposition.

In addition, where appropriate as determined by the Property Administrator, the serial number and/or Government identification number for each item shall be recorded in a permanent manner in the property records and, upon disposition, lined out or otherwise deleted from the record.

S1-304 *Records of Capitalized Equipment.*

(a) *Item Records.* The contractor shall maintain individual item records (manual or mechanized) of each item of Government-owned capitalized equipment which will provide the following minimum information:

(1) Name of the equipment manufacturer;

(2) Manufacturer's model/part number (including National Stock Number when available);

(3) Serial number and year built (when available);

(4) Government identification/tag number;

(5) Noun name of the item;

(6) Acquisition document reference and date;

(7) Location;

(8) Disposition document reference and date;

(9) Contract number or equivalent code designation; and

(10) Unit price. (Unit price will be reduced when accessory and auxiliary items are permanently separated from the basic item of capitalized equipment.)

(b) *Records of Accessory and Auxiliary Equipment.* Accessory and auxiliary equipment which is attached to or otherwise a part of an item of capitalized equipment or has been acquired for use in connection with a specific item shall be recorded on the record of the item of capitalized equipment. In the event the accessory or auxiliary item is not attached to, a part of, or acquired for use with a specific item of capitalized equipment, it shall be recorded as indicated in S1-303 or S1-304(a) of this Manual.

S1-305 *Records of Real Property.*

The contractor shall maintain a continuous itemized record of the description, location, acquisition cost, and disposition of all Government real property including unimproved real property, all alterations, and all construction, whether acquired by purchase, lease, or otherwise. The foregoing records shall be complete, show the original cost of the property and improvements and the cost of changes and additions thereto, and be appropriately classified as indicated in S1-101 (f) of this Manual.

S1-306 *Records of Scrap and Salvage.*

Unless the Property Administrator has determined that such records are not necessary, the contractor shall maintain records of all scrap and salvage generated.

(a) *Records of Scrap.* The contractor's property control system shall be such as to provide the following minimum information:

(1) Contract number, if practicable, or equivalent code designation;

(2) Scrap classification (material content);

(3) Quantity on hand;

(4) Unit of measure;

(5) Posting reference and date of transaction; and

(6) Disposition.

(b) *Records of Salvage.* The contractor's property control system shall be such as to provide the following minimum information:

(1) Contract number, if practicable, or equivalent code designation;

(2) Nomenclature or description of item (including National Stock Number, if available);

(3) Quantity on hand;

(4) Posting reference and date of transaction; and

(5) Disposition.

S1-307 *Records of Related Data and Information.*

The contractor shall maintain property control and accountability in accordance with sound business practice with respect to manufacturing or assembly drawings, installations, operation, repair, or maintenance instructions, or other similar data and information provided to the contractor by the Government. Other requirements set forth in this Manual are not applicable to such property unless specified in the contract or required by the Property Administrator.

S1-308 *Records of Completed Products.*

The contractor shall maintain a record of all completed products produced under the contract as follows:

(a) When there is not any lapse of time between Government inspection and acceptance of the completed products and shipment from the contractor's facility, the records shall, as a minimum, consist of a summary of quantities accepted or shipped. When end items are accepted by the Government and stored with the contractor awaiting shipment, the record shall identify quantities stored, location, and disposition action.

(b) On contracts which provide that completed products are to be retained by the contractor for further use under the contract, or other contracts, such items shall be considered Government-furnished property upon acceptance and shall be recorded as prescribed in this part.

(c) When completed products are returned to a contractor under the terms of a warranty clause, the contractor shall, as a minimum, maintain a record by contract setting forth a description of the items involved, quantities received and returned to the Government, and such other pertinent data as may be required to permit determination that a proper accounting for all property has been made.

S1-309 *Financial Control Accounts and Reports.*

(a) *Control System.* The contractor's property control system shall be such as to provide at any time for each contract the dollar amount of Government property for which he is accountable in the following classifications:

(1) Real property;

(2) Capitalized equipment;

(3) Noncapitalized equipment; and

(4) Material maintained in stocks.

The contractor's accounts shall be susceptible to reconciliation in totals and subtotals as to whether contractor-acquired or Government-furnished.

(b) *Financial Property Reports.* The contractor shall prepare a report as of July 31 each year, for each contract, showing the dollar amount of Government real property and capitalized equipment in the possession of the contractor and his subcontractors. Reports shall be prepared in the format shown below and shall be furnished to the Property Administrator not later than September 15 each year. Subcontract reports shall be consolidated with prime contract reports. The contractor shall certify that the reports have been reconciled and are in balance with the contract property records. If specifically requested by the Property Administrator, the contractor shall submit similar reports for Government noncapitalized equipment and material maintained in stocks.

	Real property	Capitalized equipment	Total
Balance beginning of period			
Acquisitions during period:			
Government furnished			
Contractor acquired			
Dispositions during period:			
Government furnished			
Contractor acquired			
Balance end of period			

Part 4—Identification

S1-400 *General.*

This part establishes minimum requirements for the identification and marking of Government property in the possession or control of the contractor. The contractor shall identify and record all Government property promptly upon receipt, except as may be exempted by this part, and it shall remain so identified. Assigned Government property identification numbers shall be recorded on all applicable receiving documents, shipping documents, disposal documents, and any other documents pertaining to the property control system. Such markings shall be removed or obliterated from the property involved when Government ownership is terminated.

V 42 I 174 SEP 8 77 UMI

S1-401 *Material and Noncapitalized Equipment.*

All Government material and noncapitalized equipment shall be identified as Government property except in those cases where:

(1) Material or noncapitalized equipment of the same type at the same location is not owned by the contractor, his employees, or other contracting agencies;

(2) Adequate physical control is maintained over sensitive items, tool crib items, guard force items, protective clothing, and other items issued for use by individuals in the performance of their work under the contract;

(3) Property is of bulk type or by its size or general nature of packing or handling precludes adequate markings; or

(4) The property is segregated and kept physically separate from contractor-owned property at all times.

S1-402 *Capitalized Equipment.*

(a) *Equipment Identification.* Unless already marked in compliance with these instructions, all Government capitalized equipment shall be marked by the contractor with a Government identification number except: when the size or nature of the equipment makes it impracticable, or the equipment is accessory or auxiliary and attached to or otherwise a part of an item of capitalized equipment and is required for its normal operations, in which case such item shall be entered and described on the record of the equipment to which it is attached or of which it is otherwise a part. Identification shall be effected by affixing a numbered decal direct to the equipment, or, when practicality dictates, by using indellible ink, acid, or electric etch, steel dies, or any other legible, permanent, conspicuous, and tamper proof method which will identify the equipment with the Government number assigned.

(b) *Position of Markings or Identification.* Identification shall be affixed on the main body of the item, not on a removable part. For practical purposes, identification should be placed where it is conspicuous and readily visible without requiring the item to be moved and where it will not interfere with the functioning, especially if it is a sensitive instrument. If the manufacturer's identification plate or label is in a readily accessible position, a position immediately above or below it is preferable to any other.

S1-500 *General.*

This part establishes minimum requirements for the physical inventory of Government property in the possession or control of the contractor.

S1-501 *Annual Inventories.*

The contractor shall perform an annual physical inventory of the following categories of Government property in his possession or control and shall require such inventories of any subcontractors that are in possession of Government property provided under the contract: (1) Capital property; (2) noncapitalized equipment; and (3) material maintained in stocks. The contractor's procedures for the performance of annual physical inventories constitute a necessary part of the contractor's property control system. For the purposes of this Manual, inventory consists of sighting, tagging or marking, describing, recording, and reporting the property involved, and reconciling the inventory results with the property records.

S1-502 *Reporting Results of Annual Inventories.*

The contractor shall promptly submit to the Property Administrator information as follows:

(1) A list on both a quantitative and monetary basis of all discrepancies disclosed by the inventory in each category of Government property;

(2) A signed statement that physical inventory of Government property under the contract was completed on a specified date and that the contractor's official property records were found to be in agreement with the physical inventory except for the discrepancies noted; and

(3) If specifically requested by the Property Administrator, a list of all items of capital property.

S1-503 *Inventories Upon Termination or Completion.*

Immediately upon termination or completion of a contract, the contractor shall perform a physical inventory adequate for disposal purposes of all Government property applicable to the terminated or completed contract. Further, the contractor shall cause each subcontractor to perform a physical inventory adequate for disposal purposes of all Government property in the subcontractor's possession or control which is applicable to the terminated or completed contract. Within 30 days after the contract's completion or termination, unless the Contracting Officer specifically approves an extension of time, the prime contractor shall submit a final inventory of Government property (including subcontractor property) in the form and detail as prescribed below:

(a) *Form.* Separate reports are required for Government-furnished property and for contractor-acquired property and for each of the following property categories:

(1) Real Property;
(2) Capitalized Equipment;
(3) Noncapitalized Equipment;
(4) Materials;
(5) Salvage; and
(6) Scrap.

(b) *Details Required.* Each item of capital property must be completely identified with sufficient detail to permit verification by reference to the covering reimbursement voucher or (if furnished by the Government) shipping or other documents. To the extent to which they apply, the following particulars are required for all items:

(1) Commercial description, adequate for screening and disposal purposes;
(2) Make, model, type, serial number, and National Stock Number when available;
(3) Government identification number;
(4) Quantity;
(5) Cost;
(6) Condition (use codes listed in Exhibit A of this Manual); and
(7) Location (contractor's facility or other site).

(c) *Copies Required.* Three copies of the inventory reports shall be submitted to the Property Administrator.

(d) *Certification.* The following certification signed by the contractor or an authorized official shall accompany each copy of the inventory schedules:

I do hereby certify as (Title) of (Name of Contractor) that the attached inventory reports are complete and correctly list and describe all items of property furnished to the contractor, or for which the contractor has been or will be reimbursed by the Government, for use in the performance of Contract No. ____ which as of this date have not been consumed in performance of this contract; and that I will immediately notify the Contracting Officer of any change affecting these inventory reports at any time prior to final disposition of the inventory.

(S) _____

Dated _____

(e) *Disposal of Property.* Disposal of property will be directed by the Contracting Officer, or a designated representative of the Contracting Officer, in accordance with the terms of the contract. The contractor shall not make disposition of any property except as so directed.

Part 6—Care, Maintenance, and Utilization

S1-600 *General.*

This part establishes minimum requirements as to care, maintenance, and utilization of Government property in the possession or control of the contractor. The contractor shall be responsible for the proper care, maintenance, and utilization of Government property in his possession or control from the time of receipt of the property until properly relieved of responsibility in accordance with the contract. The removal of Government property to storage, or its contemplated transfer, shall not relieve the contractor of these responsibilities.

S1-601 *Contractor's Maintenance Program.*

(a) *Policy.* The contractor's maintenance program (which shall be approved in accordance with Part 1 of this Manual) shall be such as to provide, consistent with sound industrial practice and the terms of the contract, for:

(1) Disclosure of need for the performance of preventive maintenance;
(2) Disclosure and reporting of need for capital type rehabilitation; and
(3) Recording of work accomplished under the program.

(b) *Preventive Maintenance.* Preventive maintenance is maintenance generally performed on a regularly scheduled basis to prevent the occurrence of defects and to detect and correct minor defects before they result in serious consequences. An effective preventive maintenance program shall consist of, but not be limited to, the following actions:

(1) Inspection of buildings at such periodic intervals as will assure detection of deterioration and the need for repairs;
(2) Inspection of equipment at such periodic intervals as will assure detection of maladjustment, wear, or impending breakdown;
(3) Regularly scheduled lubrication of bearings and moving parts in accordance with a lubrication chart or equivalent plan;
(4) Protection from exposure to deteriorating agents;
(5) Adjustments for wear, repair, or replacement of worn or damaged parts and the elimination of causes of deterioration of associated parts;
(6) Removal of sludge, chips, and cutting oils from equipment which will not be used for a period of time; and
(7) Proper storage and preservation of accessories and special tools furnished with an item of capitalized equipment but not regularly used with it.

(c) *Capital Type Rehabilitation.* The contractor's maintenance program shall be such as to provide for the disclosure and reporting of the need for major repair, replacement, and other rehabilitation work for Government property in the possession or control of the contractor.

(d) *Records of Maintenance.* The contractor's maintenance program shall provide for records sufficient to disclose the maintenance actions performed and deficiencies discovered as a result of inspections.

S1-602 *Utilization of Government Property.*

The contractor's procedures shall be adequate to assure that Government property will be utilized only for those purposes authorized in the contract.

S1-603 *Property in Possession of Subcontractors.*

The contractor shall require any of his subcontractors having Government property in their possession or control adequately to care for and maintain that property and assure that it is utilized only as authorized by the contract. Procedures necessary to assure the accomplishment of this responsibility shall be included in the contractor's approved property control system.

S1-604 *Property Excess to Contract Requirements.*

Government property which becomes excess to contract performance requirements shall be reported to the Property Administrator within 30 days. The contractor's excess declaration shall be prepared in the same manner as prescribed in S1-503 of this Manual. Disposal of excess property will be directed by the Contracting Officer, or a designated representative of the Contracting Officer, in accordance with the terms of the contract. The contractor shall not make any disposition of such property except as so directed.

Part 7—Passage of Title to Equipment Under Research Contracts

S1-700 *General.*

This part covers to the extent not otherwise provided in the contract or elsewhere in this Manual the obligations of the contractor with respect to property acquired with research contract funds, title to which has passed to him. In accordance with the provisions of 42 U.S.C. 1892, DOT is authorized to transfer title to equipment acquired with research contract funds to nonprofit institutions of higher education and to other nonprofit organizations whose primary purpose is the conduct of scientific research. This statutory authority is implemented by express provision in the Special Provisions of contracts with eligible institutions and organizations permitting the Contracting Officer to transfer to the contractor title to equipment acquired with research contract funds at any time during the term of the contract or upon its completion or termination. The contract will reserve the right to require the contractor to transfer title of equipment costing $1,000 or more per unit to the Government, or to a third party named by the Government, at any time prior to final payment under the contract.

S1-701 *Conditions of Transfer.*

In research contracts with eligible institutions and organizations, the Contracting Officer may, upon his own initiative or upon the request of the contractor, transfer title to equipment at any time during the term of the contract or upon its completion or termination. All transfers of title must be based upon a written determination by the Contracting Officer that transfer with respect to the specific items of equipment is consistent with the best interests of the Department. Until such time as title has been transferred, the property shall be administered and controlled as Government property in accordance with Parts 1 through 6 of this Manual. Upon transfer, such equipment ceases to be Government property, however, the transfer of title is subject to the terms and conditions of the contract and this Part 7.

S1-702 *Contractor's Obligations.*

Although equipment ceases to be Government property when title to it is vested in or transferred to the contractor, nonetheless the following obligations attach to the property and the contractor agrees to such obligations by accepting title thereto:

(1) *Utilization.* The contractor agrees to use the property for the benefit of research under the contract and any extensions or successor contracts thereto and to continue to use such property for the benefit of research of interest to the Government;

(2) *Charges with Respect to the Property.* The contractor is not permitted to charge for any depreciation, amortization, or use with respect to such equipment under any Government contract, any Government grant, or any subcontract under a Government contract;

(3) *Transfer of Title to Government.* With respect to each item of equipment having a unit acquisition cost of $1,000 or more, the contractor's ownership rights are qualified by the contractor's express agreement to transfer title to any such items to the Government, or to a third party designated by the Government, in accordance with any written request therefore issued by the Contracting Officer at any time prior to final payment under the contract;

(4) *Control of Property.* The contractor shall maintain a property control system which will provide for adequate identification, recording, location, utilization, maintenance, and physical inventory of equipment acquired with contract funds; and

(5) *Inventories Upon Completion or Termination.* Immediately upon completion or termination of the contract, the contractor shall perform a physical inventory of all contractor-owned equipment acquired with contract funds and having a unit acquisition cost of $1,000 or more. The inventory shall be performed, prepared, and submitted in the same manner as prescribed in S1-503 of this Manual.

DOTPR supplement 1, exhibit A—Property condition codes

[See S1-503 of this manual]

Code	Brief definition	Expanded definition
N-1	New—Excellent	New or unused property in excellent condition. Ready for use and identical or interchangeable with new items delivered by manufacturer or normal source of supply.
N-2	New—Good	New or unused property in good condition. Does not quite qualify for N-1 (because slightly shopworn, soiled, or similar), but condition does not impair utility.
N-3	New—Fair	New or unused property in fair condition. Soiled, shopworn, rusted, deteriorated, or damaged and its utility is slightly impaired.
N-4	New—Poor	New or unused property so badly soiled, rusted, mildewed, deteriorated, or damaged, that its utility is seriously impaired.
E-1	Used—Reconditioned excellent	Used property, but repaired or renovated and in excellent condition.
E-2	Used—Reconditioned good	Used property which has been repaired or renovated and, while still in good usable condition, has become worn from further use and cannot qualify for excellent condition.
E-3	Used—Reconditioned fair	Used property which has been repaired or renovated but has deteriorated since reconditioning and is only in fair condition. Further overhauling required or expected to be needed in near future.
E-4	Used—Reconditioned poor	Used property which has been repaired or renovated and is in poor condition from serious deterioration such as from major wear and tear, corrosion, exposure to weather or mildew.
O-1	Used—Usable without repairs—Excellent	Property which has been slightly or moderately used, no repairs required, and still in excellent condition.
O-2	Used—Usable without repairs—Good	Used property, more worn than O-1, but still in good condition with considerable use left before any important repairs would be required.
O-3	Used—Usable without repairs—Fair	Used property which is still in fair condition and usable without repairs; however, somewhat deteriorated with some parts (or portion) worn and should be replaced.
O-4	Used—Usable without repairs—Poor	Used property which is still usable without repairs, but in poor condition and undependable or uneconomical in use. Parts badly worn and deteriorated.
R-1	Used—Repairs required—Excellent	Used property, still in excellent condition, but minor repairs required (repairs would not cost more than 10 pct of acquisition cost).
R-2	Used—Repairs required—Good	Used property, in good condition but considerable repairs required. Estimated cost of repairs would be from 11 to 25 pct of acquisition cost.
R-3	Used—Repairs required—Fair	Used property, in fair condition but extensive repairs required. Estimated repair costs would be from 26 to 40 pct of acquisition cost.
R-4	Used—Repairs required—Poor	Used property, in poor condition and requiring major repairs. Badly worn, and would still be in doubtful condition of dependability and uneconomical to use if repaired. Estimated repair costs from 41 to 65 pct of acquisition cost.
X	Salvage	Property which because of its worn, damaged, deteriorated or incomplete condition, or specialized nature, has no reasonable prospect of sale or use as serviceable property without major repairs or alterations, but which has some value in excess of its scrap value.
S	Scrap	Property that has no reasonable prospect of being sold except for the recovery value of its basic material content.

CHILD MEDICAL ASSISTANCE PROGRAM

Penalty for Failure to Provide Early and Periodic Screening, Diagnosis, and Treatment

V 42 174 SEP 8 77 UMI

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Health Care Financing Administration

[45 CFR Parts 205, 249]

MEDICAL ASSISTANCE PROGRAM

Penalty for Failure To Provide Early and Periodic Screening, Diagnosis, and Treatment

AGENCY: Health Care Financing Administration, HEW.

ACTION: Proposed rule.

SUMMARY: This proposal would revise current rules on the financial penalty imposed on States that fail to carry out the child health screening program required under title XIX of the Social Security Act (Medicaid program). Experience with the existing regulation indicates a need for greater clarity and for updating certain provisions. The proposal clarifies the steps States must take to avoid the penalty, provides alternative ways of meeting requirements and specifies the circumstances under which the penalty will be applied.

DATES: Closing date for receipt of comments November 7, 1977. Please refer to MSA–157–P. Agencies and organizations are requested to submit comments in duplicate.

ADDRESSES: Address comments in writing to:

Administrator, Health Care Financing Administration, Department of Health, Education, and Welfare, P.O. Box 2366, Washington, D.C. 20013.

Beginning two weeks from today, the public may review the comments Monday through Friday of each week, from 8:30 a.m. to 5 p.m.

Department of Health, Education, and Welfare, Health Care Financing Administration, Room 5225, 330 C Street S.W., Washington, D.C. 202–245–0950.

FOR FURTHUR INFORMATION CONTACT:

Beatrice D. Moore, 202–245–6575.

SUPPLEMENTARY INFORMATION: The purpose of these proposed regulations is to revise the conditions implementing section 403(g) of the Social Security Act, which provides for a one percent penalty, applied to payments to a State under title IV–A of the Social Security Act (Aid to Families with Dependent Children), for failure to provide early and periodic screening, diagnosis, and treatment (EPSDT) for children under the State's Medical Assistance program.

A previous Notice of Proposed Rule Making (NPRM) was published on August 20, 1975 (40 FR 36378). Its purposes were to (1) clarify requirements with regard to State action necessary to implement the EPSDT program; (2) to facilitate State compliance with requirements in order to avoid the penalty; and (3) to strengthen basic structural support for an effective program of health care for children under 21.

Approximately 100 comments were received in response to the NPRM. In addition, meetings were held with representatives of 45 States and with interest groups and providers at which the following issues were discussed in depth: effective informing; follow-up and support services; timely delivery of EPSDT services; screening services requirements; and documentation. Analyses of comments and suggested alternatives derived from these activities have been taken into account in the amendments now being proposed.

Due to the large volume of comments on all provisions of the NPRM that reflect significantly different and frequently opposite points of view, the Department is publishing a second NPRM rather than final regulations. It is the Department's intent to consider comments on the current proposal, which is intended to synthesize and accommodate earlier public response, before publishing final regulations.

It is Department policy to publish a Notice of Intent to issue proposed rule making in order to involve the public in the rule making process during the drafting phase. However, that step is being omitted in the publication of this NPRM, since the Department believes that the intent of the Notice of Intent to develop regulations has already been met through the publication of an NPRM in August 1975 and subsequent meetings with States and other interested parties.

The following summary of major public comments on the 1975 NPRM indicates significant areas which the Department wishes to reconsider. The Department's response, as reflected in the current proposal, is also summarized.

(1) Commenters took the position that the 1975 NPRM was overly process-oriented and did not focus sufficiently on program outcomes or goals, such as improvement in health status or assuring delivery of EPSDT services to specified numbers of children.

The current proposal relates application of the penalty to administrative and service delivery outcomes (e.g., informing of families, initiation of treatment found necessary as a result of screening, provision of support services) that should produce desired program goals, rather than to actual achievement of broad program goals. The Department believes such an approach is more in keeping with the legislative authority, which requires that families be informed, screening be provided if requested, and follow-up treatment be provided if necessary, than an approach focusing on health-related outcomes would be. Further, after in-depth consideration of comments in this area, the Department determined that identification of health-related outcomes and related measures of health status, as well as specifying numbers of children to be served, would be essentially arbitrary and involve requirements over which States would have less control than the administrative and service delivery outcomes.

(2) Commenters felt the 1975 NPRM did not allow sufficient administrative flexibility for States or recognize sufficiently variations in health care delivery patterns.

The current proposal attempts to accommodate these comments by specifying timely delivery of EPSDT services in terms of one time period from request to initiation of treatment, rather than specifying numbers of days for each of the required activities to occur. The proposal also differentiates State responsibilities for families who request State assistance in obtaining EPSDT services and those who do not, and for families who receive EPSDT services from certain comprehensive care providers, or from a health care provider from whom they may usually receive health services. Although the proposal identifies certain actions which States must carry out, under each of these circumstances, ways in which such activities are to be accomplished are left to State discretion.

(3) Many commenters felt that the previous NPRM would take eligible children out of the mainstream of health care or make State Medicaid agencies responsible for activities that are more properly the responsibility of health care providers.

The current proposal specifically recognizes that EPSDT medical and health-related support services may be provided by certain comprehensive care providers under different procedures than those used by a State agency making arrangements for each EPSDT service. Thus, provision is made for distinguishing between State responsibilities and health care provider responsibilities for eligible individuals who are, or request to be, under the care of certain comprehensive care providers.

In addition, the proposal provides for the delivery of initial and periodic EPSDT services over the course of a year, but under the frequency intervals of the State's periodicity schedule, rather than within the shorter time period otherwise applicable under the proposal, in the case of families requesting EPSDT services under the care of the health care provider whom they usually receive health care services.

(4) Most commenters emphasized the value of verbal, face-to-face contact as an effective informing method and strongly discredited written informing when used alone. In addition, almost all States reported that verbal informing of the availability of EPSDT services is occurring at AFDC eligibility intake or with notification of eligibility, though the scope and intensity varies among, and sometimes within, States.

The current proposal requires verbal informing, in addition to written, of AFDC families who become eligible for the first time or after a period of ineligibility.

(5) Most commenters indicated a need for exceptions to time requirements imposed for EPSDT service delivery.

The current proposal provides such exceptions by making it clear that States are not responsible for the inaction of eligible families and by providing different time requirements depending on the pattern of service delivery.

(6) Proposed requirements related to periodicity of notification and services were mentioned by several commenters as administratively cumbersome and possibly could result in harassment of eligible families.

The current proposal retains, but further clarifies, these requirements, since the law requires State plans to provide for periodic screening services.

(7) A large number of comments was received from States in resistance to proposed documentation requirements.

Most resistance was based on misunderstanding of the intent and possible methods of meeting the requirements. The current proposal clarifies that documentation requirements may be met with any appropriate form of written evidence, such as claims forms, reports, case records, etc., that, as a whole, include the information necessary for assessing compliance. Further, such documentation need not all be available only at the State level, but may be maintained at the State, local, or provider level, as appropriate. Similarly, each activity documented may be produced by the person responsible for the underlying activity: one person would not be required to document all required informing, assistance, follow-up, and service delivery activities for an individual child. Finally, requirements for documentation have been retained in the current proposed changes, since the Department believes that documentation is essential to State accountability, and to provision of a more equitable and objective basis for determining whether or not a penalty is applicable than would a verbal, other non-written, or other clearly subjective method. It should be noted that the current proposal, as did the 1975 NPRM, requires documentation only for the administrative or service delivery outcomes identified by the proposed requirements.

As a whole, the proposed changes are intended to achieve a balance among legal requirements for specificity, State needs for administrative flexibility, and eligibles' needs for comprehensive, preventive health care. The Department recognizes that these objectives are often mutually contradictory and invites comments on the extent to which the proposed changes achieve an appropriate and feasible balance and suggestions of alternative ways of meeting these objectives if the proposal does not seem to have met our goal.

The major provisions of the current proposal are summarized as follows:

Section 205.147(a) provides requirements related to the legislative provision that all AFDC families be informed of the availability of EPSDT services under the State's Medicaid plan. The purposes of the requirements are to assure that families can make a judgment on whether or not they want to receive EPSDT services, to provide sufficient opportunity to families to make such a choice and to obtain State assistance in getting services, and to reinforce the periodic nature of preventive health services.

Thus, the proposed changes in informing requirements specify major subjects of information, both written and face-to-face explanations, reinforming and periodic notices, and State responsibilities for follow-up with families who do not answer the first offer of services. These requirements are intended to provide a mechanism whereby States clearly know of the family's desire to receive EPSDT.

Section 205.147(b) specifies a 120 day period from date of request for services during which screening must be completed and treatment initiated. This single period replaces the separate periods specified in both the currently effective regulation (45 CFR 205.146(c)) and the 1975 NPRM. It is intended to assure that the individuals eligible for EPSDT services receive screening and beginning treatment within a reasonable period, while allowing States flexibility to work out arrangements for screening and treatment on an overall schedule that can be adjusted as necessary for the individual components. The Department believes that a period of time less than 120 days would not allow sufficient time for States to arrange for delivery of the full screening package and initiation of all necessary follow-up treatment services required under EPSDT for all eligibles who may request services. On the other hand, the Department believes that a time period longer than 120 days would not provide sufficient assurance of delivery of all necessary EPSDT services for individuals who may become ineligible after four months. (The turnover rate for EPSDT eligibles is about 17 percent annually.) Further, a longer time period would not, the Department believes, provide sufficient assurance that follow-up treatment would be initiated soon enough after screening findings indicate that they are necessary to be effective or that arrangements for delivery of screening services would be carried out soon enough after the family's request to be responsive to their interest, which is essential to the family's motivation in seeking preventive health services and keeping appointments.

Section 205.147(b) also includes a requirement that States provide a minimum screening package which in the Department's judgment will assure that the most critical elements of child health care are rendered to eligible children at appropriate periods of their development (see the discussion of 45 CFR 249.10 below).

Section 205.147(c) provides that the 120 day period specified under paragraph (b) will not apply in instances where:

(1) The individual is under the care of a "comprehensive care" provider (see § 205.147(e));

(2) The individual is already under the care of a health care provider from whom they usually receive health care services (see § 205.147(f));

(3) The individual refuses treatment, or requests EPSDT services, but is determined to have already received them;

(4) The individual missed an appointment(s) scheduled with State assistance, or the family had not requested State assistance in getting services but wished to make their own arrangements, and the necessary appointments were not scheduled or not kept, and the State has made one follow-up offer, within 150 days of the request for EPSDT, of help with appointments and transportation for the missed or unscheduled appointment(s). In no case must a State continue to offer such assistance to an individual who has missed two or more appointments for the same services for that recorded request.

These exceptions, together with the added flexibility of treating the time period as a whole, are intended to provide for a variety of arrangements among States to achieve the services goal while recognizing situations in which the State's responsibility is reasonably changed or ended for purposes of compliance with requirements which impose a financial penalty if States do not meet them.

Thus, the Department believes that States have a responsibility to provide scheduling assistance, transportation, and follow-up services to eligibles in order to remove significant obstacles that program experience clearly indicates eligibles generally have in obtaining EPSDT services. However, limiting State responsibility to one follow-up attempt after missed appointments in general and to no more than one for an appointment for the same service recognizes a certain responsibility that eligibles must take in obtaining EPSDT services once the State has provided requested, necessary support services. Similarly, providing for eligibles who want to make their own arrangements for appointments, with some assurance of fall-back State support if they have been unable to do so for whatever reason, is also an attempt to achieve a balance between State and eligible responsibility. Both provisions further recognize that more intensive State offers of assistance than would be required by the current proposal may be perceived as coercive.

By providing exceptions to the 120 day requirement and to certain State responsibilities for assistance in the case of eligibles under the care of certain comprehensive care providers and other health care providers (see summary of § 205.147 (e) and (f) for a fuller discussion of these provisions), the proposal recognizes instances where the necessity for State management and coordination of the EPSDT service delivery process may be somewhat less where there is assurance that certain health care providers may reasonably carry out those responsibilities for EPSDT service delivery.

Section 205.147(e) recognizes that arrangements have been and can be made with "comprehensive care" providers under which the Federal requirements for EPSDT services can be met in a satisfactory or improved manner without direct State action in tracking an eligible's progress through the EPSDT process. Under the proposed changes, a State has fewer direct responsibilities in relation

V 42 174 SEP 8 77 UMI

to eligibles for purposes of compliance with the penalty provisions, if an eligible is under care of such a provider with whom the State Medicaid agency has an agreement. These providers may be grantees under title V of the Act (e.g, Children and Youth projects, Maternity and Infant Care programs), neighborhood health centers, private physicians, HMOs, Head Start projects, or other providers equipped to deliver comprehensive health care and certain related support services.

The agreement entered into between the Medicaid agency and such provider must cover all pertinent aspects of the EPSDT program and specify the respective responsibilities of each party. Under the agreement, the Medicaid agency's responsibilities, for penalty compliance purposes, must include:

(1) Assuring that the eligible requesting to be under the care of such provider for EPSDT services in fact reaches that provider for the first appointment for initial and periodic screening;

(2) Verifying that the eligible is under the provider's care; and

(3) Assuring transportation up to the limits of the Medicaid State plan provisions.

The comprehensive care providers must agree to deliver or arrange for all screening, diagnostic, and treatment (except dental) services and certain health related support services in order to qualify under this provision.

The Department believes that this provision can be important in encouraging full use of all existing comprehensive care providers in a State who provide services identical in content and equivalent in timing to the EPSDT program. Thus, the provision should stimulate more provider participation in the EPSDT program, as well as lessen the problems of poorly coordinated services that sometimes result from use of different providers for each service to a child. The items specified for inclusion in the agreements between the State and comprehensive care providers are intended to protect the interests of both parties and assure that appropriate care is actually given.

Section 205.147(f) recognizes that some health care providers who are capable of delivering comprehensive medical services may not be equipped or willing to enter into an agreement that includes responsibilities for health related support services, as provided for under § 205.147(e) of the proposal. However, families who are already receiving health care from such a provider may also wish to assure that their children receive all of the services to which they are entitled under EPSDT and may wish to continue under that provider's care for receipt of the full range of EPSDT services. In this case, the state may arrange for such providers to review their services over the year prior to the eligible's request for EPSDT and verify screening services and relevant treatment components already rendered. If the screening services appropriate to the eligible's age under the State's EPSDT periodicity schedule have not been rendered, and necessary treatment services not initiated, the State would be responsible for arranging for the delivery of services not yet received, either with that provider, or other provider if necessary. The State would also be responsible for arranging services not usually provided by private physicians or certain other comprehensive care providers—such as dental services—and for providing transportation and scheduling assistance, if requested by the family. Services under the State's periodicity schedule could be provided in the same manner. The intent of this provision is to recognize that the child may have been receiving care appropriate to his age and consistent with good health care practices, and that it is not necessary to require duplication of any services already provided, and not necessary that, if a child is already under a provider's care, the full range of screening be provided within the specific time span otherwise required (i.e., within 120 days of request) when the State agency is managing and coordinating EPSDT service delivery. The Department does consider it to be essential to the intent of the law and goals of the program that the required screening and necessary follow-up treatment services and the frequency intervals of the State's periodicity schedule must be identical for all eligibles requesting EPSDT.

Section 205.147(g) specifies the documentation States must make available to the Department as evidence that the regulatory requirements have been met. While specificity is necessary so that there will be no uncertainty as to what the required evidence is, the Department's intention, as stated under comment No. 7 above, is that States may work out, in the way most feasible under their particular system, where and how the documentation is produced. In addition, adjustments in the documentation requirements have been made for the special arrangements made with comprehensive care providers. In the past, some of the most frequent criticism of EPSDT monitoring both inside and outside the Department has been the inability in certain cases to determine effectively whether essential program requirements are being met by States. Without full knowledge of what actions States have taken to inform AFDC families of EPSDT and the subsequent provision of services where requested, the Department believes that it cannot adequately fulfill the Congressional mandate to assure the provision or arrangement of EPSDT services in each case in which recipients indicate an interest in receiving the benefits of the program.

Section 205.147(h) specifies the bases for determining application of the penalty. The Department believes that the underlying statutory authority for the penalty (section 403(g) of the Social Security Act) clearly requires that each eligible family shall be informed of the availability of the State's EPSDT services, and that each person requesting EPSDT services shall be provided such services if a State is to avoid the imposition of the penalty. For this reason, the Department has required 100 percent compliance with all of the statutory provisions related to the penalty.

The Department also recognizes that human and/or administrative systems error may cause a temporary delay or unanticipated failure to inform or arrange for services in an otherwise efficiently operated program or may result in an occasional failure to record the documented evidence necessary for determining whether federal regulatory requirements are met. Thus penalty determinations will be based upon compliance with two distinct requirements for timely informing and service delivery. The first will be based upon a State's obligation to comply with the various timing requirements set forth in proposed § 205.147(a), (b), (c), (e), and (f) which, for example, require that certain persons requesting EPSDT services have screening provided and necessary treatment initiated within 120 days of the initial request. Compliance with these provisions will be deemed satisfied if there is documented evidence, as required under the proposed section (g), that (a) the time limits and other applicable requirements are met in 90 percent of the cases reviewed by the Department on the basis of a statistically valid sample and (b) specific evidence of noncompliance exists in any case reviewed by the State has corrected that failure within 120 days of notification by HCFA that such a failure exists. This requirement means that if the Department finds, in the course of its reviews, more than 10 percent of the case files do not have the requisite documentation specified in paragraph (g), the penalty would be assessed notwithstanding a State's subsequent effort to demonstrate that the regulation's underlying requirements have in fact been met.

Ninety percent is believed to be a reasonable rate of compliance that takes into account the sort of unforeseeable error that is apt to occur because of an unanticipated systems failure or other type of State administrative error causing temporary delays in an otherwise efficiently operated program.

The Department believes that a level of compliance documented in less than 90 percent of the cases reviewed would, however, indicate that a State's EPSDT program is not operating at a capacity sufficient to carry out its full obligation under the law for all eligibles.

Providing for 120 days to correct specific failures of which the State is notified is thought to provide the means by which the needs of eligibles may be met, while providing States ample time within which to take the steps they are otherwise required to take in informing and/or providing services to these individuals. Compliance with this provision for a grace period will be based on a State's ability to comply with respect to all such individuals who fall within this section's coverage. The Department firmly believes that while it may not reasonably expect perfect adherence by States to the first set of time limits described above (e.g., the 120 day limitations), it must require perfect adherence for reasonably timely informing and service provision to all EPSDT eligibles for whom there is documented evidence that the regulatory requirements had not been met. Were the Department to adopt a requirement that all requests not responded to within the first set of time limits were to be responded to within an unspecified, and unlimited, period of time, there could be no certainty that all persons were assured of receiving requested EPSDT services because of the impossibility of monitoring such a provision. Adopting a regulation that contained such an open-ended provision would, in the Department's view, be in violation of the statute.

The two sets of time limits discussed above concerning timely service delivery are a direct response to the difficulties attending the existing penalty requirement that all services be provided "normally" within a 60 day period (45 CFR 205.146(c)). There has been frequent criticism that this current requirement is difficult to measure and subject to uneven enforcement. In its place, the Department believes that specific, readily measurable time limits would allow application of the penalty on an objective and equitable basis among all States.

In addition to determinations of compliance as discussed above, the proposal also specifies that the proposed requirement for an agreement, which meets specified conditions, between the State agency and certain comprehensive care providers must be met in 100 percent of the applicable cases reviewed.

Since the proposed requirements for such an agreement would require that such agreements be contractual and binding and the Department believes that such an agreement would be entered into in good faith by both parties, the proposal would not hold a State liable, for penalty purposes, for those activities otherwise required of the State but accepted by a comprehensive care provider under the agreement. The Department believes, however, that total adherence must be required for the existence of an agreement that meets the specified conditions in order to deem the statutory requirements for service delivery satisfied in the case of eligibles under the care of such providers. The Department also expects that State agencies will monitor such provider's adherence to the terms of such agreements just as it would any other legally binding contract that it has established.

The proposal indicates that the penalty shall be assessed upon a failure to comply with applicable requirements on a countywide basis. While this does nothing more than reflect the Department's current policy with respect to the imposition of the penalty, it is included in the proposal for purposes of clarity. The Department has always contended that one of the reasons for the statutory penalty provision was Congressional recognition that the compliance mechanism available to the Secretary to force program compliance in EPSDT under section 1904 of the Social Security Act was extremely harsh and, therefore, not a realistic approach to program enforcement. The traditional compliance mechanism has generally been viewed as addressing "substantial non-compliance", often on a State-wide basis. In light of the statute's clear reflection of the Congressional mandate that failure to inform any AFDC family or arrange for EPSDT services for any individual requesting such services results in penalty liability, the Department believes that the imposition of the penalty is supportable if there is a disclosure of any failure of a State to perform its required obligations with respect to any one individual. Accordingly, the Department, while believing it could be monitoring State's EPSDT performance and assessing penalties on the basis of findings smaller in scale than a county-wide basis, has chosen to review States' compliance with penalty requirements on a county-wide basis for purposes of administrative convenience and uniformity.

In Section 249.10, regulations on the program requirements for providing EPSDT services, changes from the previous NPRM include a new format for better comprehension; an additional requirement for State consultation with medical and dental organizations on certain program provisions; and, in the minimum screening package, addition of immunizations, developmental assessment, and rewording of "nutritional assessment." The consultation requirement has been developed in light of difficulties States have experienced in determining what constitutes an effective minimum screening package and periodicity schedule and adequate provision of vision, hearing, and dental treatment services. Advice from experienced professionals is considered essential in assuring that appropriate decisions are reached. Changes in the required screening services result from our determination that a developmental assessment is necessary to carry out the statutory requirement for screening for "mental" as well as physical health problems. "Nutritional assessment" was reworded after consultation with persons in the field. It is believed that "nutritional assessment" may have suggested a highly specialized procedure which is not appropriate to the initial screening process. The term "assessment of nutritional status" has been substituted to clarify that potential nutritional problems are an appropriate and essential area to be included in the screening services, but that a full diagnostic and treatment process would follow screening findings indicating that such services are necessary.

The addition of immunization to the screening package is a change from the previous NPRM inclusion of a "determination of immunization status." The Department strongly believes that because EPSDT is a preventive health program, in contrast to the remedial thrust of other Medicaid services, immunizations are more appropriate as an element of screening rather than treatment. In light of the potentially disabling effects of diseases that may occur in the absence of immunizations, and the concomitant costly treatment of those diseases, the Department believes it is essential that immunizations as a tool of preventive health care be provided at the screening stage of EPSDT rather than risk the uncertainties of treatment referrals that would otherwise occur.

In addition to proposing revisions as contained in this Notice of Proposed Rule Making to the current regulations implementing section 403(g) of the Social Security Act, the Department is also proposing to the Congress that certain legislative changes be made both in the statutory provision for a penalty related to the EPSDT program as well as in the legislative provision authorizing the EPSDT program under Title XIX of the Social Security Act. As a part of the Department's proposed legislative changes, the name of the program would be changed from Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) to Child Health Assessment Program (CHAP). The proposed revisions contained in this Notice are compatible with the goals and major features of the proposed legislation. These revisions would serve as a direct transition, to the extent possible under current law, between current program requirements and the CHAP proposal by: (a) Encouraging more effective informing methods; (b) facilitating the development of comprehensive, continuous care for EPSDT eligibles; (c) strengthening follow-up and support services; and (d) providing specific standards under which penalties may be assessed.

Also, the Department recognizes the limitations of process requirements in achieving the goals of the EPSDT program (as stated above) and the new legislation and prefers the use of performance standards, where possible. The new legislation proposes to make available a bonus for Medicaid administration for States which meet certain performance criteria. Thus, the Department feels that performance standards are feasible for purposes of a bonus, but not yet sufficiently developed for use in penalty assessment. Suggestions from reviewers for specific performance standards will be welcome.

Chapter II, Title 45 of the Code of Federal Regulations is amended as set forth below.

1. Part 205 is amended by revising §205.146(c) and by redesignating it as a new §205.147 to read as follows:

§ 205.147 Penalty for failure to provide early and periodic screening, diagnosis and treatment (EPSDT) of children under Title XIX of the Act.

Pursuant to section 403(g) of the Act, notwithstanding any other provision of this chapter, total payments to a State under title IV–A of the Act for any quarter of any fiscal year beginning on or after July 1, 1974, shall be reduced by 1 percentage point if the State fails to meet any of the following requirements with respect to informing, screening, diagnosing, and treating individuals eligible for EPSDT services and with respect to documenting implementation of such requirements.

(a) *Informing families and offering to provide or arrange for the provision of EPSDT services.* (1) Notification of the EPSDT services available under the State title XIX plan shall be made to each eligible family:

(i) Through written material and through a face-to-face contact with a person knowledgeable in explaining EPSDT services and their benefits, within 60 days following the authorization of AFDC payment for families becoming eligible for AFDC for the first time or after any period of ineligibility, and

(ii) Through written material, for families who have not requested EPSDT services, within one year of the date in which they were last notified, and through written material for families who have requested EPSDT services and whose children are eligible for a periodic screening based on the periodicity schedule under the State title XIX plan, within periods of time that fall within such schedule as it applies to children in such families;

(2) Both the written and face-to-face notification shall clearly and specifically describe EPSDT services in nontechnical language and shall include at least the following information:

(i) The nature and value of preventive health services;

(ii) That screening services should be received periodically; that the family can request information specifying which screening services will be provided upon request; at what ages after an initial screening; and in the case of families notified under paragraph (a)(1)(iii) of this section, that it is time for a periodic screening for the family's children and that the family should tell the State whether they want such periodic screening services;

(iii) The elements of the screening package available under the State title XIX plan;

(iv) That treatment services covered under the State title XIX plan will be provided for problems discovered through screening, including treatment for vision, hearing and dental problems;

(v) How EPSDT services can be obtained, including an offer to schedule appointments, if requested, for EPSDT services, and to provide, if requested, necessary transportation as required under § 249.10(a)(5)(ii) of this chapter;

(vi) That the family can obtain information from a specified local office identifying public and private providers which are located nearest to the family and who provide EPSDT services;

(vii) That the family is entitled to EPSDT services covered under the State's title XIX plan at no cost;

(viii) That the State will assure that the family receives EPDST services on a timely basis (as required in paragraphs (b) and (c) of this section);

(ix) That the family should tell the State whether it does or does not request EPSDT services and State assistance with scheduling and transportation.

(3) Either written or face-to-face notification must be adjusted to the language requirements of families who are blind or illiterate, cannot read English, or are not conversant in English.

(4) In the case of any family notified under paragraph (a)(1)(i) of this section, if such family makes no written or verbal response to the notification as to whether or not it requests EPSDT services and assistance with scheduling and/or transportation, the State shall, within 60 days of the date of such notification, make one attempt to obtain such a response, either by mail, face-to-face contact, or telephone.

(b) *Providing or arranging for EPSDT services for families requesting EPSDT.* All requested initial or periodic screening services must be completed, and all necessary followup treatment services covered under the State title XIX plan must be initiated, within 120 days of the family's request for initial or periodic EPSDT services for the eligible individual. Requested assistance with transportation must be provided in accordance with provision under the State's title XIX plan for assuring necessary transportation of recipients to and from providers of services, as required under § 249.10(a)(5)(ii) of this chapter. Screening services that must be provided upon request must include at least those specified under § 249.10(a)(3)(vi) of this chapter. For purposes of this requirement, initiation of treatment means that the first encounter has occurred between the eligible individual and health care provider(s) for purposes of beginning treatment services found necessary as a result of screening (and, as appropriate, diagnostic) findings.

(c) *Exceptions to requirements for timely service delivery.* The requirements under paragraph (b) of this section do not apply when the State can show that the following condition(s) exist:

(1) The family has requested to be under the care of a comprehensive care provider as described under paragraph (e) of this section; or

(2) The family has requested to be under the care of a provider from whom they usually receive health care services as provided for under paragraph (f) of this section; or

(3) In the case of requested screening services not having been completed within the 120 day period, the eligible individual has already received, within the range of time indicated by the periodicity schedule under the State's title XIX plan, the elements of the State's screening package appropriate to his age that were not completed, as well as the necessary related treatment services; or

(4) In the case of necessary treatment services not having been initiated within the 120 day period, the eligible individual declined the treatment service(s) indicated to be necessary by screening; or

(5) The family requested EPSDT services but did not request State assistance with scheduling appointments; the appointment(s) necessary to complete screening services and/or to initiate necessary treatment services were not scheduled or not kept; and the State made one attempt (after determining that such appointment(s) were not scheduled or kept) within 150 days of the request for EPSDT services to offer scheduling and transportation assistance for the necessary appointments; or

(6) The State provided requested assistance with scheduling EPSDT appointments, but the eligible individual failed to keep an appointment arranged by the State and the State made one attempt (after determining that such appointments were not kept) within 150 days of the family's request for EPSDT to offer scheduling and transportation assistance for each of the appointments that were missed. In cases where the eligible individual misses two appointments scheduled by the State for the same service, no further assistance from the State is required for that recorded request.

(d) *Referral for treatment services not covered under the State's plan.* States must provide referral assistance for treatment services not covered under the State's plan.

(e) *Providing or arranging for EPSDT services for families requesting EPSDT under the care of certain comprehensive care providers.* (1) Except as specified in this paragraph, the requirements contained in paragraphs (b)-(c) of this section do not apply in the case of eligible individuals who are or request to be under the care of:

(i) A Children and Youth project, Crippled Children's Service program, Maternal and Infant Care project, other title V grantee, or State health agency which has entered into an agreement with the State Medicaid agency under § 251.10 of this chapter; or

(ii) Other comprehensive health care provider (including a Head Start project) which has entered into an agreement identical to that required under § 251.10 of this chapter,

for providing or arranging for screening, diagnostic, and treatment services on a periodic basis as provided for under the State's title XIX plan.

(2) Such agreements must:

(i) Meet each condition under § 251.10 of this chapter;

(ii) Identify the estimated number of eligible children who are to be maintained under the care of the comprehensive care provider;

(iii) Provide that the first appointment for delivery of screening services will be scheduled to occur within 90 days of the date of request for EPSDT services under the care of the comprehensive care provider for eligible individuals not already under the care of such provider;

(iv) Specify the respective responsibilities of the comprehensive care provider and the Medicaid agency for notifying the family that, based on the periodicity schedule provided for in the State title XIX plan, it is time for a periodic screening for the eligible individual under care;

(v) Specify that the Medicaid agency is responsible for:

(A) Assuring necessary transportation as required under § 249.10(a)(5)(ii) of this chapter;

(B) Providing scheduling assistance requested by the family, within 90 days of the request for such assistance, with regard to the first appointment with the comprehensive care provider for eligible individuals not already under such provider's care and with regard to the first appointment for periodic screening with such provider;

(C) Arranging for appointments scheduled by the State at the family's request to occur within 90 days of the family's request for EPSDT services under the care of the comprehensive care provider;

(D) Determining within 90 days of the family's request for receiving EPSDT services under the care of the comprehensive care provider, whether the eligible individual is under such provider's care and, if not, making one attempt within the 90 days (after determining that the eligible individual is not under care) to offer scheduling assistance to the family; and

(vi) Specify the comprehensive care provider's responsibility for:

(A) Delivering or arranging for delivery (through referral to other health care providers) periodically, of all screening services required under the State title XIX plan and necessary follow-up diagnostic and treatment services, except that providing or arranging for dental services may, upon mutual agreement, remain the Medicaid agency's responsibility; and

(B) For appropriate health-related support services, including, specifically, follow-up with patients and other health care providers with whom arrangements have been made by the comprehensive care provider to assure that appointments are kept or rescheduled and to assure delivery of services that the comprehensive care provider has arranged for; and

(C) Maintaining specific reports of the screening, diagnosis, and treatment and health-related support services delivered to each eligible individual under its care.

(3) Where the comprehensive care provider does not agree to provide or arrange for the dental services required under § 249.10(a)(3)(iv) of this chapter, the State shall retain the responsibility for assuring the delivery of such services in accordance with the requests specified in paragraphs (a)–(d) of this section.

(f) *Providing or arranging for EPSDT services for families requesting EPSDT who are already under the care of a health care provider.* Except as specified in this paragraph, the requirements of paragraphs (b), (c), and (e) of this section do not apply. In the case of families who request EPSDT services under the care of a provider from whom they usually receive health care services, the State must within 120 days of such request for EPSDT services and, if applicable, within 120 days of the family's request for periodic screening services under that provider's care:

(1) Verify that all the elements of the State's screening package appropriate for the age of the eligible individual, as specified under the periodicity schedule provided in the State's title XIX plan, were completed and all necessary follow-up treatment services covered under the State title XIX plan were initiated by such provider during the year prior to such request, and

(2) If not, make one attempt after such determination to offer scheduling assistance to the family and to make arrangements with such provider or another provider, if necessary, so that within such 120 day period the screening services appropriate to the eligible individual's age under the State's periodicity schedule are completed and all necessary treatment services that had not been initated and that were discovered necessary upon completion of the screening package are initiated.

Requested assistance for transportation related to receipt of any EPSDT services from such provider must be provided, in accordance with provision under the State's title XIX plan for assuring necessary transportation, as required under § 249.10(a)(5)(ii) of this chapter. The 120 day requirement specified in this paragraph does not apply when the State can show that the conditions specified in paragraph (c)(4), (5), and (6) of this section exist.

(g) *Documentation.* States must make written documentation available at the State and/or local level, consisting of reports, claims forms, case records and/or other appropriate written evidence which must, when considered as a whole, include the following information:

(1) The screening services provided for under the State's Title XIX plan and the State's periodicity schedule for such screening services (as required under § 249.10(a)(3)(iv) of this chapter);

(2) The written material with which families are notified and material used by or available to persons notifying families through face-to-face contact in accordance with the content requirements under paragraph (a)(2) of this section;

(3) For each family, the date(s) of initial and annual or periodic notification through face-to-face contact and/or through written material, as required under paragraph (a)(1) of this section;

(4) For each family notified under paragraph (a)(1) of this section which has not requested EPSDT services, whether such family has specifically declined the services;

(5) For each applicable family, the date of the attempt to obtain a response to notification, as required in paragraph (a)(4) of this section;

(6) For each eligible individual for whom initial and periodic, as applicable, EPSDT services are requested (except for such requests described under paragraph (e) of this section related to certain comprehensive care providers):

(i) The date of the request(s) for EPSDT services, whether for initial or periodic services;

(ii) That scheduling and/or transportation assistance was requested or declined (whether in response to notification under paragraph (a)(1) of this section, to the follow-up attempt required under paragraph (a) of this section, and/or to the follow-up attempt after missed appointments specified under paragraph (c)(5) and (6) of this section), and that such assistance was provided if requested, or that no response has been made to the State's offer(s) of such assistance;

(iii) Where an appointment(s) scheduled with State assistance is missed, that an attempt was made to offer scheduling and transportation assistance for a second appointment, as required under paragraph (c)(6) and paragraph (f) of this section, and the date of such attempt;

(iv) Where State assistance with scheduling has not been requested and where it is determined that screening services have not been completed and/or necessary follow-up treatment services not initiated within 120 days of request for EPSDT services, that the attempt was made to offer scheduling and transportation services as required under paragraph (c)(5) and paragraph (f) of this section, and the date of such attempt;

(v) The initial and periodic screening services, as applicable, provided;

(vi) Screening findings (or screening and diagnostic findings if performed simultaneously) for each of the completed screening services;

(vii) The date(s) of initiation of treatment service(s) covered under the State's Title XIX plan and provided as a result of positive screening (or, as appropriate, diagnostic) findings, or the date that such services were declined; and the types of such treatment services provided; and

(viii) The source(s) of referral for treatment services not covered under the State's Title XIX plan.

(7) For each eligible individual who has requested EPSDT services under the care of a comprehensive care provider, as provided in paragraph (e) of this section:

(i) The agreement made under paragraph (e) of this section between the applicable comprehensive care provider and the Title XIX agency;

V 42 174 SEP 8 77 UMI

(ii) Written verification from such provider that the eligible individual is under its care and the date the individual was placed under care;

(iii) The date of request for EPSDT services under the care of such provider;

(iv) That scheduling assistance requested of the Medicaid agency was provided for an initial and, if applicable, a periodic screening appointment and the date such assistance was provided;

(v) Where it is determined that the eligible individual is not under the care of the comprehensive care provider, that the attempt was made to offer scheduling assistance as required under paragraph (e)(2)(v)(D) of this section; and

(vi) That requested transportation was provided within the scope of the agreement and the State Medicaid agency's responsibility for assuring necessary transportation under § 249.10(a)(5)(ii) of this chapter.

(h) *Application of the penalty.* (1) The penalty shall be applied on a quarterly basis where findings described in paragraph (h)(3) of this section indicate non-compliance with the requirements of this section.

(2) Determination of whether the penalty is applicable will be based on:

(i) Such reviews, including statistical sampling, as may be deemed necessary by HCFA, of documentation from States including documentation specified in paragraph (g) of this section; and

(ii) Such interviews of HCFA may deem necessary with persons responsible for face-to-face informing to determine compliance with the requirements under paragraph (a)(2) of this section.

(3) On the basis of evidence described in paragraph (h)(2) of this section, a State will be considered in compliance with the requirements of this regulation as specified in paragraphs (a)–(d), (e)(2)(vi) and (v), (e)(3) and (f)–(g) of this section if in all counties reviewed:

(i) There is evidence that requirements for informing and providing or arranging for EPSDT service delivery under paragraphs (a)–(d), (e)(2)(iv) and (v), (e)(3) and (f) are met in 90 percent of the instances reviewed; and

(ii) If the requirements of paragraph (h)(3)(i) of this section are met, and if there is specific evidence of non-compliance with applicable requirements in any of the cases reviewed, but there is evidence in all such cases that the State has corrected the failure to inform the family in accordance with paragraph (a) of this section or to provide EPSDT services in accordance with paragraphs (b)–(d), (e)(2)(iv) and (v), (e)(3) and (f) of this section within 120 days of the notification by HCFA to the State of such failure; and

(iii) An agreement as required in paragraph (e)(2) of this section is found to exist in 100 percent of the instances reviewed that are applicable to eligible individuals under the care of a comprehensive care provider as provided for under paragraph (e) of this section.

(4) On the basis of evidence described in paragraph (h)(2) of this section, the penalty shall be assessed where, in any county, any one or more of the requirements of paragraph (h)(3) of this section are not met.

(i) *Reconsideration of penalty imposition.* Whenever a penalty is imposed under section 403(g) of the Social Security Act and the provisions of this section, the State shall be entitled to, and upon request shall receive a reconsideration of the imposition of the penalty in accordance with section 1116(d) of the Social Security Act and § 201.14 of this chapter.

2. In § 249.10, paragraph (a)(3)(iv) is amended as set forth below:

§ 249.10 Amount, duration, and scope of medical assistance.

(a) *State plan requirements.* A State plan for medical assistance under title XIX of the Social Security Act must:

• • • • •

(3) With respect to the requirements of paragraphs (a) (1) and (2) of this section as they relate to the provision of early and periodic screening, diagnosis, and treatment under paragraph (b)(4)(ii) of this section, provide:

• • • • •

(iv) For making available to all eligible individuals under 21 years of age:

(A) Early and periodic screening and diagnosis to ascertain physical and mental defects; and

(B) Treatment of conditions discovered, within the State plan limits on the amount, duration, and scope of care and services; and

(C) Whether or not otherwise included under the State plan, eyeglasses, hearing aids, and other kinds of treatment for visual and hearing defects, and at least such dental care as is necessary for relief of pain and infection and for restoration of teeth and maintenance of dental health, subject, however, to such utilization controls as may be imposed by the State agency;

(v) For consultation with representatives of recognized medical and dental organizations of the State in the development of the periodicity schedule, the specific screening services applicable at each age, beginning with the neonatal period of age 21, and the amount, duration, and scope of dental, vision, and hearing treatment services to be provided under EPSDT;

(vi) For at least the following screening services, adjusted as appropriate for the age of the eligible individual (as determined by the State in accordance with paragraph (a)(3)(v) of this section) at the time of the request for screenings:

(A) Health and developmental history;

(B) Unclothed physical examination;

(C) Developmental assessment;

(D) Provision of immunizations appropriate for age and health history;

(E) Determination of nutrition status;

(F) Vision screening;

(G) Hearing testing;

(H) Laboratory procedures appropriate for age and population group; and

(I) Dental diagnostic services provided by a dentist, or dental screening based on clear and specific criteria for referral to a dentist for diagnostic and treatment services, and referral as indicated by such screening findings;

(vii) For a periodicity schedule which identifies the time periods, based on age or lapse of time between each delivery of the screening package, at which screening services under the State plan are to be provided after initial screening.

See § 205.147 of this chapter relating to reduction in Federal financial participation under Title IV-A of the Act for failure to provide early and periodic screening, diagnosis, and treatment of children.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Department of Commerce

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: One position of Director, Executive Secretariat, is excepted under Schedule C because it is confidential in nature.

EFFECTIVE DATE: September 9, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3314(a)(35) is added as set out below:

§ 213.3314 Department of Commerce.

(a) *Office of the Secretary.* • • •

(35) Director, Executive Secretariat.

• • • • • •

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77-26242 Filed 9-8-77;8:45 am]

PART 213—EXCEPTED SERVICE

Equal Employment Opportunity Commission

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This amendment (1) revokes under the automatic revocation system because they have been vacant for more than 60 days four positions of Special Assistant to the Chairman, and the positions of Secretary to each of two Special Assistants to the Chairman; and (2) excepts under Schedule C because they are confidential in nature the following positions: one position of Special Assistant to the Chair and one position of Secretary to the Chair.

EFFECTIVE DATE: September 9, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3377 (a) and (c) are amended and (d) is revoked as set out below:

§ 213.3377 Equal Employment Opportunity Commission.

(a) One Special Assistant to the Chair.

• • • • • •

(c) Two Secretaries to the Chair and one Private Secretary and Confidential Assistant to the Chair.

(d) (Revoked).

(5 U.S.C. 3301, 3302, E.O. 10577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc 77-26039 Filed 9-8-77;8:45 am]

PART 213—EXCEPTED SERVICE

General Services Administration

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: The position of Confidential Assistant to the Director of Administration is excepted from the competitive service under Schedule C because it is confidential in nature.

EFFECTIVE DATE: September 9, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3337(a)(22) is added as set out below:

§ 213.3337 General Services Administration.

(a) *Office of the Administrator.* • • •

(22) One Confidential Assistant to the Director of Administration.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77-26482 Filed 9-8-77;8:45 am]

PART 213—EXCEPTED SERVICE

Department of Health, Education, and Welfare

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: The following positions are excepted under Schedule C because they are confidential in nature: One position of Confidential Assistant to the Commissioner of Education, and one position of Staff Director, Federal Interagency Committee on the Integration of Human Service Delivery Systems.

EFFECTIVE DATE: September 9, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR § 213.3316(c)(3) is amended and (c)(15) is added as set out below:

§ 213.3316 Department of Health, Education, and Welfare.

• • • • • •

(c) *Office of Education.* • • •

(3) Two Confidential Assistants to the Commissioner of Education.

• • •

(15) Staff Director, Federal Interagency Committee on the Integration of Human Service Delivery Systems.

(5 U.S.C 3301, 3302, E.O 10577, 3 CFR 1954–1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77-26038 Filed 9-8-77;8:45 am]

PART 213—EXCEPTED SERVICE

Department of the Treasury

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: Two positions of Special Assistant to the Assistant Secretary (Legislative Affairs) are reestablished under Schedule C because they are confidential in nature.

EFFECTIVE DATE: September 9, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3305(a)(51) is amended as set out below:

§ 213.3305 Department of the Treasury.

(a) *Office of the Secretary.* • • •

(51) Three Special Assistants to the Assistant Secretary (Legislative Affairs).

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77-26040 Filed 9-8-77;8:45 am]

V 42 I 175 SEP 9 77 UMI

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

PART 82—EXOTIC NEWCASTLE DISEASE; AND PSITTACOSIS OR ORNITHOSIS IN POULTRY

Areas Released From Quarantine

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: The purpose of this amendment is to release portions of Honolulu County in Hawaii from the areas quarantined because of exotic Newcastle disease. Surveillance activity indicates that exotic Newcastle disease no longer exists in the areas quarantined. No areas remain under quarantine in the State of Hawaii.

EFFECTIVE DATE: September 2, 1977.

FOR FURTHER INFORMATION CONTACT:

Dr. M. A. Mixson, USDA, APHIS, VS, Federal Building, Room 748, Hyattsville, Md. 20782 (301-436-8073).

SUPPLEMENTARY INFORMATION: This amendment excludes portions of Honolulu County in Hawaii from the areas quarantined because of exotic Newcastle disease under the regulations in 9 CFR Part 82, as amended. Therefore the restrictions pertaining to the interstate movement of poultry, mynah and psittacine birds, and birds of all other species under any form of confinement, and their carcasses and parts thereof, and certain other articles from quarantined areas, as contained in 9 CFR Part 82, as amended, will not apply to the excluded areas.

Accordingly, Part 82, Title 9, Code of Federal Regulations, is hereby amended in the following respects.

In § 82.3, paragraph (a)(1) relating to the State of Hawaii is deleted.

(Secs. 4–7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791–792, as amended; secs. 1–4, 33 Stat. 1264, 1265, as amended; secs. 3 and 11, 76 Stat. 130, 132; 21 U.S.C. 111–113, 115, 117, 120, 123–126, 134b, 134f; 37 FR 28464, 28477; 38 FR 19141.)

The amendment relieves certain restrictions no longer deemed necessary to prevent the spread of exotic Newcastle disease, and must be made effective immediately to be of maximum benefit to affected persons. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and unnecessary, and good cause is found for making it effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 2d day of September 1977.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

J. K. ATWELL,
Acting Deputy Administrator, Veterinary Services.

[FR Doc.77-26418 Filed 9-8-77;8:45 am]

SUBCHAPTER E—VIRUSES, SERUMS, TOXINS, AND ANALOGOUS PRODUCTS; ORGANISMS AND VECTORS

PART 113—STANDARD REQUIREMENTS

Miscellaneous Amendments

AGENCY: Animal and Plant Health Inspection Service (APHIS).

ACTION: Final rule.

SUMMARY: This amendment will clarify the second stage testing provisions for potency used in evaluating Encephalomyelitis Vaccine. The second stage test requirement for a product when one fraction thereof is found to be acceptable by the first stage test is not clear. This amendment clarifies this requirement.

EFFECTIVE DATE: This amendment becomes effective September 9, 1977.

FOR FURTHER INFORMATION CONTACT:

Dr. R. J. Price, 301–436–8245.

SUPPLEMENTARY INFORMATION: The test used for evaluating Encephalomyelitis Vaccine for potency, which is found in § 113.127(b), is a two stage test. The first stage is used for all fractions of the product. The second stage is applicable only to fractions of a product which are found unacceptable by the first stage test, but are not rejected as being unsatisfactory.

The current regulations are unclear in this respect. Section 113.127(b)(4) indicates that if one or less of the vaccinate serum samples meets the titer requirements for one fraction in the first stage, such fraction need not be retested. However, this is not what was intended, as shown in the table in subpart (6) of that section. What was intended was that when a fraction is found acceptable by first stage testing, i.e., if there is one or less failure, such fraction need not be retested. Therefore, the purpose of this amendment is to eliminate any confusion which might be caused by the present wording.

Each word in the heading of § 113.127 shall be capitalized.

Section 113.127 is amended by revising paragraph (b)(4) to read:

§ 113.127 Encephalomyelitis vaccine, Eastern and Western, killed virus.

* * * * * *

(b) * * *

(4) If two or three of the vaccinate serum samples show a titer of less than 1:4 for the Eastern type fraction or less than 1:32 for the Western type fraction, or both, the second stage may be used; except, that if a fraction is found to be acceptable by the first stage test, such fraction need not be retested. Otherwise, the second stage shall be conducted in a manner identical to the first stage.

* * * * * *

(21 U.S.C. 151 and 154; 37 FR 28477, 28646; 38 FR 19141.)

This amendment makes administrative changes to clarify the second stage test provisions in the potency test without making substantive changes in the regulations. In order for this amendment to be of maximum benefit, it must be made effective immediately.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure concerning this amendment are impracticable and unnecessary, and good cause is found for making this amendment effective less than 30 days after publication in the FEDERAL REGISTER.

The foregoing amendment shall become effective upon issuance.

Done at Washington, D.C., this 2nd day of September, 1977.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

J. K. ATWELL,
Acting Deputy Administrator, Veterinary Services.

[FR Doc.77-26267 Filed 9-8-77;8:45 am]

Title 10—Energy

CHAPTER II—FEDERAL ENERGY ADMINISTRATION

PART 212—MANDATORY PETROLEUM PRICE REGULATIONS

Resumption of Adjustments To Lower and Upper Tier Crude Oil Price Ceilings To Reflect Impact of Inflation

AGENCY: Federal Energy Administration.

ACTION: Final rule.

SUMMARY: The Federal Energy Administration ("FEA") by this action issues Crude Oil Price Schedule No. 8, which resumes in September 1977, crude oil price increases to take into account the impact of inflation, as permitted under the Emergency Petroleum Allocation Act of 1973, as amended ("EPAA"). These price increases were discontinued because during 1976 and part of 1977 actual weighted average prices for domestic crude oil exceeded the statutory maximum weighted average first sale ("composite") price.

Pursuant to this action, FEA will, beginning in September 1977, apply the inflation adjustment to the projected August lower tier price (approximately $5.17 per barrel), and will begin to restore over a 3 month period the upper tier price to a level that represents the $11.28 per barrel price originally intended to be achieved for upper tier crude oil in February 1976 by the Energy Policy and Conservation Act "EPCA" crude oil pricing policy, plus the $ 27 per barrel increase in upper tier prices that was authorized for the months of March through June 1976 By November 1977, as a result of this action, lower tier prices will be approximately $5 26 per barrel and upper tier prices will be approximately $11 75 per barrel.

Thereafter, lower tier and upper tier prices will be allowed to rise at the rate not in excess of the rate of inflation, as was proposed in the National Energy Plan issued by the President on April 20, 1977.

EFFECTIVE DATE: September 1, 1977.

FOR FURTHER INFORMATION CONTACT.

Everard A. Marseglia, Jr. (Office of General Counsel), 12th and Pennsylvania Ave. NW., Room 5140, Washington, D C 20461 (202–566–9567).

SUPPLEMENTARY INFORMATION.

A *Background.*
B *The Basis For This Action.*
C *Crude Oil Price Schedule No. 8.*

A. *Background.*—Under the Emergency Petroleum Allocation Act of 1973, as amended ("EPAA," Pub. L. 93–159), Congress provided FEA with flexibility to control first sale prices of domestic crude oil as long as the national weighted average first sale price ("actual composite price") did not exceed $7.66 per barrel ("statutory composite price") for all domestic crude oil produced and sold in February 1976.

Beginning in March 1976, the EPAA authorized increases in the statutory composite price to reflect the effects of inflation and to provide production incentives. Under present authority, the statutory composite price is adjusted upward by FEA at a rate not to exceed 10 percent annually.

In specifying a composite price of $7.66 per barrel for all domestic crude oil in February 1976, Congress assumed that the existing ceiling price on domestic old crude oil (lower tier) would be continued and that the average price of old crude oil was $5.25 per barrel. The $5.25 per barrel estimate was derived originally by the Cost of Living Council ("CLC") as the average first sale price of controlled domestic crude oil in December 1973. FEA was not required, nor did it have any regulatory need, to monitor actual first sale prices of controlled domestic crude oil until the advent of EPCA. Inasmuch as old crude oil prices had remained frozen from December 1973, the $5 25 figure was thought to be a reasonable estimate of lower tier crude oil prices

In specifying the $7 66 per barrel composite price, the Congress also assumed that "new," "released," and "stripper well" crude oil (which were not then subject to ceiling price limitations), would not have to be rolled back from the average first sale price of uncontrolled domestic crude oil in January 1975, which was $11 28 per barrel. The January 1975 price was based on the most recent price data available which was free from the influence of (1) the 1975 supplemental import fees on crude oil, and (2) the October 1975 price increase by the Oil Producing and Exporting Countries which subsequently affected domestic crude oil prices.

It was also estimated that old crude oil constituted sixty percent of total domestic crude oil. The $7.66 per barrel composite price figure was therefore calculated as follows:

(.6) ($5.25) + (.4) ($11 28) = $7.66.

(See generally S. Rept. No. 94–516, 94th Cong., 1st. Sess. 187–191 (1975).)

Under FEA price regulations adopted to implement the pricing policy that included the statutory composite price restrictions, domestic crude oil is classified either as lower tier (which currently accounts for about 50 percent of total domestic production), upper tier (which currently accounts for about 36 percent of total domestic production) and crude oil produced from stripper well properties (which currently accounts for about 14 percent of total domestic production).

Stripper well property crude oil, which is production from properties that have declined to a level of 10 barrels or less per well per day for a proceeding consecutive 12-month period, is permitted by statutory authority to be sold at market price levels, so as to encourage continued production from such marginal properties for as long as possible. For purposes of determining compliance with the statutory composite price limitation, however, stripper well property crude oil is given by statutory formula an imputed value which approximates the average upper tier price. (Section 121 of the Energy Conservation and Production Act, "ECPA," Pub. L. 94–385.)

Upper tier crude oil generally includes production from properties which first began producing crude oil after 1972 (except those which qualify as stripper well properties or which produce crude oil that is otherwise exempt from first sale price controls), plus incremental production from older properties which exceeds a certain "base production control level." The upper tier price (an average of $11.64 per barrel at the end of 1976) is generally designed to stimulate increased production from older properties and to encourage further exploration and development of domestic crude oil resources. The lower tier price, which averaged about $5.17 per barrel nationally at the end of 1976, applies to all domestic production which is not exempt or which does not qualify as upper tier crude oil.

FEA adopted regulations to implement the composite price limitation of EPCA that were predicated on the same estimates and assumptions that had been used by the Congress. Pursuant to those regulations, which became effective February 1, 1976, comprehensive data on actual first sale prices were obtained for the first time. Those data revealed that the average first sale price for lower tier crude oil was, in fact, $5.05 per barrel, rather than the estimated $5.25 per barrel; that lower tier crude oil constituted approximately 56.1 percent of domestic production rather than the estimated 60 percent; and that the upper tier ceiling price (the September 30, 1975 posted price, less $1.32 per barrel) had resulted, in February 1976, in average upper tier prices of $11.48 per barrel rather than the intended $11.28 per barrel. These factors, among others, led FEA to discontinue price increases in July 1976.

Effective July 1, 1976, FEA halted further monthly increases in crude oil price ceilings and continued them at their June 1976 levels in order to compensate for actual composite prices in excess of adjusted statutory composite price levels. FEA took further corrective action to achieve compliance with statutory composite price restrictions by reducing upper tier price ceilings by 20 cents per barrel effective January 1, 1977, and by an additional 45 cents per barrel effective March 1, 1977. These actions were projected to eliminate all excess crude oil receipts by June 30, 1977 (see 42 FR 13013, March 8, 1977). (Although the ceiling prices for lower tier crude oil had been frozen since June 1976, and the ceiling prices for upper tier crude oil had been frozen—and subsequently rolled back—since June 1976, ceiling prices for lower and upper tier crude oil are determined on a field-by-field basis. As a result, the average actual prices for lower tier and upper tier crude oil vary from month to month as a function of the mix of types of crude oil selling at varying ceiling prices from field to field.)

On March 15, 1977, FEA submitted Energy Action No. 11 to the Congress, pursuant to section 8(f) of the EPAA, to continue in effect that portion of the 10 percent annual increase in the statutory composite price relating to production incentives. That action, having undergone legislative review without disapproval by either house of Congress, permits the statutory composite price to continue to increase at an annual rate of 10 percent.

In congressional hearings relating to Energy Action No. 11, FEA stated that the 10 percent annual adjustment in the statutory composite price was anticipated to be entirely or almost entirely used to reflect the impact of inflation on the ceiling prices for lower and upper tier crude oil (anticipated at between 5.5 and 6.5 percent annually) and to account for the automatic increase in the actual composite price attributable to the continuing decline in the percentage of lower tier crude oil (resulting in an increase in

V 42 I 175 SEP 9 77 UMI

the actual composite price of approximately 3.0 to 3.6 percent annually). Accordingly, FEA stated that it intended in the future to adjust lower tier and upper tier prices by not more than the amount necessary to reflect the impact of inflation.

On August 11, 1977, FEA issued a Notice of Proposed Rulemaking and Public Hearing (42 FR 41396, August 16, 1977) to consider a proposal to specify the price levels for lower tier and upper tier crude oil to which such future adjustments should be applied and to implement the provision of the National Energy Plan that calls for allowing lower tier and upper tier ceiling prices to rise at not more than the rate of inflation.

Pursuant to Section 8(d) of the EPAA, the impact of inflation is measured for purposes of adjusting the composite price by using the "adjusted GNP deflator." The Act defines the term "adjusted GNP deflator" to mean:

> . . . the first revision of the quarterly percent change, seasonally adjusted at annual rates, of the most recent implicit price deflator for the gross national product which shall be computed and published for each calendar quarter by the Department of Commerce, subject to such additional modification as the President shall make to exclude therefrom any amount which he determines is attributable solely and directly to increases which occur after the date of enactment of this section in prices of imported crude oil, residual fuel oil, or any refined petroleum product resulting from concerted action of two or more petroleum exporting countries.

For purposes of this rulemaking proceeding, the inflation adjustment for the months of September, October, and November 1977 was computed at an annual rate of 5.5 percent. This was the most recent first revision of the GNP deflator at the time, which was published by the Department of Commerce in late June 1977. As FEA stated in the August 11 Notice, actual adjustments to crude oil price ceilings for the months of September through November 1977, pursuant to the regulations adopted in this rulemaking, would be based on the first revision of the GNP deflator published on August 20, 1977, which is now known to be 7.1 percent. Beginning in December the first revision of the GNP deflator published on or about November 20, 1977 will be used to adjust ceiling prices for the next three months to reflect the rate of inflation, and so forth.

B. *The Basis For This Action.*—As indicated above, monthly increases in both lower tier and upper tier crude oil price ceilings were deferred and upper tier crude oil price ceilings were reduced in order to compensate for actual composite price levels in excess of statutory composite price limits. This elimination of excess receipts is projected to be completed by June 30, 1977—final data for a particular month are not available to FEA until the end of the third month following that month—and resumption of monthly price adjustments can therefore be resumed September 1, 1977. As FEA indicated in the August 11 Notice, this more conservative pricing policy is intended to further the EPAA goal of providing a more stable and predictable basis for future pricing actions by decreasing the potential for future price freezes or rollbacks.

This action applies such inflation adjustments prospectively to existing lower tier prices and to upper tier prices adjusted to reflect (1) the fact that actual upper tier prices when the upper tier ceiling price was first imposed in February 1976 were higher than the intended average of $11.28 per barrel, and (2) the fact that upper tier prices have been reduced by a total of $.65 per barrel in recent months. Because the restoration of upper tier prices will represent a price increase of some significance, it will, as proposed, be phased in over a 3 month period so as to avoid creating any substantial incentive to withhold production in anticipation of a price increase.

FEA has concluded, as proposed, that it would not be appropriate to restore lower tier and upper tier price levels to the real dollar equivalent of their February 1976 price levels because the overall economic impact of such an action would not, in all likelihood, be counterbalanced by any measurable production response. Domestic crude oil production has been subject to frozen or reduced price levels for more than a year without any measurable effect on production. (FEA has granted price relief on a case-by-case basis in all instances in which those price levels have resulted in a demonstrable threat to continued production.)

Accordingly, FEA has concluded that restoration of crude oil ceiling prices to their February 1976 real dollar equivalent would constitute essentially a windfall to producers, in that it would constitute a form of payment for production that has already taken place under economically advantageous circumstances. In this regard, however, FEA has also concluded that equitable considerations favor the restoration of upper tier prices to a level that recognizes the initial pricing objectives of the EPAA crude oil pricing policy and the fact that the upper tier price has, in fact, been rolled back to compensate for prices in excess of the statutory composite price.

This result is not inconsistent with Energy Action No. 11, which was submitted to Congress on March 15, 1977, the purpose of which was to provide for a continuation of the adjustment to the statutory composite price as a production incentive. In the absence of that Energy Action, no adjustment as a production incentive could be given any effect beyond March 15, 1977, and only the adjustment to take into account the impact of inflation could thereafter have been applied. In transmitting Energy Action No. 11 to Congress, FEA stated:

> In essence, continuation of the adjustment as a production incentive *could* permit lower tier and upper tier ceiling prices to be restored to and maintained in real dollars at the level that existed in February, 1976 for lower tier crude oil ($5.05 per barrel), and at the level that was intended in February, 1976 for upper tier crude oil ($11.28 per barrel).

Discontinuation of the adjustment as a production incentive would mean, on the other hand, that the legal composite price could be increased at not more than the rate of inflation. Because the projected rate of decline in production of lower tier crude oil results in an increase in the actual composite price of approximately 3 to 3.6 percent annually, a projected inflation rate of 5.5 percent would result in a maximum rate of increase in lower tier and upper tier ceiling prices of approximately only 1.9 to 2.5 percent per year.

Discontinuation of the adjustment as a production incentive would, therefore, effectively prevent maintenance of February, 1976 ceiling price levels for domestic crude oil in real dollars. It would therefore, tend to have a dampening effect on domestic production, particularly in view of the fact that there are indications that the cost of producing crude oil is increasing at a faster rate than the rate of inflation as measured by the GNP deflator. (Emphasis added.)

Comments submitted in response to the August 11 Notice, indicated producers' misperception that this language in Energy Action No. 11 indicated FEA's intention to resume adjustments to lower tier and upper tier ceiling prices based upon February 1976 ceiling price levels for domestic crude oil in real dollars. Of particular concern to those submitting comments was the statement that failure to maintain these ceiling price levels in real dollars would

> tend to have a dampening effect on domestic production, particularly in view of the fact that there are indications that the cost of producing crude oil is increasing at a rate faster than the rate of inflation as measured by the GNP deflator.

Initially, it should be stressed that Energy Action No. 11 was submitted to Congress to provide for continuation of the adjustment as a production incentive provided for in Section 8 of the EPAA. In establishing the need to continue the production incentive adjustment, FEA was concerned that failure to do so might lead to the result that FEA would be unable to maintain February 1976 ceiling prices in real dollars for existing production i.e., production currently subject to ceiling price controls: lower tier and upper tier crude oil). To avoid the possible dampening effects on such production that might have ensued as a result of the extended freeze on ceiling prices for lower and upper tier crude oil and the rollback of ceiling prices for upper tier crude oil. FEA sought from Congress the additional flexibility, if needed, under the full 10 percent composite price adjustment to offset any significant declines in domestic production during the freeze and rollback period and to guard against any subsequent declines in flowing production after the freeze period was ended, due to impacts of inflation in excess of the GNP deflator on crude oil subject to current controls.

Accordingly, it was inappropriate to draw the conclusion from statements made in the Energy Action that FEA in fact would, or intended to, resume adjusments to lower and upper tier ceiling prices based on February 1976 real dollar equivalents. Rather, FEA indicated only that approval of the Energy Action would provide FEA with sufficient flexibility so that prices for currently controlled crude oil could be escalated to such levels if necessary, but indicated that in no event would currently controlled domestic production be escalated at a faster rate than necessary to provide for the impact of inflation. This is consistant with the policy of the National Energy Plan to allow lower and upper tier ceiling prices to rise at a rate not in excess of the rate of inflation.

With respect to the period during which lower and upper tier ceiling prices were frozen and upper tier ceiling prices were rolled back, as FEA indicated in the August 11 Notice, to restore ceiling prices to February 1976 real dollar equivalents—in effect to reimburse producers for production during that period under circumstances in which (a) production was economically favorable, or (b) where not economically favorable, individual producers were granted price relief on a case-by-case basis by the FEA Office of Exceptions and Appeals—would constitute a windfall to producers for a period during which there was no significant "dampening effect" on domestic production. With respect to future production of crude oil currently subject to price controls, Crude Oil Price Schedule No. 8 provides for adjustments, consistent with the National Energy Plan, to reflect the impact of inflation as measured by the GNP deflator.

Persons that submitted comments in this rulemaking argued that the absence of a "dampening effect" on production during the freeze and rollback period should not be considered in determining whether to restore ceiling price levels to their February 1976 real dollar equivalents because investment decisions made by producers in "reliance" on Energy Action No. 11 would not necessarily have resulted in a significant production response during the freeze period. However, this argument fails to persuade FEA that such ceiling price levels should be restored for two reasons.

First, as stated above, FEA does not believe that the statements made in connection with the Energy Action should have been construed as a commitment by FEA to take such action. More fundamentally, however, such long term investment actions would presumably have been taken in reliance on incentive prices for production such as newly discovered oil as set forth in the National Energy Plan, and would not necessarily have depended upon an assumption that ceiling price levels for crude oil subject to current controls would be restored to their February 1976 real dollar equivalents. Accordingly, as noted above, for FEA to restore ceiling price levels to February 1976 real dollar equivalents would constitute a windfall to producers for production that occurred during the freeze period.

C. *Crude Oil Price Schedule No. 8.*—Under Crude Oil Price Schedule No. 8, effective September 1, 1977, the previous lower tier ceiling price (the May 15, 1973 posted price plus $1.48 per barrel, resulting in an average first sale price of approximately $5.17 per barrel), is adjusted for inflation beginning with September 1977.

Thus, the ceiling price for lower tier crude oil and the approximate average first sale price pursuant to that ceiling price in September, October, and November, is determined as follows:

Month	Ceiling price	Estimated average first sale price
August	May 15, 1973, highest posted field price plus $1.48	$5.17
September	May 15, 1973, highest posted field price plus $1.51	5.20
October	May 15, 1973, highest posted field price plus $1.54	5.23
November	May 15, 1973, highest posted field price plus $1.58	5.26

The upper tier ceiling price is determined as follows: First, as noted above, the upper tier ceiling price is established by reference to September 30, 1975 highest posted field prices. When the ceiling price rule was first promulgated, FEA estimated the average of highest posted field prices on September 30, 1975 to be $12.60 per barrel; hence the price rule provided for a subtraction of $1.32 from that posted price for February 1976, with the intent of achieving an average price of $11.28. Actual upper tier pricing data have varied from month to month (which results from changes in the volumes of the various grades and qualities of upper tier crude oil produced and sold each month).

For the months of June through December 1976, when upper tier prices were frozen at the September 30, 1976 posted prices less $1.05 per barrel, actual average first sale prices ranged from $11.60 to $11.65 per barrel, averaging $11.62 per barrel. These data therefore indicate that the September 30, 1975 reference postings average approximately $12.67 per barrel (i.e., $11.62+$1.05=$12.67), rather than the $12.60 per barrel estimated by FEA when the upper tier price rule was first adopted.

Based on the foregoing actual pricing data, a February 1976 upper tier ceiling price of $11.28 per barrel would best be approximated by a ceiling price of the September 30, 1975 posted price (averaging $12.67 per barrel), less $1.39 per barrel. The adjustments to the upper tier ceiling price provided during March through June totalled $.27 per barrel. Applying this $.27 adjustment to the Congressionally intended February 1976 upper tier price of $11.28 results in a price of $11.55. The ceiling price for September that would be most likely to result in an average first sale price of $11.55 per barrel is, therefore, the September 30, 1975 posted price (approximately $12.67 per barrel), less $1.12 per barrel.

As noted above, however, the restoration of the upper tier ceiling price will be phased in over a 3 month period. Application of the 7.1 percent annual rate of inflation to the "restored" upper tier price level of $11.55 for September yields an average upper tier price of $11.75 for November 1977.

FEA does not currently have final or preliminary data with respect to actual prices in August 1977. However, assuming that the September 30, 1975 posted price averages $12.67 per barrel in August 1977, applying a $1.70 reduction in that month pursuant to Schedule No. 7 of Monthly Price Adjustments (42 FR 38894, August 1, 1977) results in a projected average upper tier price of $10.97 for August 1977 ($12.67 less $1.70).

In order to provide a smooth transition from the projected August 1977 average upper tier price of $10.97, to the November 1977 target price of $11.75, FEA will add to the projected August 1977 upper tier price $.26 per barrel in September, October and November 1977.

Thus, the ceiling price for upper tier crude oil and the approximate average first sale price pursuant to that ceiling price in September, October, and November, is determined as follows:

Month	Ceiling price	Estimated average first sale price
August	Sept. 30, 1975, highest posted field price less $1.70.	$10.97
September	Sept. 30, 1975, highest posted field price less $1.44.	11.23
October	Sept. 30, 1975, highest posted field price less $1.18.	11.49
November	Sept. 30, 1975, highest posted field price less $.92.	11.75

Beginning in December, the lower and upper tier ceiling price would be adjusted each month at not more than the rate of inflation as determined by the most recent first revision of the GNP deflator.

The following table summarizes on a monthly basis the projected cumulative excess receipts for the months February 1976 through November 1977.

V 42 I 175 SEP 9 77 UMI

- 24 -

Month	Lower tier percent	Lower tier price	Upper tier price	Statutory composite price	Actual composite price1/	Cumulative excess receipts (millions)
1976						
February	56.12	$5.05	$11.48	$7.66	$7.87	$ 49
March	56.93	5.07	11.39	7.72	7.79	67
April	56.69	5.07	11.52	7.78	7.86	86
May	57.04	5.13	11.55	7.84	7.89	97
June	55.92	5.15	11.60	7.88	7.99	123
July	55.58	5.19	11.60	7.93	8.04	152
August	55.68	5.18	11.62	7.98	8.03	164
September	53.41	5.17	11.65	8.04	8.19	198
October	52.39	5.15	11.62	8.11	8.23	228
November	49.94	5.17	11.62	8.17	8.40	282
December	50.07	5.17	11.64	8.24	8.40	322
1977						
January	50.61	5.17	11.44	8.30	8.28	316
February	49.52	5.18	11.39	8.37	8.33	308
March	49.18	5.15	11.03	8.44	8.19	246
April	49.46	5.15,	10.97	8.50	8.14	161
May2/	48.48	5.18	11.00	8.57	8.23	78
June3/	48.84	5.17	10.99	8.64	8.20	- 27

September3/	44.09	5.20	11.23	8.85	8.26	-494
October3/	43.84	5.23	11.49	8.92	8.39	-635
November3/	43.58	5.26	11.75	8.99	8.52	-755

1/ Beginning with the month of September 1976, includes prices for stripper well crude oil production at values imputed in accordance with section 121 of the DCPA.
2/ Preliminary.
3/ Projected. Effects of Alaska North Slope (ANS) crude oil production, which commenced June 20, 1977, are included.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-163, as amended, Pub. L. 94-385; E.O. 11790, 39 FR 23185.)

In consideration of the foregoing, Part 212 of Chapter II of Title 10 of the Code of Federal Regulations is amended as set forth below.

Issued in Washington, D.C., September 1, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

1. Section 212.77 is revised in paragraph (c) to read as follows:

§ 212.77 Adjustments to ceiling prices.

• • • • •

(c) *Application of price adjustments.*—(1) Price adjustment schedules issued pursuant to paragraph (b) of this section shall, beginning with prices for September 1977, adjust the lower tier and the upper tier ceiling prices by not more than the amount necessary to reflect the impact of inflation on the weighted average first sale price for each tier.

(2) Notwithstanding paragraph (c)(1) of this section, FEA may issue price adjustment schedules pursuant to paragraph (b) of this section to (A) discontinue or restrict price adjustments or require reductions in ceiling prices to the extent deemed necessary by the FEA to achieve compliance with the Act, or (B) restore, in part or in full, to the upper tier ceiling price an amount not in excess of any reductions in such ceiling prices for months prior to September 1977.

APPENDIX.—*Schedule No. 8 of monthly price adjustments effective Sept. 1, 1977*

Month	Lower tier, May 15, 1973, posted price (plus) [1]	Upper tier, Sept. 30, 1975, posted price (less) [2]
1976:		
February	1.35	1.32
March	1.38	1.25
April	1.41	1.18
May	1.45	1.11
June	1.48	1.05
July	1.48	1.05
August	1.48	1.05
September	1.48	1.05
October	1.48	1.05
November	1.48	1.05
December	1.48	1.05
1977:		
January	1.48	1.25
February	1.48	1.25
March	1.48	1.70
April	1.48	1.70
May	1.48	1.70
June	1.48	1.70
July	1.48	1.70
August	1.48	1.70
September	1.51	1.44
October	1.54	1.18
November	1.58	.92

[1] The price referred to in 10 CFR 212.73(b)(1) or in 212.73(c)(1), 212.73(c)(3), and 212.73(c)(4).
[2] The price referred to in 10 CFR 212.74(b)(1).

This schedule of monthly price adjustments was issued by the Federal Energy Administration on September 1, 1977, pursuant to 10 CFR 212.77. It restates without change the lower and upper tier price ceilings applicable to crude oil produced and sold in the months of February 1976 through August 1977, as determined under 10 CFR 212.73, 212.74, and 212.77. Upper tier ceiling prices, which were reduced under Schedule No. 5 effective January 1, and further reduced effective March 1, 1977, are increased as indicated in this schedule. Also, lower tier ceiling prices, which were held at the ceiling price level for the month of June 1976, are increased as indicated in this schedule.

This schedule is effective only through November 30, 1977. Price ceilings for subsequent months will be provided by Schedule No. 9, to be issued on or about November 30, 1977. This schedule may, however, be superseded prior to November 30, 1977, by early issuance of Schedule No. 9 to reflect further ceiling price adjustments based on presently unanticipated trends in actual composite price levels.

[FR Doc.77-26221 Filed 9-6-77;10:31 am]

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Docket No. R-0090; Reg. H and Reg. Y]

PART 208—MEMBERSHIP OF STATE BANKING INSTITUTIONS IN THE FEDERAL RESERVE SYSTEM

PART 225—BANK HOLDING COMPANIES

Municipal Securities Dealers

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: This rule requires State member banks, and their subsidiaries, departments, and divisions, that are municipal securities dealers to file with the Board information about persons who are associated with them as municipal securities principals or municipal securities representatives. The Board believes that these requirements will facilitate compliance by those dealers with Municipal Securities Rulemaking Board rules concerning the qualification of municipal securities principals and municipal securities representatives.

EFFECTIVE DATE: October 31, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert S. Plotkin, Assistant Director, Division of Banking Supervision and Regulation, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202-452-2782).

SUPPLEMENTARY INFORMATION: On March 30, 1977, the Board issued for comment in the FEDERAL REGISTER (42 FR 16821) proposed amendments to its Regulation H (12 CFR Part 208) and Regulation Y (12 CFR Part 225) to require State member banks and bank holding companies, and certain of their subsidiaries, departments, and divisions, that are muncipal securities dealers for which the Board is the appropriate regulatory agency under section 3(a)(34) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)(34)) to file with the Board information about persons who are associated with them as municipal securities principals or municipal securities representatives. In conjunction with that proposal, the Board also proposed Form MSD-4, "Uniform Application for Municipal Securities Principal or Municipal Securities Representative Associated with a Bank Municipal Securities Dealer," and Form MSD-5, "Uniform Termination Notice for Municipal Securities Principal or Municipal Securities Representative Associated with a Bank Municipal Securities Dealer," for use in complying with the proposed amendments to Regulations H and Y.

Concurrent with the Board's proposal of amendments to Regulations H and Y, the Federal Deposit Insurance Corporation and the Comptroller of the Currency proposed similar regulations requiring the filing of proposed Forms MSD-4 and MSD-5.[1] Proposed Form MSD-4 and proposed Form MSD-5 were drafted jointly by the Board, the Federal Deposit Insurance Corporation, and the Comptroller of the Currency for use by municipal securities dealers subject to their regulation. After considering the comments submitted on the proposed amendments to Regulations H and Y and proposed Forms MSD-4 and MSD-5 and working with the Federal Deposit Insurance Corporation and the Comptroller of the Currency in drafting final Forms MSD-4 and MSD-5, the Board has adopted the amendment to Regulation H and forms substantially as proposed, but has determined not to adopt the proposed amendment to Regulation Y at this time.

The proposed amendment to Regulation Y would have established a record system for municipal securities principals and representatives associated with bank holding companies. The activities of bank holding companies are generally limited by the Bank Holding Company Act to those the Board determines to be "so closely related to banking or managing or controlling banks as to be a proper incident thereto." The Board has not made such a determination concerning municipal securities dealer activities and accordingly, as a general matter, bank holding companies are not permitted to engage in such activities at this time. On October 19, 1976, the Board suspended for a period of time not to exceed twelve months a proposed regulation that would permit bank holding companies generally to engage in certain municipal securities activities. In the event the Board upon further consideration determines that municipal securities dealer activities should be permissible for bank holding companies, the Board may also at that time adopt the proposed amendment to Regulation Y with modifications similar to those the Board has made in the amendment to Regulation H.

As a result of the comments received, the following changes have been made in the amendment and forms:

[1] Forms MSD-4 and MSD-5 filed as part of the original document. See FR Doc. 77-26068 (part III of this issue).

V 42 175 SEP 9 77 UMI

1. The period during which municipal securities dealers must retain copies of forms or statements that they are required to file with the Board under the amendment to Regulation H is specified as until at least three years after the termination of the employment or other association with the dealer of the municipal securities principal or municipal securities representative to whom the form or statement relates. That retention requirement is parallel to the one imposed on municipal securities dealers under paragraph (e) of Municipal Securities Rulemaking Board Rule G–7.

2. The instructions to Forms MSD–4 and MSD–5 have been revised to require that only the original of Forms MSD–4 and MSD–5 be manually signed.

3. For purposes of Forms MSD–4, and MSD–5 and the instructions thereto, the term bank municipal securities dealer has been defined as a municipal securities dealer which is a bank or a subsidiary or a department or division of a bank.

4. Item 8 of proposed Form MSD–4 (Item 6 of final Form MSD–4) has been changed to indicate that qualification as both a municipal securities principal and municipal securities representative can be requested on a single Form MSD–4.

5. Item 9 of proposed Form MSD–4 (Item 7 of final Form MSD–4), which describes the functions to be performed by a municipal securities principal or municipal securities representative, has been expanded to reflect a change in Municipal Securities Rulemaking Board rules effected after Form MSD–4 was proposed for comment.

6. The "permitted to resign" and "voluntary" reasons for termination contained in Item 8 of proposed Form MSD–5 (Item 7 of final Form MSD–5) have been combined into a single "resigned" category. Further, municipal securities dealers are required to furnish full details about the reason for termination only if the termination is related to a violation or probable violation of securites or banking law.

7. Editorial changes have been made in Forms MSD–4 and MSD–5 and the instructions thereto for clarification purposes.

The Board considered but decided not to adopt a suggestion that Form MSD–4s, Form MSD–5s, and statements received pursuant to paragraph (c) of Municipal Securities Rulemaking Board Rule G–7 be considered filed with the Board when mailed. Upon receipt of a Form MSD–4 or Form MSD–5, the Board will remit to the sender the acknowledgement found at the bottom of the form.

The Board also noted the concern expressed in several comments about the effect of Item 10 of proposed Form MSD–4 (Item 8 of final Form MSD–4) on the privacy of individuals. In completing Item 10 municipal securities dealers are required to confirm that they have made the inquiry of former employers of a municipal securities principal or municipal securities representative required under paragraph (d) of Municipal Securities Rulemaking Board Rule G–7. Since Item 10 reflects a Municipal Securities Rulemaking Board requirement, the Board decided not to alter Item 10 other than to renumber it as Item 8.

The Board prescribed Form MSD–4 for purposes of paragraph (b) of Municipal Securities Rulemaking Board Rule G–7 which becomes effective on October 15, 1977. Printed copies of Forms MSD–4 and MSD–5 will be available from the Federal Reserve Banks and the Board of Governors of the Federal Reserve System on and after September 20, 1977. The amendment to Regulation H will become effective on October 31, 1977. In the proposed amendment to Regulation H the paragraph to be added was designated 12 CFR 208.8(h). As adopted, that paragraph has been redesignated 12 CFR 208.8(j).

1. Pursuant to sections 15B(c) (5), 17, and 23 of the Securities Exchange Act of 1934 (15 U.S.C. 78o–4(c)(5), 78q, and 78w) and section 11(a) of the Federal Reserve Act (12 U.S.C. 248(a)), the Board amends Regulation H (12 CFR Part 208) by adding a new paragraph (j) to § 208.8 as set forth below:

§ 208.8 Banking practices.

* * * * *

(g) [Reserved]

(h) [Reserved]

(i) [Reserved]

(j) *State member banks, and subsidiaries, departments, and divisions thereof, which are municipal securities dealers.* (1) For purposes of this paragraph, the terms herein have the meanings given them in section 3(a) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)) and the rules of the Municipal Securities Rulemaking Board. The term Act shall mean the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq.).

(2) On and after October 31, 1977, a State member bank of the Federal Reserve System, or a subsidiary or a department or a division thereof, that is a municipal securities dealer shall not permit a person to be associated with it as a municipal securities principal or municipal securities representative unless it has filed with the Board an original and two copies of Form MSD–4, "Uniform Application for Municipal Securities Principal or Municipal Securities Representative Associated with a Bank Municipal Securities Dealer," completed in accordance with the instructions contained therein, for that person. Form MSD–4 is prescribed by the Board for purposes of paragraph (b) of Municipal Securities Rulemaking Board Rule G–7, "Information Concerning Associated Persons."

(3) Whenever a municipal securities dealer receives a statement pursuant to paragraph (c) of Municipal Securities Rulemaking Board Rule G–7, "Information Concerning Associated Persons," from a person for whom it has filed a Form MSD–4 with the Board pursuant to subparagraph (2) of this paragraph, such dealer shall, within ten days thereafter, file three copies of that statement with the Board accompanied by an original and two copies of a transmittal letter which includes the name of the dealer and a reference to the material transmitted identifying the person involved and is signed by a municipal securities principal associated with the dealer.

(4) Within thirty days after the termination of the association of a municipal securities principal or municipal securities representative with a municipal securities dealer that has filed a Form MSD–4 with the Board for that person pursuant to subparagraph (2) of this paragraph, such dealer shall file an original and two copies of a notification of termination with the Board on Form MSD–5, "Uniform Termination Notice for Municipal Securities Principal or Municipal Securities Representative Associated With a Bank Municipal Securities Dealer," completed in accordance with instructions contained therein.

(5) A municipal securities dealer that files a Form MSD–4, Form MSD–5, or statement with the Board under this paragraph shall retain a copy of each such Form MSD–4, Form MSD–5, or statement until at least three years after the termination of the employment or other association with such dealer of the municipal securities principal or municipal securities representative to whom the form or statement relates.

(6) The date that the Board receives a Form MSD–4, Form MSD–5, or statement filed with the Board under this paragraph shall be the date of filing. Such a Form MSD–4, Form MSD–5, or statement which is not prepared and executed in accordance with the applicable requirements may be returned as unacceptable for filing. Acceptance for filing shall not constitute any finding that a Form MSD–4, Form MSD–5 or statement has been completed in accordance with the applicable requirements or that any information reported therein is true, current, complete, or not misleading. Every Form MSD–4, Form MSD–5, or statement filed with the Board under this paragraph shall constitute a filing with the Securities and Exchange Commission for purposes of section 17(c)(1) of the Act (15 U.S.C. 78q(c)(1)) and a "report," "application," or "document" within the meaning of section 32(a) of the Act (15 U.S.C. 78ff(a)).

(15 U.S.C. 78o–4(c)(5), 78q, 78w (12 U.S.C. 248(a)).)

By order of the Board of Governors, September 1, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

[Docket No. R–0110]

PART 265—RULES REGARDING DELEGATION OF AUTHORITY

Administration of Municipal Securities Rulemaking Board Rules

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board of Governors has delegated certain of its functions in connection with the administration of Municipal Securities Rulemaking Board rules to the Director of the Division of Banking Supervision and Regulation. These delegations were made to expedite and facilitate the Board's administration of Municipal Securities Rulemaking Board rules.

EFFECTIVE DATE: September 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert S. Plotkin, Assistant Director, Division of Banking Supervision and Regulation, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202–452–2782).

SUPPLEMENTARY INFORMATION: The Board of Governors has amended its Rules Regarding Delegation of Authority (12 CFR Part 265) to authorize the Director of the Division of Banking Supervision and Regulation (or, in the Director's absence, the Acting Director) (i) to grant or deny requests for waiver of examination and waiting period requirements for municipal securities principals and municipal securities representatives under Municipal Securities Rulemaking Board Rule G–3, (ii) to grant or deny requests for a determination that a natural person or municipal securities dealer subject to a statutory disqualification is qualified to act as a municipal securities principal or municipal securities representative or municipal securities dealer under Municipal Securities Rulemaking Board Rule G–4, and (iii) to approve or disapprove clearing arrangements under Municipal Securities Rulemaking Board Rule G–8, in connection with the administration of Municipal Securities Rulemaking Board rules for municipal securities dealers for which the Board is the appropriate regulatory agency as defined in section 3(a)(34) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)(34)).

The provisions of section 553 of Title 5, United States Code, relating to notice and public participation and deferred effective date, are not followed in connection with the adoption of these amendments because the changes involved are procedural in nature and do not constitute substantive rules subject to the requirements of that section.

Section 265.2 is amended by adding a new subparagraph (24) to paragraph (c) as follows:

§ 265.2 Specific functions delegated to Board employees and to Federal Reserve Banks.

* * * * *

(c) The Director of the Division of Banking Supervision and Regulation (or, in the Director's absence, the Acting Director) is authorized:

* * * * *

(24) Pursuant to section 23 of the Securities Exchange Act of 1934 (15 U.S.C. 78w) (i) to grant or deny requests for waiver of examination and waiting period requirements for municipal securities principals and municipal securities representatives under Municipal Securities Rulemaking Board Rule G–3, (ii) to grant or deny requests for a determination that a natural person or municipal securities dealer subject to a statutory disqualification is qualified to act as a municipal securities principal or municipal securities representative or municipal securities dealer under Municipal Securities Rulemaking Board Rule G–4, and (iii) to approve or disapprove clearing arrangements under Municipal Securities Rulemaking Board Rule G–8, in connection with the administration of Municipal Securities Rulemaking Board rules for municipal securities dealers for which the Board is the appropriate regulatory agency under section 3(a)(34) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)(34)). (15 U.S.C. 78w and 12 U.S.C. 248)

By order of the Board of Governors, September 1, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release Nos. 33–5882; IC–9916; File No S7–537]

PART 231—INTERPRETATIVE RELEASES RELATING TO THE SECURITIES ACT OF 1933 AND GENERAL RULES AND REGULATIONS THEREUNDER

PART 271—INTERPRETATIVE RELEASES RELATING TO THE INVESTMENT COMPANY ACT OF 1940 AND GENERAL RULES AND REGULATIONS THEREUNDER

Sales Literature for Mutual Funds

AGENCY: Securities and Exchange Commission.

ACTION: Amendment to statement of policy.

SUMMARY: The Commission amends its Statement of Policy governing mutual fund sales literature to allow certain additional charts and tables reflecting compound rates of total return and adopts an interpretive letter procedure under which the staff can express its opinion relative to the proposed use of charts and tables not included in the Statement. These actions are taken in order to update the Statement and give mutual funds more flexibility in the development of sales literature. The use of the new charts and tables should make available to investors more meaningful and comparable measures of mutual fund performance. The Commission is also requesting comments on certain proposed changes in the requirements relating to charts and tables currently authorized by the Statement.

EFFECTIVE DATE OF AMENDMENT: Immediately. Comments must be submitted on or before October 31, 1977.

ADDRESSES: Comments should be submitted in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549. All material should be designated "Program to Revise the Statement of Policy," File No. S7–537. Such communications will be available for public inspection at the Commission's Public Reference Room, Room 6101, 1100 L Street NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Gene A. Gohlke, Division of Investment Management, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549, (202–755–1815).

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission today announced the adoption of an amendment to its Statement of Policy ("Statement") (Statement of Policy adopted by the Commission August 11, 1950, and amended January 31, 1955, November 5, 1957 and May 19, 1975 (15 FR 5469 as amended 20 FR 793, 22 FR 8977 and 40 FR 21711)) governing sales literature of investment companies. The amendment adds to the charts and tables currently described in the Statement as not misleading charts and tables which portray investment results on a total return basis. Two of the charts added to the Statement by the amendment are revisions of charts included in a proposed amendment to the Statement published on November 4, 1974 (Release No. 33–5537 and IC–8571, 39 FR 40789); a third chart and a table were considered independently. In addition, the Commission is requesting comments on whether the use of the new mountain chart, Sample Chart E, should be made mandatory in conjunction with the use of any other chart currently allowed by the Statement, and whether the time period portrayed in any existing Statement chart or table should be limited to the most recent ten years unless specific Commission approval to use a longer time period is obtained.

In addition to expanding the number of presentations described in the Statement, the Commission announced that the staff of the Division of Investment Management would respond to interpretive requests relating to the use in investment company sales literature of presentations not discussed in the Statement of Policy.

REVISION AND ADOPTION OF PORTRAYALS PREVIOUSLY PROPOSED

In contrast to the proposed amendment, the amendment to the Statement contained herein applies only to mutual funds and not to variable annuities. In addition, this amendment adds three new formats for displaying investment results on a total return basis, one of which must be used whenever any of the total return charts herein adopted is used, and establishes a procedure that is designed to introduce flexibility to and adaptability of the content of the Statement.

The Statement sets forth the respects in which the Commission considers that literature used in connection with the sale of investment company shares may be misleading and violate the standards of the securities laws which, generally speaking, provide that it shall be unlawful to offer or sell securities by means of any untrue statement or omission of a material fact or by any fraudulent or deceitful practice or device. Initially pub-

V 42 175 SEP 9 77 UMI

lished in 1950, the Statement was last amended in 1975.

The current Statement does not permit, in using the mountain chart illustrated therein, the display of investment results on a total return basis or the measurement of these results in terms of a compound rate of total return. Neither has the use of semi-logarithmic charts nor the display of investment results on a fund-price-high to fund-price-low basis been approved. Furthermore, the Statement does not provide for the presentation of investment results in summary form during successive periods of less than ten years.

Reasons for the Amendment to the Statement

An investor considering the purchase of mutual fund shares might benefit from the inclusion in sales literature of standardized charts of past investment results in a semi-log format, based on the total return earned (net investment income plus capital appreciation) and displayed on an annual fund-price-high to fund-price-low basis. An investor may also benefit from studying the changes in total value of an investment from period to period as shown in a mileage chart or in successive period tables. These innovations, and others contained in the new charts and tables, could help investors better to understand and evaluate past returns, risks and costs of mutual funds, and thus provide an efficient means of conveying information about the principal service investment companies provide to the investing public.

The Charts as Originally Proposed

Under the amendment as originally proposed, the investment results of mutual funds could have been portrayed on Sample Charts E and F. Chart E, a mountain chart in semi-log format, had both a cumulative growth scale and an actual investments results scale. The cumulative growth scale was based on continuously compounded rates of return. Investment results were plotted on a yearly market-high to market-low basis using the Standard and Poor's Composite 500 Stock Index (S&P 500) as the market index. The S&P 500, on a total return basis, was also plotted on Chart E in order to give investors some indication of variations in the value of the investment in comparison to the market index. Fund investment results, both before and after fund expenses, were displayed in terms of capital appreciation and investment income. The base line of the chart was drawn at the net amount invested (gross investment minus sales load). The year-by-year summary of results tabulated at the base of Chart E was in terms of continuously compounded rates of return. Chart E portrayed the ten most recent years of a fund's existence or its life if less than ten years.

Chart F portrayed in a bar chart format the year-by-year total returns for the fund and the S&P 500, side-by-side, over the most recent ten-year period along with the ten-year average compound rate of return for the fund. The chart also indicated by means of percentages the relative effects of capital appreciation and net investment income on returns as well as the effects of fund expenses and sales charges on the ten-year average return. Also included at the base of Chart F was a year-by-year listing of the average assets of the fund. The use of both Charts E and F would have been required whenever fund performance on a total return basis was portrayed.

Charts E and F As Adopted

Charts E and F as adopted are based upon the total return concept and show compound rates of return. However, several changes have been made in the format and content of the charts.

Chart E

Sample Chart E, set forth and described further in the Appendix, presents a continuous record of the results of an investment in a mutual fund on a total return basis. It continues the use of the semi-log format in order to allow accurate visual comparison and interpretation of results. It graphically illustrates investment results only in terms of changes in the dollar value of a sample investment. The cumulative growth scale has been deleted. Rather than requiring comparison of fund performance to that of the S&P 500, the chart makes optional comparison of fund performance to that of an appropriate index on a total return basis. Because the use of an index is optional, the presentation of fund results on a yearly fund-price-high to fund-price-low basis was substituted for the market-high to market-low basis. Fund results continue to be displayed in terms of capital appreciation and investment income so as to call attention to the variations in each component and the relative effect of each on the total return. The line representing fund total returns before fund expenses has been eliminated in order to simplify the chart. The primary base line (horizontal axis) of the chart has been redrawn at the $10,000 level, the amount of the original investment, rather than at the $9,150 level, the amount of the net investment, in order to give more emphasis to the effect of the sales charge on the total return. The use of a uniform period—the most recent ten years or the life of the fund if shorter—and uniform dimensions is continued so as to promote comparison of results among different funds and to minimize the possibility of distortion. Fund performance is shown in a tabular format at the base of Chart E in terms of both dollars and percentages. The percentages represent annual rates of return except for the 10 year averages which represent average, annually compounded rates of return.

Chart E may be presented alone and must be presented whenever any other chart portraying fund performance on a total return basis is presented.

In summary, Chart E is designed to permit investors to make meaningful visual interpretations of the past performance and current cost of an investment in a fund and to facilitate the comparison of such results from fund to fund.

Chart F

Sample Chart F, set forth and described further in the Appendix, portrays the same investment results as are portrayed in Chart E utilizing a bar graph of year-by-year total returns for the fund and an appropriate index, side by side, over the most recent ten-year period along with the ten-year average annual compound rate of return for the fund. The chart is drawn on a semilog scale in order that equal dollar changes, both plus and minus, in the value of the investment are represented by bars of equal length. The use of an appropriate index on a total return basis is optional. This change was made because the S&P 500 may not be a suitable basis of comparison for all funds. Average annual compound rates of return have been substituted for continuously compounded rates of return. The chart continues to show the relative effects of capital appreciation and net investment income on returns as well as the effects of expenses and sales charges on the annual and ten-year average returns. A line showing the percentage of annual fund expenses applicable to the $10,000 investment has been added. This line of percentages replaces the portrayal of fund expenses on Chart E. The line representing average annual assets of the fund has been eliminated.

Presentation of annual variations in the fund's return should assist investors in distinguishing the average rate of return for a mutual fund which varies from year to year from the rather constant return available from a savings account or a fixed-income security. Contrasting the annual variations with the ten-year average rate should emphasize the potential differences in the annual returns with the average return over a longer period of time. Breaking the return into its component parts allows investors to distinguish between results obtained from income and capital appreciation and allows them to make their own evaluation of the variability of each source. The chart also more clearly illustrates the impact of costs and expenses on the total return. Comparing the annual returns with the index, if used, would also give some indication of how fund returns are related to market fluctuations.

Sample Chart F must be accompanied, in the same piece of sales literature, by Sample Chart E.

Additional New Charts and Tables

In addition to Sample Charts E and F dis ussed above, the Commission has amended the Statement to include Sample Chart G, a "mileage" chart and variants thereof. While Chart G has not been exposed for public comment, it is based on the same total return concept as used in Sample Charts E and F and expands the alternatives available to investment companies for portraying their investment results on a total return basis.

Mileage Chart

Sample Chart G (set forth and described further in the Appendix) is called a "mileage" chart because it has the format of the familiar mileage chart on a road map; it portrays the results of a $10,000 investment on a total return basis (reinvestment of dividends and distributions) for any investment period or successive periods (in years) for a maximum of the most recent ten years or the life of the fund if shorter. From this chart, an investor can determine the value of a $10,000 investment at the end of any number of years within a ten-year period by looking at the appropriate column or row. For example, the investor could ascertain investment results for each three-year period, each five-year period or each seven-year period during the last ten years. The figure at the bottom of each column represents the value of a $10,000 investment at the end of the most recent year for each of ten possible different periods of time beginning with the year listed at the top of the column. The mileage chart must be accompanied in the same piece of literature by Sample Chart E and Sample Table 5 which is described below.

Successive Period Table(s)

Sample Chart G described above shows the investment results for every successive period for a maximum of the previous ten years. So, for example, from Chart G it is possible to determine the value of a $10,000 investment at the end of each five-year period for six successive periods and at the end of each eight-year period for three successive periods. As an alternative to showing an investment company's results for every possible successive period during the most recent ten years, a fund may select certain successive periods such as every five years or every eight years and show in an appropriate tabular format the results of a $10,000 investment for only the selected successive periods. If only selected successive periods are illustrated, every period within the successive period(s) selected must be shown on the table.

The length of the successive periods used could be any number of whole year periods from one year to ten years and any number of different successive period tables can be used. The successive period tables must be accompanied in the same piece of sales literature by Sample Table 5 which is described below.

Table To Accompany the Mileage Chart and Successive Period Tables

In order to make the use of mileage charts and successive period tables not misleading and also to provide persons using such charts and tables with detailed data on the components of total return, a table similar to Sample Table 5 (set forth and described further in the Appendix) must accompany, in the same piece of sales literature, the mileage chart and successive period tables.

Sample Table 5 portrays for the entire period covered, on either the mileage chart or successive period table(s), the components of the investment value at the end of each year. The components identified are (1) the initial $10,000 investment, (2) capital gains distributions reinvested, and (3) dividends reinvested. The total value of these components at each year end should equal the total value of the investment at that time. Knowing the year-by-year details should give investors a better understanding of how the three components change from year to year both relatively and in total. Furthermore, by comparing the value of the three components for the most recent year to the line on the table entitled "Cost plus actual amounts available for distributions and dividends," an investor can determine how much the initial investment, capital gain distributions and dividends have increased or decreased through investment or reinvestment in the fund.

Even though in Sample Table 5 dividends reinvested each year are not shown as being added to the initial cost of the investment, the total amount of dividends as well as the total amount of capital gains distributions that could have been received in cash are shown in the last row of the table. Both the reinvested distributions and dividends are then added to the initial cost of the investment to obtain a total "amount invested" figure against which the total value of the shares can be compared. Thus, Table 5 shows in total, for both distributions and dividends, what current Statement tables show on a yearly basis.

Sample Table 5 can be presented independently of any other chart or table. Sample Table 5 can portray at a maximum the most recent ten years of life of the fund if shorter.

Location of Sample Charts and Tables in Prospectuses

In addition to their use in sales literature, one or more of Sample Charts E, F, or G, the successive period tables, and sample Table 5 may also be used in prospectuses. If the charts and/or tables are used in prospectuses, they may be located anywhere in the prospectus but in such a way so as not to obscure or detract from other portions of the prospectus.

Procedure for Interpretive Letters

While the Statement carefully conditions the use of the various charts and tables illustrated therein, it does not proscribe the use of alternate presentations not discussed in the Statement, but states that "Persons using other charts and tables must assume responsibility that they are not materially false or misleading." Nevertheless, the use of charts and tables has been, as a practical matter, almost completely restricted to those illustrated in the Statement. We believe that this restriction prevails because of the policy of the Commission staff in the past not to issue opinions that presentations not specifically included in the Statement were not misleading and the reluctance of the industry to use novel presentations without some indication from the Commission or its staff that the presentation was considered not misleading. Such a situation can easily result in the failure of investment companies to develop and use to their legitimate advantages new, and possibly better, charts and tables which are not misleading.

In order to assist the industry in its effort to develop and use nonmisleading novel presentations, the Division of Investment Management will respond to requests for interpretive positions relating to presentations of investment company results not discussed in the Statement. While this procedure is being established in order to make nonmisleading presentations available for use more quickly than would be the case if an amendment to the Statement were required for each new chart or table, such submissions will be given full consideration by the staff and it is expected that the NASD will be consulted. It is anticipated that any such new presentations may be subject to conditions, one of which may be the inclusion of Chart E in order to maintain comparability among investment companies. Moreover, the Division anticipates that, because the Statement extensively describes the presentations included therein and the conditions under which they may be used, favorable responses will not ordinarily be given in the case of modifications of the charts and tables included in the Statement. All letters requesting an interpretive position pursuant to this procedure should include a statement by the sender that he does not object to the request and the reply thereto being made public immediately upon the issuance of the reply.

Appended to this Release is the text of the amendment to the Statement and the Sample Charts and Tables the use of which is permissible under the amendment.

Request for Comments on Proposed Changes to the Requirements for Charts and Tables Currently Authorized by the Statement

In connection with its consideration of the total return charts and tables being adopted by this Release, the Commission considered the length of the time period that should be portrayed in these charts and tables. Among the points considered by the Commission as warranting a ten-year limitation were the following:

1. The average individual investor does not appear to retain his investment in a fund for more than ten years,[1] and

2. The economic environment, events, and fund management that existed more than ten years ago may not be similar to the current circumstances of the fund.

On the basis of these considerations, the Commission determined that the total return charts and tables should be limited to a maximum of the most re-

[1] While it is difficult to compute a precise figure for the length of time the average individual investor remains invested in a fund, the staff estimates that the average person retains his investment in a mutual fund for approximately ten years.

V 42 I 175 SEP 9 77 UMI

cent ten years or life of the fund if shorter.

The Commission is also considering, for the same reasons, limiting the maximum time period that could be portrayed on charts and tables currently approved by the Statement to ten years or the life of the fund if shorter.[2]

The Commission recognizes, however, that an argument could be made that charts and tables showing periods in excess of ten years may not be misleading in all situations. For example, the sales effort of a mutual fund might be directed toward pension funds or other institutions whose investment horizon may reasonably be assumed to be in excess of ten years. For these exceptional situations, two approaches are possible. On the one hand, standards might be developed approving the use of periods greater than ten years in specified circumstances. On the other hand, the Commission could consider whether specific charts and/or tables that exceed the ten-year limitation are misleading on an individual request basis. Under either approach, the circumstances which would make a chart or table portraying a period in excess of ten years not misleading would have to be such as to make inapplicable the two basic reasons on which the Commission based its general ten-year limitation.

The Commission in its consideration of the total return charts decided that Sample Chart E, the mountain chart, should accompany, in the same piece of sales literature, Sample Charts F and G in order to obtain a greater degree of uniformity and comparability among funds in their presentations of performance on a total return basis and in order to make Charts F and G not misleading. The Commission is also considering whether Sample Chart E should accompany, in the same piece of sales literature, any of the charts currently approved by the Statement in order to make such charts not misleading and both to achieve greater comparability among funds and to show performance on a total return basis whenever any performance chart is used.

Interested persons are requested to submit their views and comments on the proposals to:

(1) Limit the time period portrayed in existing Statement charts and tables to a maximum of the most recent ten years,

(2) Find that certain charts and tables which exceed the ten-year limit are not misleading, and

(3) Require the use of Sample Chart E in conjunction with the use of any other performance chart approved by the Statement.

In order to provide further guidance for the inclusion of 1977 fund operating results in charts and tables which may be used in 1978 sales literature and prospectuses, the Commission intends to publish its definitive views on these three proposals before the end of the current calendar year. Accordingly, the Commission does not contemplate any extension of the comment period.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

SEPTEMBER 1, 1977.

AMENDMENT TO THE STATEMENT OF POLICY

It will be considered materially misleading hereafter for sales literature—

(a) To represent or imply a percentage return in the shares of an investment company except in accordance with paragraph (t) or unless based upon—

. . . . . .

(b) (1) To combine into any one amount distributions from net investment income and distributions from any other source except in a manner consistent with Sample Charts E, F, and G, successive period tables and Sample Table 5.

. . . . . .

(i) . . .

(1) . . .

(i) The text, graphic detail and arrangement of any such chart or table should be substantially as shown on Sample Charts A, B, C, D, E, F, G and Sample Table 5 in the Appendix, whichever is applicable.

. . . . . .

(j) (3) Approved charts and tables patterned after Charts A, B, C, and D and Tables 1, 2, 3, and 4 should conform with the following:

. . . . . .

(j) (4) Approved charts patterned after Charts E and F should conform with the following:

(i) If the life of the fund is less than 10 years, the maximum number of complete calendar years available should be used and the average compound return over the period covered should be used instead of the ten-year average compound return.

(ii) The visual presentation on Chart E may be extended to cover a portion of the current calendar year by means of an overlay which would cover the figures for the investment results which appear on the right hand side of these charts. The extensions should be plotted as straight lines starting with the values at the end of the last complete calendar year and ending with the most recent values.

(iii) The dates of the intermediate fund highs and lows during the year needed in constructing Chart E should be determined in reference to the net asset value per share of the subject fund.

(iv) The results of an investment of other than $10,000 may be portrayed on charts similar to Charts E and F: *Provided*, That they are accompanied by Chart(s) E and F portraying a $10,000 investment.

(v) If the sales charge for a fund has changed, the most recent charge, if any, applicable to an investment of $10,000 and the reinvestment of dividends should be portrayed on Charts E and F for the entire period covered.

(vi) The investment results portrayed can be based on either a calendar or fiscal year so long as the calendar or fiscal year base is used consistently.

(vii) Distributions of both net investment income and capital gains that are to be reinvested in fund shares should be assumed to be reinvested at the net asset value per share on the dates such distributions took place. Any sales charge levied on reinvested net investment income should be considered in computing the number of shares purchased.

(viii) The results of a single investment of $10,000 in a mutual fund may be portrayed on a chart substantially similar to Chart E which contains the following information:

A. The growth of the investment in dollars on a total return basis showing both the growth due to net investment income (after fund expenses) and the growth due to capital appreciation, plotted on a semi-logarithmic scale on an annual fund-price-high to fund-price-low basis over the most recent ten calendar years;

B. The chart should clearly differentiate by means of separate markings the cumulative effects of capital appreciation, net investment income and capital appreciation and income needed to recover the initial sales charge.

C. An appropriate index may be plotted using the fund-price-high and fund-price-low dates as the intermediate plotted points during each year. The index chosen should be appropriate considering the fund's investment policies and objectives. Examples of indexes that may be appropriate include the S&P 500, New York Stock Exchange or American Stock Exchange Index, NASDAQ Index or an index of mutual fund performance. The Dow Jones Industrial Average will not be considered an appropriate index except in those cases where the fund's portfolio is primarily invested in very large New York Stock Exchange listed equities. The figures for any index used should reflect the total return (both dividends and appreciation) on the index in order to be comparable to the total return figures of the fund. If an index is used, an appropriate second vertical scale should be added to Chart E or, alternatively, the index should be converted into dollar amounts.

D. A year-by-year tabular summary of results in dollars disclosing end of year value of the investment and income during the year assuming income was taken in cash and end of year value of the investment assuming income is reinvested.

E. A year-by-year tabular summary of results in percentages disclosing:

(a) The year-by-year total return and a ten-year average, annually compounded total return after expense deductions expressed as the sum of the returns due to net investment income before deduction of any sales charges on reinvested dividends and capital appreciation before deduction of any initial sales charge and any withdrawal charge;

(b) The effect of any initial sales charge on the first year's total return;

(c) The effect on a year's total return of any sales charge on reinvested dividends during the year;

(d) The effect of any withdrawal charge on the tenth year's total return; and

(e) The effect of any sales and/or withdrawal charges on the ten-year average total return.

(f) The annual total return and the ten-year average total return after deduction of all sales charges.

(g) The Fund expenses applicable to the investment expressed as a percentage.

(ix) The annual and the ten-year average annual rate of total return on a single investment of $10,000 in a mutual fund may be portrayed on a semi-logarithmic chart substantially similar to Chart F which contains the following information:

A. A bar graph presentation of the total returns after sales charges and expense deductions for each year over the most recent ten calendar years, side-by-side with the value on a total return basis, of an appropriate index. The use of a comparative index is optional. If an index is used, it should comply with the guidelines enumerated in paragraph (viii)C of this section. If indices are used in both Sample Charts E and F, the same index must be used on both charts.

B. A bar graph presentation of the ten year average annually compounded total return expressed as the sum of the average compound return due to capital appreciation and the average compound return due to investment income, indicating the effects of fund expenses and any sales charges on the initial investment and reinvested dividends (and any withdrawal charge) on the ten-year average compound return and highlighting the return after expenses and after the sales (and/or withdrawal) charges.

C. The year-by-year tabular summary of results in percentages at the base of the chart should be constructed in accordance with the instructions contained in paragraph (j) (3) (viii) E(a)–(g).

(x) If Sample Chart E is used, it should be accompanied in the same piece of literature by Sample Chart E.

(xi) For purposes of constructing Sample Charts E and F, the following definitions apply:

A. Dates of the fund-price-high and fund-price-low during a year are, respectively, the days on which the per share net asset value of the fund was at its high and at its low during a year.

B. Actual Investment Results Plotted on a fund-price-high to fund-price-low basis means that the values of the investment at year ends and at the dates of fund-price-highs and lows should be plotted on the chart and these values connected by straight lines.

C. Actual Investment Results Scale is a logarithmic scale which is used to measure changes in the dollar value of the sample investment on Chart E. The Actual Investment Results Scale can be constructed using natural logarithms. Alternatively, the logarithmic scale on single cycle, semi-log graph paper may be used to construct the Actual Investment Results Scale.

(a) A radial line representing a 10 percent annually compounded rate of return and plotted from the $10 000 point on the Actual Investment Results Scale shall not have more than a 25 degree angle with the horizontal axis ($10,000 level) of the chart.

D. The Percentage Change Scale on Chart F is a logarithmic scale which is used to measure the annual percentage change in the value of the sample investment. The Percentage Change Scale can be constructed using natural logarithms. Alternatively, the logarithmic scale on single cycle, semi-log graph paper may be used to construct the Percentage Change Scale.

E. The annual percentage changes on Sample Chart E and, if used, Chart F, should be calculated in the following manner:

(a) The net income return (after fund expenses) is the percentage calculated by dividing the gross cash dividends (before deducting any sales charge on reinvested dividends) declared on the shares held in the sample investment during a year by the total value of the investment at the beginning of the year. For the year in which the initial investment is made, the value at the beginning of the year is the total amount invested ($10,000).

(b) The appreciation return is the percentage calculated by dividing the total change in the value of the investment during a year minus the actual amount of dividends reinvested (gross dividends minus any sales charge) during the year by the total value of the investment at the beginning of the year. For the year in which the initial investment is made, the value at the beginning of the year is the total amount invested ($10,000).

(c) The total return before sales charges is the sum of the net income return and the appreciation return for the year.

(d) The sales charge on the initial investment is the percentage computed by dividing the dollar amount of the sales charge by the total amount invested.

(e) The sales charge on reinvested dividends is the percentage computed by dividing the dollar amount of sales charges on dividends reinvested during the year by the value of the investment at the beginning of the year. For the year in which the initial investment is made, the value at the beginning of the year is the total amount invested ($10,000). These percentages would be shown only by those funds that have a sales charge on reinvested dividends.

(f) The total return after sales charges is the summation of items "a" through "e" above. The total return can also be computed by dividing the difference between the value of the investment at the beginning and end of each year by the value of the investment at the beginning of the year.

For the year in which the initial investment is made, the value at the beginning of the year is the total amount invested ($10,000).

(g) The fund expense percentage is calculated by dividing the total fund expenses applicable to the shares held in the sample investment during the year by the value of the investment at the beginning of the year. For the year in which the initial investment is made, the value at the beginning of the year is the total amount invested ($10,000).

F. The 10 year average compound return on Sample Chart E, and if used, Chart F represents annually compounded returns and the computations should be done in such a way that the components of the average return when added together equal the ten year average compound return after sales charges. Both the average compound income return and the average compound appreciation return should be computed using the full $10,000 invested and not the net amount invested.

(i) (5) Approved charts patterned after Sample Chart G, total return successive period tables, and tables patterned after Sample Table 5 should conform with the following:

(i) The investment results portrayed may be based on either a calendar or fiscal year so long as the calendar or fiscal year base is used consistently.

(ii) Distributions of both net investment income and capital gains that are to be reinvested in fund shares should be assumed to be reinvested at the net asset value per share on the date such distributions took place. If a sales charge is levied on reinvested net investment income, such charge should be considered in computing the number of new shares purchased.

(iii) If the sales charge for a fund has changed, the most recent charge, if any, applicable to an investment of $10,000 and the reinvestment of dividends should be used.

(iv) The value at the end of each year of a single investment of $10,000 in a mutual fund on a total return basis may be portrayed on a chart substantially similar to Sample Chart G which contains the following information:

A. The period shown is a maximum of the most recent ten years or the life of the fund if shorter.

B. A column for each year during the period covered showing the total value of the $10,000 investment at the end of the year in which the investment was assumed to have been made and at the end of every successive year thereafter up to the end of the most current year.

C. A row for each of the periods included in the chart with the rows constructed in such a way that the dollar amount shown at the intersection of each row and column would represent te value of $10,000 invested at the beginning of the year listed at the top of the column and invested for the number of years indicated by the number of the row.

D. Appropriate explanations of the rows and columns and how the rows and columns are to be used in interpreting the chart.

(v) Where a chart patterned after Sample Chart G is used, the chart should be accompanied in the same piece of literature by Sample Chart E and a table substantially similar to Sample Table 5 described in subparagraph (v) of this subsection.

(vi) As an alternative to using Sample Chart G which shows investment results for every possible successive period during a maximum of the most recent ten years, a table or tables may be presented which show total investment results for only selected successive periods. Such successive periods may be any period such as every five-year period or every eight-year period during the most recent ten years or life of the fund if shorter. Any whole number of years from one to ten may be used as the length of the successive periods. All successive period total return charts should conform to the following requirements.

A. Every successive period of the length of the successive periods selected during the number of years included in the table should be shown in the table. Thus, for example, if five-year successive periods are selected, every five-year period within the period covered by the table should be shown.

B. The table(s) should have a column for the successive periods included showing both the beginning and ending year of each successive period.

C. The table(s) should have a column showing the total value of the investment at the end of each successive period listed.

D. The table(s) should be accompanied in the same piece of literature by a table substantially similar to Sample Table 5 described in the following subparagraph.

(vii) A table substantially similar to Sample Table 5, and covering the same number of years as are shown on Chart G and/or total return successive period tables should accompany Sample Chart G and total return successive period tables. Table 5 may be presented independently of any other chart or table. Table 5 should contain the following information:

A. Columns showing the value of a single $10,000 investment at the end of each year by component and the total value of the investment at the end of each year.

B. The numbers in the "Total Value of Shares" column should be the same as those shown in the first left hand total value column of the Sample Chart G (if used).

C. The last row of the table entitled "Cost plus actual amounts available for distributions and dividends" should show, respectively, the initial amount of the investment, the total amount of capital gains distributions that could have been received in cash during the total period illustrated, the total amount of income dividends that could have been received in cash during the total period illustrated, and the total of the three columns.

D. If a sales charge is levied on reinvested dividends, a note to the table should state the total amount of dividends actually reinvested after deduction of the sales charge.

E. If the table is used alone, it should cover the most recent ten years of the life of the fund if shorter.

. . . . . .

(t) To represent or imply in sales literature a compound rate of total return on an investment in a mutual fund unless such representation is accompanied by charts substantially similar to Sample Charts, E, F, G, successive period tables or Sample Table 5.

[2] Currently, charts and tables approved by the Statement can portray periods of time up to the life of the fund.

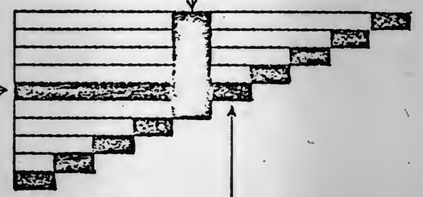
SAMPLE CHART G

Chart showing the Results of a Single Investment of $10,000 in the XYZ Fund on a Total Return Basis over any Investment Period during the Last Ten Years

NOTE: Results shown assume reivestment of capital gains and dividends. If capital gains and dividends are not reinvested, results would be less than depicted.



Initial $10,000 investment made January 1, this year. Results reflect reinvestment of dividends and capital gains in additional shares

Investment period	1967	1968	1969	1970	1971	1972	1973	1974	1975	1976
1	$11,273	$10,976	$ 7,908	$ 9,501	$10,076	$10,396	$ 8,736	$ 7,801	$12,929	$12,450
2	13,328	9,351	8,103	10,306	11,290	9,795	7,346	10,851	17,357	
3	11,459	9,581	8,790	11,549	10,637	8,233	10,220	14,569		
4	11,713	10,395	9,850	10,881	8,946	11,459	13,720			
5	12,711	11,647	9,281	9,152	12,445	15,386				
6	14,235	10,974	7,805	12,731	16,708					
7	13,467	9,229	10,857	17,092						
8	11,412	12,839	14,578							
9	15,899	17,237								
10	21,249									

Investment period tells you the number of years your money remained invested

These vertical columns show how a $10,000 investment changed from year to year. Select any January during the last 10 years as the starting point of your hypothetical investment, then look down the column of figures to see how the value of your investment would have changed over the years.

Look along any horizontal row of figures to find the value of a $10,000 investment at the end of any specific period

The figures at the bottom of each column show the value of a $10,000 investment on December 31, 1976 at the end of ten different periods. These periods range in length from 10 years (the vertical column on the left) to 1 year (the vertical column on the right.)

SAMPLE TABLE 5

ILLUSTRATION OF AN ASSUMED INVESTMENT OF $10,000 with Dividends Reinvested and Capital Gains Distributions Accepted in Shares

The table below covers the period from January 1, 1967 to December 31, 1976. This period was one in which common stock prices fluctuated severely and were generally at the same level at the end of the period as they were at the beginning. The results shown should not be considered as a representation of the dividend income or capital gain or loss which may be realized from an investment made in the fund today.

	Value of Shares by Component			
Year ended December 31	Value of $10,000 Investment	Value of Capital gains Distributions	Value of Reinvested Dividends	Total Value of Shares
1967	$10,104	$ 785	$ 384	$11,273
1968	10,725	1,771	832	13,328
1969	8,360	1,988	1,111	11,459
1970	8,012	2,145	1,556	11,713
1971	8,082	2,570	2,059	12,711
1972	8,488	3,062	2,685	14,235
1973	7,479	3,027	2,961	13,467
1974	5,937	2,466	3,009	11,412
1975	7,838	3,521	4,540	15,899
1976	9,844	4,930	6,475	21,249
Cost plus actual amounts available for distributions and dividends	$10,000	$ 4,473	$ 5,801	$20,274

Dividends reinvested are subject to sales commissions of 7 1/4% as described in the prospectus and such commissions were deducted from the dividends paid each year in computing the dollar amount of dividends reinvested. The cumulative amount of dividends reinvested during the period 1967 - 1976 was $5,367.

No adjustment has been made for any income taxes payable by shareholders on capital gains distributions and dividends invested in shares.

Title 20—Employees' Benefits

CHAPTER VI—EMPLOYMENT STANDARDS ADMINISTRATION, DEPARTMENT OF LABOR

SUBCHAPTER A—LONGSHOREMEN'S AND HARBOR WORKERS' COMPENSATION ACT AND RELATED STATUTES

PART 702—ADMINISTRATION AND PROCEDURES

Office of Workers' Compensation Programs; Longshoremen's and Harbor Workers' Compensation

AGENCY: Department of Labor.

ACTION: Final rule.

SUMMARY: This rule clarifies and expands the rules applicable to the filing, processing and adjudication of claims filed under the Longshoremen's and Harbor Workers' Compensation Act as amended and extended. It includes procedures for processing discrimination charges and defines the term "physician" and "final payment of compensation." The amendments will enable the Department of Labor to process in a more efficient and timely manner the increasing number of claims filed each year.

DATE: These amendments will be effective October 11, 1977.

FOR FURTHER INFORMATION CONTACT:

John E. Stocker, Associate Director for Longshore and Harbor Workers' Compensation, U.S. Department of Labor, Washington, D.C. 20210. (202–523–8721).

SUPPLEMENTARY INFORMATION: On August 13, 1976, a notice of proposed rulemaking was published in the FEDERAL REGISTER (41 FR 34294), which proposed to amend certain rules of the Department of Labor governing the administration of the Longshoremen's and Harbor Workers' Compensation Act, 33 U.S.C. 901 et seq., as amended by Pub L. 92–576, 86 Stat. 1251 (20 CFRP 701 and 702) to clarify and expand the rules applicable to the filing, processing and adjudication of claims. The public was given until September 13, 1976 to make written comments on the proposal. Written comments were received by the Office of Workers' Compensation Programs from 28 parties.

Substantive comments received from all sources have been considered and have resulted in changes being made to several provisions of the regulations. Some of the suggestions were not adopted either because the changes suggested were unwarranted, unnecessary, or went beyond the scope of the rules to be revised. A section by section summary of the substantive comments received and of the action taken in response thereto is set forth below.

1. *Section 702.104.* Under this section a deputy commissioner may transfer an individual case file to another compensation district whenever he determines that such transfer is necessary or appropriate to properly develop the claim. Such action may be taken with the prior or subsequent approval of the Director, OWCP. Under the proposed amendment an employee who moves from one district to another may request that his file be transferred to the second compensation district. Several persons suggested that the employer should also have the right to request that the file be transferred and further that such action should be taken only where it would not be unduly burdensome to all of the parties. The final regulation has been revised to grant the employer as well as the claimant the right to request a transfer, while reserving to the deputy commissioner, with the Director's approval, the ultimate decision making authority. The provision in the proposal which requires that the letter contemplated by § 702.104(b) be sent to all interested parties is adopted.

2. *Section 702.162.* Two comments were received concerning this section. The first suggested that a specified period should be established within which the claimant may dispute the right of a trust fund to the lien provided for in section 17(b) of the Longshoremen's Act or to the amount stated in the application for a lien. This suggestion has merit and the regulation has been revised to indicate that such opposition should be filed within 30 days after the claimant received a copy of the application or such other longer period as the deputy commissioner may set.

The second commentator urges that once a lien satisfies the "threshold" criteria of section 17(b) it shall be authorized either by the deputy commissioner at the informal level or by the administrative law judge at the formal hearing level, thus eliminating any exercise of discretion by the deputy commissioner or administrative law judge in authorizing a lien. Without gainsaying the merit or rationale for, in effect, substituting "shall" for "may" in the proposed regulation, the fact is that the regulation simply tracks "may" from section 17(b) itself, and it would be neither appropriate nor proper to vary the statutory language by implementing regulation. With regard to the contention that Congress intended the lien authorization to be mandatory upon satisfaction of the criteria in section 17(b), we consider that the language of that section is clear that although the basic criteria are satisfied the authorization of the lien is still a matter for the Secretary's discretion, as exercised by the deputy commissioner or administrative law judge.

3. *Section 702.212.* Under the proposed revision to § 702.212(c) a claim would be "any writing evidencing a claimant's intent to claim compensation and benefits provided by" the Act. The comments received objected to this amendment because it was neither specific nor clear as to what might actually constitute a claim for purposes of section 13 of the Longshoremen's Act. After reviewing such comments it has been decided that the provision in question should not be amended at this time.

The proposed new § 702.212(b) has been adopted as proposed.

4. *Section 702.235.* This section is being revised in accordance with the comments received to clarify what constitutes a final payment of compensation within the meaning of section 14(g) of the Longshoremen's Act by adding a new subparagraph (5) which reads—

(5) Any other payment of compensation which anticipates no further payments under the Act.

Another suggestion that the regulation specify that the required reports must be filed within 16 working days must be rejected as inconsistent with the statute. It was also suggested that the third line of subparagraph (a) be revised to impose the duty to file timely reports on the insurance carrier when the employer is not self-insured. This suggestion has been approved and incorporated into the final regulation.

5. *Sections 702.271–702.274.* These provisions are designed to establish procedures for resolving claims seeking redress from an employer because of an alleged violation of section 49 of the Act. Several persons suggested that if a penalty is to be assessed against an employer in a contested case, such penalty should be assessed by the administrative law judge as part of the final decision resolving the issues relating to the alleged unlawful activity, rather than by the deputy commissioner as proposed in § 702.274. These comments have much merit and thus § 702.273 has been revised to authorize the administrative law judge to assess a penalty where appropriate. Section 702.274 as proposed has been deleted.

Section 702.271(b) has been revised to state that the deputy commissioner shall notify the employer of the filing of a discrimination complaint.

Section 702.272 as proposed has also been clarified to ensure that the employee is entitled to a hearing where the deputy commissioner's informal recommendation is to deny the claim.

6. *Section 702.281.* Although no comments received strongly opposed this section of the regulations, one commentator suggested that information concerning the terms, conditions and amounts of third party settlements, compromises or judgments should be required only where written approval of the settlement or compromise has been given by the employer and insurance carrier. Such a limitation is deemed unnecessary and inconsistent with the basic purposes of the regulation which is designed to assist the employee, employer and/or insurance carrier, and the deputy commissioner in complying with the provisions of section 33 of the Longshoremen's Act.

7. *Section 702.312.* In adopting this section as proposed, we have rejected the suggestion that where a claimant is represented an informal conference may be called only at the request of the representative. Since the primary purpose of the informal conference is to resolve, where possible, contested issues, the suggested limitation would unduly restrict the actions of the deputy commissioner and may result in some unnecessary delays in the processing of claims.

8. *Section 702.315.* This section has been revised to state that upon the request of any party the deputy commissioner shall issue a formal compensation order within 30 days of the request.

9. *Section 702.404.* In the notice of proposed rulemaking (41 FR 34294) it was stated that the definition of "physician" as used in the Act would conform to the use of that term as defined in the Federal Employees' Compensation Act (FECA). Although most comments received concerning this proposal were favorable, several objections were received, particularly with respect to the inclusion of chiropractors. Since Congress amended the FECA to specifically include chiropractors and others within the definition of physician and since the Secretary has always been guided by the terms of the FECA in defining "physician" for Longshoremen's Act purposes, these objections have been rejected. Section 702.404 has been revised to ensure conformity of interpretation under the two statutes.

10. *Section 702.411.* This section dealing with special examinations conducted pursuant to section 7(e) of the Act has been revised to provide that upon request a party shall be given copies of all information, opinions, reports, etc., that were made available to the impartial specialist. Another suggestion which would restrict the use of impartial specialists to those situations where claimant's counsel has requested an impartial examination has been rejected as an unreasonable and unnecessary limitation on the authority of the deputy commissioner.

11. *Section 702.412.* One commentator suggested that the cost of the initial special examination should be borne by the party requesting the examination. This suggestion was rejected as being contrary to the provisions of section 7(e) of the Act. For the same reason another suggestion that the Special Fund established by section 44 of the Act should always pay where more than one special examination is ordered was also rejected.

12. In addition to adopting those proposals published August 13, 1976, §702.410 has also been revised to authorize deputy commissioners to order the suspension of compensation payments where the employee unreasonably refuses to submit to a medical examination by a physician selected by the employer or where an employee refuses to submit to a special examination as required by §§ 702.408 and 702.409. Although this revision was not initially published as a proposal, the requirements of 5 U.S.C. 553 do not apply since it is not in the public interest to permit the continued payment of compensation where the party will not cooperate and there is a potential for fraud.

This document was prepared under the direction and supervision of George M. Lilly, Counsel for Longshore, Suite N-2716, New Department of Labor Building, Washington, D.C. 20210, Telephone No. area code 202–523–7651. Accordingly, 20 CFR Part 702 is amended as follows:

1. Section 702.104 is revised to read as follows:

§ 702.104 Transfer of individual case file.

(a) At any time after a claim is filed, the deputy commissioner having jurisdiction thereof may, with the prior or subsequent approval of the Director, transfer such case to the deputy commissioner in another compensation district for the purpose of making an investigation, ordering medical examinations, or taking such other action as may be necessary or appropriate to further develop the claim. If, after filing a claim, the claimant moves to another compensation district, the deputy commissioner may, upon request by the claimant or the employer and with the approval of the Director, transfer the case to such other compensation district.

(b) The deputy commissioner making the transfer may by letter or memorandum to the deputy commissoner to whom the case is transferred give advice, comments, suggestions, or directions if appropriate to the particular case. The transfer of cases shall be by registered or certified mail. All interested parties shall be advised of the transfer.

2. Section 702.161 is revised to read as follows:

LIENS ON COMPENSATION

§ 702.161 Liens against assets of insurance carriers and employers.

(a) Where a claimant is entitled to compensation under the provisions of this Act, and the carrier or employer shall have suffered insolvency, bankruptcy, or reorganization in bankruptcy proceedings and be unable to pay appropriate compensation, the claimant shall have a lien against the assets of such carrier or employer, or both. Such lien shall be without limit and shall be entitled to preference and priority in the distribution of the assets of such carrier or employer, or both.

(b) Where payments have been made from the special fund pursuant to section 18(b) of the Act and § 704.145(f) the Secretary of Labor shall, for the benefit of the fund, be subrogated to all the rights of the person receiving such payments including the right of lien and priority provided for by section 17(a) of the Act, 33 U.S.C. 917(a). The Secretary may institute proceedings under either section 18 or 21(d) of the Act, 33 U.S.C. 918 or 921(d), or both, to recover the amount expended by the fund or so much as in the judgment of the Secretary is possible, or the Secretary may settle or compromise any such claim.

3. Section 702.162 is revised to read as follows:

§ 702.162 Liens on compensation authorized under special circumstances.

(a) Pursuant to section 17(b) of the Act, 33 U.S.C. 917(b), when a trust fund which complies with section 302(c) of the Labor-Management Relations Act of 1947, 29 U.S.C. 186(c) [LMRA], established pursuant to a collective bargaining agreement in effect between an employer and an employee entitled to compensation under this Act, has paid disability benefits to an employee which the employee is legally obligated to repay by reason of his entitlement to compensation under this Act, a lien may be authorized on such compensation in favor of the trust fund for the amount of such payments.

(b)(1) An application for such a lien shall be filed on behalf of the trust fund with the deputy commissioner for the compensation district where the claim for compensation has been filed, 20 CFR 702.101. Such application shall include a certified statement by an authorized official of the trust fund that:

(i) The trust fund is entitled to a lien in its favor by reason of its payment of disability payments to a claimant-employee (including his name therein);

(ii) The trust fund was created pursuant to a collective bargaining agreement covering the claimant-employee;

(iii) The trust fund complies with section 302(c) of the Labor-Management Relations Act of 1947, 29 U.S.C. 186(c);

(iv) The trust agreement contains a subrogation provision entitling the fund to reimbursement for disability benefits paid to the claimant-employee who is entitled to compensation under the Longshoremen's Act;

(2) The statement shall also state the amount paid to the named claimant-employee and whether such disability benefit payments are continuing to be paid.

(3) If the claimant has signed a statement acknowledging receipt of disability benefits from the trust fund and/or a statement recognizing the trust fund's entitlement to a lien against compensation payments which may be received under the Longshoremen's and Harbor Worker's Compensation Act as a result of his present claim and for which the fund is providing disability payments, such statement[s] shall also be included with or attached to the application.

(c) Upon receipt of this application, the deputy commissioner shall, within a reasonable time, notify the claimant, the employer and/or its compensation insurance carrier that the request for a lien has been filed and each shall be provided with a copy of the application. If the claimant disputes the right of the trust fund to the lien or the amount stated, if any, he shall, within 30 days after receipt of the application or such other longer period as the deputy commissioner may set, notify the deputy commissioner and he shall be given an opportunity to challenge the right of the trust fund to, or the amount of, the asserted lien; notice to either the employer or its compensation insurance carrier shall constitute notice to both of them.

(d) If the claim for compensation benefits is resolved without a formal hearing and if there is no dispute over the amount of the lien or the right of the trust fund to the lien, the deputy commissioner may order and impose the lien

V 42 I 175 SEP 9 77 UMI

and he shall notify all parties of the amount of the lien and manner in which it is to be paid.

(e) If the claimant's claim for compensation cannot be resolved informally, the deputy commissioner shall transfer the case to the Office of the Chief Administrative Law Judge for a formal hearing, pursuant to section 19(d) of the Act, 33 U.S.C. 919(d), and 20 CFR 702.-317. The deputy commissioner shall also submit therewith the application for the lien and all documents relating thereto.

(f) If the administrative law judge issues a compensation order in favor of the claimant, he may include therein a lien in favor of the trust fund if it is determined that the trust fund has satisfied all of the requirements of the Act and regulations.

(g) If the claim for compensation is not in dispute, but there is a dispute as to the right of the trust fund to a lien, or the amount of a lien, the deputy commissioner shall transfer the matter together with all documents relating thereto to the Office of the Chief Administrative Law Judge for a formal hearing pursuant to section 19(d) of the Act, 33 U.S.C. 919(d), and 20 CFR 702.317.

(h) In the event that either the deputy commissioner or the administrative law judge is not satisfied that the trust fund qualifies for a lien under section 17(b), he may require further evidence including but not limited to the production of the collective bargaining agreement, trust agreement, or portions thereof.

(i) Before any such lien is finally approved, if the trust fund has provided continued disability payments after the application for a lien has been filed, the trust fund shall submit a further certified statement showing the total amount paid to the claimant as disability payments. The claimant shall likewise be given an opportunity to contest the amount alleged in this subsequent statement.

(j) In approving a lien on compensation, the deputy commissioner or administrative law judge shall not order an initial payment to the trust fund in excess of the amount of the past due compensation. The remaining amount to which the trust fund is entitled may thereafter be deducted from the affected employee's subsequent compensation payments and paid to the trust fund, but any such payment to the trust fund shall not exceed 10 percent of the claimant-employee's bi-weekly compensation payments.

4. Section 702.212(b) is revised to read as follows:

§ 702.212 Claims for compensation; time limitations.

* * * * *

(b) The time limitations set forth, supra, do not apply to claims filed under section 49 of the Act, 33 U.S.C. 948a, see § 702.271.

5. Section 702.235 is revised to read as follows:

§ 702.235 Report by employer of final payment of compensation.

(a) Within 16 days after the final payment of compensation has been made, the employer, the insurance carrier, or where the employer is self-insured, the employer shall notify the deputy commissioner on a form prescribed by the Secretary, stating that such final payment has been made, the total amount of compensation paid, the name and address of the person(s) to whom payments were made, the date of the injury or death and the name of the injured or deceased employee, and the inclusive dates during which compensation was paid.

(b) A "final payment of compensation" for the purpose of applying the penalty provision of § 702.236 shall be deemed any one of the following:

(1) The last payment of compensation made in accordance with a compensation order awarding disability or death benefits, issued by either a deputy commissioner or an administrative law judge;

(2) The payment of an agreed settlement approved under section 8(i) (A) or (B), of the Act, 33 U.S.C. 908(i);

(3) A lump sum payment of future compensation payments commuted under section 14(j) of the Act, 33 U.S.C. 914(j);

(4) The last payment made pursuant to an agreement reached by the parties through informal proceedings;

(5) Any other payment of compensation which anticipates no further payments under the Act.

6. Section 702.271 is revised to read as follows:

§ 702.271 Review of discharge or other acts of discrimination.

(a) Under the provisions of section 49 of the Act, 33 U.S.C. 948a any employer or its duly authorized agent who discharges, or in any other manner discriminates against an employee because he or she has claimed or attempted to claim compensation or has testified or is about to testify in a proceeding under this Act, shall be liable to a penalty of not less than $100 nor more than $1,000.

(b) When a deputy commissioner receives a complaint from an employee alleging discrimination as defined under section 49, he or she shall notify the employer, and within five working days, initiate specific inquiry to determine all the facts and circumstances pertaining thereto. This may be accomplished by interviewing the employee, employer representatives and other parties who may have information about the matter. Interviews may be conducted by written correspondence, telephone or personal interview.

(c) If circumstances warrant, the deputy commissioner may also conduct an informal conference on the issue as described in §§ 702.312–314.

(d) Any employee discriminated against is entitled to be restored to his employment and to be compensated by the employer for any loss of wages arising out of such discrimination provided that the employee is qualified to perform the duties of the employment. If it is determined that the employee has been discriminated against, the deputy commissioner shall also determine whether the employee is qualified to perform the duties of the employment. The deputy commissioner may use medical evidence submitted by the parties or he may arrange to have the employee examined by a physician selected by the deputy commissioner. The cost of the medical examination arranged for by the deputy commissioner may be charged to the special fund established by section 44, 33 U.S.C. 944.

7. Section 702.272 is revised to read as follows:

§ 702.272 Informal recommendation by deputy commissioner.

(a) If the deputy commissioner determines that the employee has been discharged or suffered discrimination and is able to resume his or her duties, the deputy commissioner will recommend that the employer reinstate the employee and/or make such restitution as is indicated by the circumstances of the case, including compensation for any wage loss suffered as the result of the discharge or discrimination. The deputy commissioner may also assess the employer an appropriate penalty, as determined under authority vested in the deputy commissioner by the Act. If the deputy commissioner determines that no violation occurred he shall notify the parties of his findings and the reasons for recommending that the complaint be denied. If the employer and employee accept the deputy commissioner's recommendation, it will be incorporated in an order and mailed to each party within 10 days.

(b) If the parties do not agree to the recommendation, the deputy commissioner shall, within 10 days after receipt of the rejection, prepare a memorandum summarizing the disagreement, mail a copy to all interested parties, and shall within 14 days thereafter refer the case to the Office of the Chief Administrative Law Judge for hearing pursuant to § 702.317.

8. Section 702.273 is revised to read as follows:

§ 702.273 Adjudication by Office of the Chief Administrative Law Judge.

The Office of Administrative Law Judges is responsible for final determinations of all disputed issues connected with the discrimination complaint, including the amount of penalty to be assessed, and shall proceed with a formal hearing as described in §§ 702.331 to 702.394.

9. Section 702.274 is revised to read as follows:

§ 702.274 Employer's refusal to pay penalty.

In the event the employer refuses to pay the penalty assessed, the deputy commissioner shall refer the complete administrative file to the Associate Director, Division of Longshore and Harbor Workers' Compensation, for subsequent transmittal to the Associate Solicitor for Employee Benefits, with the request that appropriate legal action be taken to recover the penalty.

10. Section 702.281 is revised to read as follows:

§ 702.281 Third party action.

(a) Every person claiming benefits under this Act (or the representative) shall promptly notify the employer and the deputy commissioner when:

(1) A claim is made that someone other than the employer or person or persons in its employ, is liable in damages to the claimant because of the injury or death and identify such party by name and address.

(2) Legal action is instituted by the claimant or the representative against some person or party other than the employer or a person or persons in his employ, on the ground that such other person is liable in damages to the claimant on account of the compensable injury and or death; specify the amount of damages claimed and identify the person or party by name and address.

(3) Any settlement, compromise or any adjudication of such claim has been effected and report the terms, conditions and amounts of such resolution of claim. (Caution: See 33 U.S.C. 933(g).)

11. Section 702.312 is revised to read as follows:

§ 702.312 Informal conferences: Called by and held before whom.

Informal conferences shall be called by the deputy commissioner or his designee assigned or reassigned the case and held before that same person, unless such person is absent or unavailable. When so assigned, the designee shall perform the duties set forth below assigned to the deputy commissioner, except that a compensation order following an agreement shall be issued only by a person so designated by the Director to perform such duty.

12. Section 702.315 is revised to read as follows:

§ 702.315 Conclusion of conference; agreement on all matters with respect to the claim.

(a) Following an informal conference at which agreement is reached on all issues, the deputy commissioner shall, within 10 days after conclusion of the conference, embody the agreement in a memorandum or within 30 days issue a formal compensation order, to be filed and mailed in accordance with § 702.349. If either party requests that a formal compensation order be issued the deputy commissioner shall, within 30 days of such request, prepare, file, and serve such order in accordance with § 702.349. Where the problem was of such nature that it was resolved by telephone discussion or by exchange of written correspondence, the parties shall be notified by the same means that agreement was reached and the deputy commissioner shall prepare a memorandum or order setting forth the terms agreed upon. In either instance, when the employer or carrier has agreed to pay, reinstate or increase monetary compensation benefits, or to restore or appropriately change medical care benefits, such action shall be commenced immediately upon becoming aware of the agreement, and without awaiting receipt of the memorandum or the formal compensation order.

* * * * *

13. Section 702.403 is revised to read as follows:

§ 702.403 Employee's right to choose physician; limitations.

The employee shall have the right to choose his attending physician from among those authorized by the Director, OWCP, to furnish such care and treatment. In determining the choice of a physician, consideration must be given to availability, the employee's condition and the method and means of transportation. Generally 25 miles from the place of injury, or the employee's home is a reasonable distance to travel, but other pertinent factors must also be taken into consideration.

14. Section 702.404 is revised to read as follows:

§ 702.404 Physician defined.

The term "physician" includes doctors of medicine (MD), surgeons, podiatrists, dentists, clinical psychologists, optometrists, chiropractors, and osteopathic practitioners within the scope of their practice as defined by State law. The term includes chiropractors only to the extent that their reimbursable services are limited to treatment consisting of manual manipulation of the spine to correct a subluxation shown by x-ray or clinical findings. Physicians defined in this part may interpret their own x-rays. All physicians in these categories are authorized by the Director to render medical care under the Act. Naturopaths, faith healers, and other practitioners of the healing arts which are not listed herein are not included within the term "physician" as used in this part.

15. Section 702.410 is revised to read as follows:

§ 702.410 Duties of employees with respect to special examinations.

(a) For any special examination required of an employee by §§ 702.408 and 702.409, the employee shall submit to such examination at such place as is designated in the order to report, but the place so selected shall be reasonably convenient for the employee.

(b) Where an employee fails to submit to an examination required by §§ 702.408 and 702.409, the deputy commissioner may order that no compensation otherwise payable shall be paid for any period during which the employee refuses to submit to such examination unless circumstances justified the refusal.

(c) Where an employee unreasonably refuses to submit to medical or surgical treatment, or to an examination by a physician selected by the employer, the deputy commissioner may by order suspend the payment of further compensation during such time as the refusal continues.

16. Section 702.411 is revised to read as follows:

§ 702.411 Special examinations; nature of impartiality of specialists.

(a) The special examinations required by § 702.408 shall be accomplished in a manner designed to preclude prejudgment by the impartial examiner. No physician previously connected with the case shall be present, nor may any other physician selected by the employer, carrier, or employee be present. The impartial examiner may be made aware, by any party or by the OWCP, of the opinions, reports, or conclusions of any prior examining physician with respect to the nature and extent of the employee's impairment, its cause, or its effect upon the wage-earning capacity of the injured employee, if the Deputy Commissioner determines that, for good cause, such opinions, reports or conclusions shall be made available. Upon request, any party shall be given a copy of all materials made available to the impartial examiner.

* * * * *

17. Section 702.412 is revised to read as follows:

§ 702.412 Special examinations; costs chargeable to employer or carrier.

(a) The Director or his designee ordering the special examination shall have the power in the exercise of his discretion, to charge the cost of the examination or review to the employer, to the insurance carrier, or to the special fund established by section 44 of the Act, 33 U.S.C. 944.

(b) The Director or his designee may also order the employer or the insurance carrier to provide the employee with the services of an attendant, where the deputy commissioner considers such services necessary, because the employee is totally blind, has lost the use of both hands, or both feet or is paralyzed and unable to walk, or because of other disability making the employee so helpless as to require constant attendance in the discretion of the deputy commissioner. Fees payable for such services shall be in accord with the provisions of § 702.412

18. Section 702.413 is revised to read as follows:

§ 702.413 Fees for medical services; prevailing community charges.

All fees charged by physicians for the care of persons covered by this Act, or any other charges for medical treatment or supplies within the purview of this Act, shall be limited to such charges for similar treatment, services or supplies as prevail in the community in which the physician, medical facility or suppler is located. In those jurisdictions where there are official State medical fee

V 42 175 SEP 9 77 UMI

schedules for workers' compensation, they may be used as guidelines.

Signed at Washington, D.C., this 6th day of September 1977.

JOHN B. MUMFORD,
Acting Assistant Secretary for Employment Standards.

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER D—DRUGS FOR HUMAN USE

[Docket No. 76N-0384]

PART 310—NEW DRUGS

Requirement for Labeling Directed to the Patient

AGENCY: Food and Drug Administration.

ACTION: Delay of effective date of final regulation.

SUMMARY: The effective date of the final regulation requiring patient labeling for estrogenic drug products is extended to October 18, 1977. The extension is in response to a request to delay the running of the effective date for the length of time required to consider petitions to stay the final regulation.

EFFECTIVE DATE: Section 310.515 (21 CFR 310.510) shall be effective on October 18, 1977.

ADDRESS: Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Philip L. Paquin, Bureau of Drugs (HFD-30), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857. (301-443-5220).

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of July 22, 1977 (42 FR 37636), the Commissioner of Food and Drugs issued a final regulation to require patient labeling for prescription estrogenic drug products. The regulation specifies the kind of information to be contained in the patient labeling and how it is to be made available to the patient. The regulation was scheduled to become effective on September 20, 1977.

On August 4, 1977, the Food and Drug Administration (FDA) received petitions from the Pharmaceutical Manufacturers Association and The American College of Obstetricians and Gynecologists requesting a stay of this effective date pending the outcome of litigation challenging the validity of the regulation. At the same time, counsel for the two petitioners requested that the running of the 60-day period between publication of the final regulation in the FEDERAL REGISTER and its effective date be tolled, i.e., suspended, for the length of time it takes the agency to consider the petitions. Petitioners argued that unless a suspension in the running of the 60-day period is granted, manufacturers would be required to begin taking steps to meet the new labeling requirements before the agency decision on the petitions requesting a stay. In its response to the request, FDA acknowledged that the time between the Commissioner's decision on the petitions and the scheduled effective date of September 20, 1977, might be insufficient to enable manufacturers to comply with the regulation. Therefore, the agency agreed to suspend the running of the 60-day period for the brief period needed to respond to the petitions.

On September 1, 1977, the Commissioner denied the petitions to stay the final regulation. Copies of the petitions and the Commissioner's responses to them are on file in the office of the Hearing Clerk, Food and Drug Administration. In all, 28 days had elapsed from date of submission of the petitions (August 4, 1977) to the issuance of the Commissioner's decision. Accordingly, consistent with the request, the effective date of the final regulation is extended to October 18, 1977.

This action is taken under the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 701(a), 52 Stat. 1050-1053 as amended, 1055 (21 U.S.C. 352, 355, 371(a)) and under authority delegated to the Commissioner (21 CFR 5.1).

Dated: September 1, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[FR Doc.77-26025 Filed 9-2-77;9:57 am]

SUBCHAPTER E—ANIMAL FEEDS, DRUGS, AND RELATED PRODUCTS

[FRL 787-7; FAP 6H5145-T28]

PART 561—TOLERANCES FOR PESTICIDES IN ANIMAL FEEDS ADMINISTERED BY THE ENVIRONMENTAL PROTECTION AGENCY

Ethyl 3-methyl-4-(methylthio)phenyl (1-methylethyl) phosphoramidate

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a feed additive regulation permitting the experimental use of the nematocide ethyl 3-methyl-4-(methylthio)phenyl (1-methylethyl) phosphoramidate in pineapple bran. The regulation was requested by the Pineapple Growers' Assoc. of Hawaii. This rule will permit the marketing of pineapple bran while further data is collected on the subject pesticide.

EFFECTIVE DATE: Effective on September 9, 1977.

FOR FURTHER INFORMATION CONTACT:

Ms. Libby Zink, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M Street SW., Washington, D.C. 20460. (202-755-4851).

SUPPLEMENTARY INFORMATION: On November 18, 1976, the EPA announced (41 FR 50854) that the Pineapple Growers' Association of Hawaii, 1902 Financial Plaza of the Pacific, Honolulu, HA 96813, had filed a food additive petition (FAP 6H5145). This petition proposed that 21 CFR Part 561 be amended to establish a food additive regulation permitting the use of the nematocide ethyl 3-methyl-4-(methylthio)phenyl (1-methylethyl) phosphoramidate and its cholinesterase-inhibiting metabolites in a proposed experimental program involving application of the nematocide to growing pineapples with a tolerance limitation of 10 parts per million (ppm) for residues of the nematocide in dried pineapple bran. This petition was submitted in accordance with two experimental use permits that are being issued concurrently under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended (86 Stat. 973, 89 Stat. 751; 7 U.S.C. 136 (a) et seq. No comments were received by the Agency in response to this notice of filing.

The scientific data reported and other relevant material have been evaluated, and it has been determined that the pesticide may be safely used in accordance with the provisions of the experimental use permits. It has further been determined that since residues of the pesticide may result in dried pineapple bran from the agricultural use provided for in the experimental use permits, the feed additive regulation should be established and should include a tolerance limitation. The toxicological data considered in support of the proposed tolerance were 90-day dog and rat-feeding studies, a two-year dog-feeding study, a rabbit teratology study, and a hen neurotoxicity study. The metabolism of the subject pesticide in plants and animals has been adequately described, and an adequate analytical method (gas chromatography with thermionic detection) is available for enforcement purposes. There is no reasonable expectation of residues from the proposed use in eggs, meat, milk, or poultry as delineated in 40 CFR 180.6(a)(3).

The available data and information are sufficient to support the proposed tolerance. The following data must be supplied prior to the establishment of a permanent tolerance or for any expanded use: The manufacturing process for the pesticide, the toxicological significance of residues of phenolic hydrolysis products, the composition of a certain inert ingredient, correct nomenclature for the sulfoxide and sulfone metabolites of the pesticide, and additional residue data reflecting the proposed use in Hawaii. Also a mutagenicity study may be required.

Permanent tolerances have previously been established (40 CFR 180.349) for residues of the pesticide on peanut hulls at 0.4 ppm; bananas, brussels sprouts, and cabbage at 0.1 ppm; cottonseed and soybeans at 0.05 ppm; and peanuts at 0.02 ppm. (A related document establishing a tolerance of 0.2 ppm for residues of the pesticide on pineapples appears elsewhere in today's FEDERAL REGISTER.) Accordingly, a feed additive regulation is established as set forth below.

Any person adversely affected by this regulation may, on or before October 11, 1977, file written objections with the Hearing Clerk, EPA, Rm. 1019, East Tower, 401 M St. SW., Washington D.C. 20460. Such objections should be submitted in quintuplicate and specify the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by the grounds legally sufficient to justify the relief sought.

Effective on September 9, 1977, 21 CFR Part 561 is amended as set forth below.

Dated: August 31, 1977.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

(Sec. 408(c)(1), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 348(c)(1))

Part 561 is amended by adding section 561.232 to read as follows:

§ 561.232 Ethyl 3-methyl-4-(methylthio)phenyl (1-methylethyl) phosphoramidate.

(a) A tolerance of 10 parts per million is established for combined residues of the nematocide ethyl 3-methyl-4-(methylthio)phenyl (1-methylethyl) phosphoramidate and its cholinesterase-inhibiting metabolites in pineapple bran resulting from application of the nematocide in accordance with the provisions of two experimental use permits that expire August 31, 1980.

(b) Residues in pineapple bran not in excess of 10 parts per million resulting from the use described in paragraph (a) of this section remaining after expiration of the experimental use program will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permits and feed additive tolerance.

(c) The Pineapple Growers' Association of Hawaii shall immediately notify the Environmental Protection Agency of any findings from the experimental use that have a bearing on safety. The association shall also keep records of distribution and performance and on request make the records available to any authorized officer or employee of the Environmental Protection Agency or the Food and Drug Administration.

[FR Doc.77-26259 Filed 9-8-77;8:45 am]

Title 24—Housing and Urban Development

CHAPTER II—OFFICE OF ASSISTANT SECRETARY FOR HOUSING—FEDERAL HOUSING COMMISSIONER, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SUBCHAPTER B—MORTGAGE AND LOAN INSURANCE PROGRAMS UNDER NATIONAL HOUSING ACT

[Docket No. R-77-429]

PART 201—PROPERTY IMPROVEMENT AND MOBILE HOME LOANS

Mobile Home Loans; Prepayment of Loans

AGENCY: Department of Housing and Urban Development.

ACTION: Final rule.

SUMMARY: This rule prescribes the mathematical method to be used for calculating finance charges when loans are prepaid. The rule provides that lenders must use the "actuarial method," which is defined in the rule, in calculating earned and unearned finance charges. Use of the "actuarial method" provides for a more exact calculation of interest and will result in lower interest charges for consumers who prepay mobile home loans.

EFFECTIVE DATE: This amendment is effective October 10, 1977.

FOR FURTHER INFORMATION CONTACT:

Christopher LaMartina, Director, Title I Insured Loan Division, Dept. Housing and Urban Development, 451 Seventh Street, SW., Room 6133, Washington, D.C. 20410. (202-755-8636).

SUPPLEMENTAL INFORMATION. On January 7, 1977, a proposed rule was published in the FEDERAL REGISTER (42 FR 1487). Sixteen comments were received and the rule has been modified in certain respects as a result of the comments received.

Several commenters questioned the allowance of a minimum retained charge, not to exceed $50 where authorized under state law, when a loan is prepaid. This provision has been deleted because of the penalty it would impose on consumers.

In response to other comments, the regulations were amended to provide that in the event of prepayment a lender would be permitted to retain a 1 percent origination fee, if such fee was assessed against the borrower, as an earned charge, without provision for total or partial rebate with respect to such fee.

A number of financial institutions and trade associations representing financial institutions stated their objections to the adoption of the rule on the grounds that the reduction in earnings resulting from the rule might discourage lending institutions from making mobile home loans. Other commenters felt that the "Rule of 78th's" method should be retained because it is a simpler method. A commenter suggested that the actuarial method be used only for loans having terms of more than 144 months. After careful consideration these suggestions and objections were rejected as it is unfair to require borrowers who prepay their loans to pay proportionately larger finance charges than borrowers whose loans run for the term of the loan. For instance, with a $10,000 loan for 12 years at 12 percent prepaid in the 52nd month, the debt would be calculated under the "Rule of 78th's" as $555.91 more than it would be if calculated according to the actuarial method. The Department recognizes that prepayment of loans in some cases results in loss of anticipated income to lending institutions; however, this factor is considered in establishing the initial interest charge for loans.

A commenter expressed serious concern about the effect of the Department's proposed rule on banks' methods for extending insured mobile home credit, stating that several states' laws governing rebate of finance charges require the use of the "sum of the digits" method ("Rule of 78th's") in the computation of earned financing charges. Many state laws require the use of the "Rule of 78th's." However, the Department has determined that these laws set minimum requirements and do not prohibit the rebating of a greater portion of the finance charge to consumers.

The actuarial method of computation of earned and unearned finance charges is a more exact and understandable method than the "Rule of 78th's" and results in all cases in lower charges to consumers who prepay their loans. After careful consideration of all of the comments that have been received it has been determined to adopt the actuarial method.

A finding of Inapplicability respecting the National Environmental Policy Act of 1969 has been made in accordance with HUD procedures. A copy of this Finding of Inapplicability will be available for public inspection during regular business hours in the Office of the Rules Docket Clerk, Office of the Secretary, Room 5218, Department of Housing and Urban Development, 451 7th Street SW., Washington, D.C. 20410.

Accordingly, 24 CFR Part 201 is amended as follows:

1. By adding a new paragraph (n) to § 501 to read as follows:

§ 201.501 Definitions.

* * * * * *

(n) "Actuarial method" means the method of allocating payments made on a debt between the amount financed and the finance charge, pursuant to which a payment is applied first to the accumulated finance charge, and any remainder is subtracted from, or any deficiency is added to, the unpaid balance of the amount financed.

2. Section 201.540(b) is amended to read as follows:

§ 201.540 Financing charges.

* * * * * *

V 42 175 SEP 9 77 UMI

(b) *Prepayment rebate.* If an obligation is paid in full, or otherwise matured, prior to its scheduled maturity, the insured shall rebate the full unearned charge, if any, where such rebate is $1.00 or more. The earned charge shall be calculated by the actuarial method. When an obligation is prepaid in full and the borrower has previously paid an origination fee, where the law of the jurisdiction permits, such origination fee, or permissible portion thereof, may be retained by the insured and not included in the charge for the purpose of calculating the unearned charge to be rebated.

3. Section 201.585 is amended by adding the following material after the final sentence, to read as follows:

§ 201.585 Refinancing.

* * * The full amount of any unearned finance charge on the original obligation shall be rebated to the borrower. The earned charge shall be calculated by the actuarial method. The finance charge for the purpose of calculating the earned charge and the unearned finance charge shall not include an origination fee paid by the borrower, if any. The borrower may be assessed a handling charge of not more than $25.00 in figures in connection with the refinancing.

4. Section 201.680(a) is amended to read as follows:

§ 201.680 Amount of claim.

* * * * *

(a) Deduct from the unpaid amount of the obligation (net unpaid principal, and the earned portion of the finance charge calculated according to the actuarial method) * * *

* * * * *

(Sec. 7(d) 79 Stat. 670 (42 U.S.C. 3535(d)); sec. 2, 48 Stat. 1246, (12 U.S.C. 1703), as amended.)

NOTE.—The Department of Housing & Urban Development has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821.

Issued at Washington, D.C., August 27, 1977.

LAWRENCE B. SIMONS,
Assistant Secretary for Housing, Federal Housing Commissioner.

Title 29—Labor

CHAPTER IV—OFFICE OF LABOR-MANAGEMENT STANDARDS ENFORCEMENT, DEPARTMENT OF LABOR

PART 452—GENERAL STATEMENT CONCERNING THE ELECTION PROVISIONS OF THE LABOR-MANAGEMENT REPORTING AND DISCLOSURE ACT OF 1959

Subpart E—Candidacy for Office; Reasonable Qualifications

AGENCY: Labor-Management Services Administration, Department of Labor.

ACTION: Typographical corrections to a final amendment to an interpretative rule.

SUMMARY: The amendments in this document correct typographical errors in the amendment to § 452.38 of Department of Labor's regulations as published in F.R. Vol. 42, No. 148 at 39105 and 39106 on August 2, 1977.

EFFECTIVE DATE: Since this amendment corrects typographical errors and does not change substance, it is effective on September 9, 1977.

FOR FURTHER INFORMATION CONTACT:

Herbert Raskin, Chief, Branch of Interpretations and Standards, Division of Program Standards, Office of Labor-Management Standards Enforcement, Labor-Management Services Administration, Department of Labor, Washington, D.C. 20210. (202-523-7373).

SUPPLEMENTARY INFORMATION: This document was prepared under the direction and control of Carl Rolnick, Director, Office of Labor-Management Standards Enforcement, Room N5408, New Department of Labor Building, 200 Constitution Ave. N.W., Washington, D.C. 20210, telephone 202-523-7377.

29 CFR Part 452 is amended by revising section 452.38 as follows:

1. The figure 70 at the end of the second line in paragraph (A-1) should be 79.

2. In the 11th line of paragraph (b) the section symbol before 11,857 should be a paragraph symbol.

3. In the 18th line of paragraph (b) "was mott" should be "as moot."

4. In the 22nd line of paragraph (b) the semicolon after Ass'n should be a comma.

5. In the 22nd line of paragraph (b) 985 should be 965.

6. In the 10th line from the end of paragraph (b) there should be a paragraph symbol before 12,816.

7. In the 10th line from the end of paragraph (b) there should be a comma instead of a period in 12,816.

Signed at Washington, D.C., this 31st day of August, 1977.

FRANCIS X. BURKHARDT,
Assistant Secretary of Labor.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER C—AIR PROGRAMS

[FRL 779-3]

PART 80—REGULATION OF FUELS AND FUELS ADDITIVES

Unleaded Gasoline Regulations; Information and Reports; Liability Provisions

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This amendment allows EPA to request information from wholesale purchaser-consumers concerning suspected violations of the unleaded gasoline regulations. This amendment also changes the liability of branded refiners for contamination of unleaded gasoline at owned or leased facilities to conform with applicable case law.

EFFECTIVE DATE: October 11, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert A. Weissman, Attorney-Advisor, Mobile Source Enforcement Division (EN-340), Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460. (202-755-2816).

SUPPLEMENTARY INFORMATION:

1. REQUESTS FOR INFORMATION FROM WHOLESALE PURCHASER-CONSUMERS

On November 12, 1974, it was proposed that section 80.7 be added to 40 CFR Part 80 to require refiners, distributors, and retailers to provide the Agency, upon request, information pertaining to compliance with the unleaded gasoline regulations. (39 FR 39988). At the time of proposal refiners, distributors and retailers constituted all classes of persons who were subject to the principal controls on unleaded gasoline. The regulations were amended to include section 80.7 on August 20, 1975. (40 FR 36335). However, this amendment failed to take into account an intervening promulgation. On December 12, 1974, regulations were promulgated subjecting wholesale purchaser-consumers to all provisions of the unleaded gasoline regulations applicable to retailers except for the provision, 40 CFR 80.22(b), requiring retailers to offer for sale unleaded gasoline. (39 FR 43281). When section 80.7 was added a few months later, however, reference to wholesale purchaser-consumers was inadvertently omitted. Therefore, section 80.7 is now being revised to require that wholesale purchaser-consumers provide the Agency, upon request, information related to compliance with the unleaded gasoline regulations.

2. LIABILITY OF BRANDED REFINERS

On December 5, 1974, and December 12, 1974, EPA amended the unleaded gasoline regulations at 40 CFR Part 80 setting forth the liability of gasoline retailers, wholesale purchaser-consumers, resellers, distributors and refiners for gasoline offered for sale that is represented to be unleaded but does not conform with the requirements for unleaded gasoline under 40 CFR 80.2(g). 40 CFR 80.21, 80.22, 80.23. (39 Fed. Reg. 42360; 39 Fed Reg. 43284). In 40 CFR 8023(b)(2)(iv), the branded refiner was provided a defense to liability based upon quality control contracts, but the defense did not extend to a refiner where the refiner directly supplied a retail outlet substantially owned or leased by the refiner. The U.S. Court of Appeals for the District of Columbia Circuit, in *Amoco Oil Co., Inc. v. EPA*, 543 F. 2d 270,279 (D.C. Cir. 1976) (hereinafter *Amoco II*), held that the language herein being removed from section 80.23(b)(2)(iv) be stricken to permit a contract defense to liability for a refiner in a direct supply situation to a retail outlet owned or leased by the branded refiner.

3. DEFINITION OF "WAS CAUSED"

In *Amoco II* the Court endorsed a stipulation of the parties modifying the regulations regarding the burden of proof that a refiner has to meet to establish a defense to liability under 40 CFR 80.23(b)(2)(ii) through (vi). 543 F. 2d at 273n.8. Section 80.23(b) is accordingly being revised by the addition of section 80.23(b)(2)(viii) defining the words "was caused" as used in subparagraphs (ii) through (vi) to conform with the agreed upon language.

4. GENERAL

The amendment to section 80.7 is intended to correct an oversight in the promulgation of that section. The amendments to section 80.23 are necessary under judicial decision. Therefore, the Agency finds good cause to promulgate these amendments without prior notice and public procedure. The Agency also finds these amendments are not environmentally or economically significant and therefore do not require an Environmental Impact Statement, or an Economic Impact Analysis under Executive Orders 11821 and 11949 and OMB Circular A-107.

40 CFR Part 80 is amended as follows:

1. In § 80.7, paragraph (a), by inserting the words "wholesale purchaser-consumer," between the word "distributor," and the words "or retailer."

2. In § 80.7, subparagraph (a)(1), by inserting the words ", wholesale purchaser-consumer" between the words "to a distributor" and the words "or a retail outlet."

3. In § 80.7, subparagraph (a)(1)(i), by inserting the words ", wholesale purchaser-consumers" between the words "of distributors" and the words "or retail outlets."

4. In § 80.7, by revising subparagraph (a)(2) to read as follows:

§ 80.7 Requests for information.

* * * * *

(a) * * *

(2) For any bulk shipment of gasoline represented to be unleaded gasoline received by a retail outlet or a wholesale purchaser-consumer facility within the previous six months, whether by purchase or otherwise, the retailer or wholesale purchaser-consumer shall maintain accessibility to and provide the following information:

(i) Business or corporate name and address of the distributor.

(ii) Quantity of gasoline received.

(iii) Date of receipt.

5. In § 80.7, by revising paragraph (c) to read as follows:

§ 80.7 Request for information.

* * * * *

(c) Any refiner, distributor, wholesale purchaser-consumer or retailer shall provide such other information as the Administrator, the Regional Administrator, or their delegates may reasonably require to enable him to determine whether such refiner, distributor, wholesale purchaser-consumer and retailer has acted or is acting in compliance with section 211(c) of the Act and the regulations thereunder and shall, upon the request of the Administrator, the Regional Administrator, or their delegates, produce and allow reproduction of any relevant records at all reasonable times. Such information may include but is not limited to records of unleaded gasoline inventory at a wholesale purchaser-consumer facility or a retail outlet, unleaded pump meter readings at a wholesale purchaser-consumer facility or a retail outlet, and receipts providing the date of acquisition of signs, labels, and nozzles required by § 80.22. No person shall be required to furnish information requested under this paragraph if he can establish that such information is not maintained in the normal course of his business.

6. In § 80.23, subparagraph (b)(2)(iv), by deleting the words "and whose assets or facilities are not substantially owned, leased, or controlled by the refiner," immediately following the words "(and not by a reseller)."

7. In § 80.23, by adding a new subparagraph (b)(2)(viii) reading as follows:

§ 80.23 Liability for violations.

* * * * *

(b) * * *

(2) * * *

(viii) In subparagraphs (ii) through (vi) hereof, the term "was caused" means that the refiner must demonstrate by reasonably specific showings by direct or circumstantial evidence that the violation was caused or must have been caused by another.

(Sections 211 and 301 of the Clean Air Act, as amended (42 U.S.C. 1857f-6c, 1857g).)

Dated: August 31, 1977.

DOUGLAS M. COSTLE,
Administrator.

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 177—FEDERAL, STATE, AND PRIVATE PROGRAMS OF LOW-INTEREST LOANS TO VOCATIONAL STUDENTS AND STUDENTS IN INSTITUTIONS OF HIGHER EDUCATION

Technical Correction—Annual Loan Limits for Health Professions Students Under the Guaranteed Student Loan Program

AGENCY: Office of Education, HEW.

ACTION: Notice.

SUMMARY: This technical correction is being issued to clarify the eligibility requirements for health professions schools under health professions student loan provisions of the Guaranteed Student Loan Program. These provisions were published as an interim final regulation in the FEDERAL REGISTER on June 30, 1977 (42 FR 33290).

EFFECTIVE DATE: August 5, 1977 (this is the effective date of the provisions of the interim final regulation corrected by this notice).

FOR FURTHER INFORMATION CONTACT:

Robert F. Carmody, Jr., Director, Division of Program Development, Office of Guaranteed Student Loans, Bureau of Student Financial Assistance, Office of Education, 7th and D Streets SW., Washington, D.C. 20202 (202-472-2758).

NOTICE

An interim final regulation which raises annual loan limits for qualified health professions students under the Guaranteed Student Loan Program (GSLP) was published in the FEDERAL REGISTER on June 30, 1977 (42 FR 33290). This interim final regulation allows health professions students attending eligible schools of medicine, osteopathy, dentistry, veterinary medicine, optometry, podiatry, or public health to borrow up to $10,000 annually under the existing GSLP. Qualified students attending eligible schools of pharmacy may borrow up to $7,500 annually under the existing GSLP. The preamble to the interim final regulation states that students who would have been eligible under the Health Professions Guaranteed Student Loan Program (HPGSLP), had the program been in operation, are eligible for the raised health professions loan limits under the GSLP.

This technical correction clarifies that students attending health professions schools located outside the United States, who would not have been eligible to participate in the HPGSLP, are not eligible to receive the higher loan amounts for health professions students under the GSLP. This is in accordance with section 737(1) of the Public Health Service Act, as amended, which states that a school of medicine, osteopathy, dentistry, veterinary medicine, optometry, podiatry, pharmacy, or public health must be located within the United States in order to be eligible for the HPGSLP (42 U.S.C. 294j).

(Catalog of Federal Domestic Assitance Number 13.460, Guaranteed Student Loan Program.)

Dated: September 1, 1977.

JOHN ELLIS,
Acting United States Commissioner of Education.

Approved: September 1, 1977.

L. DAVID TAYLOR,
Deputy Assistant Secretary for Management, Planning, and Technology.

1. 45 CFR 177.12 is corrected by revising paragraph (a)(1)(xv) as follows:

§ 177.12 Agreements for Federal payments to reduce student interest costs for insured loans.

(a)(1) * * *

(xv) Authorizes the insurance of up to $10,000 in the case of a student en-

V 42 I 175 SEP 9 77 UMI

rolled in a school of medicine, osteopathy, dentistry, veterinary medicine, optometry, podiatry or public health located within the United States, and $7,500 in the case of a student enrolled in a school of pharmacy located within the United States who has satisfactorily completed three years of training.

2. 45 CFR 177.43 is corrected by revising paragraphs (a)(2) and (a)(3) as follows:

§ 177.43 Limitations governing maximum amount of federally insured loans.

(a) • • •

(2) To a student enrolled in a school of medicine, osteopathy, dentistry, veterinary medicine, optometry, podiatry, or public health located within the United States in an amount in excess of $10,000;

(3) To a student who has satisfactorily completed three years of training and is enrolled in a school of pharmacy located within the United States in an amount in excess of $7,500; and

Title 46—Shipping

CHAPTER II—MARITIME ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 252—OPERATING DIFFERENTIAL SUBSIDY FOR BULK CARGO VESSELS ENGAGED IN WORLDWIDE SERVICE

Wages Allowable as a Variable Cost

AGENCY: Maritime Administration, Department of Commerce.

ACTION: Final rule.

SUMMARY: Part 252 of Title 46, Code of Federal Regulations, which prescribes regulations governing the payment of operating-differential subsidy to operators of bulk cargo vessels engaged in worldwide services is hereby amended. The amendment increases the amount of subsidizable overlap in wages for replacement of crew. The new maximum number of overlap days is three for officers and two for unlicensed personnel. The amendment is being made to reflect the hiring practices and payoff requirements for crew members of bulk cargo vessels.

EFFECTIVE DATE: September 9, 1977.

FOR FURTHER INFORMATION CONTACT:

James S. Dawson, Jr., Secretary, Maritime Subsidy Board, Washington, D.C. 20230, Tel. 202-377-2188.

Accordingly, § 252.31(e)(1)(ii), Title 46, Code of Federal Regulations (General Order 117) is amended as follows:

§ 252.31 Wages of officers and crews.

• • • • • •

(e) *Calculation of collective bargaining costs* (1) • • •

(ii) *Variable costs.* Variable costs are all regularly incurred employment costs which are not stated in specific or determinable amounts per time period since they vary with ship operating experience. Variable costs include but are not limited to:

Payroll taxes
Overtime and penalty pay
Payments to Master for piloting
Transportation expenses and travel allowances
Payments to relief officers and crews.
Lodging allowances
Overlap in wages for replacement of crew (maximum of three days for officers and two days for unlicensed personnel)
Division of wages occasioned by other than a shortage of crew

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[RM 2243; FCC 77-588]

PART 97—AMATEUR RADIO SERVICE

Frequencies Available to Amateur Radio Stations

AGENCY: Federal Communications Commission.

ACTION: Final rules.

SUMMARY: The Commission is amending its Rules to permit amateur radio operation by amateur stations operating outside the United States and outside the jurisdiction of foreign governments on all frequencies authorized for amateur operation by the International Telecommunication Union. This action is taken in response to complaints that the existing restrictions on such operation are unnecessarily severe.

EFFECTIVE DATE: September 12, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mr. Gregory M. Jones, Personal Radio Division, 202-632-7175, Safety and Special Radio Services Bureau.

SUPPLEMENTARY INFORMATION: In the matter of Amendment of Part 97 of the Commission's Rules concerning the frequencies available to amateur radio stations (RM-2243).

Adopted: August 24, 1977.

Released: September 1, 1977.

1. The Commission has before it petition for rulemaking, RM-2243, submitted by Mr. Max Grossman of Las Vegas, Nev., in accordance with the Administrative Procedure Act, 5 U.S.C. 553(e), and Section 1.401 of the Commission's Rules.

2. Petitioner in RM-2243 requests amendment of Section 97.95 of the Rules to permit operation of amateur radio stations licensed by the Commission outside the United States and outside the jurisdiction of foreign governments on all amateur frequency bands between 3.5 MHz and 148 MHz. Section 97.95(b)(2) of the Rules presently limits such operation to amateur frequency bands between 7.0 MHz and 148 MHz when a station is located in International Telecommunication Union (ITU) Region 2. Operation outside the jurisdiction of a foreign government in ITU Regions 1 and 3 is limited to 7.0-7.1 MHz, 14.00-14.35 MHz, 21.00-21.45 MHz, and 28.0-29.7 MHz.

3. Petitioner states that as the number of amateur stations operated on airplanes and ships increases, a greater number of frequencies are needed to accommodate the operations of such stations. It is also alleged that a greater number of available frequencies will result in safer operation of ships and aircraft. A comment supporting the proposals in RM-2443 was submitted by Mr. Norman White of North Hollywood, Calif.

4. We believe the proposals contained in RM-2443 to be meritorious. Section 97.61 of the Rules lists the frequency bands and emissions authorized amateur stations in the United States, which is in ITU Region 2. Section IV of Article 5 of the Radio Regulations of the International Telecommunication Union lists those frequency bands that signatory administrations may allocate to the Amateur Service. We believe there to be no reason why amateur stations operating outside the United States and outside the jurisdiction of foreign governments should be restricted in their operation to the frequency bands listed in Section 97.95 of the Rules. We are therefore amending the Rules to permit amateur operation outside the jurisdiction of a foreign government in ITU Region 2 on all frequency bands listed in Section 97.61 of the Rules. We are also authorizing amateur operation outside the jurisdiction of a foreign government in ITU Regions 1 and 3 on those frequencies listed in Section IV of Article 5 of the ITU Radio Regulations. All operations are subject to the provisions and limitations of the ITU Radio Regulations. Additionally, except for permissible frequency bands, all operation must comply with all other requirements of Part 97 of the Rules.

5. The specific amendments we are adopting are set forth below. As an aid to users of these rules, we are replacing the text of the Note following Section 97.95, which defines ITU Region 2, with a map of the world, outlining graphically each of the three ITU Regions. Because this is a very minor amendment of the Commission's Rules, merely increasing slightly the privileges available to licensees in the Amateur Service, and because adoption of this amendment will have an insignificant impact on amateur licensees and the public-at-large, the Commission finds, for good cause, that the notice and public procedure provisions of the Administrative Procedure Act, 5 U.S.C. 553, are unnecessary. This amendment relieves a previously imposed restriction, and its effective date may be immediate under the provisions of the Administrative Procedure Act. Authority for this action is contained in Sections 4(i) and 303 of the Communications Act of 1934, as amended.

6. *Accordingly, it is ordered,* That RM-2243 is granted and that Part 97 of the Commission's Rules is amended as set forth in the attached Appendix effective September 12, 1977.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082, 47 U.S.C. 154, 303.)

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

Part 97 of Chapter 1 of Title 47 of the Code of Federal Regulations is amended to read, as follows:

1. In § 97.95, paragraph (b)(2) and the Note are amended and new paragraphs (b)(3) and (b)(4) are added, as follows:

§ 97.95 Operation away from the authorized fixed operation station location.

• • • • • •

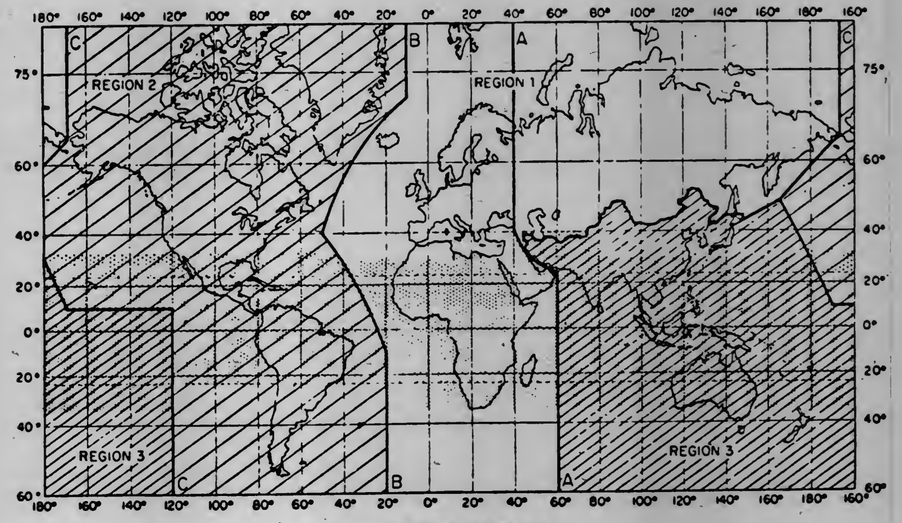
(b) • • •

• • • • • •

(2) When outside the jurisdiction of a foreign government, amateur operation may be conducted within ITU Region 2 subject to the limitations of, and on those frequency bands listed in, § 97.61.

(3) When outside the jurisdiction of a foreign government, amateur operation may be conducted within ITU Regions 1 and 3 on the following frequencies, subject to the limitations and provisions of Section IV of Article 5 of the Radio Regulations of the ITU:

(i) Region 1: 3.5-3.8 MHz, 7.0-7.1 MHz, 14.0-14.35 MHz, 21.0-21.45 MHz, 28.0-29.7 MHz, 144-146 MHz, 430-440 MHz, 1215-1300 MHz, 2300-2450 MHz.



Region 3: 3.5-3.9 MHz, 7.0-7.1 MHz, 14.0-14.35 MHz, 21.0-21.45 MHz, 28.0-29.7 MHz, 50.0-54.0 MHz, 144-148 MHz, 420-450 MHz, 1215-1300 MHz, 2300-2450 MHz.

(ii) Operation on amateur frequency bands above 2450 MHz may be conducted subject to the limitations and provisions of Section IV of Article 5 of the Radio Regulations of the ITU.

(4) Except as otherwise provided, amateur operation conducted outside the jurisdiction of a foreign government shall comply with all requirements of Part 97 of this Chapter.

CHAPTER I—U.S. FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

SUBCHAPTER B—TAKING, POSSESSION, TRANSPORTATION, SALE, PURCHASE, BARTER, EXPORTATION, AND IMPORTATION OF WILDLIFE

PART 20—MIGRATORY BIRD HUNTING

Final Frameworks for Late Season Migratory Bird Hunting Regulations

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: This rule prescribes final frameworks, that is, the outer limits for dates and times when shooting may begin and end, and the number of birds which may be taken and possessed for late season migratory bird hunting regulations. The Service annually prescribes hunting regulations frameworks to the States. The effects of this final rule are to facilitate the selection of hunting seasons by the States and to establish late season migratory bird hunting regulations for the 1977–78 season.

EFFECTIVE DATE: September 8, 1977.

FOR FURTHER INFORMATION CONTACT:

John P. Rogers, Chief, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240 (202–343–8827).

SUPPLEMENTARY INFORMATION: The Migratory Bird Treaty Act of July 3, 1918 (40 Stat. 755; 16 U.S.C. 703 et seq.), as amended, authorizes and directs the Secretary of the Interior, having due regard for the zones of temperature and for the distribution, abundance, economic value, breeding habits, and times and lines of flight of migratory game birds to determine when, to what extent, and by what means such birds or any part, nest, or egg thereof may be taken, hunted, captured, killed, possessed, sold purchased, shipped, carried, exported, or transported.

The annual process for developing migratory game bird hunting regulations is divided into those for "early" seasons and those for "late" seasons. Early seasons include those which open before October 1 while late seasons open on or after October 1. Regulations are developed independently for early and late seasons. The early season regulations cover mourning doves, white-winged doves, bandtailed pigeons, rails, gallinules, woodcock, common snipe, sea ducks in the Atlantic Flyway, teal in September in the Central and Mississippi Flyways, lesser sandhill cranes in North Dakota and South Dakota, doves in the Virgin Islands and Hawaii, all migratory game birds in Puerto Rico and Alaska and special falconry seasons. Late seasons include the general waterfowl seasons; special seasons for scaup and goldeneyes; extra scaup and blue-winged teal in regular seasons; most sandhill crane seasons in the Central Flyway; coits, gallinules, and snipe in the Pacific Flyway; and special falconry seasons.

Certain general procedures are followed in developing regulations for both the early and the late seasons. Initial regulatory proposals are first announced in a FEDERAL REGISTER document in early March, and opened to public comment. As additional information becomes available, and comments are received and considered to the initial proposals, a supplemental proposed rulemaking is announced in the FEDERAL REGISTER. At the termination of the comment periods and following a public hearing, the Service develops and publishes the proposed frameworks for times of seasons, season lengths, shooting hours, daily bag and possession limits, and other regulatory restraints or options. Following another public comment period and after consideration of additional comments, the Service publishes in the FEDERAL REGISTER the final frameworks. Using these frameworks, State conservation agencies select hunting season dates and offered options. States may select more restrictive seasons and options than those offered in the Service's frameworks. The final regulations, reflected in amendments to Subpart K of 50 CFR 20 then appear in the FEDERAL REGISTER, and become effective upon publication.

On March 10, 1977, the Service published for public comment in the FEDERAL REGISTER (42 FR 13311) proposals to amend 50 CFR Part 20, with a comment period ending May 18, 1977. That document dealt with minor modifications in § 20.11 of Subpart B, the addition of § 20.40 in Subpart D, and with establishment of seasons, limits, and shooting hours for migratory game birds under §§ 20.101 through 20.107 of Subpart K. On May 25, 1977, the Service published for public comment in the FEDERAL REGISTER (42 FR 26669) a second document in the series consisting of supplemental or modified proposals and clarification or correction of minor portions of the earlier document. On July 5, 1977, the Service published in the FEDERAL REGISTER (42 FR 34305) a third document in the series consisting of final rulemaking dealing specifically with final frameworks from which wildlife conservation agency officials in Puerto Rico and the Virgin Islands could select season dates for hunting certain migratory birds in Puerto Rico and the Virgin Islands during the 1977–78 season. On July 5, 1977, the Service also published for public comment in the FEDERAL REGISTER (42 FR 34342) a fourth document in the series consisting of supplemental proposed rulemaking dealing specifically with proposed frameworks for early season migratory bird hunting regulations from which, when finalized, States could select season dates and daily bag and possession limits for the 1977–78 season. On July 15, 1977, the Service announced in a fifth document in the FEDERAL REGISTER (42 FR 36495) the availability of a draft environmental assessment on shooting hours and allowed a 10-day public comment period. On July 22, 1977, the Service published in the FEDERAL REGISTER (42 FR 37552) a sixth document in the series consisting of final rulemaking dealing specifically with final frameworks (except shooting hours) for early season migratory bird hunting regulations in all States during the 1977–78 seasons from which States selected early season dates and daily bag and possession limits for the 1977–78 season. On August 9, 1977, the Service published in the FEDERAL REGISTER (42 FR 40211) a seventh document in the series, consisting of final rulemaking dealing specifically with final frameworks for shooting hours for early season migratory game bird hunting regulations in all States during the 1977–78 season. On August 15, 1977, the Service published in the FEDERAL REGISTER (41145) an eighth document in the series consisting of supplemental proposed rulemaking dealing specifically with proposed frameworks for late season migratory bird hunting regulations from which, when finalized, States could select season dates shooting hours, and daily bag and possession limits for the 1977–78 season. On August 18, 1977, the Service published in the FEDERAL REGISTER (42 FR 41636) a ninth document in the series consisting of final rulemaking amending Subpart K of 50 CFR 20 to set open hunting seasons, certain closed areas, shooting hours, and bag and possession limits for mourning doves, white-winged doves, bandtailed pigeons, rails, woodcock, snipe, and gallinules; September teal seasons; sea ducks in certain defined areas of the Atlantic Flyway; sandhill cranes in designated portions of North Dakota and South Dakota; and migratory game birds in Alaska, Hawaii, Puerto Rico, and the Virgin Islands. This document is the tenth in a series of proposed, supplemental, and final rulemaking documents for migratory game bird hunting regulations and deals specifically with final regulations frameworks for 1977–78 late hunting seasons on certain migratory game birds.

On June 21, 1977, a public hearing was held in Washington, D.C., as announced in the FEDERAL REGISTER (42 FR 26709; May 25, 1977; and 42 FR 29345; June 8, 1977) to review the status of mourning doves, woodcock, band-tailed pigeons, white-winged doves, rails, gallinules, lesser sandhill (little brown) cranes in North Dakota and South Dakota, and common (Wilson's) snipe. Proposed hunting regulations for these species were discussed plus those governing migratory game birds in Alaska, Puerto Rico, and the Virgin Islands; mourning doves in Hawaii; September teal seasons in the Mississippi and Central Flyways; and special sea duck seasons in the Atlantic Flyway. Statements or comments were invited. On August 2, 1977, a public hearing was held in Washington, D.C., as announced in the FEDERAL REGISTER (42 FR 26709; May 25, 1977; and 42 FR 34897; July 7, 1977), to review information on population status and proposed hunting regulations for waterfowl, coots, and gallinules; lesser sandhill (little brown) cranes in Colorado, New Mexico, Oklahoma, Texas, Montana, and Wyoming; common (Wilson's) snipe in the Pacific Flyway; and special falconry regulations. Statements or comments were invited.

REVIEW OF PUBLIC COMMENTS AND THE SERVICE RESPONSE TO SAME

The public was given several opportunities to comment on regulations being proposed for late seasons during 1977–78. Altogether, 662 written public comments were received by August 4, 1977, and given consideration. The Service advised that interested persons should respond by May 18, 1977, to the initial regulatory proposals shown in the FEDERAL REGISTER dated March 10, 1977, on page 13313. One hundred twenty-eight comments were received. A supplemental proposed rulemaking appeared in the FEDERAL REGISTER on May 25, 1977 (42 FR 26669), and the public was given until July 14, 1977, to submit comments. Twenty-nine comments were submitted. The public was notified in the FEDERAL REGISTER on July 15, 1977 (42 FR 36495), that a draft environmental assessment on shooting hours for migratory game birds was available for review and comment, and that comments would be considered if received by July 25, 1977. Four written comments on the draft environmental assessment were received by July 25, 1977. Five additional written comments were received between July 26 and August 1 after the close of this comment period but were, nevertheless, considered in preparing the final environmental assessment for proposed shooting hours regulations.

Many of the earlier comments dealt with the early season regulations, and these were tabulated and analyzed in the FEDERAL REGISTER dated July 5, 1977, on page 34306, and July 22, 1977, on page 37552. Many letters contained statements on several topics. Some regulatory proposals, such as shooting hours, pertained to both early and late season proposals. Some respondents submitted more than one statement during the overall comment period. Also, some of the comments addressed topics outside the scope of the regulatory proposals, and, in this regard, were irrelevant.

An additional 364 comments regarding late season regulations were received from August 4, 1977, through the close of the public comment period on August 25, 1977. Most of these were from individuals commenting on the proposed shooting hours. Eight other comments, all favorable, were received regarding the overall proposed frameworks for late hunting seasons. These were from 6 State conservation agencies, 1 organization, and 1 individual. One organization recommended against the proposed shooting hours and continuation of the point system; urged greater restrictions for the black duck and reductions in daily bag limits for coots, mergansers, and sea ducks; proposed elimination of whistling swan and sandhill crane seasons; and opposed the special falconry seasons, alleging that falconry threatens hawk populations by encouraging nest robbing. In previous FEDERAL REGISTER documents the Service commented on these issues raised by the same organization.

Of the 355 comments received on shooting hours, 189 were in favor of one-half hour before sunrise to sunset shooting while 164 were opposed to these hours. Two other comments were opposed to more restrictive hours which one State had selected. In general, those favoring retention of the one-half hour before sunrise shooting period noted that this was a time of day when waterfowl were active, hunting success was good, and that these shooting hours were not detrimental to waterfowl or other birds. In contrast, opponents to the one-half hour before sunrise shooting period alleged that flying birds could not be identified by species in the pre-sunrise period, and that the shooting of protected or endangered species was contrary to purposes of the Migratory Bird Treaty Act and the Endangered Species Act. Very few comments, either favoring or opposing the proposed shooting hours, provided any data or new information. The Service notes that a final environmental assessment on shooting hours was completed on August 1, 1977 (42 FR 40211), and made available to the public.

The most extensive comments on shooting hours were submitted by Defenders of Wildlife (hereinafter Defenders) in a letter to the Director dated August 25, 1977. They were in the form of a detailed criticism of the Environmental Assessment on Proposed Shooting Hours Regulations completed by the Service on August 1, 1977. Defenders' comments reiterated and expanded upon points made in their July 30, 1977, comments on a draft of this environmental assessment. The Service response to Defenders' July 30 comments is discussed in detail in the August 9, 1977, FEDERAL REGISTER (42 FR 40211). As noted there, the assessment was modified and expanded in a number of ways in response to these and other comments.

In their August 25, 1977, comments Defenders reiterated the view that the assessment is inadequate because (1) it does not assess, in a satisfactory way, the impact of shooting hours on populations of protected species, (2) lacks information on the effects of available light on the waterfowl identification abilities of hunters, and (3) relies on data gathered for purposes other than an evaluation of shooting hours. Specific points and assertions made by Defenders in connection with these three general points, and Service responses to them are discussed below in the order in which they were presented in Defenders' August 25, 1977, letter. The Service makes special note that in these responses a distinction is made between protected species and endangered species. This is appropriate and necessary because of the Service's additional statutory responsibilities for endangered and threatened species above and beyond those for migratory birds generally. Therefore, references to protected species in the following Service responses do not include endangered species. Where the responses concern endangered species, they are specifically mentioned.

Defenders asserts that the information used by the Service is 5 to 10 years out of date, no new information is supplied, and no plans are set forward for gathering new information.

The Service believes that the information presented in the assessment is modern, up to date, and fully pertinent to the questions at hand. Much of the information is new in the sense that it has only recently been obtained from on-going field studies. Much of the remainder is new in the sense that it is derived from analyses not previously conducted and made available for use. Defenders apparently refers chiefly to the hunter performance survey. The Service believes that these data cannot be considered out of date simply because they were gathered during an eight-year period ending five years ago. They measure attributes of hunting that are likely to change slowly and there is no reason known to the Service to consider them obsolete. In regard to research, the assessment was viewed as a vehicle for analyzing and presenting currently available information on shooting hours rather than discussing future research plans.

Defenders asserts that only 320 hunts per year were observed in hunter performance observations in seasons with pre-sunrise shooting hours; that this represents only a few hunts per day of an activity involving millions of citizens throughout the nation; and that the observations were gathered according to convenience rather than scientific procedures. Defenders objects that the sample is too limited for conclusions to be drawn, and the results contribute relatively little to the problem at hand.

The Service notes that the 320 hunts per year cited by Defenders represents less than half of the annual sample. It is not appropriate to consider only hunts that were observed in seasons with pre-sunrise shooting hours because observations made in seasons with shooting hours beginning at sunrise also contain information relevant to the 90-minute shooting hour period that is contested. The 8 years of data used in the study consisted of 5,417 hunts by 11,562 hunters. These, rather than the number of hunts per year, are the relevant figures on sample size. Further, the reference to "millions of citizens" in connection with the number of hunts observed per day exaggerates the actual situation. The number of waterfowl hunters in the U.S. is on the order of 2 million, only a portion of which are in the field on any given day. The observations were not gathered on the basis of convenience but, on the contrary, were in line with an effort to obtain the best possible estimates of the attributes of an activity that is distributed in a highly uneven and non-random manner, i.e., the observations were focused on those places where waterfowl and waterfowl hunters concentrate in large numbers. These are the places where it was determined that data

V 42 175 SEP 9 77 UMI

could best and most usefully be gathered. As stated previously in 42 FR 40211 (August 9, 1977), the Service believes that the sample was actually quite large and the data very strong. The sample size is large enough to draw reasonable conclusions regarding the extent to which any shooting of protected or endangered species occurs, and contributes importantly to an understanding of the impact of shooting hours on these species.

Defenders asserts that they have little confidence in the hunter performance surveys because observers cannot check the accuracy of their observations with bag checks if they are (1) uncertain as to who shot a given bird, (2) uncertain if one or more birds were retrieved or not, and (3) uncertain as to the numbers and kinds of birds taken by multiple shots.

The Service considers item 1 to be irrelevant to the analysis since the important information is whether or not a particular bird was shot by the hunters under observation. As noted previously in 42 FR 40211 and on page 15 of the assessment, in cases where there were questions such as those in items 2 and 3, the observations were not used in this analysis. Nine percent of the hunts observed to completion were rejected on the basis of such selection criteria.

Defenders objects that no information is provided on where the data were obtained and what protected birds could be found in those areas.

The Service notes that it was pointed out on page 13 of the assessment that observations were made throughout all or part of the 8-year period in all of the 48 conterminous States. While each of the individual observation records identifies the specific area where the observation was made, it was not considered necessary or desirable to describe the data base in such minute detail in the assessment. The assessment was not intended to provide such an area by area analysis but instead to provide a clear, concise, and understandable analysis of the relationship of shooting hours to the nationwide kill of protected and endangered species. General information on populations and distribution of the protected and endangered species identified as being of most concern in connection with hunting in general and shooting hours in particular was provided in the assessment. This is discussed in the section on species evaluations for protected species, and in the appendices for endangered species. As noted on page 24 in the assessment, such information is often not precise. Nevertheless, the Service believes that it is adequate for an understanding of the impact of shooting hours on the species in question.

Defenders asserts that most if not all of the hunter performance surveys were conducted on national wildlife refuges where hunters know law enforcement is more thorough, and this may have biased the data as hunters may behave differently under such circumstances.

The Service notes that the majority of the observations were made by State biologists and law enforcement officers on areas other than national wildlife refuges.

Defenders asserts that the selection of hunter observation sites was non-random and subjective and that a randomizing procedure should have been used to obtain statistically valid data. The Service notes that waterfowl hunting is not uniformly distributed but is focused on those places where waterfowl concentrate and are accessible to hunters. Consequently, the Service believes that the way the data were obtained does not compromise the validity of the observations.

Defenders asserts that data presented in the assessment shows that the highest incidence of shooting protected waterfowl and protected non-waterfowl occurred during the shooting hours contested and that this identifies a problem which the Service failed to treat adequately in the assessment.

The Service notes that the assessment shows only a fraction of one percent of the birds killed throughout the entire day consisted of protected waterfowl and protected non-waterfowl, and only a fraction of this small percentage occurred during the contested 90-minute period. This is applicable to regular waterfowl hunting seasons with shooting hours that begin either one-half hour before sunrise, or at sunrise. The Service believes that this was adequately discussed and considered in the sections on Environmental Impacts of the Proposed Action and Alternatives to the Proposed Action.

Defenders asserts that the analysis of data on page 23 of the assessment excludes protected waterfowl and non-waterfowl for which hunting was allowed at other times of the year.

The Service finds that this assertion is not correct and that the data discussed on page 23 include the birds in question.

Defenders asserts that birds killed in violation of bag limits or point totals, which are not included in Tables 4–6 in the assessment but which are considered elsewhere should have been lumped with the other data.

The information on ducks shot in excess of the daily bag limit was added to the assessment in response to Defenders' comments of July 30, 1977, on the draft assessment. The Service decided to present it separately to insure that it would not be overlooked. Further, the Service believes that the information in question is different in nature than that presented in Tables 4–6 and should not be combined with other data. As pointed out on page 22 of the assessment, ducks shot in excess of the daily bag limit were most commonly shot later in the day than one hour after sunrise. This is consistent with other studies of harvest as well as the information presented in the assessment showing that the average daily bag per hunter is on the order of one or two birds. Thus, hunters seldom are in an over-bagging situation during the contested shooting hours.

Defenders asserts that the assessment clearly shows a potential problem with the shooting of canvasbacks and redheads during sunrise and sunset portions of the day but the assessment balks at probing further into the impacts.

The Service believes that the impacts on canvasbacks and redheads are adequately discussed and explained in the context of information presented on pages 21, 22, and 24–25 in the assessment.

Defenders asserts that for most of the species considered the sample sizes are extremely small and a change in 1 or 2 individual birds killed can make a major difference in the percentages involved.

The Service notes again that the sample on which this study is based is not small but is actually quite large. It is the extent to which protected species are killed that is small because of relatively infrequent occurrence. An increase of 1 or 2 individuals per species would not change this. This is an attribute of the sample, not the sample itself, and it is important to recognize this distinction.

Defenders asserts that the Service should have conducted studies on the amount of light necessary to make the identifications needed to distinguish species because the assessment does not demonstrate that protected species are not being harmed by hunting and the evidence is at best inconclusive.

The Service notes that this point was discussed at some length in 42 FR 40211 in responding to comments received on the draft environmental assessment. At that time it was noted that the Service decided not to undertake additional studies on the amount of light necessary to make identifications during early morning and late afternoon hunting unless the assessment indicated that there was a significant problem associated with hunting at these times, or at other times of the day, that resulted in an adverse impact on the populations of protected waterfowl and non-waterfowl species or endangered species. In light of the inconsequential take of protected species during all hours of the day, it was decided that further studies on illumination in relation to species identification were unnecessary. It is therefore the view of the Service that the assessment complies with the Court's directive.

Defenders refers to Objective No. 3 in the discussion of the role of regulations in page 2 of the assessment which reads as follows: To avoid the taking of endangered or threatened species so that their continued existence is not jeopardized and their conservation is enhanced. Defenders asserts that the important concept of restoration of endangered and threatened species, or species that have been depleted significantly, is not mentioned in the goal.

The Service notes that the concept referred to above is included in the meaning of the term their conservation is enhanced and is so understood by the Service. The definition of conservation as set forth in the Endangered Species Act of 1973 includes the concept of restoration. It is the Service's view that the mi-

gratory bird hunting regulations, including shooting hours, currently proposed are consistent with and supportive of programs to enhance the conservation of those protected or endangered species whose numbers are depleted and the management objective is to increase them. For further information on these programs in relation to the present discussion, readers are referred to the discussions of endangered species in the appendices to the assessment. It is the view of the Service that these programs are effectively enhancing the conservation of these species, and that hunting regulations set in consonance with them are contributing to that enhancement. The programs for whooping cranes and the Aleutian Canada geese provide examples of successful programs and show the inter-relationship of different actions, including appropriate hunting restrictions. No need is presently discerned for new and different types of regulatory restrictions, such as a broad application of more restrictive shooting hours, which go beyond those types of regulatory restrictions already in use and found to be effective, in order to continue the success of these and similar programs.

Correction in Ohio Zoning

In the August 15, 1977, FEDERAL REGISTER, on page 41152, the Service proposed zoned hunting seasons on ducks, coots and mergansers and described the zones for Ohio as follows *North Zone*—That portation of Ohio north of U.S. Highway 30 North. *South Zone*—The remainder of Ohio. The Service has been notified by Ohio that it erred in the highway number designation when it submitted its zone descriptions to the Service. In the final regulations frameworks the Service has changed the zone descriptions for Ohio to read as follows *North Zone*—That portion of Ohio north of Interstate Highway 70 to the Ohio, Michigan, Ontario, Pennsylvania boundary in Lake Erie. *South Zone*—That portion of Ohio south of Interstate Highway 70 to the Ohio River. This change is intended to correct the zone description error.

Steel Shot Regulations

Non-toxic shot requirements in some areas apply to waterfowl regulations frameworks being finalized here. On April 28, 1977, the Service published in the FEDERAL REGISTER (42 FR 21614) final regulations regarding areas in the Atlantic and Mississippi Flyways in which shotshells loaded with steel shot will be required for waterfowl hunting in seasons commencing in 1977. Subsequently, the Service proposed in the FEDERAL REGISTER (42 FR 33354, June 30, 1977) that these requirements would apply only to 12-gauge shotshells, and final rulemaking on this proposal was published in the FEDERAL REGISTER on August 3, 1977 (42 FR 39106). The intended effect of establishing these steel shot regulations is to reduce the number of deaths of waterfowl caused by ingesting spent lead pellets. The regulations appear under 50 CFR, § 20.21 and § 20.108, and will also be summarized in the Service's regulations leaflets to be published late this summer.

Environmental Review

The "Final Environmental Statement for the Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FES 75–54)" was filed with the Council on Environmental Quality on June 6, 1975, and notice of availability was published in the FEDERAL REGISTER on June 13, 1975 (40 FR 25241). The final environmental assessment on shooting hours (42 FR 40211; August 9, 1977) supplements the discussion on shooting hours in FES 75–54.

Compliance With Section 7 of the Endangered Species Act of 1973

Section 7 of this act provides that, "The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act," and "by taking such action necessary to insure that actions authorized, funded, or carried out • • • do not jeopardize the continued existence of such endangered or threatened species or result in the destruction or modification of habitat of such species • • • which is determined to be critical." Consequently, the Service reviewed all migratory bird regulations being contemplated for early seasons in the United States this year and concluded in a biological opinion that none of the proposals, including shooting hours, if implemented, would result in jeopardizing the continued existence of any species designated as endangered or threatened under the act, or adversely modify their critical habitat or habitats that may be determined as critical in the future. Likewise, the biological opinion concluded that the proposed regulations were not contrary to, and did not undermine the Service's obligation to conserve endangered or threatened species. The consideration of section 7 was described in more detail in the FEDERAL REGISTER dated July 22, 1977, on page 37554. It should be noted that much of the discussion and evaluation of shooting hours in the shooting hours environmental assessment related to protected or endangered species. No evidence was found that the proposed shooting hours were detrimental to any endangered or threatened species.

The proposed late season regulatory frameworks were likewise subjected to careful study to insure that they complied with section 7 of the Endangered Species Act. Five endangered species were considered in a threshold examination completed on August 22, 1977. These included the Aleutian Canada goose (*Branta canadensis leucopareia*), Everglade kite (*Rostrhamus sociabilis plumbeus*), bald eagle (*Haliaeetus leucocephalus*), Arctic peregrine falcon (*Falco peregrinus tundris*) and the American peregrine falcon (*F. p. anatum*). The threshold examination report reviewed and evaluated the population and habitat status and trends of these endangered species; factors affecting their status and welfare; management programs under way or planned to enhance the status of the species; and the impacts, if any, of the proposed late season hunting regulations. It was concluded that no likelihood exists that the late season migratory game bird regulations for 1977–78 will jeopardize the continued existence of any of the five endangered species, or destroy or adversely modify their critical habitat or habitats that may in the future be determined to be critical for them. Furthermore, it was concluded that the Service has taken all reasonable measures to insure that these regulations are compatible with the conservation programs being carried out for each of these species. The Service wishes to reiterate that delays or closures of migratory bird hunting seasons will be considered, and invoked when justified, for the protection of endangered species.

The proposed migratory bird hunting regulations for late seasons were also evaluated as they relate to the Mexican duck (*Anas diazi*) and the whooping crane (*Grus americana*). A biological opinion on these endangered species was issued in a report dated August 22, 1977. This opinion concluded that the proposed regulations were unlikely to jeopardize the continued existence of either species, or destroy or adversely modify habitats that have been proposed as critical habitat or that may in the future be determined to be critical for either species.

However to insure that programs administered by the Service are used to further the purposes of the Endangered Species Act, the Service intends to initiate new investigation and management programs for each species. These are described in detail in the biological opinion, and summarized here.

New efforts for the Mexican duck include projects to further determine the status, distribution, and genetic purity of Mexican-like ducks in the United States, determine the proper taxonomic classification of the Mexican duck; and increase public information and education programs for the species. In addition, the Service intends to prohibit the hunting of all ducks in all or portions of 13 southwestern counties in the range of the Mexican duck. These include Cochise County in Arizona, Catron, Dona Ana, Hidalgo, and Luna Counties in New Mexico and Brewster, Culberson, El Paso, Hudspeth, Jeff Davis, Pecos, Presidio, and Reeves Counties in Texas. The closure boundaries in these three States are fully described in the framework text. Hunting seasons for migratory game birds other than ducks are unaffected by these closures.

Additional management efforts for the whooping crane particularly in the Bosque del Apache National Wildlife Refuge area of New Mexico, were also specified. Whooping cranes of the Grays Lake transplant program winter in the area where limited snow goose hunting is permitted. Changes in the snow goose hunt conducted on the refuge include expanding the hunter education and testing program, shifting certain refuge fields to closed or open to hunting status, improving the hunter communications

V 42 175 SEP 9 77 UMI

system operative while hunting is under way, relocating some blinds, expanding law enforcement efforts, increasing food supplies, and changing the schedule of hunting days. The Service will invoke an emergency closure on snow goose hunting on the refuge should such action become necessary. Emergency closures elsewhere for the Grays Lake and the Aransas whooping crane flocks will also be invoked if necessary. Such emergency closure will be based upon the proportion of the population involved, degree of risk of hunter-induced mortality, and extent of crane redistribution.

The Service devoted more than 500 hours to consideration of the early season regulations in the section 7 consultation process this year, and in excess of 750 hours were devoted to the late season regulations. In addition, the review process involved the appropriate endangered species recovery teams, consultations with employees of various State conservation agencies, other federal agencies, and universities; and field trips to potential problem areas.

The Service's biological opinions and threshold examination reports resulting from consultation under section 7 are available for public inspection in the Office of Endangered Species, U.S. Fish and Wildlife Service, Room 1100, 1612 K Street NW., Washington, D.C 20240, or the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Room 2243, Department of the Interior, 18th and C Streets NW., Washington, D.C. 20240. Copies may also be supplied by mail upon request.

Drafting Information

This final rulemaking was authored by Dr. John P. Rogers, Chief, Office of Migratory Bird Management.

Regulations Promulgation

The rulemaking process for migratory game bird hunting, must, by its nature, operate under severe time constraints. However, the Service is of the view that every attempt should be made to give the public the greatest possible opportunity to comment on the regulations. Thus, when the proposed rulemakings were published on March 10, May 25, July 5, July 15, and August 15, the Service established what it believed were the longest periods possible for public comment. In doing this, the Service recognized that at the periods' close, time would be of the essence. That is, if there were a delay in the effective date of these regulations after this final rulemaking, the Service is of the opinion that the States would have insufficient time to select their season dates, and bag limits; to communicate those selections to the Service, and finally to establish and publicize the necessary regulations and procedures to implement their decisions. The Service therefore finds that "good cause" exists, within the terms of 5 U.S.C. 553(d)(3) of the Administrative Procedure Act, and these frameworks will, therefore, take effect immediately upon publication.

Accordingly, the Service prescribes the final frameworks setting forth the species to be hunted, daily bag and possession limits, season dates, shooting hours, and special closures from which State conservation agency officials may select open season dates Upon receipt of season selections from State officials, the Service will publish in the Federal Register final rulemaking amending certain sections of Subpart K of 50 CFR Part 20 to reflect seasons, limits and shooting hours for the contiguous United States for the 1977–78 season.

Final Regulations Frameworks for 1977–78 Late Hunting Seasons on Certain Migratory Game Birds.

Pursuant to the Migratory Bird Treaty Act, the Secretary of the Interior has approved final frameworks for season lengths, shooting hours, bag and possession limits, and outside dates within which states may select seasons for hunting waterfowl, coots, and gallinules; cranes in parts of New Mexico, Texas, Colorado, Oklahoma, Montana, and Wyoming; common snipe in the Pacific Flyway; and special extended falconry seasons. States may be more restrictive in selecting season regulations, but may not exceed the framework provisions. For the guidance of State conservation agencies, these frameworks are summarized below

General

States may split their seasons for ducks or geese into two segments of equal or unequal lengths. Exceptions are noted in appropriate sections.

Shooting hours in all States, on all species, and for all seasons are ½ hour before sunrise until sunset, except that September teal season shooting hours are sunrise until sunset.

States in the Atlantic, Mississippi, and Central Flyways selecting neither a September teal season nor the point system may select an extra daily bag and possession limit of 2 and 4 blue-winged teal, respectively, for 9 consecutive days designated during the regular duck season. These extra limits are in addition to the regular duck bag and possession limits.

States in the Atlantic, Mississippi and Central Flyways may select a special scaup-only hunting season not to exceed 16 consecutive days, with daily bag and possession limits of 5 and 10 scaup, respectively, subject to the following conditions:

1. The season must fall between October 1, 1977, and January 31, 1978, all dates inclusive.

2. The season must fall outside the open season for any other ducks except sea ducks.

3. The season must be limited to areas mutually agreed upon between the State and the Service prior to September 1, 1977.

4. These areas must be described and delineated in State hunting regulations

OR

As an alternative, States in the Atlantic, Mississippi, and Central Flyways, except those selecting a point system, may select an extra daily bag and possession limit of 2 and 4 scaup, respectively, during the regular duck hunting season, subject to conditions 3 and 4 listed above These extra limits are in addition to the regular duck limits and apply during the entire regular duck season.

Selection of the point system for any State entirely within a flyway must be on a statewide basis, *except* if New York selects the point system, conventional regulations may be retained for the Long Island Area. New York may not select the point system within the Upstate zoning option. Maine may not select the point system with the State zoning option

States that did not select their rail, woodcock, snipe, gallinule, and sea duck seasons in July should do so at the time they make their waterfowl selections.

Frameworks for open seasons and season lengths, bag and possession limit options, and other special provisions are listed below by Flyway

Atlantic Flyway

Between October 1, 1977, and January 20, 1978, States in this Flyway may select open seasons on ducks, coots, and mergansers of (a) 45 days, with basic daily bag and possession limits of 4 and 8 ducks, respectively, of which no more than 2 in the daily bag and 4 in possession may be black ducks or (b) 45 days, with basic daily bag and possession limits of 5 and 10 ducks, respectively, of which no more than 1 in the daily bag and 2 in possession may be black ducks Under either option (a) or (b), a 50-day season may be selected provided the season is opened on a Wednesday with shooting hours beginning at noon on opening day If the 50-day season is split, each segment must open on a Wednesday with shooting hours beginning at noon on opening day

Except in closed areas, the limit on canvasbacks and redheads is 1 canvasback daily and 1 in possession or 1 redhead daily and 1 in possession. Under the point system, canvasbacks count 100 points each and redheads count 70 points each, except in closed areas. Areas closed to canvasback and redhead hunting are

New York—Upper Niagara River between the Peace Bridge at Buffalo, New York, and the Niagara Falls All waters of Lake Cayuga.

New Jersey—Those portions of Monmouth County and Ocean County lying east of the Garden State Parkway

Marvland, Virginia and North Carolina—Those portions of each State lying east of U S. Highway 1

Under conventional and point system options, the daily bag and possession limits may not include more than 2 and 4 wood ducks, respectively, except that Virginia, North Carolina, South Carolina, Georgia and Florida may split their regular hunting season in such a way that a hunting season not to exceed 9 consecutive days occurs between October 1 and October 15 During this period under conventional regulations, no special restrictions within the regular daily

bag and possession limits established for the flyway in 1977 shall apply to wood ducks. Under the point system, the point value of wood ducks shall be 25. For other species of ducks, daily bag and possession limits shall be the same as established for the flyway under conventional or point system regulations. For those States using conventional regulations, the 9 consecutive days extra blue-winged teal option may be selected concurrent with the early wood duck season option. This exception to the daily bag and possession limits for wood ducks shall not apply to that portion of the duck hunting season that occurs after October 15.

The daily bag limit on mergansers is 5 only 1 of which may be a hooded mergansers. The possession limit is 10, only 2 of which may be hooded mergansers.

The daily bag and possession limits of coots are 15 and 30, respectively.

The Lake Champlain Area of New York must follow the waterfowl seasons, daily bag and possession limits, and shooting hours selected by Vermont. This area includes that part of New York lying east and north of a boundary running south from the Canadian border along U.S. Highway 9 to New York Route 22 south of Keeseville, along New York Route 22 to South Bay, along and around the shoreline of South Bay to New York Route 22, along New York Route 22 to U.S. Highway 4 at Whitehall, and along U.S. Highway 4 to the Vermont border.

In lieu of a special scaup season, Vermont may, for the Lake Champlain Area, select a special scaup and goldeneye season not to exceed 16 consecutive days, with a daily bag limit of 3 scaup or 3 goldeneyes or 3 in the aggregate and a possession limit of 6 scaup or 6 goldeneyes or 6 in the aggregate, subject to the same provisions that apply to the special scaup season elsewhere.

New York may, for Long Island, select season dates and daily bag and possession limits which differ from those in the remainder of the State.

Upstate New York (excluding the Lake Champlain area) may be divided into three zones (West, North, South) on an experimental basis for the purpose of setting separate duck, coot and merganser seasons. Option (a) or (b) for seasons and bag limits is applicable to the zones in the Upstate area within the Flyway framework; only conventional regulations may be selected. The West Zone will be permitted the full number of days offered under options (a) or (b), with or without the Wednesday opening with shooting hours beginning at noon on opening day. In addition, a split season without penalty may be selected in the West Zone. The North Zone and the South Zone must take a 5-day reduction in season length under either option, with or without the Wednesday opening, with shooting hours beginning at noon on opening day. The basic daily bag limit on ducks in each zone and the restrictions applicable to options (a) and (b) of the regular season for the Flyway also apply. Teal and scaup bonus birds, shall be applicable to the Upstate zones, but the 16-day special scaup season will not be allowed.

The zones are defined as follows The West Zone is that portion of Upstate New York lying west of a line commencing at the north shore of the Salmon River and its junction with Lake Ontario and extending easterly along the north shore of the Salmon River to its intersection with Interstate Highway 81, then southerly along Interstate Highway 81 to the Pennsylvania border

The North and South Zones are bordered on the west by the boundary described above and are separated from each other as follows:

Starting at the intersection of Interstate Highway 81 and New York Route 49 and extending easterly along Route 49 to its junction with Route 8 in Utica, then southerly along Route 8 to its intersection with U.S. Highway 20 in Bridgewater, then easterly along U.S. Highway 20 to the Massachusetts border.

Maine may be divided into two zones (North, South) on an experimental basis for the purpose of setting separate duck, coot and merganser seasons. Option (a) or (b) for seasons and bag limits is applicable to the zones within the Flyway framework; only conventional regulations may be selected. Both zones will be permitted the full number of days offered under options (a) or (b) with or without the Wednesday opening with shooting hours beginning at noon on opening day. In addition, a split season without penalty may be selected in the South Zone. The basic daily bag limit on ducks in each zone and the restrictions applicable to options (a) and (b) of the regular season for the Flyway also apply Teal and scaup bonus bird options, if offered, shall be applicable, but the 16-day special scaup season will not be allowed.

The Maine zones are defined as follows: North Zone—Game Management Zones 1, 2 and 3. South Zone—Game Management Zones 4 through 8.

As an alternative to conventional bag limits for ducks, a 45-day season with a point-system bag limit may be selected by States in the Atlantic Flyway during the framework dates prescribed. A 50-day season may be selected provided the season is opened on a Wednesday with shooting at noon on opening day If the 50-day season is split, each segment must open on a Wednesday with shooting hours beginning at noon on opening day. Point values for species and sexes taken are as follows in Florida only, the fulvous tree duck counts 100 points each, in all States the canvasback counts 100 points each (except in closed areas); the female mallard, black duck, mottled duck, wood duck (except in Virginia, North Carolina, South Carolina, Georgia and Florida during the early wood duck season option), redhead (except in closed areas) and hooded merganser count 70 points each, the blue-winged teal, green-winged teal, pintail, gadwall, shoveler, scaup, sea ducks, and mergansers (except hooded) count 10 points each; the male mallard, the wood duck during the early wood duck season option in Virginia, North Carolina, South Carolina, Georgia and Florida, and all other species of ducks count 25 points each The daily bag limit is reached when the point value of the last bird taken, added to the sum of the point values of the other birds already taken during that day reaches or exceeds 100 points The possession limit is the maximum number of birds which legally could have been taken in 2 days.

In any State in the Atlantic Flyway selecting both point-system regulations and a special sea duck season, sea ducks count 10 points each during the point-system season, but during any part of the regular sea duck season falling outside the point-system season, regular sea duck daily bag and possession limits of 7 and 14, respectively, apply.

Coots have a point value of zero, but the daily bag and possession limits are 15 and 30, respectively, as under the conventional limits.

Between October 1, 1977, and January 20, 1978, Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, Pennsylvania, West Virginia, New Jersey, Maryland, and Virginia (excluding those portions of the cities of Virginia Beach and Chesapeake lying east of Interstate 64 and U.S. Highway 17) may select 70-day seasons on Canada geese; the daily bag and possession limits are 3 and 6 geese, respectively However, in the area comprised of Delaware, the Delmarva Peninsula portions of Maryland and Virginia, and that portion of Pennsylvania lying east and south of a boundary beginning at Interest Highway 83 at the Maryland border and extending north to Harrisburg, then east on U.S. Highway 22 to the New Jersey border, the Canada goose season length will be 90 days with the closing framework date extended to January 31, 1978. The daily bag limit within this area will be 4 birds with a possession limit of 8 birds. North Carolina, South Carolina, and those portions of the cities of Virginia Beach and Chesapeake lying east of Interstate 64 and U.S. Highway 17 in Virginia may select 50-day seasons on Canada geese within the October 1, 1977, to January 20, 1978, framework; the daily bag and possession limits are 1 and 2 Canada geese, respectively.

The season is closed on Canada geese in Florida and Georgia.

Between October 1, 1977, and January 20, 1978, concurrent with either the regular waterfowl season or the Canada goose season, States in the Atlantic Flyway may select 60 day seasons on snow geese (including blue geese); the daily bag and possession limits are 2 and 4 geese, respectively

For snow geese (including blue geese) the Director, U.S. Fish and Wildlife Service, shall close the season within 48 hours should such closure be necessary to avoid excessive harvest.

The season is closed on Atlantic brant.

Mississippi Flyway

Between October 1, 1977, and January 20, 1978, States in this Flyway may select concurrent 45-day seasons on ducks, coots, and mergansers. The daily

V 42 175 SEP 9 77 UMI

bag limit for ducks is 5, and may include no more than 2 mallards or 2 black ducks, or one of each, and 2 wood ducks (except as noted below). The possession limit is 10, including no more than 4 mallards or 4 black ducks, or 4 in the aggregate, and 4 wood ducks (except as noted below).

Except in closed areas, the limit on canvasbacks and redheads is 1 canvasback daily and 1 in possession or 1 redhead daily and 1 in possession. Under the point system, canvasbacks count 100 points each and redheads count 70 points each, except in closed areas. Areas closed to canvasback and redhead hunting are:

Mississippi River—entire river, both sides, from Alton Dam upstream to Prescott, Wisconsin, at confluence of St. Croix River.

Alabama—Baldwin and Mobile Counties.

Louisiana—Caddo, St. Charles, and St. Mary Parishes; that portion of Ward 1 formerly designated as Ward 6 of St. Martin Parish; and Catahoula Lake in LaSalle and Rapides Parishes.

Michigan—Arenac, Bay, Huron, Macomb, Monroe, St. Clair, Tuscola, and Wayne Counties, and those adjacent waters of Saginaw Bay south of a line extending from Point au Gres in Sec. 6, T18N, R7E (Arenac County) to Sand Point in sec. 11, T17N, R9E (Huron County), the St. Clair River, Lake St. Clair, the Detroit River and Lake Erie, under jurisdiction of the State of Michigan.

Minnesota—Douglas, Mahnomen, Polk, Pope and Sibley Counties. Where the county line of any of the above counties crosses any portion of a lake, that entire lake is closed. In addition, all land in sec. 13, T130N, R31W (i.e., land between Lake Christina and Pelican Lake) is closed.

Ohio—Land and water areas comprising Erie, Ottawa and Sandusky Counties.

Tennessee—Kentucky Lake lying north of Interstate Highway 40.

Wisconsin—In the Mississippi River Zone, all that portion of Wisconsin west of the Burlington-Northern Railroad in Grant, Crawford, Vernon, LaCrosse, Trempealeau, Buffalo, Pepin and Pierce Counties. Also, the following lakes and waters, including a strip of land 100 yards wide adjacent to the shorelines thereof: Lake Poygan in Winnebago and Waushara Counties and Lakes Winneconne and Butte des Morts, including the connecting waters thereof, in Winnebago County.

The daily bag limit on mergansers is 5, only 1 of which may be a hooded merganser. The possession limit is 10, only 2 of which may be hooded mergansers.

The daily bag and possession limits on coots are 15 and 30, respectively.

As an alternative to conventional bag limits for ducks, a 45-day season with point-system bag and possession limits may be selected by States in the Mississippi Flyway during the framework dates prescribed. Point values for species and sexes taken are as follows: Except in closed areas, the canvasback counts 100 points; the redhead (except in closed areas), female mallard, wood duck (except as noted below), black duck and hooded merganser count 70 points each, the pintail, blue-winged teal, cinnamon teal, gadwall, shoveler, scaup, green-winged teal and mergansers (except hooded merganser) count 10 points each; the male mallard and all other species of ducks count 25 points each. The daily bag limit is reached when the point value of the last bird taken, added to the sum of the point values of the other birds already taken during that day, reaches or exceeds 100 points. The possession limit is the maximum number of birds which legally could have been taken in 2 days.

Coots have a point value of zero, but the daily bag and possession limits are 15 and 30, respectively, as under the conventional limits.

Kentucky, Arkansas, Tennessee, Louisiana, Mississippi and Alabama may split their regular duck hunting seasons in such a way that a hunting season not to exceed 9 consecutive days may occur between October 1 and October 15. During this period, under conventional regulations, no special restrictions within the regular daily bag and possession limits established for the Flyway shall apply to wood ducks, and under the point system, the point value for wood ducks shall be 25 points. For other species of ducks, daily bag and possession limits shall be the same as established for the Flyway under conventional or point system regulations. In addition, the extra blue-winged teal option available to States in this Flyway that select conventional regulations and do not have a September teal season may be selected during this period. This exception to the daily bag and possession limits for wood ducks shall not apply to that portion of the duck hunting season that occurs after October 15.

In that portion of Louisiana west of a boundary beginning at the Arkansas-Louisiana border on Louisiana Highway 3; then south along Louisiana Highway 3 to Shreveport; then east along Interstate 20 to Minden; then south along Louisiana Highway 7 to Ringgold, then east along Louisiana Highway 4 to Jonesboro; then south along U.S. Highway 167 to Lafayette; then southeast along U.S. Highway 90 to Houma; then south along the Houma Navigation Channel to the Gulf of Mexico through Cat Island Pass—the season on ducks, coots and mergansers may extend 5 additional days, provided that the season opens on November 5, 1977. If the 5-day extension is selected, and if point-system regulations are selected for the State, point values will be the same as for the rest of the State.

The waterfowl seasons, limits, and and shooting hours in the Pymatuning Reservoir area of Ohio will be the same as those selected by Pennsylvania. The area includes Pymatuning Reservoir and that part of Ohio bounded on the north by County Road 306 known as Woodward Road, on the west by Pymatuning Lake Road, and on the south by U.S. Highway 322.

Michigan, Illinois, Indiana, Ohio and Missouri may select hunting seasons on ducks, coots and mergansers by zones described as follows

MICHIGAN

North Zone—The Upper Peninsula.
South Zone—The Lower Peninsula.

ILLINOIS

North Zone—St Clair Clinton Marion, Clay Richland and Lawrence Counties and all counties to the north
South Zone—The remainder of Illinois.

INDIANA

North Zone—That portion of Indiana north of State Highway 18
South Zone—The remainder of Indiana.

OHIO

North Zone—That portion of Ohio north of Interstate Highway 70 to the Ohio Michigan, Ontario, Pennsylvania boundary in Lake Erie
South Zone—That portion of Ohio south of Interstate Highway 70 to the Ohio River

MISSOURI

North Zone—That portion of Missouri north of a line running easterly from the Kansas-Missouri border along U.S. Highway 160 to the junction of U.S. Highway 60 in Springfield, along U.S. Highway 60 to the junction of State Highway 21 along State Highway 21 to the junction of State Highway 34, and along State Highway 34 to the Illinois-Missouri border along the Mississippi River at Cape Girardeau
South Zone—The remainder of Missouri

Within each State (1) The season must be continuous in both zones, (2) the same bag limit option must be selected for both zones, and (3) if a special scaup season is selected, it shall not begin until after the latest season closing date in the State.

Between October 1, 1977 and January 20, 1978, States in this Flyway except Louisiana, may select 70-day seasons on geese, with daily bag and possession limits of 5 geese, to include no more than 2 white-fronted geese. Regulations for Canada geese are shown below by State

Between October 1, 1977 and February 14, 1978, Louisiana may select 70-day seasons on snow including blue and white-fronted geese by zones established for duck hunting seasons, with daily bag and possession limits of 5 geese, to include no more than 2 white-fronted geese. The season on Canada geese is closed in Louisiana.

In Minnesota, in the (a) Lac Qui Parle Zone—the season on Canada geese closes after 45 days or when 5,000 birds have been harvested, whichever occurs first. The daily bag limit is 1 Canada goose or 2 white-fronted geese, or 1 of each; the possession limit is 2 Canada and 2 white-fronted geese. The quota zone is that area encompassed by a boundary described as follows: beginning at Montevideo, then west on U.S. Highway 212 to U.S. Highway 75, then north on U.S. Highway 75 to State Highway 7 at Odessa, then north on County State Aid Highway 21, Big Stone County, to U.S. Highway 12, then east on U.S. Highway 12 to County State Aid Highway 17, Swift

County, then south on C.S.A.H. 17 and C.S.A.H. 9, Chippewa County, to State Highway 40, then east on State Highway 40 to State Highway 29, then south on State Highway 29 to point of beginning at Montevideo.

(b) Southeastern Zone (same as description in 1971)—the season for Canada geese may extend for 70 consecutive days. The daily bag limit is 1 Canada goose or 2 white-fronted geese or 1 of each, the possession limit is 2 Canada and 2 white-fronted geese.

(c) Remainder of the State—the season on Canada geese may not exceed 45 days. The daily bag limit is 1 Canada goose or 2 white-fronted geese or 1 of each; the possession limit is 2 Canada and 2 white-fronted geese.

In Iowa, the season for Canada geese may extend for 45 consecutive days. The daily bag and possession limits are 2 Canada geese.

In Missouri, in the: (a) Swan Lake Zone (same description as in 1971)—the season on Canada geese closes after 45 days or when 25,000 birds have been harvested, whichever occurs first. The daily bag limit is 1 Canada goose or 2 white-fronted geese, or 1 of each; the possession limit is 2 Canada and 2 white-fronted geese.

(b) Southeastern Area (east of U.S. Highway 67 and south of Crystal City)—State may select a 45-day season on Canada geese between December 1, 1977, and January 20, 1978, with a daily bag limit of 2 Canada geese or 2 white-fronted geese or 1 of each; and a possession limit of 4 Canada and white-fronted geese in the aggregate, of which no more than 2 may be white-fronted geese.

(c) Remainder of the State—the season on Canada geese may not exceed 45 days. The daily bag limit is 2 Canada geese or 2 white-fronted geese or 1 of each; the possession limit it 2 Canada gees and 2 white-fronted geese.

In Wisconsin, the harvest of Canada geese is limited to 35,000. The daily bag limit is 1 Canada goose, 2 white-fronted geese, or 1 of each; the possession limit is 2 Canada and 2 white-fronted geese, except that in the Horicon Zone the possession limit for Canada geese is 1. In the Horicon Zone and the East Central Zone, Canada goose hunting is restricted to those persons holding valid Canada goose hunting permits issued by the State. The Horicon Zone is defined as those portions of the counties of Fond du Lac, Green Lake, Washington and Dodge enclosed by a line beginning at the intersection of County Highway N and State Highway 175 in Fond du Lac County, then southerly on State Highway 175 to its Intersection with State Highway 33, then westerly on State Highway 33 to the city of Beaver Dam, then northerly on State Highway 33 to its intersection with County Highway A, then northerly on County Highway A to its intersection with County Highway S, then easterly on County Highway S to its intersection with County Highwav E, then northerly on County Highway E to its intersection with County Highway N, then easterly on County Highway N to the point of beginning.

The East Central Zone is defined as those portions of Fond du Lac, Winnebago, Green Lake, Marquette, Columbia and Dodge Counties enclosed by a line beginning in Winnebago County at the intersection of State Highway 21 and U.S. Highway 45, then southerly on U.S. Highway 45 to its intersection with State Highway 175, then northerly on State Highway 175 to its intersection with County Highway N, then westerly on County Highway N to its intersection with County Highway E, then southerly on County Highway E to its intersection with County Highway S, then westerly on County Highway S to its intersection with County Highway A, then southerly on County Highway A to its intersection with State Highway 33, then southeasterly on State Highway 33 to its intersection with U.S. Highway 151, then southwesterly on U.S. Highway 151 to its intersection with U.S. Highway 16, then northwesterly on U.S. Highway 16 to its intersection with State Highway 73, then northerly on State Highway 73 to its intersection with State Highway 33, then westerly on State Highway 33 to its intersection with State Highway 22, then northerly on State Highway 22 to its intersection with State Highway 23, then northeasterly on State Highway 23 to its intersection with State Highway 49, then northerly on State Highway 49 to its intersection with State Highway 116, then easterly on State Highway 116 to State Highway 21, then easterly on State Highway 21 to the point of beginning

In Illinois, the harvest of Canada geese is limited to 35,000, with 29,000 birds allocated to the Southern Illinois Zone (same description as in 1971). The daily bag limit is 2 Canada geese or 2 white-fronted geese or 1 of each; the possession limit is 4 Canada geese and white-fronted geese in the aggregate, of which no more than 2 may be white-fronted geese. The season on Canada geese may open at a later date in the Southern Illinois Zone and extend to January 20, 1978, or until the Zone's quota of 29,000 birds is reached, whichever occurs first.

In Michigan, in the (a) Counties of Baraga, Dickinson, Delta, Gogebic, Houghton, Iron, Keweenaw, Marquette, Menominee and Ontonagon—the daily bag limit is 2 Canada geese or 2 white-fronted geese or 1 of each; the possession limit is 2 Canada and 2 white-fronted geese.

(b) Southeastern Canada Goose Management area—the Canada goose season will open with the duck season and extend through December 9. Through November 14, the daily bag limit will be 1 Canada goose or 2 white-fronted geese or 1 of each, the possession limit is 1 Canada and 2 white-fronted geese. From November 15 through December 9, the daily bag limit will be 2 Canada geese or 2 white-fronted geese or 1 of each; the possession limit is 2 Canada and 2 white-fronted geese. The Management Area is encompassed by a boundary described as follows: beginning at the junction of State Highway M-21 and State Highway M-53 in Lapeer County, then south on State Highway M-53 to its junction with Interstate Highway 94, then west on Interstate Highway 94 to its junction with Interstate Highway 75, then south on Interstate Highway 75 to its junction with Gibralter Road, then west on Gibralter Road to Flat Rock, then west on West Carlton, Oakville and Waltz Roads to the junction with Rawsonville Road, then north on Rawsonville Road to Willow Road, then west on Willow Road to U.S. Highway 23, then south on U.S. Highway 23 to State Highway M-50 in Dundee, then west on State Highway M-50 to State Highway M-52, then south on State Highway M-52 to State Highway M-34, then west on State Highway M-34 to U.S. Highway 127, then north on U.S. Highway 127 to Interstate Highway 69, then north and east on Interstate Highway 69 to State Highway M-21 in Flint, then east on State Highway M-21 to the point of beginning

(c) Remainder of the State—the daily bag limit is 1 Canada goose or 2 white-fronted geese or 1 of each, the possession limit is 1 Canada goose and 2 white-fronted geese.

In Ohio, the daily bag limit is 2 Canada geese or 2 white-fronted geese or 1 of each, the possession limit is 2 Canada and 2 white-fronted geese.

In Indiana, the daily bag limit is 1 Canada goose or 2 white-fronted geese or 1 of each, except in Posey County where the daily bag limit on Canada geese is 2, the possession limit is 2 Canada and 2 white-fronted geese.

In Kentucky, the daily bag limit is 2 Canada geese or 2 white-fronted geese or 1 of each, the possession limit is 4 Canada geese and white-fronted geese in the aggregate, of which no more than 2 may be white-fronted geese. In the Ballard County Zone, the harvest of Canada geese is limited to 15,000. This zone is described as follows: a boundary beginning at the northwest city limits of Wickliffe in Ballard County to the middle of the Mississippi River; then north along the Mississippi River to the low water mark of the Ohio River along the Illinois shore to the Ballard-McCracken County line; then along the county line south to State Road 358; then south along State Road 358 to its junction with U.S. Highway 60 at LaCenter; then southwest along U.S. Highway 60 to the northeast city limits of Wickliffe.

In Tennessee, the daily bag limit is 1 Canada goose and the possession limit is 2 Canada geese, except in that portion of the State west of State Highway 13, where the daily bag and possession limits are 2 Canada geese.

In Mississippi, in the Sardis Reservoir Area (that area encompassed by Interstate Highway 55 on the west, State Highway 7 on the east, State Highway 310 on the north and State Highway 6 on the south), the daily bag limit is 1 Canada goose and the possession limit is 2 Canada geese. In the remainder of the State, the season on Canada geese is closed.

V 42 175 SEP 9 77 UMI

In Alabama, the season is closed on all geese in the Counties of Chambers, Henry, Russell and Barbour Elsewhere in Alabama, the daily bag limit is 2 Canada geese or 2 white-fronted geese or 1 of each; the possession limit is 4 Canada and white-fronted geese in the aggregate, of which no more than 2 may be white-fronted geese.

In Arkansas, the Canada goose season will be concurrent with, and the same length as, the duck season, with a daily bag limit of 1 Canada goose and a possession limit of 2 Canada geese, except that the Canada goose season is closed in that portion of the State east of a line described as follows: Beginning at the junction of State Highway 1 and the Arkansas-Missouri border, then south along State Highway 1 to the junction of U.S. Highway 65 at McGehee, then south along U.S. Highway 65 to the junction of U.S. Highway 165, then south along U.S. Highway 165 to the Arkansas-Louisiana border.

When it has been determined that the quota of Canada geese allotted to Illinois and Wisconsin, to the Swan Lake Zone of Missouri, to the Lac Qui Parle Zone of Minnesota, and the Ballard County Zone of Kentucky will have been filled, the season for taking Canada geese in the respective area will be closed by the Director upon giving public notice through local information media at least 48 hours in advance of the time and date of closing.

Geese taken in Illinois and Missouri and in the Kentucky Counties of Ballard, Hickman, Fulton, and Carlisle may not be transported, shipped, or delivered for transportation or shipment by common carrier, the Postal Service, or by any person except as the personal baggage of the hunter taking the birds.

Central Flyway

Seasons on ducks (including mergansers) and coots may be selected between October 1, 1977, and January 22, 1978, inclusive, in Central Flyway States and portions of States, except in designated areas of New Mexico and Texas closed to duck hunting for the protection of the Mexican duck.

The basic season may include no more than 55 days and bag limits on ducks (including mergansers), singly or in the aggregate, are 5 daily and 10 in possession. The aggregate daily bag limit on ducks (including mergansers) may include no more than 1 hooded merganser, 2 wood ducks and 1 female mallard, and the possession limit may include no more than 2 hooded mergansers, 4 wood ducks and 2 female mallards.

The daily bag and possession limits on coots are 15 and 30, respectively.

The daily bag and possession limits, except in closed areas, may include no more than 1 canvasback or 1 redhead. Except in closed areas, canvasbacks count 100 points each and redheads 70 points each under the point system. The areas closed to canvasback and redhead hunting are:

North Dakota—that portion lying east of State Highway 3, including all or portions of 27 counties.

South Dakota—all of Marshall County; that portion of Day County east of State Highway 25; that portion of Codington County south of State Highway 20 and west of U.S. Highway 81, that portion of Hamlin County west of U.S. Highway 81; and that portion of Kingsbury County east of State Highway 25 and north of U.S. Highway 14.

Texas—the Counties of Brazoria, Chambers, Galveston, Harris, Jefferson, and Orange.

The season is closed on the Mexican duck. In order to provide greater protection to the endangered Mexican duck, all duck hunting is prohibited in designated portions of New Mexico and Texas. These areas are described as follows:

That portion of New Mexico lying south and west of the boundary described as follows:

Interstate Highway 10 from the Arizona-New Mexico border east to Deming, north on U.S. Highway 180 to State Highway 26, east on State Highway 26 to Interstate Highway 25, south on Interstate Highway 25 to Las Cruces, and south on Interstate Highway 10 to the New Mexico-Texas border.

Also, the Tula Rosa Creek Area defined as beginning where State Highway 12 crosses the Continental Divide, and extending westward along State Highway 12 to Apache, and encompassing the area one mile south of the above boundary, all in Catron County.

That portion of Texas lying west and south of the boundary described as follows:

Interstate Highway 10 from the Texas-New Mexico border south and east to Fort Stockton, U.S. Highway 385 from Fort Stockton south to the bounary of the Big Bend National Park, and southwesterly along the west boundary of the Big Bend National Park to the U.S.-Mexico border along the Rio Grande.

As an alternative to conventional bag and possession limits for ducks, point-system regulations may be selected for States and portions of States in this Flyway. The point system season length in the High Plains Mallard Management Unit is 83 days *Provided*, That the last 23 days of such season must begin on or after December 12, 1977. The High Plains Unit, roughly defined as that portion of the Central Flyway which lies west of the 100th meridian, shall be described in State regulations. The season length for the Low Plains Unit (those portions of North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, and Texas not included in the High Plains Mallard Management Unit) may not exceed 55 days.

The point values for species and sexes taken in the Central Flyway are as follows: Except in closed areas, canvasbacks count 100 points each; female mallards, wood ducks, redheads (except in closed areas) and hooded mergansers count 70 points each; blue-winged teal, green-winged teal, cinnamon teal, scaup, pintails, gadwalls, shovelers, and mergansers (except the hooded merganser) count 10 points each; all other species and sexes of ducks count 20 points each. The daily bag limit is reached when the point value of the last bird taken, when added to the sum of the point values of other birds already taken during that day, reaches or exceeds 100 points. The possession limit is the maximum number of birds which legally could have been taken in 2 days.

Coots have a point value of zero, but the daily bag and possession limits are 15 and 30, respectively, as under conventional limits.

Those portions of Colorado and Wyoming lying west of the Continental Divide, that portion of New Mexico lying west of the Continental Divide plus the entire Jicarilla Apache Indian Reservation, and that portion of Montana which includes the Counties of Hill, Chouteau, Cascade, Meagher, and Park and all counties west thereof, must select open seasons on waterfowl and coots in accordance with the framework for the Pacific Flyway.

Between October 1, 1977, and January 22, 1978, States in this Flyway may select goose seasons as follows:

(a) For the Central Flyway portions of Montana, Wyoming and Colorado, States may select seasons of 93 days, with daily bag and possession limits of 2 and 4 geese, respectively.

(b) For the Central Flyway portion of New Mexico and that portion of Texas west of U.S. Highway 81, States may select seasons of 93 days with a daily bag limit of 5 geese which may include no more than 2 dark (Canada and white-fronted) geese and a possession limit of 5 geese which may include no more than 4 dark geese.

(c) North Dakota, South Dakota, Nebraska, Kansas, Oklahoma and Texas (for that portion east of U.S. Highway 81) may select seasons of 86 days for light (snow and blue) geese and seasons of 72 days for dark (Canada and white-fronted) geese subject to the following:

Seasons for light and dark geese need not be concurrent.

The daily bag and possession limits may not exceed 5 geese during periods when such light and dark goose seasons may be concurrent.

The daily bag and possession limit may include no more than 5 light geese.

The daily bag limit may include no more than 2 dark geese and the possession limit may include no more than 4 dark geese subject to the following:

In North Dakota, the daily bag limit may include no more than 1 Canada goose and 1 white-fronted goose or 2 white-fronted geese. The possession limit may include no more than 2 Canada or 2 white-fronted geese or 1 of each. The season on dark geese may not extend beyond November 13, 1977.

In South Dakota, the daily bag limit may include no more than 1 Canada goose and 1 white-fronted goose and the possession limit may include no more than 2 Canada geese or 2 white-fronted geese or 1 of each The season on dark geese may not extend beyond November 27, 1977. in the Counties of Buffalo, Brule, Campbell, Charles Mix, Corson, Dewey, Gregory, Hughes, Hyde, Lyman, Potter, Stanley, Sully and Walworth.

In Nebraska, the season on dark geese may not extend beyond December 18, 1977 The daily bag limit may include no more than 1 Canada goose and 1 white-fronted goose and the possession limit may include no more than 2 Canada geese or 2 white-fronted geese or 1 of each except that, in that portion of the State west of U.S Highway 183, prior to November 21, the daily bag limit may include no more than 2 Canada geese and the possession limit no more than 4 Canada geese.

In Kansas, the season on Canada and white-fronted geese may not extend beyond December 25, 1977 The daily bag limit may include no more than 1 Canada and 1 white-fronted goose and the possession limit may include no more than 2 Canada geese or 2 white-fronted geese or 1 of each.

In the Oklahoma Counties of Alfalfa, Bryan, Johnston, and Marshall, the State may select either:

(a) A season of 72 days with a daily bag limit of no more than 1 Canada goose and 1 white-fronted goose, and a possession limit of no more than 2 Canada geese or 2 white-fronted geese or 1 of each.

OR

(b) A season of 53 days (within the 72-day period selected for the remainder of the State) with a daily bag limit of no more than 2 Canada geese or 1 Canada goose and 1 white-fronted goose, and a possession limit of no more than 2 Canada geese and 2 white-fronted geese or 1 of each.

In the remainder of Oklahoma, the daily bag limit may include no more than 2 Canada geese or 1 Canada goose and 1 white-fronted goose and the possession limit no more than 2 Canada geese or 2 white-fronted geese or 1 of each.

In that portion of Texas east of U.S. Highway 81, the State may select either:

(a) A season of 72 days with a daily bag limit of no more than 1 Canada goose or 1 white-fronted goose and a possession limit of no more than 2 Canada geese or 2 white-fronted geese or 1 of each.

OR

(b) A season of 64 consecutive days commencing no earlier than November 12, 1977, with a daily bag limit of no more than 1 Canada and 1 white-fronted goose and a possession limit of no more than 2 Canada geese or 2 white-fronted geese or 1 of each.

In all States in the Flyway, the daily bag and possession limits may include no more than 1 Ross' goose.

Colorado, New Mexico, Oklahoma, Texas, Montana and Wyoming may select a lesser sandhill (little brown) crane season with daily bag and possession limits of 3 and 6 respectively, within an October 1, 1977-January 31, 1978, framework as follows

(a) 37 consecutive days from October 1 through November 6, 1977, in the Central Flyway portion of Colorado except the San Luis Valley area

(b) 93 consecutive days between October 22, 1977, and January 31, 1978, in the New Mexico Counties of Chaves, Curry, De Baca, Eddy, Lea, Quay and Roosevelt, and in that portion of Texas west of a boundary from the Oklahoma border along U.S Highway 287 to U.S. Highway 87 at Dumas, along U.S. Highway 87 (including all of Howard and Lynn Counties) to U.S Highway 277 at San Angelo, and along U.S. Highway 277 to the International Toll Bridge in Del Rio.

(c) 58 consecutive days on or after November 26, 1977, in that portion of Oklahoma west of U.S. Highway 81, and in that portion of Texas east of a boundary from the Oklahoma border along U.S. Highway 287 to U.S. Highway 87 at Dumas, then along U.S. Highway 87 to San Angelo, and west of a line running north from San Angelo along U.S. Highway 277 to Abilene, along State Highway 351 to Albany, along U.S. 283 to Vernon, and then along U.S. Highway 183 east to the Oklahoma border.

(d) 37 consecutive days to open with the goose season in Phillips County, Montana.

(e) 30 consecutive days beginning on or after October 8, 1977, in Platte and Goshen Counties, Wyoming.

All persons hunting sandhill cranes in the above designated areas of the Central Flyway must obtain and possess valid Federal permits issued by the appropriate State conservation agency on an equitable basis without charge.

Emergency closures of hunting seasons will be considered whenever portions of either the Gray's Lake or Arkansas flocks of whooping cranes are found in areas where there is risk to their taking by hunters.

Pacific Flyway

Between October 1, 1977, and January 22, 1978, concurrent 93-day season on ducks, mergansers, coots, and gallinules may be selected in Pacific Flyway States and portions of States, except the Columbia Basin Area and the designated portion of Arizona closed to duck hunting for protection of the Mexican duck. Basic daily bag and possession limits on ducks are 7 and 14, respectively.

No more than 2 redheads or 2 canvasbacks or 1 of each may be taken daily and no more than 4 singly or in the aggregate may be possessed.

The season is closed on the Mexican duck. In order to provide greater protection to the endangered Mexican duck, all duck hunting is prohibited in a designated portion of Arizona. This area is described as follows:

That portion of Cochise County, Arizona, lying south and east of the boundary described as follows:

Interstate Highway 10 from the New Mexico-Arizona border west to Benson, south on U.S. Highway 80 to the San Pedro River, and south along the San Pedro River to the U.S.-Mexico border

The daily bag possession limits on mergansers are 5 and 10, respectively, of which no more than 1 daily and 2 in possession may be hooded mergansers.

The daily bag and possession limits on coots and gallinules are 25 singly or in the aggregate.

For that portion of California lying south of the Tehachapi Mountains and west of the Colorado River Area (as described in Title 14 California Fish and Game Code, Section 502), the State may designate season dates differing from those in the remainder of the State.

Waterfowl season dates for Clark and Lincoln Counties in Nevada and the Colorado River Area of California must coincide with season dates selected by Arizona for waterfowl. Waterfowl season dates for the Tule Lake Area of California must must coincide with season dates selected by Oregon for waterfowl.

In the Columbia Basin Area of Washington, Oregon and Idaho, between October 1, 1977, and January 22, 1978, the season lengths for ducks, mergansers, coots and gallinules may be 100 days with all seasons to run concurrently. The daily bag limit is 7 ducks and the possession limit is 14 ducks, to include no more than 2 redheads or 2 canvasbacks or 1 of each daily, and no more than 4 singly or in the aggregate in possession. The bag limit on mergansers is 5 daily and 10 in possession, of which no more than 1 daily and 2 in possession may be hooded mergansers. The daily bag and possession limits on coots and gallinules are 25 singly or in the aggregate.

Between October 1, 1977, and January 22, 1978, 93-day seasons on geese may be selected in States or portions of States in this Flyway, except the Columbia Basin Area. The basic daily bag and possession limits are 6, provided, that the daily bag limit includes no more than 3 snow geese and 3 geese of the dark species (Canada and white-fronted); the daily bag and possession limits are proportionately reduced in those areas where special restrictions apply to Canada geese. In Washington and Idaho, the daily bag and possession limits are 3 and 6 geese, respectively.

The season is closed on the Aleutian Canada goose.

Three areas in California, described as follows, are restricted to the hunting of Canada geese in order to protect the Aleutian Canada goose for which no hunting is allowed:

(1) In the Counties of Del Norte and Humboldt there will be no open season on Canada geese during the 1977-78 waterfowl hunting season.

(2) In the Sacramento Valley in the area described as follows: Beginning at Willows in Glenn County proceeding south on Interstate Highway 5 to the junction with Hahn Road north of Arbuckle in Colusa County; then easterly on Hahn Road and the Grimes-Arbuckle Road to Grimes on the Sacramento River; then south on the Sacramento River to the Tisdale By-pass; then east-

V 42 I 175 SEP 9 77 UMI

erly on the Tisdale By-pass to where it meets O'Banion Road; then easterly on O'Banion Road to State Highway 99; then northerly on State Highway 99 to its junction with the Gridley-Colusa Highway in Gridley in Butte County; then westerly on the Gridley-Colusa Highway to its junction with the River Road; then northerly on the River Road to the Princeton Ferry; then westerly across the Sacramento River to State Highway 45; then northerly on State Highway 45 to its junction with State Highway 162; then continuing northerly on State Highway 45–162 to Glenn; then westerly on State Highway 162 to the point of beginning in Willows, the hunting season for taking Canada geese will not open until December 15, 1977, and will then continue to the end of the 1977–78 waterfowl hunting season.

(3) In the San Joaquin Valley in the area described as follows: beginning at Modesto in Stanislaus County proceeding west on State Highway 132 to the junction of Interstate 5; then southerly on Interstate 5 to the junction of State Highway 152 in Merced County; then easterly on State Highway 152 to the junction of State Highway 59; then northerly on State Highway 59 to the junction of State Highway 99 at Merced; then northerly and westerly to the point of beginning; the hunting season for taking Canada geese will close on November 24, 1977 at sunset.

Emergency closures may be invoked for all Canada geese should Aleutian Canada goose distribution pattern or other circumstances justify such actions.

In the Washington Counties of Adams, Franklin, Grant, Walla Walla, Lincoln, Douglas, Yakima, Benton, Klickitat, and Kittitas, and in the Oregon Counties of Morrow, Wasco, Sherman, Gilliam, Umatilla, Union and Wallowa, the goose season must run concurrently with the Columbia Basin duck season and the bag limits for geese are to be the same as in the general goose season in their respective States.

In that portion of Idaho lying west of U.S. Highway 93 (except Boundary, Bonner, Kootenai, Benewah, Shoshone, Latah, Nez Perce, Lewis, Clearwater and Idaho Counties); in the Oregon Counties of Baker and Malheur; in that portion of Montana and Wyoming in the Pacific Flyway, the daily bag and possession limit is 2 Canada geese and the season on Canada geese may not extend beyond January 1, 1978.

In that portion of Idaho lying east of U.S. Highway 93; in that portion of Colorado in the Pacific Flyway; in Utah except Washington County, the season on Canada geese may be no more than 72 days and may not extend beyond December 18, 1977.

In Arizona; in that portion of New Mexico in the Pacific Flyway; in Clark and Lincoln Counties, Nevada; in Washington County, Utah; and in the Tehachapi waterfowl area of California, the season on Canada geese may be no more than 72 days. The daily bag and possession limit is 2 Canada geese and the season on Canada geese may not extend beyond January 1, 1978.

In that portion of California Fish and Game District 22 for which California selects the open season (that portion of District 22 lying outside the Colorado River area), the daily bag limit is 1 Canada goose with 2 in possession and the season on Canada geese may be no more than 72 days and may not extend beyond January 1, 1978.

In all States in the Flyway, the daily bag and possession limits may include no more than 1 Ross' goose.

Between October 22, 1977, and February 22, 1978, States in this Flyway may select an open season on black brant of 93 days with daily bag and possession limits of 4 and 8 brant, respectively.

In Utah, Nevada and Montana, an open season for taking a limited number of whistling swans may be selected subject to the following conditions: (a) the season must run concurrently with the duck season; (b) in Utah, no more than 2,500 permits may be issued, authorizing each permittee to take 1 whistling swan; (c) in Nevada, no more than 500 permits may be issued, authorizing each permittee to take 1 whistling swan in Churchill County; (d) in Montana, no more than 500 permits may be issued authorizing each permittee to take 1 whistling swan in Teton County; (e) permits and correspondingly numbered metal locking seals must be issued by the appropriate State conservation agency on an equitable basis without charge.

For all States entirely in the Pacific Flyway, open seasons on common (Wilson's) snipe must coincide with the duck season locally in effect. For other States partially within the Pacific Flyway seasons between September 1, 1977, and February 28, 1978, and not to exceed 93 days, may be selected. The daily bag and possession limits are 8 and 16, respectively. Any State may split its snipe season without penalty.

SPECIAL FALCONRY SEASONS FRAMEWORKS

Any State that provides special falconry hunting seasons may select extended falconry seasons for taking certain migratory game birds in accordance with the following provisions:

1. Seasons must fall within the framework dates provided for selecting regular hunting seasons for the various groups of species (e.g. October 1–January 20 for waterfowl, etc.).

2. Season lengths for all permitted methods of hunting within a given area may not exceed 107 days for any species.

3. Hawking hours to be ½ hour before sunrise until sunset.

4. Daily bag and possession limits for waterfowl (ducks, geese, and mergansers) may not exceed 2 and 4 birds, respectively, singly or in the aggregate.

5. Daily bag and possession limits for coots, gallinules, rails, snipe, woodcock, doves and pigeons only may not exceed 4 and 8 birds, respectively, singly or in the aggregate.

6. States offering extended seasons shall evaluate and report to the Service the results of each regular and extended falconry hunting season each year.

Hunting by falconry during regular migratory game bird seasons is permitted in accordance with applicable regulations.

States selecting extended falconry seasons must inform the Service of seasons and other regulations and publish said regulations.

NOTE.—The Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: September 2, 1977.

PART 26—PUBLIC ENTRY AND USE

Catahoula National Wildlife Refuge, La.

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Service announces a hunter access route across a specified part of the Catahoula National Wildlife Refuge, La. The opening of this access route is compatible with the objectives for which the area was established, and will provide for a route to enter areas open to hunting.

DATES: These regulations will be effective for the 1977–78 hunting season.

FOR FURTHER INFORMATION CONTACT:

Stephen K. Joyner, Refuge Manager, Catahoula National Wildlife Refuge, P.O. Drawer LL, Jena, La. 71342; telephone 318–992–5261.

SUPPLEMENTARY INFORMATION:

§ 26.34 Special regulations concerning public access, use, and recreation for individual national wildlife refuges.

A corridor open for the transportation of unloaded and encased firearms by vehicles during any and all legal waterfowl hunting seasons as follows:

The corridor shall consist of a Parish maintained road on the south side of French Fork of Little River in Sections 8 and 9, T. 6N., R. 4E.

This special regulation supplements the regulations governing transportation of firearms on national wildlife refuges generally which are set forth in 50 CFR, Chapter I, Subchapter C. The public is invited to offer suggestions and comments at any time.

NOTE.—The service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

The primary author of this document is Stephen Joyner, Refuge Manager, Catahoula National Wildlife Refuge, La.

PART 32—HUNTING

Opening of Alamosa National Wildlife Refuge, Colo., to Public Hunting of Migratory Game Birds

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of geese, ducks, coots, mergansers, mourning doves, and Wilson's snipe on Alamosa National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: October 1, 1977, through January 19, 1978

FOR FURTHER INFORMATION CONTACT:

Robert L. Darnell, Refuge Manager, Alamosa National Wildlife Refuge, P.O. Box 1148, Alamosa, Colo. 81101; telephone 303–589–4021.

SUPPLEMENTARY INFORMATION:

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

Hunting of geese, ducks, coots, mergansers, mourning doves, and Wilson's snipe is permitted on Alamosa National Wildlife Refuge, Colo., but only on the areas designated by signs as being open to hunting. These areas comprising 3,946 acres, is delineated on maps available at refuge headquarters, Alamosa, Colo., and from the office of the Regional Director, U.S. Fish and Wildlife Service, 10597 West 6th Avenue, Denver, Colo. 80215. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of geese, ducks, coots, mergansers, mourning doves, and Wilson's snipe subject to the following special conditions:

(1) The hunting of mourning doves and Wilson's snipe will be limited to those dates open to the hunting of waterfowl, (geese, ducks, coots, and mergansers).

(2) Admittance—Entrance to the area open to hunting, and the parking of vehicles will be restricted to designated hunter parking areas.

(3) Dogs—Not to exceed two dogs per hunter may be used in the hunting of the above species.

(4) Boats—The use of boats is prohibited. One or two-man life rafts that can be carried by one individual from the parking areas to the hunting area may be used to retrieve dead or wounded birds.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: August 30, 1977.

ROBERT L. DARNELL,
Refuge Manager, Alamosa National Wildlife Refuge, Alamosa, Colo.

PART 32—HUNTING

Opening of Alamosa National Wildlife Refuge, Colo., to Public Hunting of Upland Game

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of cottontail rabbits and white and black-tailed jack rabbits on Alamosa National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: October 1, 1977, through January 19, 1978.

FOR FURTHER INFORMATION CONTACT:

Robert L. Darnell, Refuge Manager, Alamosa National Wildlife Refuge, P.O. Box 1148, Alamosa, Colo. 81101. Telephone 303–589–4021.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

Hunting for cottontail rabbits, white and black-tailed jack rabbits is permitted on the Alamosa National Wildlife Refuge, Colo., but only on the areas designated by signs as being open to hunting. These areas comprising 3,946 acres are delineated on maps available at refuge headquarters, Alamosa, Colo., and from the office of the Regional Director, U.S. Fish and Wildlife Service, 10597 West Sixth Avenue, Denver, Colo. 80215. Hunting shall be in accordance with all applicable State regulations subject to the following conditions:

(1) Hunting of rabbits will be permitted only during the Colorado waterfowl season.

(2) Admittance—Entrance to the area open to hunting and parking of vehicles will be restricted to designated parking areas.

(3) Dogs—Not to exceed two dogs per hunter may be used in the hunting of rabbits.

(4) Hunting with rifles and handguns is prohibited.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: August 30, 1977.

ROBERT L. DARNELL,
Refuge Manager, Alamosa National Wildlife Refuge, Alamosa, Colo.

PART 32—HUNTING

Opening of Cape Romain National Wildlife Refuge, S.C., to Public Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to rail hunting of Cape Romain National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: September 22 through October 29, 1977, except Sundays.

FOR FURTHER INFORMATION CONTACT:

George R. Garris, Refuge Manager, Cape Romain National Wildlife Refuge, Rt. 1, Box 191, Awendaw, S.C. 29429. Telephone 803–928–3368.

SUPPLEMENTARY INFORMATION:

§ 32.12 Special regulations; migratory birds; for individual wildlife refuge areas.

Public hunting of rail on portions of the Cape Romain National Wildlife Refuge, Awendaw, S.C., is permitted only on the area designated by signs as open to hunting. The open portion of the refuge consists of approximately 12,000 acres of marsh as delineated on a map which is available upon request from refuge headquarters and from the Office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive NE., Atlanta, Ga. 30329. Hunting will be in accordance with all applicable State and Federal regulations governing the hunting of rails and subject to the following special conditions on the refuge areas:

1. Only the areas designated by signs as open to hunting may be hunted. (Only rails may be hunted or taken.)

2. Only shotguns are allowed and they must be unloaded and either encased or broken down, except when in the designated hunting area.

3. Dogs are permitted only in the hunting area. (Dogs and weapons are not per-

V 42 175 SEP 9 77 UMI

mitted on any of the islands outside the hunting area.)

4. A special refuge permit is required and may be obtained from refuge headquarters, Monday through Friday (except holidays), from 9 a.m. to 3:30 p.m. Hunters also may obtain their permits through the mail by written request. (Be sure to include complete name and mailing address.)

5. Each hunter under age 18 must be under the close supervision of an adult. For safety reasons, the ratio should be one adult to one juvenile, but in no case should one adult have more than two juveniles under his/her supervision.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: September 2, 1977.

RAY R. VAUGHN,
Acting Regional Director.

[FR Doc.77-26321 Filed 9-8-77;8:45 am]

PART 32—HUNTING

Opening of Eufaula National Wildlife Refuge, Ga., to Waterfowl Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to waterfowl hunting of Eufaula National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: Each Saturday morning of the regular Georgia waterfowl season.

FOR FURTHER INFORMATION CONTACT:

Refuge Manager, Eufaula National Wildlife Refuge, P.O. Box 258, Eufaula, Ala. 36027. Telephone 205-687-4065.

SUPPLEMENTARY INFORMATION:

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

Waterfowl hunting is permitted on the Eufaula National Wildlife Refuge, Ga., only on the areas designated by signs as being open to hunting. These areas comprising 770 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, Fish and Wildlife Service, 17 Executive Park Drive NE., Atlanta, Ga. 30329. Waterfowl hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. Hunts will be held from 30 minutes prior to sunrise until 11:30 a.m. (Eastern Time) on each Saturday morning of the season.

2. Hunters must hunt only from designated blinds provided and located by refuge personnel. Shooting is not permitted outside of designated blind zone.

3. Guns must be unloaded while being transported on the refuge and while being carried to and from the blinds.

4. Each hunter is limited to one box of 12-gauge shells in his possession. Only shells containing steel shot will be permitted and these may be purchased at the check-in station at cost.

5. Hunters are required to check in and out of the hunt area and must present all bagged game for inspection.

6. A refuge permit is required. A blind fee of $6 per blind will be charged at the time the permits are issued prior to each day's hunt.

7. Applications for reservations for the refuge permits must be received by the Refuge Manager, Eufaula Refuge, Eufaula, Ala., prior to 12 noon, Friday, October 28, 1977. Successful applicants will be determined by an impartial drawing on Monday, October 31, 1977.

8. Each hunter under age 18 must be under the close supervision of an adult. For safety reasons the ratio should be one adult to one juvenile, but in no case should one adult have more than two juveniles under his/her supervision.

9. Blind reservations are nontransferable.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

The primary author of this document is Jimmie L. Tisdale, Refuge Manager, Eufaula National Wildlife Refuge, Ala./Ga.

Dated: September 2, 1977.

RAY R. VAUGHN,
Acting Regional Director.

PART 32—HUNTING

Opening of National Wildlife Refuge in Oklahoma to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Sequoyah National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: September 1, 1977, through the last day of the regular 1977-78 duck season.

FOR FURTHER INFORMATION CONTACT:

Refuge Manager, Sequoyah National Wildlife Refuge, Box 398, Sallisaw, Okla. 74955. Telephone 918-775-4931.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; upland game birds; for individual wildlife refuge areas.

Public hunting of quail, rabbit, and squirrel on the Sequoyah National Wildlife Refuge is permitted on three areas designated by signs as open to hunting. These open areas, comprising a total of 10,500 acres, are delineated on maps available at refuge headquarters, and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, N. Mex. 87103. Hunting seasons are as follows: squirrel, September 1, 1977, through January 1, 1978; quail, November 20, 1977, through the last day of the regular 1977-78 duck season; rabbits, October 1, 1977, through the last day of the regular 1977-78 duck season. Hunting shall be in accordance with all applicable State regulations covering the hunting of quail, squirrel, and rabbits, subject to the following special conditions:

1. Only shotguns without slug ammunition or longbow and arrow are permitted.

2. Hunting weapons of any kind are prohibited in areas not posted as open to public hunting, except the Kerr-McClellan Navigation Channel where weapons must be cased or broken down.

3. Dogs may be used for hunting quail or rabbit, but must be under immediate control or supervision and restrained from pursuit of protected species.

4. Camping or possession of firearms on the refuge at night is prohibited.

5. All vehicles must be parked in designated parking areas as shown on maps available at refuge headquarters and at leaflet boxes throughout the public hunting area.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

W. O. NELSON, JR.,
Regional Director,
Albuquerque, N. Mex.

PART 32—HUNTING

Opening of Pathfinder National Wildlife Refuge, Wyoming, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Pathfinder National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: As established by Wyoming Game and Fish Commission for Calendar Year 1977.

FOR FURTHER INFORMATION CONTACT:

V. Carrol Donner, Refuge Manager, Pathfinder National Wildlife Refuge, Box 457, Walden, Colo. 80480. Telephone 303-723-4717.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Hunting of deer and antelope is permitted on Pathfinder National Wildlife Refuge, Wyoming, in accordance with dates and areas designated in the Wyoming 1977 Orders regulating deer and antelope hunting. These areas, comprising 16,807 acres, are composed of four separate units and are delineated on maps available at refuge headquarters in Walden, Colo. and from the office of the Area Manager, U.S. Fish and Wildlife Service, 1426 Federal Building, 125 S. State St., Salt Lake City, Utah 84138. Hunting shall be in accordance with all applicable State regulations covering the hunting of deer and antelope.

The provisions of this special regulation supplement the regulations which govern hunting in wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

V. CARROL DONNER,
Refuge Manager.

AUGUST 30, 1977.

PART 32—HUNTING

Opening of Piedmont National Wildlife Refuge, Georgia, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Piedmont National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: Deer hunts—Archery—October 1-9, 1977. Gun hunts: Bucks only—October 27-29, 1977. Either sex—November 5 and 12, 1977.

FOR FURTHER INFORMATION CONTACT:

Ronnie A. Shell, Refuge Manager, Piedmont National Wildlife Refuge, Round Oak, Ga. 31080. Telephone 912-986-3651.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Hunting is permitted on the entire Piedmont National Wildlife Refuge, Georgia, except on the areas designated by signs as being closed to hunting. This open area, comprising approximately 33,000 acres, is delineated on maps available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive NE., Atlanta, Ga. 30329. Hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. Open season and bag limit: (a) Archery hunt—October 1-9, 1977; limit two deer of either sex; (b) buck hunt—October 27-29, 1977; limit two bucks with visible antlers; (c) either sex hunts—November 5 and 12, 1977; limit one deer.

2. During deer hunts, if weather permits gates blocking roads will be opened one hour prior to official sunrise and closed one hour after sunset. Parked vehicles must not block entrances to roads.

3. Handguns may not be used or possessed. Target practice during the hunts is prohibited.

4. All deer must be checked in at refuge headquarters the day killed and before leaving the refuge.

5. Dogs are prohibited.

6. Camping and fires are restricted to the designated camping area in Compartment 19, which will be open one day before, during, and one day after each deer hunt.

7. Each hunter under age 18 must be under the close supervision of an adult. For safety reasons the ratio should be one adult to one juvenile, but in no case may one adult have more than two juveniles under his/her supervision.

8. It is unlawful to drive a nail, spike, or other metal object into any tree or to hunt from any tree in which a nail, spike, or other metal object has been driven.

9. Prehunt scouting and stand placement will be permitted from 12 noon until sunset on the day immediately prior to each deer hunt. Weapons are not permitted in the woods during scouting periods.

10. A refuge permit is required. Hunt permits are nontransferable. Submission of more than one permit application or applications containing false information is prohibited.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: September 2, 1977.

RAY R. VAUGHN,
Acting Regional Director.

PART 32—HUNTING

Opening of Yazoo National Wildlife Refuge, Mississippi, to Resident Game Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to upland game hunting of Yazoo National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: Squirrels: October 1, 1977 through October 8, 1977 (Sundays excluded). Raccoon and Opossum: December 3, 1977 through December 10, 1977 (Sundays excluded).

FOR FURTHER INFORMATION CONTACT:

James M. Dale, Refuge Manager, Route 1, Box 286, Hollandale, Miss. 38748. Telephone 601-839-2638.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; hunting of upland game; for individual wildlife refuge areas.

Squirrel, raccoon, and opossum hunting is permitted on the Yazoo National Wildlife Refuge, Mississippi, in wooded areas not designated by signs as closed to hunting. The open areas comprising 7,800 acres are delineated on a map along with special regulation sheets and are available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive NE., Atlanta, Ga. 30329. Upland game hunting shall be in accordance with all State regulations subject to the following conditions:

1. Bag limit: To comply with State regulations at time of hunt.

2. Hunting Hours: Squirrels may be hunted from one half hour before official sunrise until official sunset. Raccoons and opossums may be hunted from official sunset to 12 midnight.

3. Dogs: No dogs will be permitted during squirrel hunt. Dog use during raccoon and opossum hunt will be in accordance with State laws at that time.

4. Weapons: Shotguns, 10-gauge or smaller, and .22 caliber rimfire rifles only.

5. Permits: One day, free permits are required. All hunters must check in and check out at refuge office.

6. Carrying of loaded firearms in vehicles is prohibited. Shooting or spotlighting from vehicles or any paved road is prohibited. No firearms may be dis-

V 42 175 SEP 9 77 UMI

charged within 250 yards of any residences or refuge office.

7. Each hunter under age 18 must be under the close supervision of an adult. For safety reasons the ratio should be one adult to one juvenile, but in no case should one adult have more than two juveniles under his/her supervision.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Date: September 2, 1977.

RAY R. VAUGHN,
Acting Regional Director.

PART 32—HUNTING

Opening of Lake Zahl National Wildlife Refuge, North Dakota, to Archery Hunting of Deer

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to archery hunting of deer on Lake Zahl National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: September 2, 1977 through September 30, 1977, and November 21, 1977 through December 31, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles S. Peck, Project Leader, Des Lacs NWR, Kenmare, N. Dak. 58746. (701-385-4046).

SUPPLEMENTARY INFORMATION.

§ 32.32 Special regulations; big game, for individual wildlife refuge areas.

Public archery hunting of deer will be permitted on Lake Zahl National Wildlife Refuge. The refuge portion owned in fee title consisting of 3,296 acres located in northern Williams County will be open for archery hunting. Hunting shall be in accordance with all applicable State Regulations covering archery hunting of deer, subject to the following conditions:

(1) No motorized vehicles will be allowed within the boundaries of the refuge.

(2) Archery hunting is permitted from 12 noon (CDT) September 2 to sunset September 30, and from 12 noon November 21 to sunset December 31, 1977.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas, generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 31, 1977.

NOTE.—The Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: August 31, 1977.

ROLLAND J. KRIEGER,
Acting Project Leader, Des Lacs National Wildlife Refuge Complex, Kenmare, N. Dak. 58746.

PART 32—HUNTING

Opening of White Lake National Wildlife Refuge, North Dakota, to Archery Hunting of Deer

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to archery hunting of deer on White Lake National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: September 2, 1977 through September 30, 1977, and November 21, 1977 through December 31, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles S. Peck, Project Leader, Des Lacs NWR, Kenmare, N. Dak., 58746. (701-385-4046.)

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations, big game, for individual wildlife refuge areas.

Public archery hunting of deer will be permitted on White Lake National Wildlife Refuge. The entire refuge of 1040 acres located in Slope County will be open for archery hunting. Hunting shall be in accordance with all applicable State Regulations covering archery hunting of deer, subject to the following conditions:

(1) No motorized vehicles will be allowed within the boundaries of the refuge.

(2) Archery hunting is permitted from 12 noon (CDT) September 2 to Sunset September 30, and from 12 noon November 21 to sunset December 31, 1977.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50. Code of Federal Regulations, Part 32 and are effective through December 31, 1977

NOTE.—The Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107

Dated: August 31, 1977.

PART 32—HUNTING

Opening of Wildlife Management Areas 10 and 11 to Public Pheasant Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening of parts of the Lacreek National Wildlife Refuge to public hunting of cock pheasants is compatible with the objectives for which the area was established, will utilize a renewable natural resource and will supply additional recreational opportunities to the public.

DATES: October 15, 1977 through November 27, 1977.

FOR FURTHER INFORMATION CONTACT:

Refuge Manager, Lacreek National Wildlife Refuge, Martin, S. Dak. 57551. Telephone 605-685-6508.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

Public hunting of cock ringneck pheasant on the Lacreek National Wildlife Refuge, South Dakota is permitted in those parts of Wildlife Management Areas 10 and 11 (2,800 acres) delineated on maps available at designated parking areas, at Refuge Headquarters, Martin, S. Dak. 57551 and at the U.S. Fish and Wildlife Service, Area Office, Pierre, S. Dak. 57501 and not designated closed. Hunting shall be according to State and Federal Regulations governing the hunting of cock pheasants subject to the following special conditions:

(a) The hunting of other than cock pheasant is prohibited.

(b) Designated hunting access and parking sites will be available. Entering and parking at other sites will be prohibited.

(c) Hunting will be allowed only by Special Permit Report forms available at designated parking sites.

The provisions of this special regulation supplements the regulations which governs hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations Part 32 and are effective through December 31, 1977. The public is invited to offer suggestions and comments at any time.

NOTE.—The U S Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under

Executive Order 11949 and OMB Circular A-107.

HAROLD H BURGESS,
Refuge Manager, Lacreek National Wildlife Refuge, Martin, S. Dak.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Lemon Reg 109]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of California-Arizona lemons that may be shipped to fresh market during the weekly regulation period September 11-17, 1977 This regulation is needed to provide for orderly marketing of fresh lemons for the regulation period because of the production and marketing situation confronting the lemon industry

EFFECTIVE DATE September 11, 1977

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S Department of Agriculture, Washington, D C. 20250. Telephone 202-447-3545

SUPPLEMENTARY INFORMATION

Findings. (1) Pursuant to the amended marketing agreement and Order No 910, as amended (7 CFR Part 910) regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937 as amended (7 U.S.C 601-674), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee established under the amended marketing agreement and order, and upon other available information, it is found that the limitation of handling of such lemons, as provided in this regulation, will tend to effectuate the declared policy of the act.

(2) The need for this regulation to limit the quantity of lemons that may be marketed during the specified week stems from the production and marketing situation confronting the lemon industry

(i) The committee has submitted its recommendation for the quantity of lemons it considers advisable to be handled during the specified week. The recommendation resulted from consideration of the factors covered in the order. The committee further reports the demand for lemons is good on all sizes.

Average f.o.b. price was $6.95 per carton the week ended September 3, 1977, compared to $6.73 per carton the previous week.

Track and rolling supplies at 135 cars were down 30 cars from last week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the quantity of lemons which may be handled should be established as provided in this regulation.

(3) It is further found that it is impracticable and is contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because the time intervening between the date when information upon which this regulation is based became available and the time when it must become effective to effectuate the declared policy of the act is insufficient. A reasonable time is permitted, for preparation for the effective time; and good cause exists for making the regulation effective as specified. The committee held an open meeting during the current week, after giving due notice, to consider supply and market conditions for lemons and the need for regulation. Interested persons were afforded an opportunity to submit information and views at this meeting. The recommendation and supporting information for regulation during the period specified were promptly submitted to the Secretary after the meeting was held, and information concerning the provisions and effective time has been provided to handlers of lemons. It is necessary, to effectuate the declared policy of the act, to make this regulation effective as specified. The committee meeting was held on September 6, 1977.

§ 910.409 Lemon Regulation 109.

(a) *Order.* (1) The quantity of lemons grown in California and Arizona which may be handled during the period September 11, 1977, through September 17, 1977, is established at 215,000 cartons.

(2) As used in this section, "handled" and "carton(s)" have the same meaning as when used in the amended marketing agreement and order.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.)

Dated: September 8, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agriculture Marketing Service.

PART 926—TOKAY GRAPES GROWN IN SAN JOAQUIN COUNTY, CALIFORNIA

Industry Committee Expenses and Rate of Assessment

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation authorizes expenses of $140,642, fixes a rate of assessment of eight cents per lug (23 pounds) of grapes handled for the functioning of the Industry Committee for the 1977-78 fiscal period, and approves carrying over unexpended funds from the previous fiscal period as a reserve. The committee is established under a Federal marketing order program regulating Tokay grapes grown in San Joaquin County, Calif. This regulation enables the committee to collect assessments from handlers on all assessable grapes handled and to use the resulting funds for its expenses.

DATES: Effective for the period April 1, 1977, through March 31, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202-447-3545).

SUPPLEMENTARY INFORMATION: On August 15, 1977, notice of proposed rulemaking was published in the FEDERAL REGISTER (42 FR 41130) regarding proposed expenses and rate of assessment, under Marketing Order No. 926 (7 CFR Part 926) regulating Tokay grapes grown in San Joaquin County, Calif. This notice allowed interested persons opportunity to submit written comments pertaining to the proposal until September 2, 1977 None were submitted. This regulatory program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674).

After consideration of all relevant matter presented, including the proposal set forth in the notice, which was submitted by the Industry Committee (established under the marketing order), it is found and determined that:

§ 926.217 Expenses, rate of assessment, and carryover of unexpended funds.

(a) *Expenses.* Expenses that are reasonable and likely to be incurred by the Industry Committee during the period April 1, 1977, through March 31, 1978, will amount to $140,642.

(b) *Rate of assessment.* The rate of assessment for said period, payable by each first handler in accordance with § 926.46,

V 42 175 SEP 9 77 UMI

is fixed at eight cents ($0.08) per No. 38L grape lug (as specified in § 1380.19 of the Regulations of the California Department of Food and Agriculture) or equivalent quantity of Tokay grapes.

(c) *Reserve.* Unexpended assessment funds in excess of expenses incurred during the fiscal period which ended March 31, 1977, shall be carried over as a reserve in accordance with the applicable provisions of § 926.47.

It is further found that good cause exists for not postponing the effective date of this action until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that (1) handling of the current crop of Tokay grapes grown in the production area is now underway; (2) provisions of the marketing order require that the rate of assessment shall apply to all assessable grapes handled during the fiscal period; and (3) the fiscal period began April 1, 1977, and the rate of assessment will automatically apply to all grapes handled during the period.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.)

Dated: September 6, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77-26362 Filed 9-8-77;8:45 am]

PART 967—CELERY GROWN IN FLORIDA

Expenses and Rate of Assessment

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation authorizes expenses of $65,000 and a rate of assessment of one cent per crate of celery for the functioning of the Florida Celery Committee. The regulation enables the committee to collect assessments from first handlers on all assessable celery handled and to use the resulting funds for its expenses.

EFFECTIVE DATE: August 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, AMS, U.S Department of Agriculture, Washington, D.C. 20250 (202–447–3545).

SUPPLEMENTARY INFORMATION: Marketing Agreement No. 149 and Order No. 967, both as amended, regulate the handling of celery grown in Florida. This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The Florida Celery Committee, established under the order, is responsible for its local administration.

Notice was published in the August 17 FEDERAL REGISTER (42 FR 41431) regarding the proposals It afforded interested persons an opportunity to file written comments not later than September 2, 1977 None was filed

After consideration of all relevant matters, including the proposals in the notice, it is found that the following expenses and rate of assessment should be approved.

It is further found that good cause exists for not postponing the effective date of this section until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) because this part requires that the rate of assessment for a particular fiscal year shall apply to all assessable celery from the beginning of such year

The regulation is as follows

§ 967.213 **Expenses and rate of assessment.**

(a) The reasonable expenses that are likely to be incurred during the fiscal year ending July 31, 1978, by the Florida Celery Committee, for its maintenance and functioning, and for such purposes as the Secretary determines to be appropriate, will amount to $65,000

(b) The rate of assessment to be paid by each handler in accordance with this part shall be one cent ($0.01) per crate of celery handled by him as the first handler during the fiscal year.

(c) Unexpended income in excess of expenses for the fiscal year may be carried over as a reserve to the extent authorized in § 967 62.

(d) Terms used in this section have the same meaning as when used in the marketing agreement and this part.

(Secs. 1 19, 48 Stat 31, as amended; 7 U.S.C. 601 674)

Dated: September 6, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

Title 7—Agriculture

CHAPTER XXVIII—FOOD SAFETY AND QUALITY SERVICE, DEPARTMENT OF AGRICULTURE

PART 2852—PROCESSED FRUITS, VEGETABLES, PROCESSED PRODUCTS THEREOF, AND CERTAIN OTHER PROCESSED FOOD PRODUCTS

Subpart—Regulations Governing Inspection and Certification of Processed Fruits and Vegetables

AGENCY: Food Safety and Quality Service, USDA.

ACTION: Final rule.

SUMMARY: This document adds overtime rates to the list of charges for inspection service, because it has been determined that commodity graders are not exempt from the requirements of the Fair Labor Standards Act. This action means that recipients of commodity grading services will be required to pay for such overtime services at the rates prescribed.

EFFECTIVE DATE: September 11, 1977.

FOR FURTHER INFORMATION CONTACT:

E. C. Williams, Chief, Processed Products Branch, Fruit and Vegetable Quality Division, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202–447–3810).

SUPPLEMENTARY INFORMATION: Until recently, the Department had declared commodity graders of the Processed Products Branch, Fruit and Vegetable Quality Division, Food Safety and Quality Service, were exempt from the Fair Labor Standards Act which required time and a half pay for overtime worked. Most graders requested compensatory leave for overtime worked in lieu of overtime pay. Because of the seasonal nature of fruit and vegetable grading, this provided year-round employment. It has now been determined that the processed fruit and vegetable graders are not exempt. They no longer have the option of requesting compensatory time and must be paid for overtime worked.

Under the provisions of the Agricultural Marketing Act of 1946, fees must be assessed to recover the full cost of providing service. Therefore, overtime rates are being added to the list of charges for inspection service.

Accordingly, § 2852.42—Schedule of fees—and § 2852.52—Charges for inspection service on a contract basis—are being amended to recover increased costs.

Pursuant to the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1097, et seq., as amended; 7 U.S.C. 1621–1627), § 2852.42 and § 2852.52 (c)(6) and (d)(5) are hereby amended to read as follows:

§ 2852.42 **Schedule of fees.**

Unless otherwise provided in a written agreement between the applicant and the Administrator, the fee for any inspection service performed under the regulations in this part, including analyses specified in § 2852.47, shall be at the rate of $18.45 per hour plus an additional $5 per hour for all scheduled overtime hours.

• • • • • •

§ 2852.52 **Charges for inspection service on a contract basis.**

• • • • • •

(c) • • •

(6) *Overtime.* All overtime hours will be charged at the regular rate specified in (c) (1) and (2) of this section plus $5.00 per hour.

(d) • • •

(5) *Overtime.* All overtime hours will be charged at the regular rates specified in (d)(1) of this section plus $5 per hour

• • • • • •

Notice of proposed rulemaking, public procedure thereon, and the postponement of the effective time of this action later than September 11, 1977 (5 U.S.C. 553), are impracticable, unnecessary, and contrary to the public interest in that (1) the Agricultural Marketing Act of 1946 provides that the fees charged shall be reasonable and, as nearly as possible, cover the cost of the service rendered, (2) the increases in fee rates set forth herein are necessary to more nearly cover such cost, and (3) additional time is not required by the users of the inspection service to comply with this amendment.

(Secs. 203, 205, 60 Stat. 1087, as amended, 1090, as amended, (7 U.S.C. 1622; 1624))

Dated to become effective at 12.01 a.m., September 14, 1977.

NOTE.—The Food Safety and Quality Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

Dated: September 2, 1977.

ROBERT ANGELOTTI,
Administrator, Food Safety, and Quality Service.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

[7 CFR Part 210]

NATIONAL SCHOOL LUNCH PROGRAM

Nutritional Requirements

AGENCY: Food and Nutrition Service, USDA.

ACTION: Proposed rule.

SUMMARY: Notice is hereby given that the Food and Nutrition Service, U.S. Department of Agriculture (FNS), proposes to amend the regulations governing the nutritional requirements of the National School Lunch Program. The major purposes of the proposed changes in the lunch requirements are to meet more accurately the nutritional needs of children of varying ages and to bring the lunch requirements into conformance with the 1974 revisions of the Recommended Dietary Allowances (RDA) as published by the Food and Nutrition Board of the National Research Council, National Academy of Sciences (NRC-NAS).

DATES: Comments must be received on or before October 25, 1977.

ADDRESS: Comments should be sent to: William G. Boling, Manager, Child Nutrition Programs, USDA, FNS, Washington, D.C. 20250 (202–447–8130).

FOR FURTHER INFORMATION CONTACT:

William G. Boling, Manager, Child Nutrition Programs, USDA, FNS, Washington, D.C. 20250 (202–447–8130).

SUPPLEMENTARY INFORMATION:

Summarized Changes

Public comments are invited from all sectors and on the full range of meal quality and acceptability issues affected by this proposal. The principal changes in the lunch requirements, as set forth in a new section, § 210.19b, are to: (1) Specify minimum quantities of foods appropriate for five age groups; (2) require the service of lunch to preschool children ages 1 through 5 years at two service periods which, in combination, will meet the quantities and components of the appropriate lunch pattern; (3) expand the bread alternates to include enriched or whole-grain rice, macaroni, noodles and other pasta products; (4) specify the number of servings of bread or bread alternates to be served for a school week to provide added flexibility in menu planning; (5) specify that a serving of dry beans and peas, or peanut butter can be used to meet no more than one-half of the meat/meat alternate requirement for all children; (6) specify that eggs may be used to meet only one-half of the meat/meat alternate requirement for children ages 3 and above, and that eggs may be used to meet the full meat/meat alternate requirement for children ages 1 and 2 years; (7) specify that eggs, cooked dry beans or peas and peanut butter may be combined with meat, poultry, fish or cheese to meet the total meat/meat alternate requirement; or eggs, cooked beans or peas and peanut butter may be used with one another in equal quantities to meet the total meat/meat alternate requirement; (8) provide that children 12 years and over may request smaller portion sizes of the required lunch components than are specified to meet their individual food needs and to reduce plate waste; (9) specify that unflavored fluid lowfat milk, skim milk, or buttermilk must be available to students in addition to whole milk, flavored or unflavored, or any other flavored milk.

All public sectors, including parents and students are invited to comment during this basic 45-day comment period on proposed regulations. After the comment period, interim regulations incorporating public concerns will be issued. Interim regulations may be used by any State agency, at its option, for the interim field testing period, in willing schools of various grade levels in lieu of current regulations will permit optional testing of interim lunch patterns under actual operating experience over a four-month time period. Comments from the general public, as well as from all parties associated with field testing, will continue to be accepted and considered by the Department. These comments will be especially helpful to the Department in developing acceptable final regulations. Also of assistance to the Department will be public comments received during the course of public hearings on Child Nutrition Programs, scheduled during the fall. It is contemplated that final regulations will be adopted after the termination of the interim regulatory period putting into effect mandatory lunch patterns and related regulatory changes.

Background

The National School Lunch Program, since its inception in 1946, has specified lunch requirements. The "Type A" pattern, once the predominant lunch pattern, became the sole allowable lunch pattern as the program grew and developed.

The kinds and amounts of foods specified in the Type A lunch pattern are minimum amounts of foods to serve 10 to 12 year old children. This pattern provides a flexible framework to allow managers to choose from a wide variety of foods in planning and serving nutritious and well-balanced lunches. The lunch pattern is designed to allow flexibility to provide children with a wide variety of foods. Also, the pattern is a tool for teaching children about food and nutrition which assists in formulating good eating habits. The flexibility of the pattern also allows managers to plan menus which reflect the regional, cultural, ethnic, and special dietary needs and food practices of the children they serve.

The Type A pattern has been revised from time to time to reflect new knowledge about the nutritional needs, food consumption habits and food preferences of children. The current regulations encourage School Food Authorities, if consistent with State policy, to serve younger children lesser amounts and older children larger amounts of some foods than are prescribed by the Type A lunch. This provision allows School Food Authorities flexibility in providing lunches consistent with the nutritional needs of children. In spite of guidance and regulatory recommendations which encourage portion size variations to accommodate the food needs of children of various ages, many program administrators at the State and local levels have not implemented these recommendations. This appears to have been a factor contributing to some plate waste in the younger age groups. At the same time, older students often have complained that school lunches do not provide enough food for their increased appetites. In an effort to allow smaller portion sizes for young students and to more accurately meet the nutritional needs of children of all ages, while at the same time maintaining the original flexibility of the Type A pattern, the proposed lunch patterns define minimum portion sizes for children of varying age groups. The proposed lunch patterns are set forth in the Table, in § 210.19b.

The Nutritional Goals

The nutritional goals of the proposed lunch patterns are based on Recommended Dietary Allowances (RDA) for children of different ages.

In developing the proposed lunch patterns, consideration was given to amounts of food energy (kilocalories) and all nutrients for which Recommended Dietary Allowances have been established and adequate reliable food composition data are available. The specific nutrients include protein, calcium, iron, vitamin A, thiamin, riboflavin, niacin, magnesium, vitamin B_6, vitamin B_{12}, and ascorbic acid. Since the proposed lunch patterns allow for a variety of foods that will meet goals for these nutrients, it is assumed that the patterns

will also provide sufficient amounts of the many other nutrients for which no Recommended Dietary Allowances are established or inadequate food composition data are available.

The nutritional goal—one-third of the Recommended Dietary Allowances for the various nutrients (excluding food energy)—is believed to be justified. Many children rely on the lunch for approximately one-third of their nutrient intake.

Approximately 22 percent of the Recommended Dietary Allowances for energy will be provided when lunches meet minimum requirements of the proposed patterns. Lunches which furnish less food energy (kilocalories) than one-third of the Recommended Dietary Allowances appear to be appropriate for this program. Many children may not need a comparably high level of food energy at lunch time because foods eaten at other meals and snacks may provide more than two-thirds of their daily energy requirements. Health statistics indicate that obesity resulting from an excessive intake of food is a major nutritional problem in this country, even among children. Lunches providing high levels of food energy may contribute to overeating or food waste and may be neither practical nor nutritionally sound for most children. The Department is interested in comments on this issue.

In the 1974 edition of the Recommended Dietary Allowances, the consumption of fat and refined sugars is identified as a dietary issue, but an optimal level for these nutrients in diets for the general population is not specified. The level of fat in the proposed patterns is lower than that found in diets of many individuals and of that indicated by studies of school lunch composition, conducted by USDA and other researchers. The approximate percentage of food energy provided by fat in the proposed new lunch patterns ranges for various age groups between 34 and 37 percent when whole milk is served; 30 and 33 percent when lowfat milk is served; and 24 and 29 percent when skim milk is served. Schools will be expected to provide lunches whose fat content falls within these ranges. If the student selects whole milk as a part of lunches meeting minimum requirements of the proposed patterns, the approximate amount of food energy that would be derived from fat would be 34 to 37 percent. To make lunches available which contain a lower level of fat, while maintaining a degree of individual choice, proposed regulations specify that unflavored fluid lowfat milk, skim milk, or buttermilk must be available to students. Such milks may be offered as a choice item along with other types of fluid milk or as a single item to meet the milk component of the lunch requirements. In regard to refined sugars, the Department encourages the service of foods with relatively low sugar content (such as fresh fruits or fruits canned in natural juices or light syrup) to meet lunch requirements. Recommendations are also made to keep at a minimum quantities of sugar needed to prepare acceptable menu items such as desserts, which are not a required part of the lunch.

Recommendations for menu planning which will be identified in guidance materials include: (1) Include several foods for iron each day; (2) include a vitamin A vegetable or fruit at least twice a week; (3) use no more than three eggs per five school lunches per week per child as a meat/meat alternate or in food preparation; (4) include a vitamin C vegetable or fruit several times a week; and (5) keep fat, sugar and salt at a moderate level.

Specified Age Group Patterns

The 1974 Recommended Dietary Allowances specify nine age-sex groups of children and young adults from one to twenty-two years of age. To provide realistic age groups of preschool and school-aged children, and to reduce the number of groups for practical and administrative purposes, some age-sex groups have been combined. This reduces the number of groups while providing realistic differences in required quantities of some lunch components. The proposed lunch patterns provide approximately one-third of the Recommended Dietary Allowances for five age groups. These groups are: Group I—ages 1 and 2; Group II—ages 3, 4, and 5; Group III—ages 6, 7, and 8; Group IV—ages 9, 10, and 11; Group V—ages 12 and up.

The nutrient goal for lunch for children 1 and 2 years of age is one-third of the amounts specified for the 1 through 3 year old child in the 1974 Recommended Dietary Allowances. For the other four age groups, the nutrient goals have been derived from the sex-age groupings as specified in the 1974 Recommended Dietary Allowances. Allowances for 3, 4, and 5 year old children were interpolated using the Recommended Dietary Allowances for children 1 through 3 years of age and 4 through 6 years of age. For 6, 7, and 8 year old children, the allowances at the midpoint of the category were interpolated using the Recommended Dietary Allowances for the children 4 through 6 years and 7 through 10 years of age. For the 9, 10, and 11 year olds, the allowances at the midpoint of the category were interpolated using the Recommended Dietary Allowances for children of ages 7 through 10 years and the average Recommended Dietary Allowances for males and females 11 through 14 years of age. For children 12 years and older, allowances at the midpoint are interpolated between average Recommended Dietary Allowances for males and females 11 through 14 years of age and the average Recommended Dietary Allowances for males and females 15 through 18 years of age.

Group I serves preschool children (ages 1 and 2); Group II—kindergarten (ages 3, 4, and 5); Group III—school grades 1 through 3 (ages 6, 7, and 8); Group IV—school grades 4 through 6 (ages 9, 10, and 11); and Group V—school grades 7 through 12 (ages 12 and above).

These age-grade designations reflect the predominant configurations in the United States, provided in U.S Bureau of the Census, "Current Population Reports," Series P20, No. 303, "School Enrollment—Social and Economic Characteristics of Students, October 1975," U.S. Government Printing Office, Washington, D.C. 20402. In recognition that age-grade designations vary by locality, the proposed regulations permit State officials and local school administrators and managers reasonable flexibility in adapting the age level groups to appropriate grade levels.

Those schools with the capability to serve children solely on the basis of ages of children are encouraged to do so Since the lunch patterns are developed on the basis of the nutritional needs of each age grouping, this is a desirable goal and is the most sound approach nutritionally.

However, it is likely that some groups of children cannot be classified exactly into one of the five designated age-grade groups: that is, the ages of children may not necessarily correspond to the grades, as specified in these proposed regulations. In determining which lunch patterns are most appropriate to use, the School Food Authority must review the ages of the children being served on a school-by-school basis and base a determination of the meal patterns to be used on that data. This provision is set forth for ease of administration For instance a junior high school serving grades 7 through 9, with a predominance of children aged 12, 13, and 14, may also have a few 11 year olds enrolled. Because the predominant ages are 12 and above, it would be appropriate as a matter of practicality to serve a Group V lunch pattern to all children in the school In a second example, if age 12 is the highest age in a given elementary school, but only a few 12 year old children are enrolled, the School Food Authority may wish to serve the Group IV lunch pattern to all grades in which the 9, 10, and 11 year old children are predominantly enrolled. Even though some older children may also be enrolled in the school, the predominant ages of the children served would determine which patterns are most appropriate. However, if a substantial number of 12 year old children were enrolled in this school, the School Food Authority is obligated to provide a Group V lunch pattern to such children. The Department intends to provide more specific guidance in this area in subsequent regulations or instructions, and is particularly interested in comments on this matter.

Administration of Groups I and II Lunch Patterns

The proposed patterns for Groups I and II (preschool and kindergarten children, approximate ages 1 through 5) are designed to provide approximately one-third of their Recommended Dietary Allowances—the traditionally established nutritional goal for the school lunch for children of all ages. However, knowledge of food consumption habits

V 42 175
SEP 9 77
UMI

of young children indicates that serving such children more frequently than three times a day through the service of small meals and between meal supplemental foods is desirable Inasmuch as the quantity of foods specified to be served to such children to approximate one-third of their Recommended Dietary Allowances may be excessive for one serving, regulations are being proposed which require school officials to serve the required foods to children in Groups I and II in two separate food services daily The foods from each service, in combination, will meet the quantities and components as specified in the Table for children in Groups I and II, as applicable. To allow optimum flexibility at the local level, no specific requirements are placed upon the division of the required food components and quantities into two food services, as long as, in combination, the foods served meet the total daily lunch pattern for children in Groups I and II. The two daily food services are designed to be consistent with recommended dietary practices for children of this age group.

Administration of Group V Lunch Pattern Requirements

The proposed pattern for Group V (ages 12 and older) increases the quantities of some of the food items required under the existing lunch pattern requirements. This proposed pattern is designed to meet the higher nutritional needs of older children. However, in view of the need to accommodate differing food preferen es of individuals and minimize unnecessary waste of foods, schools serving the Group V lunch pattern shall allow individual children served this pattern to request smaller portion sizes of the required lunch components.

Second Helpings

The Department observes that, as stated above, the new lunch patterns provide less than one-third of the Recommended Dietary Allowances for food energy (kilocalories) and entail some reduction in portion sizes among certain age groups. The Department is concerned that there may be a need for schools to make second helpings available. While no provision for second helpings appears in the proposed regulations, the Department is interested in comments on whether provisions for second helpings should be added to the regulations, and on possible reimbursement mechanisms to deal with this issue.

Student Involvement and Education

Student education and student and community involvement in the programs have been found, in many instances, to be keys that have successfully led to better student acceptability of foods, higher overall participation levels, and increased nutrition awareness, all of which can have a positive impact upon student health and well-being.

Therefore, the proposed regulations encourage School Food Authorities to utilize the school food service program to teach students about good nutrition practices. School Food Authorities are also required to involve students in the program through activities su h as menu planning, enhancement of the food service environment, program promotion and related student-community support activities, and also encourage the involvement of parents teachers and community in these activities

Further the proposed regulations also address-situations where a substantial number of students over a period of time routinely (1) do not accept a particular menu item (2) have a high degree of plate waste (3) request lesser food quantities than are specified as minimums in the Table under the proposed provisions for Group V students; or 4) choose less than all five food items in the case of senior high school students under the provisions of existing regulations and where schools are experiencing declining or low program participation The proposed regulations require State agencies in cooperation with local School Food Authorities experiencing these problems, to develop, implement and monitor an action plan to upgrade the quality of food service to encourage the acceptance and consumption of the complete lunch School Food Authorities are required by the proposed regulations to involve students in this process.

Monitoring Of Lunch Pattern Requirements

Lunches shall continue to be planned to meet daily the appropriate food components and quantities specified in the Table However for ease and practicality of administration and to promote flexibility, these proposed regulations restructure the monitoring of the lunch pattern requirements from a daily to a weekly basis This arrangement is consistent with current philosophy with regard to Federal-State relationships in the operation of cooperative programs. Specifically planned menus will be evaluated over a week's time to determine if total quantities of food for each meal as specified in the Table found in § 210 19b for children of various age groups are being provided. All required food components must be served each day However it is conceivable that a quantity shortage may occur occasionally and in such an instance, the manager should make every attempt to identify such a shortage and compensate for it by providing extra foods from that component later in the week. Such compensations will assist in assuring that foods are served over a week's time which, in total, meet the prescribed appropriate lunch patterns.

Monitoring of regulatory compliance, including lunch requirements, will continue under the supervisory assistance efforts of State administering agencies described in § 2:0 14 of the regulations. However as part of the supervisory assistance effort, the traditional approach to performing a nutritional review and meal analysis must be restructured under the proposed regulations. These proposed regulations encourage State agencies to review lunch menu plans on a weekly basis to determine if lunch requirements are met over a week's time. State agencies are also encouraged to continue to review each day's menus as part of their supervisory assistance effort and make recommendations which would help the school or School Food Authority serve nutritious, well-planned acceptable lunches every school day. In the event that a School Food Authority fails to meet the lunch requirements over a week's time, the State agency must develop, implement and monitor a plan of action, in cooperation with the local authority, to correct the failure. Repeated failure to meet the requirements established for lunches means that children are not served lunches which meet their nutritional needs. It is required that penalties be imposed where such repeated failures occur.

Nutrient Standard

In an effort to allow maximum flexibility to menu planners and to increase the variety of menu planning approaches, the Department is continuing to explore alternatives to menu planning in addition to the traditional menu planning approach being used currently and in these proposed regulations. One such approach under consideration for possible future development into proposed regulations is the nutrient standard approach to menu planning.

The nutrient standard approach involves planning menus to meet a predetermined nutrient level instead of a meal pattern, such as the Type A pattern, which specifies food components and quantities to approximate this nutrient goal.

While the Department is not prepared to address the nutrient standard approach in these proposed regulations, the Department will give consideration to all public comments on this approach to menu planning. These comments will be helpful to the Department in determining if such an approach is feasible.

Field Testing

After a basic 45-day comment period on the proposed regulations, interim regulations incorporating public comments will be developed. Interim regulations will authorize State agencies and School Food Authorities to voluntarily participate in an effort to field test the provisions of the interim regulations from January 1, 1978, through April 30, 1978. School Food Authorities authorized to participate in the field test are required, during the field test, to comply with all of the provisions of the proposed regulations as well as with other provisions not inconsistent with interim regulations. After April 30, 1978, and up until September, 1978, School Food Authorities which were approved to participate in the field test will be authorized by FNS, at the discretion of the State agency, to (1) continue to operate in accordance with the provisions of the interim regulations; (2) revert back to use of existing (Type A) pattern; or (3) adopt the changes appearing in the final regulations. School Food Authorities which do not wish to participate in the field test will continue to operate under

the now current regulations. During the field testing phase, public comments will continue to be accepted from all sectors.

State agencies are encouraged to begin plans for coordinating a field testing effort by School Food Authorities under their administration. The Department will provide further detailed guidance on the structure and content of the field tests. The guidance will identify areas of concern upon which the Department would find comments from field testing schools of special assistance in formulating final regulations. Such areas would include the impact of the proposed lunch patterns upon direct costs, food acceptability, plate waste levels, student opinions and administrative costs at the State level. Participating State agencies will be expected to seek a representative sampling of schools, both public and private, representing a wide diversity of situations and age-grade ranges for participation in field testing. Due to the nature of the proposed changes, it is essential that schools of all age and grade levels be adequately represented in the field test. Of particular interest to the Department is an assessment of the effect these minimum standards have on lunches produced for and consumed by children. The preamble to the forthcoming interim regulations will also provide additional information on the conduct of field tests. State agencies are encouraged to consider the use of the special developmental project authority under § 210 7 to assist in the conduct of the field testing efforts.

Time Frames

Inasmuch as the timing of this proposed change is vital to its successful implementation, the implementation time frames in these proposed regulations are also subject to public comment. The time frames have been devised to allow an initial 45-day comment period on proposed regulations. All public comments on proposed regulations must be presented to the Department by October 25, 1977. The comment period on proposed regulations will lead into an interim field testing phase (explained above) during which time public comments will continue to be invited. The field testing phase will last four months, from January 1978 through April 1978. All final comments on the interim regulations must be presented to the Department by May 15, 1978, to be assured of consideration. The regulations are scheduled to be made final in June 1978, with voluntary implementation up until September 1978, at which time they will be mandatory in all participating schools. During the initial comment and interim testing periods, the Department plans to conduct hearings to more fully explain the proposed changes and to receive public comments, concerns, and questions directly.

Comment Period

The Department has determined that the traditional 30-day proposed rulemaking and public participation procedures are inadequate for handling the many changes it wishes to make in the lunch patterns and associated procedures And, because the Department wishes to coordinate these regulations with the school year, it has determined it necessary and in the best interest of the program to provide for a 45-day initial comment period on proposed regulations leading into a four-month optional field testing period, beginning in January 1978 The Department expects that the extended public comment and field testing periods will allow the public to provide invaluable comments, suggestions and input and will assist the Department in developing final regulations which are more nutritionally sound and responsive to local needs and concerns In this regard, School Food Authorities participating in the field testing will be expected to measure student response, to encourage students to comment, and to incorporate these comments into their general comment report or to ask the students to write directly to this Department.

Comments, suggestions, or objections on these proposed regulations are invited from all sectors, including children as well as parents In order to be assured of consideration, such comments, suggestions, or objections should be delivered to William G. Boling, Manager, Child Nutrition Programs, Food and Nutrition Service, U.S Department of Agriculture, Washington, D.C 20250, no later than October 25, 1977, or submitted by mail postmarked no later than that date Communications should identify the regulation section and paragraph on which comments, etc., are offered All written submissions received pursuant to this notice will be made available for public inspection at the Office of the Manager, Child Nutrition Programs, during regular business hours (8.30 a.m. to 5 p.m.) (7 CFR 1.27(b)).

Due to the fact that implementation of the new lunch pattern requirements will be a voluntary alternative after adoption of the final regulations until September 1978, the regulations are proposed to be amended, by adding a separate section as follows

A new § 210 19b would be added to read as follows

§ 210.19b Field testing and interim lunch patterns.

(a) State agencies, or FNSROs where applicable, may field test interim provisions for new lunch patterns set forth in this section, at their option, in selected schools, in order to make comments and suggestions on such lunch patterns which will assist the Department in developing final regulations The field testing period will extend from January 1978 through April 1978. Public comments received by May 15, 1978 will be considered Schools which participate in the field test may continue to implement the interim regulations until they are issued in final form

(b) School Food Authorities which participate in the field testing phase shall comply with all of the provisions of this section as well as with other provisions not inconsistent with this section. School Food Authorities which do not participate in the field testing phase will not be affected by the provisions of this section, and shall continue to comply with all other provisions of this part.

(c) Additional definitions applicable to this sub-section are as follows:

(1) "Group I lunch pattern" means kinds and amounts of foods to serve preschool children, ages 1 and 2.

(2) "Group II lunch pattern" means kinds and amounts of foods to serve kindergarten children, ages 3, 4, and 5

(3) "Group III lunch pattern" means kinds and amounts of foods to serve children in school grades 1 through 3 ages 6, 7, and 8.

(4) "Group IV lunch pattern" means kinds and amounts of foods to serve children in school grades 4 through 6, ages 9, 10, and 11.

(5) "Group V lunch pattern" means kinds and amounts of foods to serve children in school grades 7 through 12, ages 12 and above.

(d) To provide a nutritious and well-balanced lunch to each child daily, minimum serving sizes of food are specified to serve children of five specific age-grade groupings. Except as otherwise provided in this section, to be eligible for Federal cash reimbursement, lunches shall be planned to contain, as a daily minimum, the foods described in the following Table in the quantities specified for each of the five age-grade groupings, as applicable.

V 42 175 SEP 9 77 UMI

TABLE – School Lunch Pattern Requirements – Amounts of Foods Listed By Food Components to Serve Children of Various Ages

Food Components	Preschool Children Group I (1 and 2 years)	Group II (3,4 and 5 years)	Elementary School Children Group III (6,7 and 8 years)	Group IV (9, 10 and 11 years)	Secondary School Boys and Girls Group V (12 years and over)
MEAT AND MEAT ALTERNATES 1/					
Meat--a serving (edible portion as served) of cooked lean meat, poultry, or fish, OR Meat Alternates:	1 ounce equivalent 2/	1 1/2 ounces equivalent	1 1/2 ounces equivalent	2 ounces equivalent	3 ounces equivalent
Cheese	1 ounce equivalent 2/	1 1/2 ounces equivalent	1 1/2 ounces equivalent	2 ounces equivalent	3 ounces equivalent
The following meat alternates 3/may be used to meet only 1/2 of the meat/meat alternate requirement:					
Eggs (1 large egg may replace 1 ounce cooked lean meat.)	1 egg 4/	3/4 egg	3/4 egg	1 egg	1 1/2 eggs
Cooked Dry Beans or Peas (1/2 cup may replace 1 ounce cooked lean meat.) 5/	1/4 cup	3/8 cup	3/8 cup	1/2 cup	3/4 cup
Peanut Butter (2 tablespoons may replace 1 ounce cooked lean meat.)	1 tablespoon	1 1/2 tablespoons	1 1/2 tablespoons	2 tablespoons	3 tablespoons
VEGETABLES AND FRUITS 5/ Two or more servings consisting of vegetables or fruits or both. A serving of full strength vegetable or fruit juice can be counted to meet not more than 1/2 of the total requirement.	1/2 cup	1/2 cup	1/2 cup	3/4 cup	3/4 cup
BREAD AND BREAD ALTERNATES 6/ A serving (1 slice) of enriched or whole-grain bread; OR a serving of biscuits, rolls, muffins, etc., made with whole-grain or enriched meal or flour; 7/ OR a serving (1/2 cup) of cooked enriched or whole-grain rice, macaroni, or noodle products 8/	5 slices or alternates/week	8 slices or alternates/week	8 slices or alternates/week	8 slices or alternates/week	10 slices or alternates/week
MILK, FLUID An option to fluid whole milk or flavored milk must be offered. 9/	1/2 cup	3/4 cup	3/4 cup	1/2 pint	1/2 pint

NOTES:

1/ Meat and Meat Alternates must be served in a main dish, or in a main dish and one other menu item.

2/ Equivalents will be determined and published in guidance materials by FNS/USDA.

3/ Eggs, cooked dry beans or peas, and peanut butter may be combined with one-half of the quantity requirements for meat, poultry, fish or cheese to meet the total Meat/Meat Alternate requirement, or they may be used in equal quantities in combination with one another to meet the total Meat/Meat Alternate requirement. For example, for Group IV children, 2 tablespoons of peanut butter may be supplemented with 1 hard cooked egg to meet the total Meat/Meat Alternate component.

4/ For Group I children an egg may be served to meet the total Meat/Meat Alternate requirement.

5/ Cooked dry beans or dry peas may be used as part of the Meat Alternate or as part of the Vegetable/Fruit component, but not as both food components in the same meal.

6/ One-half or more slices of bread or an equivalent amount of bread alternate must be served with each lunch with the total requirement being served during a five day period. Schools serving lunch 6 or 7 days per week should increase this specified quantity for the five day period by approximately 20% (1/5) for each additional day.

7/ Bread Alternates and serving sizes will be published in guidance materials by FNS/USDA.

8/ Enriched macaroni products with fortified protein as defined in Appendix A, March 1974, may be used as part of a Meat Alternate or as a Bread Alternate, but not as both food components in the same meal.

9/ Unflavored fluid lowfat milk, skim milk, or buttermilk must be available to students, in addition to whole milk, or any flavored milk.

UMI

(e) Inasmuch as the age-grade designations for the five groups shown in the Table may not correspond exactly with the ages and grades of children in every local situation, the School Food Authority may exercise a reasonable degree of flexibility in adapting the age level groups to appropriate local grade levels. While the quantities of food in the lunch patterns are developed on the basis of the nutritional needs of children of various ages, for ease of program administration, grade levels have been provided along with the age level designations. School Food Authorities which have the capability to serve quantities of foods to children solely on the basis of their ages are encouraged to do so. For schools where this is not feasible, the School Food Authority shall adapt the age-grade groups provided in the Table to those which most closely approximate the ages served in each school under its jurisdiction. In no case shall the School Food Authority plan to serve a substantial number of children foods from a specified pattern that is designated to serve a younger age-grade grouping.

(f) Inasmuch as the quantities of foods specified in the Table for children in Groups I and II may be excessive at one sitting, School Food Authorities shall serve the foods required by Groups I and II lunch patterns, as appropriate, in two distinctive service periods. The foods served in the two sittings, in combination, must meet the minimum components and quantities specified in the Table for children in Groups I and II, as applicable.

(g) Inasmuch as the larger quantities of food specified for children in Group V may not be consistent with preferences of individual children, School Food Authorities shall permit children served the Group V lunch pattern to request smaller portion sizes of the lunch components than are specified in the Table. The acceptance of such smaller portion sizes shall not affect reimbursement earned under §210.11 nor shall the price of the lunch be reduced when reduced portion sizes are requested.

(h) To provide variety and to encourage consumption and participation, the School Food Authority should, whenever possible, provide a selection of foods and types of milk from which children may choose the lunch When more than one lunch is offered, or when a variety of foods and types of milk is offered for choice within the required lunch pattern, all children shall be offered the same selections regardless of whether they are eligible for free or reduced price lunches or pay the full price.

(i) The kinds and amounts of food specified in the Table shall serve as minimums to be used in planning menus for the applicable age-grade group of children being served daily To allow flexibility at the local level, monitoring of compliance with these lunch requirements shall be made over a week's time to assure that the components and the total appropriate component quantity requirements specified are provided by the menus.

(j) Senior high school students shall be offered complete lunches. Such students must choose at least three of the five food items contained within the four food components of the lunch. The choice of fewer that all five food items shall not relieve nonneedy students from paying the full price of the lunch or those determined eligible for reduced price lunches under Part 245 of this chapter from paying the reduced price charge.

(k) Substitutions may be made in foods listed in the Table, if individual participating children are unable, because of medical or other special dietary needs, to consume such foods. Such substitutions shall be made only when supported by a statement from a recognized medical authority which includes recommended alternate foods.

(l) The inability of a school to obtain a supply of milk on a continuing basis shall not bar it from participation in the Program. In such cases, the State agency, or FNSRO where applicable, may approve the service of lunches without milk, provided that an equivalent amount of canned, whole dry or non-fat dry milk is used in the preparation of the components of the lunch.

(m) If emergency conditions temporarily prevent a School Food Authority which normally has a supply of milk from obtaining delivery thereof, the State agency, or FNSRO where applicable, may approve the service of lunches without milk during the emergency period.

(n) In American Samoa, Puerto Rico, and the Virgin Islands, the following variation from the lunch requirements is authorized A serving of a starchy vegetable, such as yams, plantains, or sweet potatoes, may be substituted for one serving under the bread, bread alternate requirement.

(o) Monitoring for compliance with the lunch requirements set forth in the Table may be made over a week's time. State agencies, or FNSROs where applicable, at their discretion, may monitor compliance on a more frequent, or daily basis. If the State agency, or FNSRO where applicable, finds that a School Food Authority is failing to meet the lunch requirements as set forth in the Table over a week's time, the State agency or FNSRO shall develop, implement and monitor a plan which provides that positive corrective actions will be taken to overcome any such failure. Repeated failure by a School Food Authority to meet lunch reouirements as set forth in the Table shall subject the School Food Authority to disallowance of all or part of Federal reimbursement.

(p) In the event that the State agency, or FNSRO where applicable, finds that a School Food Authority has poor management practices leading to decreasing student participation or poor student acceptability of the program or of foods served as indicated by a substantial number of students who routinely over a period of time (1) request lesser food quantities than the minimum specified serving quantities (Group V children); (2) do not favorably accept a particular menu item; (3) return foods uneaten; or (4) choose less than all five food items (in the case of senior high school students under the provisions of paragraph (h) of this section), the State agency, or FNSRO where applicable, in cooperation with the School Food Authority, shall develop, implement and monitor a plan of corrective action to correct these management deficiencies. Such a plan shall promote the involvement of students in activities which would lead to the correction of such deficiencies. Such activities may include, but are not limited to, menu planning, the enhancement of the eating environment, program promotion and related student-community program support activities.

(q) School Food Authorities must involve students in the program through activities such as menu planning, enhancement of the eating environment, program promotion and related student-community support activities. School Food Authorities are encouraged to utilize the school food service program to teach students about good nutrition practices and to involve parents, teachers, faculty, and community in activities designed to enhance the program.

[7 CFR Part 910]

HANDLING OF LEMONS GROWN IN CALIFORNIA AND ARIZONA

Proposed Expenses and Rate of Assessment for the 1977–78 Fiscal Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION Proposed rule.

SUMMARY: This notice invites written comment on proposed expenses of $396,000 and a rate of assessment of 3.3 cents per carton of lemons for the functioning of the Lemon Administrative Committee for the 1977–78 fiscal year This committee locally administers a Federal marketing order regulating the handling of lemons grown in California and Arizona. The regulation would enable the committee to collect assessments from handlers on all assessable lemons handled and use the resulting funds for its expenses.

DATES Comments must be received on or before September 24, 1977 Proposed effective dates: August 1, 1977, through July 31, 1978.

ADDRESSES: Send two copies of comments to the Hearing Clerk, United States Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250. Comments will be made available for public inspection at the office of the Hearing Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, telephone 202–447–3545.

SUPPLEMENTARY INFORMATION: The proposals under consideration were submitted by the Lemon Administrative Committee, established under the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), as the agency to administer the terms and provisions.

The proposals are as follows:

§ 910.215 Expenses and rate of assessment.

(a) *Expenses.* Expenses that are reasonable and likely to be incurred by the Lemon Administrative Committee during the fiscal year August 1, 1977, through July 31, 1978, will amount to $396,000.

(b) *Rate of assessment.* The rate of assessment for said period, payable by each handler in accordance with § 910.41, is fixed at 3.3 cents per carton of lemons.

Dated: September 6, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[Docket No. AO-319-A28]

MILK IN THE INDIANA MARKETING AREA

Notice of Recommended Decision and Opportunity To File Written Exceptions on Proposed Amendments to Tentative Marketing Agreement and to Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This decision recommends changes in the present order provisions based on industry proposals considered at a public hearing held July 26, 1977. The recommended changes would add four Michigan counties to the marketing area and make a limited change in the classification of milk. The changes are needed to reflect changed marketing conditions and to insure orderly marketing in the area.

DATES: Comments are due on or before September 26, 1977.

ADDRESS: Comments (4 copies) should be filed with the Hearing Clerk, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT:

Irving E. Sutin, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250. (202–447–4829).

SUPPLEMENTARY INFORMATION: Prior document in this proceeding: Notice of hearing, issued June 22, 1977; published June 29, 1977 (42 FR 33040).

PRELIMINARY STATEMENT

Notice is hereby given of the filing with the Hearing Clerk of this recommended decision with respect to proposed amendments to the tentative marketing agreement and order regulating the handling of milk in the Indiana marketing area, and of the opportunity to file exceptions thereto. This notice is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

Interested parties may file written exceptions to this decision with the Hearing Clerk, United States Department of Agriculture, Washington, D.C., 20250, by September 26, 1977. The exceptions should be filed in quadruplicate. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The hearing on the record of which the proposed amendments, as hereinafter set forth, to the tentative marketing agreement and to the order as amended, were formulated, was conducted at Indianapolis, Indiana, on July 26, 1977, pursuant to notice thereof which was issued June 22, 1977 (42 FR 33040).

The material issues on the record of the hearing relate to:

1. Expansion of the marketing area; and

2. Classifying the shrinkage of nonfat milk solids used in modifying fluid milk products.

FINDINGS AND CONCLUSIONS

The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. *Expansion of the marketing area.* The Indiana marketing area, now comprised of 64 Indiana counties, should be expanded to include the four Michigan counties of Berrien, Branch, Cass, and St. Joseph. About three-quarters of the route disposition in each of the four counties is from eight Indiana order pool plants. The remaining route disposition in the four counties is from five Southern Michigan order pool plants and from a plant regulated under the Chicago order.

The handling of milk in the enlarged marketing area is in the current of interstate commerce and directly burdens, obstructs or affects interstate commerce in milk and its products.

The four-county area, which is in southwestern Michigan, borders on the northern boundary of the present Indiana marketing area. Two of the four counties, St. Joseph and Branch, are bounded on the north by Kalamazoo and Calhoun Counties, respectively, which counties are in the southwestern corner of the Southern Michigan order marketing area. The 1970 census population of the four counties is 292,000. For each county the population is: Berrien, 164,000; Branch, 38,000; Cass, 43,000; and St. Joseph, 47,000.

Expansion of the marketing area, which was proposed by McDonald Dairy Cooperative Association, was favored by the major cooperatives in the Indiana market. There was no opposition to the proposal.

McDonald operates a pool distributing plant in Benton Harbor in Berrien County, Mich. The route disposition from that plant in the four Michigan counties proposed to be added to the marketing area is greater than from any other plant. In May 1977 about 27 percent of the Benton Harbor plant's route disposition was in the Indiana marketing area and about 23 percent in the Southern Michigan marketing area. The remaining route disposition from the plant was in a presently unregulated five-county area—four proposed counties and Van Buren County, Mich., which attaches to the northern boundary of Berrien and Cass counties.

Although the Benton Harbor plant has been qualifying each month for pooling under both the Indiana and Southern Michigan orders, it has been pooled continuously under the Indiana order. This is because its route disposition each month in the Indiana marketing area has been greater than in the Southern Michigan marketing area. However, in some recent months the total route disposition in the Southern Michigan marketing area has been close to that in the Indiana marketing area.

For May 1977 it appeared that the Benton Harbor plant's route disposition in the Southern Michigan marketing area was greater than in the Indiana marketing area. Only after an audit was made by the market administrator was it determined that the route disposition from the plant was greater in the Indiana marketing area than in the Southern Michigan area.

The McDonald spokesman stated that unless the four counties are included in the marketing area, and the Benton Harbor plant's distribution therein becomes route disposition in the marketing area, regulation of the plant could shift back and forth between the Indiana and Southern Michigan orders. This is because in some months the plant's route disposition in the present Indiana marketing area could be less than in the Southern Michigan marketing area, which would result in the Benton Harbor plant being regulated for the month under the Southern Michigan order.

V 42 175 SEP 9 77 UMI

Including the four proposed counties in the Indiana marketing area will result in the Benton Harbor plant having substantially more sales each month in the foreseeable future in the Indiana marketing area than in the Southern Michigan marketing area. This would remove any uncertainty regarding the order under which the plant would be regulated.

The Indiana order provides for a "takeout-payback" fall production incentive plan that withholds 20 cents per hundredweight from the payments otherwise due producers for their deliveries in April–July. This money is distributed to producers on the basis of their production in the payback months of September–December. Under the Southern Michigan order, producers are paid on a base-excess plan throughout the year. The base on which each producer is paid is determined by his deliveries in the preceding August–December. If regulation of a plant shifted back and forth between orders, the producers involved could lose the benefits of the producer payment plan in the order under which their milk was usually pooled without obtaining the comparable benefits realized by producers regularly associated with the other order. Without the inclusion of the proposed four counties in the Indiana marketing area, producers supplying the Benton Harbor plant could find themselves in such a situation.

Including in the Indiana marketing area the proposed four counties, wherein Indiana order handlers are the principal distributors, will contribute to market stability. Particularly, it would serve as a safeguard against disruptive marketing conditions and the inequities among producers that would result if regulation of the plant they supplied shifted back and forth between the Indiana and Southern Michigan orders.

The provisions of the existing order as herein proposed to be amended are equally appropriate for the expanded marketing area.

2. *Classifying the shrinkage of nonfat milk solids used in modifying fluid milk products.* When fluid milk products are modified by adding nonfat milk solids (i.e., nonfat dry milk, condensed skim milk, or similar products), shrinkage in Class III up to two percent of the fluid equivalent of the quantity of nonfat milk solids added should be allowed.

Fluid products modified by the addition of nonfat milk solids, commonly called fortified products, represent a significant Class I disposition of handlers. Such a modified product must be accounted for under the order as Class I in a quantity equal to the weight of an equal volume of the same unmodified product. The small increase in volume due to the addition of the nonfat milk solids is accounted for when the modified product is disposed of as Class I. The remainder of the fluid equivalent of nonfat milk solids added but not represented by a volume increase in the modified product is classified as Class III.

The market administrator's laboratory tests the modified milk products of a handler to determine their total nonfat milk solids content. From that total he subtracts the nonfat milk solids content of milk utilized by the handler in making the modified milk products to determine the quantity of solids added.

The quantity of nonfat milk solids determined by the market administrator to have been added to the modified product is the basis for computing the fluid equivalent of the nonfat milk solids to be accounted for and classified.

The handler who proposed the change adopted in this decision complained that the order makes no allowance for the loss of nonfat dry milk solids used in fortification. He testified that, in addition to the loss incurred in processing fluid milk products, losses result from spillage and from nonfat dry milk sticking to the bags in which it is received at the plant.

Some disappearance of nonfat milk solids may be due to a lack of detailed records for each batch of fluid milk products fortified with added nonfat milk solids. For example, when more of a fortified fluid milk product is made than is needed for packaging on a particular day, the excess would be diverted for use in another product at the plant. It may not always be practicable for a handler to maintain a complete and accurate record of the nonfat milk products from each batch of a fortified product so diverted.

When the amount of nonfat milk solids in modified fluid milk products is determined by the market administrator's laboratory testing, a reasonable basis exists for computing a shrinkage allowance for nonfat milk solids used in the fortification process. A Class III shrinkage allowance of not more than two percent of the fluid equivalent of the quantity of nonfat milk solids so used, which is adopted in this decision, is appropriate for this purpose. This is the same rate of Class III shrinkage allowance applicable to milk received from producers.

The loss of nonfat milk solids associated with the fortifying process should be treated separately from the shrinkage allowances applied to receipts of fluid milk products. The shrinkage allowance in this case should be a part of the classification procedure of the specific modified fluid milk product disposed of.

The present classification provisions specify how much of the fluid equivalent of the nonfat milk solids in a fortified product may be classified in Class III. The shrinkage allowance provided herein would be a quantity of Class III milk in addition to the quantity now calculated under the present provision.

Any disappearance of nonfat milk solids in excess of the two percent limit would enter into the total plant accounting for receipts and disposition under the present order provisions applicable to shrinkage.

Rulings on Proposed Findings and Conclusions

Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. The briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

General Findings

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held;

(d) All milk and milk products handled by handlers, as defined in the tentative marketing agreement and the order as hereby proposed to be amended, are in the current of interstate commerce or directly burden, obstruct, or affect interstate commerce in milk or its products; and

(e) It is hereby found that the necessary expense of the market administrator for the maintenance and functioning of such agency will require the payment by each handler, as his pro rata share of such expense, 4 cents per hundredweight or such lesser amount as the Secretary may prescribe, with respect to milk specified in § 1049.85 of the aforesaid tentative marketing agreement and the order as proposed to be amended.

Recommended Marketing Agreement and Order Amending the Order

The recommended marketing agreement is not included in this decision because the regulatory provisions thereof would be the same as those contained in the order, as hereby proposed to be amended. The following order amending the order, as amended, regulating the handling of milk in the Indiana marketing area is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out:

1. Section 1049.2 is revised as follows:

§ 1049.2 Indiana marketing area.

"Indiana marketing area" (hereinafter referred to as the "marketing area") means all of the territory within the boundaries of the following counties, including territory wholly or partly within such boundaries occupied by Government (municipal, State, or Federal) reservations, installations, institutions, or other similar establishments:

(a) In Indiana, the counties of:

Adams	La Porte
Allen	Lawrence
Bartholomew	Madison
Blackford	Marion
Boone	Marshall
Brown	Miami
Cass	Monroe
Clay	Montgomery
Clinton	Morgan
Decatur	Noble
De Kalb	Owen
Delaware	Parke
Elkhart	Porter
Fayette	Putnam
Fountain	Randolph
Franklin	Ripley
Fulton	Rush
Grant	St. Joseph
Hamilton	Shelby
Hancock	Starke
Hendricks	Steuben
Henry	Switzerland
Howard	Tippecanoe
Huntington	Tipton
Jackson	Union
Jay	Vermillion
Jefferson	Vigo
Jennings	Wabash
Johnson	Warren
Kosciusko	Wayne
Lagrange	Wells
Lake	Whitley

(b) In Michigan, the counties of:

Berrien	Cass
Branch	St. Joseph

2. In § 1049.40, paragraph (c) (6) is revised as follows:

§ 1049.40 Classes of utilization.

. . . . . .

(c) . . .

(6) In skim milk in any modified fluid milk product that is in excess of the quantity of skim milk in such product that was included within the fluid milk product definition pursuant to § 1049.15, plus the fluid equivalent of loss of nonfat milk solids occurring in the process of modification in any case where determination of the quantity of added nonfat milk solids disposed of in such products is based upon laboratory analysis by the market administrator, such loss allowable pursuant to this subparagraph not to exceed two percent of the fluid equivalent of the quantity of added nonfat milk solids so determined to be added; and

. . . . . .

Signed at Washington, D.C., on: September 6, 1977.

WILLIAM T. MANLEY,
Deputy Administrator,
Program Operations.

Rural Electrification Administration

[7 CFR Part 1701]

SPECIFICATIONS FOR STEP-DOWN DISTRIBUTION SUBSTATION TRANSFORMERS

Proposed Revision of REA Specification S–3

AGENCY: Rural Electrification Administration.

ACTION: Advance notice of proposed rule.

SUMMARY: REA proposes to revise REA Specification S–3, REA Specifications for Step-Down Distribution Substation Transformers, 34.4–138 kV. This revision is intended to bring REA specifications up to date with existing standards publications. Because of the extent of the revision, the entire specification is published below. On issuance of REA Specification S–3, Appendix A to Part 1701 will be modified accordingly.

DATES: Public comments must be received by REA no later than October 11, 1977.

ADDRESS: Interested persons may submit written data, views, comments to the Director, Power Supply and Engineering Standards Division, Rural Electrification Administration, Room 3304, South Building, U.S. Department of Agriculture, Washington, D.C. 20250. All written submissions made pursuant to this notice will be made available for public inspection in the Office of the Director, Power Supply and Engineering Standards Division during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Mr. Rowland C. Hand, Sr., Director, Power Supply and Engineering Standards Division, Rural Electrification Administration, Room 3304, South Building, U.S. Department of Agriculture, Washington, D.C. 20250. Telephone number 202–447–4413.

SUPPLEMENTARY INFORMATION: Notice is hereby given that pursuant to the Rural Electrification Act, as amended (7 U.S.C. 901 et seq.), the text of the proposed revision of REA Specification S–3 is as follows:

REA Specifications for Step-Down Distribution Substation Transform

Date accepted: Spec. No. S–3

I. *Scope.*—These specifications apply to step-down distribution substation type transformers used on rural electric systems. The transformers covered by these specifications shall be 60 hertz, single-phase or three-phase, and of the outdoor, oil-immersed type. The standard ratings are to be at 55/65° C rise.

II. *Rating.*—A. *High voltage:* The nominal high voltage rating, BIL, percent impedance and full capacity tap range shall be one of the following:

Voltage rating, kilovolt	BIL	Percent Impedance	Tap voltage, kilovolt
34.4	200	6.0	36.2/35.3/33.5/32.6
43.8	250	6.5	46.2/45.0/42.6/41.4
67.0	350	7.0	70.6/68.8/65.2/63.4
115.0	550	8.0	120.75/117.875/112.125/109.25
115.0	450	7.5	120.75/117.875/112.125/109.25
138.0	650	8.5	144.9/141.45/134.55/131.1
138.0	550	8.0	144.9/141.45/134.55/131.1

B. *Low voltage:* The nominal low voltage rating and BIL shall be one of the following:

V 42 175 SEP 9 77 UMI

Voltage rating, volts		BIL, kilovolt
Single phase	3 phase	
7200/12470Y	12470Y/7200	110
7620/13200Y	13200Y/7620	110
14400/24940Y	24940Y/14400	150

C. These specifications apply to the kVA ratings in categories I, II, and III as follows:

Single phase, capacity, kilovoltampere

Primary voltage, kilovolt	Category I			Category II			
34.4	167	250	333	500	833	1250	1667
43.8	167	250	333	500	833	1250	1667
67.0	167	250	333	500	833	1250	1667
	Category III						
43.8	2500	3333	5000	6667	8333	10,000	
67.0	2500	3333	5000	6667	8333	10,000	
115.0	2500	3333	5000	6667	8333	10,000	
138.0	2500	3333	5000	6667	8333	10,000	

3 phase[1]

Primary voltage, kilovolt	Category II, capacity, kilovoltampere						
34.4	750	1000	1500	2000	2500	3750	5000
43.8	750	1000	1500	2000	2500	3750	5000
67.0	750	1000	1500	2000	2500	3750	5000
115.0	.....	.....	.....	.....	.....	.....	5000
138.0	.....	.....	.....	.....	.....	.....	5000
	Category III, capacity, 1,000 VA						
34.4	7.5	10	12	15	20	25	30
43.8	7.5	10	12	15	20	25	30
67.0	7.5	10	12	15	20	25	30
115.0	7.5	10	12	15	20	25	30
138.0	7.5	10	12	15	20	25	30

[1] Category I, none.

III. *Applicable standards.*—Transformers shall comply with the following national standards publications, except where they conflict with the specific requirements of these specifications:

American National Standard General Requirements for Distribution, Power and Regulating Transformers. ANSI C57.12.00 (1973).

American National Standard Requirements for Transformers 138,000 volts and Below, 501 through 10,000/13,333/16,667 kVA, Single Phase and 501 through 30,000/40,000/50,000 kVA, Three Phase, ANSI C57.12.10 (1969) (Categories II and III).

American National Standard Requirements for Overhead-Type Distribution Transformers, 67,000 Volts and Below; 500 kVA and Smaller, ANSI C57.12.20 (1974) (Category I).

NEMA Standards Publication on Transformers, Regulators, and Reactors. Publication No. TR–1 (1974).

IEEE Standard on Distribution and Power Transformer Short Circuit Test Code, IEEE Standard 262A (1977).

IV. *Specific requirements.*—Transformers shall be equipped for tank mounting of lightning arresters for both primary and secondary protection.

V. *Load-tap-changing transformers.*—Load-tap-changing transformers shall meet the requirements of this specification and of ANSI C57.12.30 (1971), and the tap changing mechanism shall be such that it can be removed from the transformer and the transformer returned to service with minor modifications.

VI. *Other transformers.*—A. Category IV transformers shall meet the requirements of ANSI C57.12.00 (1973).

B. Transformers with secondary voltages higher than 24,940/14,400 volts shall meet the requirements of ANSI C57.12.00 (1973), and ANSI C57.12.10 (1969).

Dated: August 31, 1977.

RICHARD F. RICHTER,
Assistant Administrator—Electric.

DEPARTMENT OF THE TREASURY

Customs Service

[19 CFR Part 113]

CUSTOMS BONDS

Proposed Change of Policy Relating to Foreign Landing Certificates

AGENCY: United States Customs Service, Department of the Treasury.

ACTION: Notice of proposed change of policy.

SUMMARY: Customs proposes to require that landing certificates be presented to confirm that certain purchases from "duty-free shops" are exported to Mexico. This action is necessary to ensure that the articles purchased are exported to Mexico and not entered into the commerce of the United States without the payment of duties and taxes.

DATES: Comments must be received on or before October 11, 1977.

ADDRESS: Comments should be addressed to the Commissioner of Customs, Attention: Regulations and Legal Publications Division, 1301 Constitution Avenue NW., Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT:

John R. Cookfair, Operations Officer, Inspection and Control Division, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229 (202–566–5354).

SUPPLEMENTARY INFORMATION:

BACKGROUND

A "duty-free shop" is a store in which a variety of merchandise is offered for sale without the payment of Customs duties and taxes. The merchandise is sold on the condition that it will be used outside the United States. Customs duties and taxes will be assessed on the merchandise if it is returned to this country. Duty-free shops were first established at airports in the United States and on the land borders with Mexico and Canada in the early 1960's, with the express purpose of providing duty and tax-free merchandise for the personal use abroad of individuals about to leave the country. These shops continue to service individuals who purchase items for their personal use abroad, following long-established administrative procedures tailored to accommodate this type of sale.

The Customs Service has discovered, however, that duty-free shops on the United States-Mexican border have become major wholesale suppliers, using the procedure designed to effect small, personal use sales to individuals. These simplified procedures were never intended to be used in wholesale transactions. Moreover, a substantial quantity of the merchandise purchased in duty-free shops is entered into Mexico illegally without the payment of Mexican Customs duties, then smuggled back into the United States to be entered into the commerce of this country without payment of United States duties and taxes. The result is a substantial loss of revenue to the United States.

To prevent this loss of revenue to the United States, the Customs Service has determined that it may be necessary to require that landing certificates be presented in certain specified circumstances. A landing certificate is a document signed by a revenue officer of the country to which merchandise is exported, certifying that the merchandise has been received into foreign Customs custody. The landing certificate is a formal acknowledgment by the foreign Customs administration that the exportation to that country has been recognized and accepted, and ensures that any required duties and taxes will be collected and any restriction governing the importation will be met.

Section 622 of the Tariff Act of 1930 (19 U.S.C. 1622) provides that the Secretary of the Treasury may prescribe regulations requiring landing certificates when merchandise is exported from the United States in cases in which he considers it necessary for the protection of the revenue. Therefore, section 113.55(d)(2) of the Customs Regulations (19 CFR 113.55(d)(2)) provides that a landing certificate may be required by the district director of Customs for merchandise exported from the United States when he considers the certificate necessary for the protection of the revenue. This certificate must be presented to the district director within six months from the date of exportation.

Since March 1973, duty-free shops have been specifically exempted from the requirement to present a landing certificate when certain commodities are exported in Customs bond, although other types of bonded warehouses were made subject to the requirement at that time. In view of the problems encountered at the Mexican border, the Customs Service proposes to require a landing certificate whenever a purchase of the commodities listed below from duty-free shops for exportation to Mexico exceeds $250. However, a landing certificate would not be required for the exportation of a single item with a purchase price over $250.

Alcoholic beverages	Porcelain
Chocolates and sweets	Powdered milk
Christmas ornaments	Radios
Clothing	Tape recorder players
Cosmetics	Tape recorders
Costume jewelry	Television sets
Crystal	Suit material
Perfumes	

These commodities were chosen, after consultation with Mexican Customs officials, to represent "high-risk" merchandise with a potential to be smuggled because of their high rates of duty in both the United States and Mexico and, in some cases, because their entry into the United States is subject to quota. The $250 amount is consistent with the regulations of the Bureau of the Census, Department of Commerce, which do not require filing a Shipper's Export Declaration when merchandise valued less than that amount is exported.

Landing certificates would also be required for all exportations of the following commodities in Customs bond, regardless of value, whenever the quantity exported exceeds that determined appropriate for personal use, as indicated:

Cigarettes, 2 cartons.
Watches, 2 each.

The proposed requirement for landing certificates would have the dual result of impeding the illegal entry in Mexico of merchandise purchased in wholesale quantities from duty-free shops, while protecting the revenue of the United States from the loss of Customs duties and taxes which occurs due to the illegal return of that merchandise into the commerce of this country. The Customs Service emphasizes that this proposal is not intended to and will not hinder purchases by individuals from duty-free shops of merchandise for export in personal use quantities. Those sales will continue to be permitted for the convenience of the individual traveler.

PROPOSED CHANGE

Accordingly, it is proposed to require the production of a landing certificate to confirm that purchases of certain commodities from duty-free shops, as set forth above, are exported to Mexico. This change is being proposed under the authority of sections 622 and 624, 46 Stat. 759 (19 U.S.C. 1622, 1624). Notice of this proposed change is being published for public comment pursuant to section 177.10(c)(2) of the Customs Regulations (19 CFR 177.10(c)(2)).

COMMENTS

Before adopting this proposal, consideration will be given to any written comments submitted to the Commissioner of Customs. Comments submitted will be available for public inspection in accordance with section 103.8(b) of the Customs Regulations (19 CFR 103.8(b)) during regular business hours at the Regulations and Legal Publications Division, Headquarters, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229.

DRAFTING INFORMATION

The principal author of this document is Todd Schneider, Attorney, Regulations and Legal Publications Division of the Office of Regulations and Rulings, United States Customs Service. However, personnel from other offices of the United States Customs Service participated in its development, both on matters of substance and style.

ROBERT E. CHASEN,
Commissioner of Customs.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 120]

[FRL 771-5]

WATER QUALITY STANDARDS

Navigable Waters of the State of Nebraska

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule to amend 40 CFR 120.

SUMMARY: The Nebraska Environmental Control Council adopted a State water quality standards regulation on September 10, 1976, that was submitted to EPA on November 2, 1976, which downgraded the uses of 35 waters of the State of Nebraska. That downgrading of water uses for the 35 waters did not meet the requirements of 40 CFR 130.17(c)(3). This proposed rule redesignates beneficial uses for the 35 waters to those in existence prior to the September 10, 1976, downgrading action.

DATES: Comments must be received on or before October 25, 1977.

FOR FURTHER INFORMATION CONTACT:

Dale B. Parke, Head, Water Quality Standards, Water Division, EPA, 1735 Baltimore Street, Kansas City, Mo. 64108. (816–374–6391).

SUPPLEMENTARY INFORMATION: Section 303(c) of the Federal Water Pollution Control Act (the Act), as amended, (33 U.S.C. 1313(c)), and 40 CFR 130.17 provide that whenever a State revises its existing water quality standards or adopts new standards, such standards must be submitted to the Regional Administrator for approval. If the Regional Administrator determines that the revised standards do not meet the requirements of the Act, he must notify the State and specify the changes necessary for compliance. If such changes are not adopted by the State within 90 days after the date of notification, the Administrator shall promulgate water quality standards that meet the requirements of the Act.

Pursuant to 40 CFR 130.17(c)(3), EPA approval of a downgrading of designated beneficial uses must be based upon a demonstration by the State of one of the following: (1) The existing designated use cannot be attained because of natural background conditions; (2) the existing designated use cannot be attained because of irretrievable man-induced conditions; or (3) the existing designated use cannot be attained because the imposition of controls above or in addition to he technology-based requirements of best available technology economically achievable and best practicable wastewater treatment technology would result in a substantial and widespread adverse economic and social impact.

On March 31, 1977, the Acting Regional Administrator, Region VII, EPA, disapproved water quality standards revisions for the 35 waters which were downgraded from primary contact recreational uses to secondary or non-contact uses, or completely eliminated by the September 10, 1976, revision of Rule 7 of the Nebraska Water Quality Standards.

In March 31, 1977 letter, the Acting Regional Administrator indicated to the Governor of Nebraska that the transcript of the public hearing at which Rule 7 was adopted did not satisfy the requirements of 40 CFR 130.17(c)(3). The letter pointed out that the justification for downgrading had not been made on a case-by-case basis. In addition, to satisfy the requirements of 40 CFR 130.17(c)(3), pertinent data should have accompanied the public hearing transcript which demonstrated the unattainability of the previously designated beneficial uses and which formed the basis for the rule adopted by the Council. Thus, the Acting Regional Administrator disapproved Rule 7 of the revised Nebraska water quality standards. He informed the Governor that:

V 42 175 SEP 9 77 UMI

The State Water Quality Standards must be modified so that the designated beneficial uses on these waters are reinstated as they were prior to the amendments to Rule 7 adopted on September 10, 1976. If the State chooses in the alternative to provide a less restrictive designation of beneficial uses on any or all of the subject 35 waters, an appropriate rule must be adopted by the Nebraska State Environmental Control Council after consideration of each water so affected on a case-by-case basis; and a decision based on and justified to EPA with information demonstrating that the existing designated uses are not appropriate in accordance with the criteria specified at 40 CFR 130.17(a)(3).

Since neither of these conditions has not been met, the Administrator of the Environmental Protection Agency has prepared a proposed regulation reinstating the previous beneficial use classification (primary contact recreation) for the 35 waters, in compliance with 40 CFR 130.17 and section 303(c)(4)(A) of the Act.

If the Nebraska Environmental Control Council takes either of the actions specified in the Acting Regional Administrator's March 31, 1977, letter, these proposed modifications to the Nebraska water quality standards will not be promulgated. If such changes are not made, the Administrator must promulgate these proposed standards no later than 90 days after the date of this notice under section 303(c)(4) of the Act.

The Agency encourages the submission of comments on the proposed regulations by all interested persons, organizations, and governmental agencies. Comments should be sent to: Dale B. Parke, Water Division, U.S. Environmental Protection Agency, 1735 Baltimore Street, Kansas City, Mo. 64108. All comments received on or before October 25, 1977, will be considered by the Agency prior to promulgation of these regulations.

Dated: August 31, 1977.

DOUGLAS M. COSTLE,
Administrator.

Section 120.37 of Part 120 of Chapter I, Title 40 of the Code of Federal Regulations is proposed to be amended as follows:

§ 120.37 Nebraska.

The water quality standards applicable to the surface waters of the State of Nebraska, adopted by the Nebraska Environmental Control Council on May 14, 1976, with subsequent revisions adopted on September 10, 1976, and December 10, 1976, are amended as follows:

The designated uses adopted in Rule 7 by the State of Nebraska on September 10, 1976, for the following navigable waters are amended in each case to be full body contact, partial body contact, and fish and wildlife protected. The criteria necessary to support the designated beneficial uses for these waters are those in Rule 2 and Rule 6 of the Nebraska water quality standards:

Hanson Memorial Reserve State Special Use Area
Limestone Bluffs State Special Use Area
Pawnee Prairie State Special Use Area
Ponderosa State Special Use Area
Wilson Creek State Special Use Area
Crystal Lake State Recreational Area
Blue Bluff State Special Use Area
Diamond Lake Wildlife Area State Special Use Area
Dead Timber State Recreational Area

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

[45 CFR Part 182]

COOPERATIVE EDUCATION PROGRAMS

Proposed Criteria Governing Awards for Planning, Establishing, Expanding or Carrying Out Programs

AGENCY: U.S. Office of Education, HEW.

ACTION: Notice of proposed rulemaking.

SUMMARY: The purpose of this notice of proposed rulemaking is to amend existing regulations for the Cooperative Education Programs under Title VIII of the Higher Education Act, as amended, to conform with section 129 of the Education Amendments of 1976 (Pub. L. 94-482). The proposed regulations set forth rules and criteria governing awards for planning, establishing, expanding, or carrying out programs of cooperative education, and for support of training, research, or demonstration projects for cooperative education.

DATES: Interested persons are invited to submit written comments, suggestions, or objections regarding these proposed regulations for the Commissioner's consideration. In order to receive consideration, all comments, suggestions, or objections must be received no later than the 45th day after publication of this notice of proposed rulemaking in the FEDERAL REGISTER, or on the next business day if the 45th day is a Saturday, Sunday, or Federal holiday. Comments must be received on or before October 25, 1977.

ADDRESSES: All comments should be sent to Bureau of Postsecondary Education, Division of Training and Facilities, U.S. Office of Education, Room 3053, Regional Office Building 3, 7th and D Streets SW., Washington, D.C. 20202. Comments will be available for inspection at the above office, between 8:30 a.m. and 4:00 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT:

Dr. John L. Chase, Bureau of Postsecondary Education, Room 3053, Regional Office Building 3, 7th and D Streets SW., Washington, D.C. 20202; telephone 202-245-2280.

SUPPLEMENTARY INFORMATION: The provisions of the Education Amendments of 1976 make several technical changes in the Cooperative Education Programs under Title VIII, formerly Title IV-D of the Higher Education Act, as amended. Section 129 of the Education Amendments of 1976 provides that programs of cooperative education may now include alternating periods of work and school attendance, removing the requirement that students be enrolled on a full-time basis. In addition, the Commissioner may now make grants to institutions or combinations of institutions for up to five fiscal years, instead of three, to plan, establish, expand or carry out programs of cooperative education and for support of training, research, or demonstration projects for cooperative education.

These proposed regulations amend existing regulations for the Cooperative Education Programs, which were published in the FEDERAL REGISTER on May 9, 1975, to include these technical changes. There have also been numerous editorial modifications made in the existing regulations to provide greater simplicity and clarity for the reader.

NOTE.—The Office of Education has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

(Catalog of Federal Domestic Assistance Number 13:510; Cooperative Education Institutional Grants.)

Dated: June 30, 1977.

ERNEST L. BOYER,
U.S. Commissioner of Education.

Approved: September 2, 1977.

HALE CHAMPION,
Acting Secertary of Health, Education, and Welfare.

Title 45 of the Code of Federal Regulations is amended by revising Part 182 to read as follows:

PART 182—COOPERATIVE EDUCATION

Subpart A—General

Sec.
182.1 Scope of part.
182.2 Purpose of the program.
182.3 Definitions.
182.4 General provisions regulations.
182.5 Applications—general.
182.6 Performance reports.

Subpart B—Cooperative Education Programs

Sec.
182.11 Eligible parties.
182.12 Eligible programs.
182.13 Limit on number of grants.
182.14 Limit on amounts of grants.
182.15 Content of application.
182.16 Funding criteria.
182.17 Student work experience.
182.18 Ineligible expenditures.
182.19 Eligible costs of administration.

Subpart C—Training, Research, and Demonstration Projects

182.30 Eligible parties.
182.31 Eligible projects.
182.32 Funding criteria for training projects.
182.33 Funding criteria for research and demonstration projects.

AUTHORITY: Title VIII of the Higher Education Act of 1965, as amended, 90 Stat. 2144-2146 (20 U.S.C. 1133-1133b), unless otherwise noted.

Subpart A—General

§ 182.1 Scope of part.

The regulations in this part apply to the Cooperative Education Programs (Title VIII of the Higher Education Act of 1965, as amended).

(20 U.S.C. 1133, 1133a, 1133b.)

§ 182.2 Purpose of the program.

The Commissioner is authorized to make awards for planning, establishing, expanding, or carrying out programs of cooperative education, and for support of training, research, or demonstration projects for cooperative education.

(20 U.S.C. 1133, 1133a, 1133b.)

§ 182.3 Definitions.

As used in this part:

(a) "Act" means Title VIII of Higher Education Act of 1965, as amended.

(b) "Cooperative education" means a program of study at an institution of higher education under which regular students undertake academic study for specified periods of time alternating with work experience in government, industry, business, or non-profit social welfare or educational agencies. In cooperative education, work periods and school attendance may be on alternate half days, full days, weeks, or other periods of time.

(c) "Regular student" is a person in a program of cooperative education who is carrying at least a half-time academic load of course work and related required activites, other than by correspondence. Whether a person comes within this definition must be determined by the institution of higher education on the basis of work loads normally required of students who are full-time degree candidates.

(d) "Institution of higher education" means an institution of higher education as defined in section 1201(a) of the Higher Education Act of 1965, as amended.

(e) "Combination of institutions of higher education" means a group of institutions of higher education which have entered into a cooperative arrangement for the purpose of carrying out a common objective, or a public or private non-profit agency, organization, or institution designated or created by a group of institutions of higher education for the purpose of carrying out a common objective on their behalf.

(20 U.S.C. 1133a-1133b, 1141.)

§ 182.4 General provisions regulations.

Assistance provided under this part is subject to the regulations in 45 CFR Parts 100 and 100a (relating to fiscal, administrative, property management, reporting requirements, and other matters).

(20 U.S.C. 1133b, 1133c.)

§ 182.5 Applications—general.

Each applicant under this part shall submit an application which meets the requirements of 45 CFR Part 100a (subpart B).

(20 U.S.C. 1133a, 1133b.)

§ 182.6 Performance reports.

Each recipient under this part shall submit the following performance reports to comply with 45 CFR Part 100a (Subpart Q):

(a) An interim progress report at the end of six months which must include information on:

(1) The extent to which the objectives of the project have been accomplished;

(2) What factors, if any, have prevented the accomplishment of project objectives, and what, if any, corrective measures are being taken; and

(3) Any highly significant aspects of the project.

(b) A final report which must be submitted with the final financial status report.

(20 U.S.C 1133a, 1133b; H. (Conf.) Rept. 94-1701 at 199 (1976).)

Subpart B—Cooperative Education Programs

§ 182.11 Eligible parties.

An institution of higher education or a combination of institutions of higher education may apply for an award under this subpart.

(20 U.S.C. 1133(a), 1133a(a).)

§ 182.12 Eligible programs.

The Commissioner may make awards under this subpart to plan, establish, expand, or carry out a program of cooperative education.

(20 U.S.C. 1133(a), 1133a(a).)

§ 182.13 Limit on number of grants.

No institution of higher education, individually or as a participant in a combination of institutions of higher education, may receive grants under this subpart for more than five fiscal years.

(20 U.S.C. 1133a(c).)

§ 182.14 Limit on amounts of grants.

(a) An institution of higher education may not receive an award of more than $175,000 for any fiscal year. A combination of institutions of higher education may not receive in any fiscal year an award of more than $125,000 multiplied by the number of institutions which apply as participants in the combination.

(20 U.S.C. 1133a(a).)

(b) Each award under this subpart may not include more than the following amounts for administering the program of cooperative education:

(1) 100 percent of the total cost of administering the program in the first fiscal year in which an award is made.

(2) 90 percent of th total cost of administering the program in the second fiscal year for which an award is made.

(3) 80 percent of the total cost of administering the programs in the third fiscal year for which an award is made.

(4) 60 percent of the total cost of administering the program in the fourth fiscal year for which an award is made.

(5) 30 percent of the total cost of administering the program in the fifth fiscal year for which an award is made.

(20 U.S.C. 1133a(c).)

§ 182.15 Content of application.

Each application under this subpart must meet the requirements of section 802(b) of the Act.

(20 U.S.C. 1133a(b).)

§ 182.16 Funding criteria.

The Commissioner evaluates applications under this subpart with the criteria in 45 CFR 100a.26(b) and with the following additional criteria (maximum of 100 points):

(a) The extent to which the applicant shows in its application that:

(1) The applicant will use its own resources to increase the size and scope of its cooperative education program during the period of Federal support (5 points);

(2) The applicant has arranged for employment opportunities which to the extent practicable are related to its students' educational, professional, or occupational objectives (10 points);

(3) The applicant supervises its students during the work;

(4) The applicant makes continuing efforts to promote close interaction between its students' work experience and academic study (5 points);

(5) The President and first-line administrators of the applicant support the program (10 points); and

(6) The applicant has a record-keeping system that keeps track of each students' status, attendance periods, and work periods (5 points);

(b) Whether the total amount of work experience is long enough to make a significant contribution toward meeting the student's educational, professional, and occupational objectives (10 points);

(c) The extent to which the applicant has involved administrators, faculty, students, employers, and cooperative education specialists in planning the program (10 points);

(d) Whether the applicant has procedures for making curriculum and cal-

V 42 175 SEP 9 77 UMI

endar changes as necessary to meet the particular needs of students (10 points);

(e) Whether the applicant has a written cooperative education philosophy appropriate to the needs and characteristics of the applicant (10 points);

(f) The extent to which employers will provide appropriate work experience for students in the applicant's program of cooperative education (10 points); and

(g) The extent to which the applicant demonstrates its intention and ability to continue its cooperative education program after Federal financial assistance ends (10 points).

(20 U.S.C. 1133(a), 1133a(b), 1133a(d).)

§ 182.17 Student work experience.

The recipient of an award under this subpart must insure that:

(a) Each student's work experience is incorporated into the student's program of study; and

(b) The student receives compensation from the employer at a rate comparable to employees who do similar work. However, a student may choose to work without pay or at a lesser rate, if the student works for a social welfare or educational organization.

(20 U.S.C. 1133 (a), (c).)

§ 182.18 Ineligible costs.

(a) A recipient may not use funds provided under this subpart to:

(1) Compensate any student for his or her work experience or to provide financial assistance to any student to meet the costs of his or her education;

(2) Purchase or lease equipment, unless specifically authorized by the Commissioner in writing;

(3) Purchase or lease land, or purchase, lease, construct, or improve any building; or

(4) Pay teaching salaries or purchase capital equipment.

(b) A recipient may not use funds provided under this subpart for any program which involves sectarian training or which is intended primarily to prepare students to be ministers or teachers of theological subjects.

(b) A recipient may not us funds provided under ths subpart for any progrm

(c) A recipient may not use funds provided under this subpart for the development and production of audio-visual materials unless specifically authorized by the Commissioner in writing.

(20 U.S.C. 1133(c), 1133a.)

§ 182.19 Eligible costs of administration.

The costs of administering the project may include the following:

(a) Salaries of the director, any coordinators, and secretaries;

(b) Release time for faculty to help administer the program, including student counseling and supervision, job location and placement, and promotional activities;

(c) Salaries of administrative personnel such as job placement staff, or admission counselors who publicize the programs and recruit students;

(d) Travel costs of administrative staff, and necessary subsistence costs for them; and

(e) Expendable office supplies and promotional literature.

(20 U.S.C. 1133a(c)); H. (Conf.) Report No. 94-1701 at 199 (1976).)

Subpart C—Training, Research, and Demonstration Projects

§ 182.30 Eligible parties.

The Commissioner may make awards under this subpart as follows:

(a) To institutions of higher education or combinations of institutions of higher education; and

(b) To other public or private nonprofit agencies or organizations, if the awards will make an especially significant contribution to attaining the objectives of this subpart.

(20 U.S.C. 1133b.)

§ 182.31 Eligible projects.

The Commissioner may make awards under this subpart for:

(a) Projects to train persons in planning, establishing, administering, or coordinating programs of cooperative education;

(b) Projects to demonstrate or explore the feasibility or value of innovative methods of cooperative education; or

(c) Projects for research into methods of improving, developing, or promoting the use of programs of cooperative education in institutions of higher education.

(20 U.S.C. 1133b.)

§ 182.32 Funding criteria for training projects.

The Commissioner evaluates applications for training projects under this subpart with the criteria in 45 CFR 100a.26(b) and with the following additional criteria (maximum score of 100 points):

(a) The extent to which the applicant proposes to make trainees aware of the need to modify existing undergraduate teaching practices, student calendars, and curricula, to begin to administer a cooperative education program (10 points);

(b) The extent to which the applicant has based its project on its experience in cooperative education or on successful cooperative education programs, or on innovations which have been used successfully in a cooperative education program (25 points);

(c) The extent to which the applicant has clearly defined procedures that give evidence of comprehensive planning (25 points);

(d) The extent to which the proposed project has promise of developing trainees who can apply their expertise in more than one type of cooperative education program (20 points); and

(e) The extent to which the applicant provides evidence of a need for the training in its geographical area (20 points).

(20 U.S.C. 1133b.)

§ 182.33 Funding criteria for research and demonstration projects.

The Commissioner evaluates applications for research or demonstration projects under this subpart with the criteria in 45 CFR 100a.26(b) and with the following additional criteria (maximum of 100 points):

(a) The extent to which the proposed project is likely to develop information of practical value to administrators of cooperative education programs, or presidents, deans and other principal administrative officers who establish or administer cooperative education programs (25 points);

(b) The extent to which the research design includes:

(1) Well-defined methodologies;

(2) Realistic work schedules; and

(3) A logical relationship between the research design and the stated objectives (25 points);

(c) The extent to which the applicant will explore innovative approaches to the operation of cooperative education programs and evaluate those approaches (20 points);

(d) The extent to which the applicant will demonstrate the feasibility of a stated hypothesis for developing, improving, and promoting the use of cooperative education nationally through:

(1) Experimental models; and

(2) Information dissemination (15 points); and

(e) The extent to which the proposed research will shed new light on:

(1) The effectiveness of cooperative education as an educational process or as preparation for employment, or both;

(2) The beneficial effects of cooperative education for students, employers, and institutions of higher education; or

(3) The effectiveness of innovative approaches to cooperative education (15 points).

FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 21371; FCC 77-585]

[47 CFR Part 2]

REQUIREMENT OF A DESCRIPTION OF MEASUREMENT FACILITIES USED IN THE EQUIPMENT AUTHORIZATION PROGRAM AND TO MAKE OTHER CHANGES

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The FCC is proposing to expand its requirements for filing a description of measurement facilities used in the equipment authorization program for radio frequency devices. The agency is also requiring the submission of a report of measurement with each application for type approval. The proposed regulations are designed to ensure that persons making measurements for equipment authorization have adequate facilities to ensure that the reported measurements are accurate and the equipment is in compliance with FCC technical specifications.

DATES: Comments must be received on or before October 11, 1977, and reply comments must be received on or before October 21, 1977.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Herman Garlan, Chief, RF Devices and Experimental Branch, Office of Chief Engineer, 202-632-7095.

SUPPLEMENTARY INFORMATION: Method of Measuring test site attenuation is described in OCE 44 attached to notice of proposed rulemaking.

Adopted: August 24, 1977.

Released: September 6, 1977.

In the matter of amendment of Part 2 to require a description of measurement facilities used in the equipment authorization program and to make other changes, Docket No. 21371.

1. Notice is hereby given of rulemaking to extend the requirement to furnish a description of measurement facilities now required for certification to other parts of the equipment authorization program.

2. Radiofrequency devices, e.g. transmitters, receivers, microwave ovens, etc., offered for sale to the public, with very few exceptions, require an equipment authorization from the Commission as a prerequisite for legal marketing.[1] With an application for type acceptance or certification, the applicant must submit a report of measurements to show that the subject equipment complies with the technical specifications promulgated by the Commission.[2] It is proposed herein to require a similar report of measurements with an application for type approval to provide some assurance that equipment submitted to the FCC Laboratory for type approval testing can reasonably be expected to pass the FCC tests. Our experience during the last two years has shown that about 50 percent of equipments submitted for type approval testing have failed during the initial submission (about 70 percent for video games). This has resulted in needless expense on the part of the manufacturer/applicant and to the Commission. By requiring the manufacturer/applicant to test his equipment prior to submission, we expect this 50 percent failure rate to be cut at least in half.

3. The integrity of the equipment authorization program depends in large measure on the accuracy of the measurement data received by the Commission. Measurements of radiation—on the fundamental, of harmonics and other spurious—are particularly susceptible to error since they are materially affected by the characteristics of the test site on which the measurement is made. The need to evaluate the suitability of the test site was recognized in the early days of the certification program and a regulation was promulgated[3] to require such a filing with the Commission. We are now proposing to extend this requirement to measurements made for type approval and type acceptance.[4] We are also proposing to require attenuation measurements of the test site to verify that the test site is suitable for making open field radiation measurements.

4. At the same time, we are proposing to require information about the calibration of the instrumentation used for the measurements reported to the Commission to insure that lack of calibration does not introduce errors in the data.

5. Many persons operating measurement facilities have already filed the information required by the rules proposed herein. These individuals will not be required to file a new description but will be expected to update and supplement the description currently on file at the end of the three year period proposed in § 2.955.

6. In view of the above, the Commission is proposing to delete § 15.38 and to add general regulations to Part 2 to require the filing by all parties of a description of measurement facilities used in our equipment authorization program. The proposed rules are attached. As part of this filing each party will be required to furnish site attenuation data measured pursuant to Bulletin OCE 44 which is attached as Appendix A.

7. Pursuant to procedures set forth in § 1.415 interested parties are invited to file comments in this proceeding on or before October 11, 1977. Reply comments may be filed on or before October 21, 1977. In accordance with § 1.419 an original and 5 copies of each comment or reply comment shall be furnished to the Commission. Members of the public who wish to express their interest by participating informally in this rulemaking proceeding may do so by submitting one copy of their comment, without regard to form, provided the docket Number of this proceeding is specified. Responses will be available for public inspection during regular business hours in the Commission's Docket Reference Room at 1919 M Street NW., Room 239, Washington, D.C.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

Part 2 is amended by adding a new undesignated subpart and Sections 2.951-2.956 inclusive, by adding paragraph (e) to Section 2.963. Part 15 is amended by deleting Section 15.38.

1. Part 2 is amended by adding a new undesignated subpart under Subpart J to read as follows:

MEASUREMENT FACILITIES

§ 2.951 Approval of measurement facility.

(a) Each person making measurements to be filed with an application for an equipment authorization shall file a description of his measurement facilities with the Commission. The description shall be sent to FCC Laboratory Div., P.O. Box 40, Laurel, Md. 20810, as a separate document, not attached to an application.

(b) In determining the acceptability of a measurement facility, the Commission will consider the adequacy and calibration schedule of the instrumentation, the terrain and the number of reflecting objects within the measurement area, and the site attenuation curve(s) furnished by the applicant. To be acceptable, the site attenuation should be within ±2dB of the theoretical site attenuation. See appendix to Bulletin OCE 44 for the method of computing the theoretical site attenuation.

(c) The Commission will advise the person filing the description as to its acceptability.

§ 2.952 Description of measurement facility.

The description of the measurement facility shall include the following information:

(a) Name and mailing address of person(s) and company operating the measurement facility.

(b) Location of the measurement facility and/or test site. Specify this location as city, street, and number. If no street and number, specify the distance and direction from the nearest city.

(c) Physical description of the test site accompanied by photographs 8" by 10" in size clearly showing the surrounding landscape 360° in azimuth of the test site. Smaller photographs may be submitted if they show the required details and are mounted on full size sheets of paper.

(d) Scale plot of the test site showing the physical layout of test structures and all surrounding structures within 5 times the distance between the measuring set and the device being measured. Show all pipes, roads, sidewalks, wiring, metallic objects with any dimension greater than 6 inches, etc., whether above or below ground.

(e) Physical description of all structures shown on the plot of the test site. For each structure indicate the materials of which it is constructed.

(f) Information on the calibration of the test site pursuant to Section 2.953 and Bulletin OCE 44.

(g) List all the measuring instruments used in the facility. For each piece of equipment, indicate the date of the last calibration and the interval between calibrations. Specify the antenna factor and

[1] 47 U.S.C. 302; 47 CFR Part 2, Subpart I.
[2] 47 CFR Part 2, Subpart J.
[3] 47 CFR 15.38.
[4] In a subsequent rulemaking proceeding, the Commission proposes to review the several equipment authorization procedures now in use with a view toward simplifying these requirements and combining them into a single procedure.

V 42 175 SEP 9 77 UMI

indicate how the antenna factor was determined for each antenna used in making field strength measurements. Include a sample calculation showing how the antenna factor is used in converting instrument readings into field strength in microvolts per meter (μV/m).

(h) For the line impedance stabilization network used in making line conducted measurements, furnish a graph of the impedance magnitude characteristic measured from either side of the receiver receptacle to chassis.

(i) A list of the published standards and measurement procedures employed by persons at the facility, and a copy of each unpublished standard and procedure that is used.

(j) A statement indicating whether this facility is available to do measurement work for others on a contract basis.

§ 2.953 Characteristics of a test site.

(a) A test site to be used for radiation measurements shall be provided with facilities and appurtenances suitable to make the technical measurements for the particular type(s) of equipment as described in an appropriate standard or measurement procedure.

(b) The site should provide for measurements at the following distances:

Below 2 MHz—limitation on the size of the test site usually makes it necessary to extrapolate measured data to determine the variation of field strength with distance at the site by measuring a known signal at several points and plotting measured field strength vs. distance.
2–25 MHz—30 meters.
25–1000 MHz—3 meters.
1–40 MHz—3 meters or less. The minimum measurement distance depends both on radiation characteristics of the device to be tested and the dimensions of the measuring antenna.

NOTE.—Instrumentation limitations and Commission requirements may dictate altering these distances in some cases.

(c) It is recommended that every site be provided with a ground screen. If the site is partially or wholly enclosed in a shelter, or lies partly or wholly over an area that is paved or of non-uniform conductivity, a ground screen is mandatory. For a site to be acceptable without a ground screen, the earth within the area must be uniform and of good conductivity. Any pipes or cables within the site shall be buried to such a depth that they have negligible effect on the measurements.

(d) To provide assurance that the site is free from the effects of reflections or other discontinuities, site attenuation measurements shall be made pursuant to Bulletin OCE 44.

§ 2.954 Changes in measurement facilities.

The description of the measurement facilities shall be kept current at all times. When a change in these facilities is made, an amendment to the description filed pursuant to Section 2.951 shall be submitted.

§ 2.955 Update of filed information.

The accuracy of the description filed pursuant to Section 2.951 shall be verified every three years by the person(s) or organization that filed the description. If this verification is not received approval of the site for use in making equipment authorization measurements may be withdrawn.

§ 2.956 Exemptions.

The description of measurement facilities is not required for measurements of a decoder device used to detect the EBS Attention Signal, as defined in Section 73.906 of this chapter.

2. Section 2.963 is amended by adding a new paragraph (e) to read as follows:

§ 2.963 Application for type approval.

* * * * *

(e) The applicant shall attach a report of measurements showing that the equipment complies with the technical specifications applicable to the equipment.

3. Section 15.38 of Part 15 is deleted and the word [Reserved] is inserted as follows:

§ 15.38 [Reserved]

APPENDIX A

FEDERAL COMMUNICATIONS COMMISSION, OFFICE OF THE CHIEF ENGINEER, WASHINGTON, D.C. 20554

Bulletin OCE 44

CALIBRATION OF A RADIATION MEASUREMENT SITE—SITE ATTENUATION

1. The suitability of a test site used to make radiation measurements may be best determined by measuring the site attenuation. This information will reveal the existence of ground discontinuities which could invalidate measurements of radiation.

2. Site attenuation should be measured over the frequency range 25–1,000 MHz at the distance(s) to be used for actual measurements (commonly 30 or 3 meters). Measurements should be made at 25 MHz intervals in the range 25–300 MHz and at 50 MHz intervals in the range 300–1,000 MHz. Site attenuation data should be furnished for each measurement distance as a plot of attenuation versus frequency over the range 25–1,000 MHz. If anomalies occur when plotting the data pursuant to paragraph 4.1 below, additional measurements should be made around that point(s) to determine the extent of the anomaly.

3. To measure site attenuation follow steps 3.1 through 3.10. See Figure 1.

3.1 Set a signal generator on the turntable at the location of the equipment under test. Connect the signal generator output to a radiating antenna through a balun or other transformer to match the generator output to the antenna.

3.2 Basic site attenuation should be measured with an adjustable dipole antenna as the radiating antenna connected to the signal generator. The adjustable dipole antenna to be used is similar to that used with the field strength meter (FSM). The radiating antenna should be adjusted to proper length for each frequency of measurement. It should be set up for horizontal polarization at a height of H as specified in Figure 1 oriented for maximum radiation toward the location of the measuring instrument which may be a field strength meter or a spectrum analyzer.

3.3 In some measuring procedures, the antenna to be used with the device under test is specified. IEEE Standard 187 for measuring radiation from an FM or TV receiver calls for a specified dipole. EIA Standard RS–378 for measuring radiation from an FM or TV receiver stipulates the use of the EIA-Laurel antenna developed at the FCC Laboratory. If the site will be used to make radiation measurements pursuant to these procedures, additional site attenuation curves must be submitted to the Commission using the particular antenna and antenna height called for in the standard. If the EIA-Laurel antenna is used, a 50–300 ohm balun must be inserted between the signal generator and the antenna and the balun attenuation must be subtracted from the measured site attenuation.

3.4 Set up the FSM connected to its antenna which must be tuned to the frequency of the signal generator.

3.5 Set the output level of the signal generator at a value that gives an FSM reading significantly above the ambient noise level or interfering signals from other sources. Record the signal generator reading.

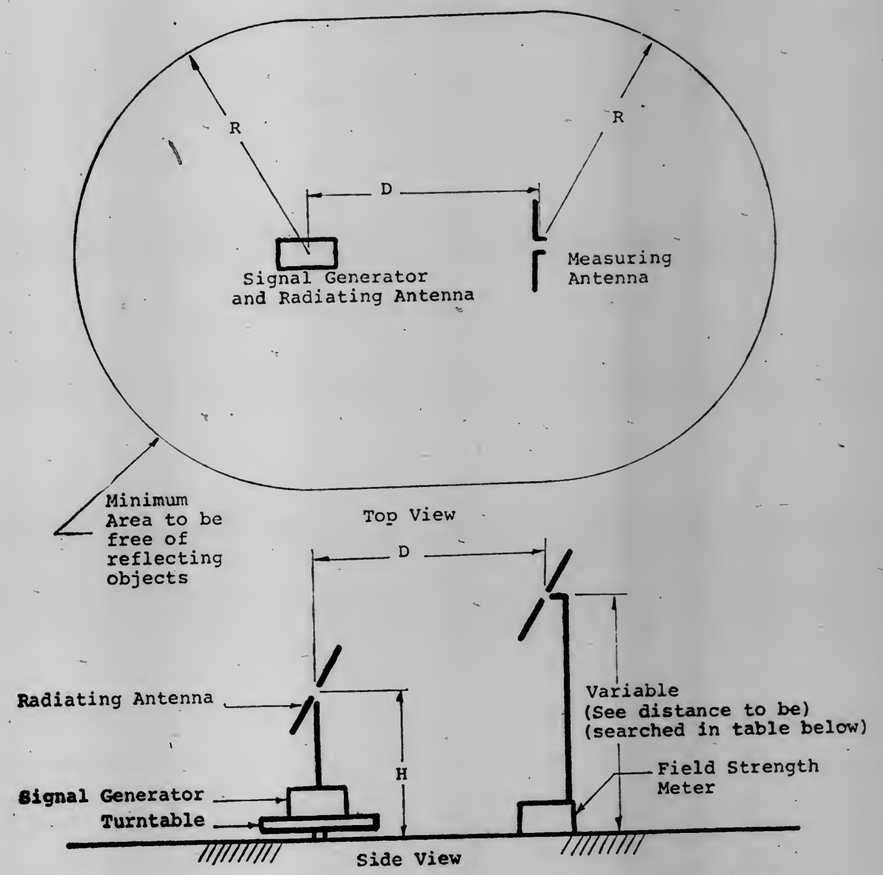
3.6 Measure the horizontal component of the field strength at the location of the FSM. Find the maximum value of the field strength by raising and lowering the measuring antenna over the search distance specified in Figure 1. Note the reading of the FSM.

3.7 Move the signal generator to the location of the FSM and connect it directly to the input terminals of the FSM (through a suitable matching network, if necessary).

3.8 Adjust the signal generator attenuator to give the same FSM reading as that recorded in 3.5. Record the signal generator reading.

3.9 Alternatively for a 3 meter measurement site, to avoid moving the signal generator, a suitable length of coaxial cable can be attached to the output of the signal generator. This cable must be matched to the signal generator output impedance. The cable becomes an integral part of the signal generator and is used both to provide the source signal and the calibrating (FSM comparison) signal.

3.10 The site attenuation is the difference in dB between the attenuator setting of the signal generator recorded in 3.5 and that in 3.8, with due accounting of the losses, if any, of the matching network required at the signal generator.



NOTE.—Do not adjust the data by applying corrections for antenna factor or cable loss of the cable from the FSM to its antenna.

4. Report of site attenuation.

4.1 Plot the site attenuation data on 2 cycle, semi-log factor graph paper with frequency as the abscissa on the log scale and site attenuation in dB as the ordinate on the linear scale. See Figure 2.

4.2 Specify on the graph the radiating antenna that was used with the signal generator.

4.3 Specify on the graph the distance of separation between the radiating antenna (connected to the signal generator) and the measuring antenna (connected to the FSM).

for D = 3m, R= 3m, H = 2m, Search 1-4 meters.
for D = 30m, R= 50m H = 5m Search 2-7 meters.

FIGURE 1. Equipment Arrangement for Measuring Site Attenuation of a Radiation Test Site.

UMI

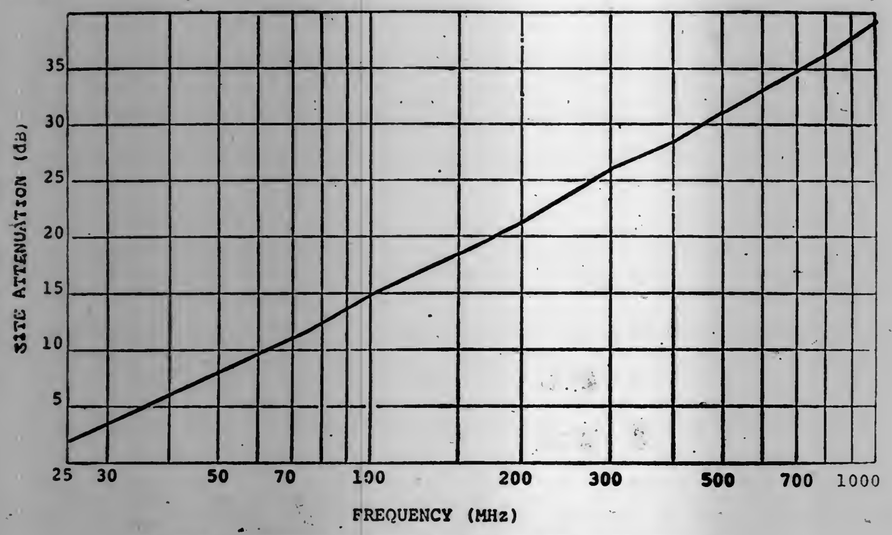

FIGURE 2. Sample Theoretical Site Attenuation Curve.

Both antennas tuned dipoles
D = 3m
C_a = 30 feet of RG58 cable
Assumes 4.7dB for average ground reflection

GENERAL EQUATION FOR SITE ATTENTION

The theoretical site attenuation of a measurement site can be calculated from equation (1).

$$A = 20 \log_{10} D + 20 \log_{10} F_m - G_r - G_r + C_a - 32.3 \quad (1)$$

where

A = Site attenuation in dB.
D = Distance in meters between the source (transmitting) antenna and receiving (FSM search) antenna.
F_m = Frequency in megahertz of the transmitted signal.
G_r = Gain in dB of the source antenna relative to isotropic.
G_r = Gain in dB of the receiving antenna relative to isotropic.
C_a = Cable attenuation in dB (a function of frequency).

Equation (1) assumes a 3.7dB value as the average of the ground reflected component.

Average figures for C_a—cable attenuation—are given in Figure 40, page 22-41, of the ITT Reference Data for Radio Engineers, 5th edition. However, since variations in these values exist not only because of the conditions of the cable being used but also because of variation in the characteristics of cable produced by various manufacturers, it is preferable that the actual cable attenuation be measured by standard techniques.

If two tuned dipoles are used as the source and receiving antennas $G_t = G_r = 2.5$ dB and equation (1) becomes:

$$A = 20 \log_{10} D + 20 \log_{10} F_m + C_a - 36.6 \quad (2)$$

Sample calculation: Let

$D = 3$ m.
$F_m = 100$ MHz.
C_a = Attenuation of 30 feet of RG58 cable. = 2 dB.

Source antenna and receiving antennas are tuned dipoles.

Using equation (2):

$A = 20 \log_{10} 3 + 20 \log_{10} 100 + 2 - 36.6$
$= 9.5 + 40 + 2 - 36.6$
$= 14.9$ dB

INTERSTATE COMMERCE COMMISSION

[49 CFR Part 1242]

[No. 36622]

SEPARATION OF COMMON OPERATING EXPENSES BETWEEN FREIGHT SERVICE AND PASSENGER SERVICE FOR RAILROADS

Proposed Revision to Rules

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed rulemaking and order.

SUMMARY: The Interstate Commerce Commission has adopted a revision to the Rules Governing the Separation of Common Operating Expenses Between Freight Service and Passenger Service for Railroads (Separation Rules). This revision updates the current Separation Rules to conform to the revised Uniform System of Accounts (USOA) (49 CFR Part 1201) served on June 24, 1977, under Docket No. 36367.

DATES: Comments must be received on or before October 12, 1977. Proposed effective date: January 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. John A. Grady, Director, Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423. Phone 202-275-7565.

SUPPLEMENTARY INFORMATION: The basic content of the Separation Rules is substantially changed by the revised USOA (Docket No. 36367). The revised USOA operating expense account structure includes separate account for labor, material, and other expenses. The Separation Rules maintain this distinction which has permitted the improvement of the rationale for allocation bases.

Secondly, the revised USOA requires carriers to maintain separtate accounts for solely related freight, solely related passenger, and common expenses. Consequently, the Separation Rules no longer address the assignment of solely related expenses but focus on the allocation of common expenses between solely related freight and passenger services.

Thirdly, the USOA prescribes that operating expenses be maintained by certain activities and subactivities. For example, the Way and Structure Activity includes the subactivities of Running, Switching and Other. As a result, the Separation Rules need not contain regulations that define activity/subactivity accounting.

The revised Separation Rules continue to use fully shared cost concepts in which freight and passenger services are each assigned full and fairly allocated portions of total expenses. The allocation bases developed for the revised rules utilize certain operating statistics, solely related freight passenger ratios, and other common account apportionments. We specifically solicit comments and suggestions from interested parties on the allocation bases used in the revised Separation Rules.

Accordingly, it is proposed that Part 1242 of Title 49 of the Code of Federal Regulations be amended to read as follows:

H. G. HOMME, JR.,
Acting Secretary.

PART 1242—SEPARATION OF COMMON OPERATING EXPENSES BETWEEN FREIGHT SERVICE AND PASSENGER SERVICE;[1] RAILROADS

LIST OF INSTRUCTIONS

Sec.
1242.0 Separation of common operating expenses.

GENERAL

1242.01 Expenses solely related to freight service and passenger service.
1242.02 Common expenses.
1242.03 Made by accounting divisions.
1242.04 Special tests.
1242.05 Operating expense account number notation.
1242.06 Instructions for separation.

OPERATING EXPENSES—WAY AND STRUCTURES

1242.10 Administration—track (accounts XX-19-02).
1242.11 Administration—bridges and buildings (accounts XX-19-03).
1242.12 Administration—signals (accounts XX-19-04).
1242.13 Administration — communications (accounts XX-19-05).
1242.14 Administration—other (accounts XX-19-06).
1242.15 Roadway, Tunnels and subways, Bridges and culverts, Ties, Rails, Other track material, Ballast, Track laying and surfacing, and Road property damaged (accounts XX-17-10 to XX-18-12, inclusive; 21-17-13 to 21-18-16, inclusive; XX-17-17, XX-18-17, XX-17-48 and XX-18-48).
1242.16 Road property damaged—other (accounts XX-19-48).
1242.17 Signals and interlockers (accounts XX-17-19 and XX-18-19).
1242.18 Communication systems (accounts XX-19-20).
1242.19 Electric power systems (accounts XX-19-21).
1242.20 Highway grade crossings (accounts XX-17-22 and XX-18-22).
1242.21 Station and office buildings (accounts XX-19-23).
1242.22 Shop buildings—locomotives (accounts XX-19-24).
1242.23 Shop buildings—freight cars (accounts XX-13-25).
1242.24 Shop buildings—other equipment (accounts XX-19-26).
1242.25 Locomotive servicing facilities (accounts XX-19-27).
1242.26 Miscellaneous buildings and structures (accounts XX-19-28).
1242.27 Coal marine terminals, Ore marine terminals, TOFC/COFC terminals, Other marine terminals, Motor vehicle loading and distribution facilities, and Facilities for other specialized service operations (accounts XX-13-29 to XX-13-35, inclusive).
1242.28 Roadway machines, Small tools and supplies, and Snow removal (accounts XX-19-36 to XX-19-38, inclusive).
1242.29 Fringe benefits (accounts 12-17-00, 12-18-00, 12-19-00).
1242.30 Dismantling retired road property and Deprecation (accounts XX-17-39, XX-18-39, XX-19-39, 62-17-00, 62-18-00, and 62-19-00).
1242.31 Lease Rentals—debit and credit, and Other rents—debit and credit (accounts 31-17-00, 31-18-00, 31-36-17-00, 36-18-00 and 36-18-00, 35-17-00, 35-18-00, 35-19-00, 36-17-00, 36-18-00, and 36-19-00).
1242.32 Joint facility rents—debit and credit, and Other rents—debit and credit (accounts 33-17-00, 33-18-00, 33-19-00, 34-17-00, 34-18-00, 34-19-00, 37-17-00, 37-18-00, 37-19-00, 38-17-00, 38-18-00, and 38-19-00).
1242.33 Other expenses and Casualties and insurance (accounts XX-17-99, XX-18-99, XX-19-99, 50-17-00, 50-18-00, and 50-19-00).

EQUIPMENT—LOCOMOTIVES

1242.34 Administration (accounts XX-26-01).
1242.35 Repair and maintenance (accounts XX-26-41).
1242.36 Machinery repair and Equipment damaged (accounts XX-26-40 and XX-26-48).
1242.37 Dismantling retired property and Depreciation (accounts XX-26-39 and 62-26-00).
1242.38 Fringe benefits (account 12-26-00). Other rents—debit and credit, and Repairs billed to other (accounts 31-26-00, 32-26-00, 35-26-00, and 40-26-98).
1242.40 Joint facility rents—debit and credit, Joint facility—debit and credit (accounts 33-26-00, 34-26-00, 37-26-00 and 38-26-00).
1242.41 Other and Casualties and insurance (accounts XX-26-99 and 50-26-00).

[1] The accounts mentioned in this Part refer to and agree with Part 1201 of this Chapter.

EQUIPMENT—FREIGHT CARS

1242.42 Administration, Repair and maintenance, Machinery repair, Equipment damaged, Dismantling retired property, Fringe benefits, Other Casualties and insurance Lease rentals, Joint facility rents, Other rents, Depreciation, Joint facility, Repairs billed to others, and Other (accounts XX-22-00, XX-22-42, XX-22-40, XX-22-48, XX-22-39, 12-22-00, 50-22-00, 31-22-00 to 38-22-00 inclusive, 62-22-00, 40-22-98, and XX-22-99

EQUIPMENT—OTHER EQUIPMENT

1242.43 Administration (accounts XX-27-01).
1242.44 Trucks, trailers, and containers—revenue service and Floating equipment—revenue service (accounts XX-23-43 and XX-23-44).
1242.45 Passenger and other revenue equipment (accounts XX-27-45).
1242.46 Computers and data processing equipment (account XX-27-46)
1242.47 Machinery (accounts XX-27-40)
1242.48 Work and other non-revenue equipment (accounts XX-27-47).
1242.49 Equipment damaged (accounts XX-27-48).
1242.50 Fringe benefits (accounts 12-27-00).
1242.51 Dismantling retired property and Depreciation (accounts XX-27-39 and 62-27-00).
1242.52 Lease rentals—debit and credit, Other rents—debit and credit, and Repairs billed to others—credit (accounts 31-27-00, 32-27-00, 35-27-00, and 36-27-00, and 40-27-98).
1242.53 Joint facility rents—debit and credit and Joint facility—debit and credit accounts 33-27-00, 34-27-00, 37-27-00 and 38-27-00)
1242.54 Other and Casualties and insurance (accounts XX-27-99 and 50-27-01).

TRANSPORTATION—TRAIN OPERATIONS

1242.55 Administration (accounts XX-51-01).
1242.56 Engine crews and Train crews (accounts XX-51-56 and XX-51-57)
1242.57 Dispatching trains (accounts XX-51-58).
1242.58 Operating signals and interlockers, Operating drawbridges, and Highway crossing protection (accounts XX-51-59, XX-51-60 and XX-51-62).
1242.59 Train inspection and lubrication (accounts XX-51-62).
1242.60 Locomotive fuel, Electric power purchased/produced for motive power, and Servicing locomotives (accounts XX-51-67, XX-51-68 and XX-51-69).
1242.61 Freight lost or damaged—solely related (to train) (account 51-51-00).
1242.62 Clearing wrecks (accounts XX-51-63).
1242.63 Fringe benefits (account 12-51-00).
1242.64 Joint facility—debit and credit (accounts 37-51-00 and 38-51-00).
1242.65 Other and Casualties and insurance (accounts XX-51-99 and 50-51-00).

TRANSPORTATION—YARD OPERATIONS

Sec.
1242.66 Administration (accounts XX-52-01).
1242.67 Switch crews; Controlling operations; Yard and terminal clerical; Operating switches, signals, retarders, and humps; locomotive fuel; Electric power purchased/produced for motive power; and Servicing locomotives (accounts XX-52-64, XX-52-65, XX-52-66, XX-52-59, XX-52-67, XX-52-68, and XX-52-69).
1242.68 Freight lost or damaged—solely related (to yard) (account 51-53-00).
1242.69 Clearing wrecks (accounts XX-52-63).
1242.70 Fringe benefits (account 12-52-00).
1242.71 Joint facility—debit and credit (accounts 37-52-00 and 38-52-00).
1242.72 Other and Casualties and Insurance (accounts XX-52-99 and 50-52-00).

TRANSPORTATION—TRAIN AND YARD OPERATIONS COMMON

1242.73 Cleaning car interiors and Freight lost and damaged—all other (accounts XX-53-70 and 51-53-00).
1242.74 Adjusting and transferring loads and Car loading devices and grain doors (accounts XX-33-71 and XX-33-72).
1242.75 Fringe benefits (account 12-53-00).

TRANSPORTATION—SPECIALIZED SERVICE OPERATIONS

1242.76 Administration; Pickup and delivery, marine line haul and rail substitute service; Loading, unloading and local marine; Protective services; Freight lost or damaged—solely related; Fringe benefits; Casualties and Insurance Joint facility—debit and credit; and Other (accounts XX-34-01, XX-34-73, XX-34-74, XX-34-75, 51-34-00, 12-34-00, 50-34-00, 37-34-00, 38-34-00, and XX-34-99).

TRANSPORTATION—ADMINISTRATIVE SUPPORT OPERATIONS

1242.77 Administration (accounts XX-55-01).
1242.78 Employees performing clerical and accounting functions, and Loss and damage claims processing (accounts XX-55-76 and XX-55-78).
1242.79 Communication systems operations (accounts XX-55-77).
1242.80 Fringe benefits (account 12-55-00).
1242.81 Joint facility—debit and credit (accounts 37-55-00 and 38-55-00).
1242.82 Other and Casualties and Insurance (accounts XX-55-99 and 50-55-00).

GENERAL AND ADMINISTRATION

1242.83 Officers—general superintendence; Accounting, auditing and finance; Management services and data processing; Personnel and labor relations; Legal and secretarial; Research and development; Writedown of uncollectible accounts; Property taxes; Other taxes except on corporate income or payrolls; and Other (accounts XX-63-01, XX-63-86, XX-63-87, XX-63-91, XX-63-92, XX-63-94, 63-63-00, 64-63-00, 65-63-00, and XX-63-99).
1242.84 Marketing, Sales, and Public relations and advertising (accounts XX-63-88, XX-63-89, and XX-63-93).
1242.85 Fringe benefits (account 12-63-00).
1242.86 Industrial development (accounts XX-61-90).
1242.87 Joint facility—debit and credit and Casualties and insurance (accounts 37-63-00, 38-63-00 and 50-63-00).

LIST OF INSTRUCTIONS

§ 1242.0 Separation of common operating expenses.

(a) Commencing with annual or quarterly reports for the year 1978 or for any portion thereof until further order, all Class I railroad companies including Class I switching and terminal companies (Section 1240.1 of this chapter) subject to section 20 of the Interstate Commerce Act as amended shall separate operating expenses common to both freight service and passenger service in accordance with the regulation in this part.

(b) The carrier shall report common expense apportionments to the Commission as required by annual or other reports.

GENERAL

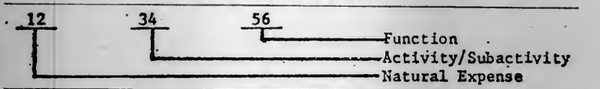
§ 1242.01 Expenses solely related to freight service and passenger service.

The Uniform System of Accounts for Railroad Companies (49 CFR Part 1201) requires that carriers assign directly to freight service or to passenger service, including allied services, the expenses, taxes and purchased services incurred solely for the benefit of either freight or passenger service.

§ 1242.02 Common expenses.

The Uniform System of Accounts also requires that carriers assign to common expense accounts the remaining expenses, taxes and purchased services which are not solely related to either freight or passenger service. The following instructions govern the separation of common expense accounts between freight and passenger services.

§ 1242.03 Made by accounting divisions.



The separation shall be made by accounting divisions, where such divisions are maintained, and the aggregate of the accounting divisions reported for the quarter and for the year.

§ 1242.04 Special tests.

When the separation of common expense accounts between freight and passenger services is based upon special tests or service unit factors, such tests shall be made at sufficiently frequent intervals to represent actual operating conditions. The service unit factors used are those of the reporting period.

§ 1242.05 Operating expense account number notation.

(a) The operating expense account numbers consist of a six-digit coding structure divided into three two-digit groups. The first two-digit group denotes natural expenses; the second group denotes activities/subactivities for freight, passenger or common services; and the third group signifies applicable function assignment.

(b) For reporting purposes, four natural expense categories are utilized. The categories are: Salaries and wages (accounts 11-XX-XX); material, tools, supplies, fuels and lubricants (accounts 21-XX-XX); purchased services (accounts 31-XX-XX to 41-XX-XX, inclusive); and general (accounts 61-XX-XX to 65-XX-XX, inclusive, 51-XX-XX, 52-XX-XX, 53-XX-XX and 12-XX-XX).

(c) The symbol "XX" in the first two-digit group is used throughout the separation instructions to denote more than one natural expense associated with the same activity/subactivity-function account structure. For reporting purposes, the natural expense account numbers represented by "XX" include:

11—Salaries and wages.
21—Materials, tools, supplies, fuels, lubricants.
30 or 41—Purchased services.
30—Summation of certain purchased service accounts.
41—Other purchased services.
61—General.

(d) The "30" natural expense designation indicates a summation of specific purchased service accounts that are reported in total rather than individually. The specific accounts under the Way and Structures Activity except for administration functions include 39-1X-XX, Repairs Billed by Others, Dr.; 40-1X-XX, Repairs Billed to Others, Cr.; and 41-1X-XX, Other Purchased Services. For the Equipment Activity excluding administration functions, the "30" designation denotes the summation of 39-2X-XX and 41-2X-XX.

(e) The "41" natural expense designation (Other Purchased Services) is the purchased service category of the "XX" code for the following:

(1) Way and structures activity administration-function accounts,

(2) Equipment activity administration-function accounts,

(3) Transportation activity expense accounts, and

(4) General and administration activity expense accounts.

(f) The "61" general natural expense designation is applicable to all accounts with the "XX" symbol except transportation, train and yards accounts (XX-(33/43/53)-XX).

(g) The natural expense account number "50" is used throughout the

separation instructions to indicate the summation of accounts 52-XX-XX, Other casualties, and 53-XX-XX, Insurance, that are reported as one item, "Casualties and Insurance," (50-XX-XX).

(h) The number "98" in the function account group (last two digits) is used to designate the summation of a natural expense consisting of more than one functional assignment that is reported as one item. This includes Repairs Billed to Others, Cr.—Equipment (40-2X-XX). For example, the locomotive subactivity containing accounts 40-(21/24/26)-40, 40-(21/24/26)-41, and 40-(21/24/26)-48 are reported as 40-(21/24/26)-98.

§ 1242.06 Instructions for separation.

(a) Certain instructions for separating common expense accounts (dependent accounts) between freight and passenger services base the allocation on the proportional freight/passenger separation of other common expense accounts (independent accounts). The dependent account is frequently identified by an "XX" symbol in the natural expense position (first two digits) with corresponding independent accounts also identified by the "XX" natural expense symbol. Unless otherwise stated, the applicable natural expense associated with the "XX" symbol shall be the same for both the dependent and independent accounts.

(b) To illustrate, § 1242.10 provides instructions for separating common Way and Structures, Administration—Track Accounts (dependent accounts) designated by XX-19-02. The separation is based on certain other common Way and Structures accounts including Roadway-Running, XX-17-10, and Roadway-Switching, XX-18-10.

(c) As § 1242.05 states, the "XX" symbol denotes the following natural expenses for Way and Structures administration functions:

11—Salaries and wages,
21—Materials, tools, supplies, fuels, lubricants,
41—Other purchased services, and
61—General.

These natural expenses shall be individually applied to the separation rules in § 1242.10. In each case, the independent accounts providing the basis for freight/passenger separation of the dependent account shall have the same natural expense designation. For example, the basis of separating account 11-19-02, Salaries and Wages, Way and Structures, Administration—Track, would be based on certain independent accounts including 11-17/18-10, Salaries and Wages, Way and Structures, Running/Switching, Repair and Maintenance, Roadway.

OPERATING EXPENSES WAY AND STRUCTURES

§ 1242.10 Administration - track (Accounts XX-19-02).

Separate common administration—track expenses between freight and passenger services in the same proportion as the common expenses of the following accounts are separated between freight and passenger services:

Roadway:
Running (XX-17-10).
Switching (XX-18-10).
Ties:
Running (21-17-13).
Switching (21-18-13).
Rails:
Running (21-17-14).
Switching (21-18-14).
Other Track Materials:
Running (21-17-15).
Switching (21-18-15).
Ballast:
Running (21-17-16).
Switching (21-18-16).
Track Laying and Surfacing:
Running (XX-17-17).
Switching (XX-18-17).
Road Property Damaged:
Running (XX-17-48).
Switching (XX-18-48).
Other (XX-19-48).
Roadway Machines (XX-19-36).
Snow Removal (XX-19-38).
Dismantling Retired Road Property:
Running (XX-17-39).
Switching (XX-18-39).
Other (XX-19-39).

§ 1242.11 Administration—bridges and buildings (Accounts XX-19-03).

Separate common administration—bridges and buildings expenses between freight and passenger services in the same proportion as the common expenses of the following accounts are separated between freight and passenger services:

Tunnels and Subways:
Running (XX-17-11).
Switching (XX-18-11).
Bridges and Culverts:
Running (XX-17-12).
Switching (XX-18-12).
Electric Power Systems (XX-19-21).
Station and Office Buildings (XX-19-23).
Shop Buildings:
Locomotives (XX-19-24).
Other Equipment (XX-19-26).
Locomotive Servicing Facilities (XX-19-27).
Miscellaneous Buildings and Structures (XX-19-28).

§ 1242.12 Administration—signals (Accounts XX-19-04).

Separate common administration — signals expenses between freight and passenger services in the same proportion as the common expenses of the following accounts are separated between freight and passenger services.

Signals and Interlockers:
Running (XX-17-19).
Switching (XX-18-19).

§ 1242.13 Administration—Communications (Accounts XX-19-05).

Separate common administration—communications expenses between freight and passenger services in the same proportion as the common expenses of the following accounts are separated between freight and passenger services:

Communications Systems (XX-19-20).

§ 1242.14 Administration—other (Accounts XX-19-06).

Separate common administration—other expenses between freight and passenger services in the same proportion as the common expenses of the following accounts are separated between freight and passenger services:

Administration:
Track (XX-19-02).
Bridges and Buildings (XX-19-03).
Signals (XX-19-04).
Communications (XX-19-05).

§ 1242.15 Roadway, tunnels and subways, bridges and culverts, ties, rails, other track material, ballast, track laying and surfacing, and road property damaged (Accounts XX-17-10 to XX-18-12 inclusive, 21-17-13 to 21-18-16 inclusive, XX-17-17, XX-17-48 and X-18-48).

(a) The expenses for running and switching subactivities shall be separated between freight service and passenger service as follows:

(1) *Switching Tracks.*— (i) *Yard.* Expenses for yards used in common by freight and passenger services shall be apportioned on the basis of the respective switching locomotive unit-hours in the common yards. (ii) *Way:* Where the tracks at any one location are used in common by both freight and passenger services, expenses may be assigned to that service which makes the dominant use of them.

(2) *Running Tracks.* The expenses of tracks used in common by both services shall be apportioned on the basis of gross ton-miles (including locomotive ton-miles) handled over these tracks in the respective services.

§ 1242.16 Road property damaged—other (Accounts XX-19-48).

Separate common expenses in proportion to the total common expenses assigned to freight/passenger from the following Way and Structures accounts:

Road Property Damaged—Running (XX-17-48).
Road Property Damaged—Switching (XX-18-48).

§ 1242.17 Signals and interlockers (Accounts XX-17-19 and XX-18-19).

Separate common expenses on the basis of the total train-hours in running service, and/or the yard-switching plus train switching hours in the switching service over the tracks on which the common signals and interlockers are used.

§ 1242.18 Communication Systems (Accounts XX-19-20).

Separate common expenses on the basis of the common expense separation in:

Way and Structures—Administration—Track, Bridges and Culverts, and Signals (Accounts XX-19-02 to XX-19-04, inclusive),
Equipment — Administration — Locomotives and Other Equipment (Accounts XX-26-01 and XX-27-01).
Transportation — Administration — Train, Yard, and Administrative Support (Accounts XX-51-01, XX-52-01, and XX-55-01).
Dispatching Trains (Accounts XX-51-58).

§ 1242.19 Electric Power Systems (Accounts XX-19-21).

Separate common expenses on basis of common expenses of electric power

V 42 175 SEP 9 77 UMI

purchased or produced for motive power (Accounts XX–51–68 and XX–52–68).

§ 1242.20 Highway Grade Crossings (Accounts XX–17–22 and XX–18–22).

Separate running and switching common expenses according to distribution of the running and switching portions only of common expense accounts listed in § 1242.10, Administration-Track (Accounts XX–19–02).

§ 1242.21 Station and Office Buildings (Accounts XX–19–23).

If the sum of the direct freight and the direct passenger expenses is more than 50 percent of the total charges to this account for an accounting division, separate the common expenses on the basis of the directly assigned expenses in this account for the accounting division involved. If the sum of the direct freight and the direct passenger expenses does not aggregate to more than 50 percent of the total charges for an accounting division, the common expenses should be separated on the basis of special test. Where common expenses exist in an accounting division but the direct expenses are applicable to only one service, i.e., freight or passenger, the common expenses shall be separated on the basis of a special test. If the accounting is performed on a system basis rather than by accounting divisions, the common expenses shall be separated on the basis of a special study.

§ 1242.22 Shop buildings—Locomotives (Accounts XX–19–24).

Separate common expenses according to distribution of common expenses in the following accounts:

Machinery Repair (XX–26–40).
Locomotive—Repair and Maintenance (XX–26–41).

§ 1242.23 Shop Buildings—Freight Cars (Accounts XX–13–25).

These accounts pertain solely to freight service and contain no common expense for separation herein.

§ 1242.24 Shop Buildings—other equipment (Accounts XX–19–26).

Assign directly to freight (or as particular facts suggest otherwise).

§ 1242.25 Locomotive Servicing Facilities (Accounts XX–19–27).

Separate common expenses according to distribution of common expenses in the following accounts:

Locomotive Fuel (XX–51–67 and XX–52–67).
Electric Power Purchased or Produced for Motive Power (XX–51–68, XX–52–68).
Servicing Locomotives (XX–51–69 and XX–52–69).

§ 1242.26 Miscellaneous Buildings and Structures (Accounts XX–19–28).

Separate common expenses as specific facts indicate or according to distribution of common expenses listed in section 1242.11, Administration-Bridges and Buildings (Accounts XX–19–03).

§ 1242.27 Coal marine terminals, ore marine terminals, TOFC/COFC terminals, other marine terminals, motor vehicle loading and distribution facilities, and facilities for other specialized service operations (Accounts XX–13–29 to XX–13–35, inclusive).

These accounts pertain solely to freight service and contain no common expenses for separation herein.

§ 1242.28 Roadway machines, small tools and supplies, and snow removal Accounts XX–19–36 to XX–19–38, inclusive).

Separate common expenses according to distribution of common expenses listed in § 1242.14, Administration—Other (Accounts XX–19–06).

§ 1242.29 Fringe benefits (Accounts 12–17–00, 12–18–00, and 12–19–00).

Separate common expenses in the running subactivity in the same proportion as the salaries and wages, way and structures, common expenses in all accounts with a designated running subactivity. Separate common expenses in the switching subactivity in the same proportion as the salaries and wages, way and structure, common expense accounts with a designated switching activity. Separate common expenses in the other subactivity in the same proportion as the salaries and wages, way and structures, common expenses in all accounts with a designated other subactivity.

§ 1242.30 Dismantling retired road property and depreciation (Accounts XX–17–39, XX–18–39, XX–19–39, 62–17–00, 62–18–00 and 62–19–00).

Separate common expenses in each account for each subactivity (running, switching and other) in proportion to the separation of common repair and maintenance expenses associated with the particular common properties depreciated and/or dismantled.

§ 1242.31 Lease Rentals—debit and credit and other rents—debit and credit (Accounts 31–17–00, 31–18–00, 31–19–00, 32–17–00, 32–18–00, 32–19–00, 35–17–00, 35–18–00, 35–19–00, 36–17–00, 36–18–00, and 36–19–00).

(a) Separate common debit expense accounts in each subactivity (running, switching and other) in proportion to the separation of solely related freight or passenger service in each account. If there are no solely related expenses in an account or if the solely related expenses are assignable entirely to freight or to passenger service, separate common debit expense accounts on the basis of the same percentages calculated for the separation of administration—other (Accounts XX–19–06).

(b) Separate all common credit expense accounts on the same percentages calculated for the separation of administration—other (Accounts XX–19–06).

§ 1242.32 Joint facility rents—debit and credit and joint facility—debit and credit (Accounts 33–17–00, 33–18–00, 33–19–00, 34–17–00, 34–18–00, 34–19–00, 37–17–00, 37–18–00, 37–19–00, 38–17–00, 38–18–00, and 38–19–00).

(a) Solely related (freight or passenger service) debit expense accounts in each subactivity (running, switching and other) shall be assigned according to the use made of each facility by the reporting carrier, regardless of the use by other carriers. Common debit expenses shall be separated on the basis of the percentage separations of the solely related expenses in each individual account. If there are no solely related expenses or if the solely related expenses are assigned entirely to freight or to passenger service, separate common debit expenses on the same percentages calculated for the separation of administrative—other (Accounts XX–19–06).

(b) Separate all common credit expense accounts on the same percentages calculated for the separation of administration—other (Accounts XX–19–06).

§ 1242.33 Other expenses and casualties and insurance (Accounts XX–17–99, XX–18–99, XX–19–99, 50–17–00, 50–18–00 and 50–19–00).

Separate common expenses on the basis of the percentages calculated for the separation of administrative—other (Accounts XX–19–06).

OPERATING EXPENSES—EQUIPMENT

LOCOMOTIVES

§ 1242.34 Administration (Accounts XX–26–01).

Separate common expenses according to distribution of common expenses in the following accounts:

Repair and Maintenance (XX–26–41).
Machinery Repair (XX–26–40).
Equipment Damaged (XX–26–48).
Dismantling Retired Property (XX–26–39).
Depreciation (62–26–00).

§ 1242.35 Repair and maintenance (Accounts XX–26–41).

(a) The carrier maintains records of the repairs by individual locomotive units or classes of locomotive units.

(1) If individual locomotive units or classes of locomotive units are used exclusively in road-freight, road-passenger, yard-freight, or yard-passenger service, the separation shall be actual.

(2) If individual locomotive units or classes of locomotive units are used interchangeably (common) in road-freight (including train-switching), road passenger (including train switching), yard-freight or yard passenger service, separate the heavy shop repairs between these services on the basis of run-out unit miles of individual locomotive units or classes of locomotive units since the previous shopping; and separate the cost of running repairs between such services on the basis of the miles run by the individual locomotive unit or class of locomotive unit in each service during the accounting period for which the separation is being made.

(b) The carrier maintains records of heavy shop repair costs by individual locomotive units or classes of locomotive units, but does not maintain records of the cost of running repairs by individual locomotive units or classes of locomotive units

(1) The heavy shop repairs shall be separated as indicated in paragraph (a) of this section.

(2) The common expenses of running repairs shall be separated among road-freight (including train switching), road passenger (including train switching), yard-freight and yard-passenger services on the basis of locomotive unit miles for the accounting period for which the separation is being made.

(c) The carrier does not maintain records of either heavy shop repairs or running repairs by individual locomotive units or classes of locomotive units. The expenses shall be separated among road-freight service (including train-switching), road-passenger service (including train switching), yard freight, and yard passenger services, on the basis of locomotive unit-miles for the accounting period for which the separation is being made.

§ 1242.36 Machinery repair and equipment damaged (Accounts XX–26–40 and XX–26–48).

Separate common expenses according to separation of common expenses in repair and maintenance (Accounts XX–26–41).

§ 1242.37 Dismantling retired property and depreciation (Accounts XX–26–39 and 62–26–00).

Separate common expenses in each account in proportion to the separation of common repair and maintenance expenses associated with the particular common properties depreciated and/or dismantled.

§ 1242.38 Fringe Benefits (Account 12–26–00).

Separate common expenses in proportion to the split of common salaries and wages in administration, locomotive repair and maintenance, machinery repair, equipment damaged, and dismantling retired road property (Accounts 11–26–01, 11–26–41, 11–26–40, 11–26–48, and 11–26–39).

§ 1242.39 Lease rentals—debit and credit, other rents—debit and credit, and repairs billed to others (Accounts 31–26–00, 32–26–00, 35–26–00, 36–26–00 and 40–26–98).

(a) Separate common debit expense accounts in proportion to the assignment of solely related freight or passenger service in each individual debit account. If there are no solely related expenses or if the solely related expenses are assigned entirely to freight or passenger service, separate common debit expense accounts on the same percentage basis calculated for the separation of administration (Accounts XX–26–01).

(b) Separate all common credit accounts on the same percentages calculated for the separation of administration (Accounts XX–26–01).

§ 1242.40 Joint facility rents—debit and credit, and joint facility—debit and credit (Accounts 33–26–00, 34–26–00, 37–26–00 and 38–26–00).

(a) Solely related freight and passenger debit expense accounts shall be assigned according to the use made of each facility by the reporting carrier, regardless of the use by other carriers. Common debit expenses shall be separated on the basis of the percentage separation of the solely related expenses; or if the solely related expenses are assigned entirely to freight or passenger service, separate common expenses on the same percentages calculated for the separation of administration (Accounts XX–26–01).

(b) Separate all common credit expense accounts on the same percentages calculated for the separation of administration (Accounts XX–26–01).

§ 1242.41 Other and casualties and insurance (Accounts XX–26–99 and 50–26–00).

Separate common expenses on the basis of percentages calculated for the separation of administration (Accounts XX–26–01).

FREIGHT CARS

1242.42 Administration, repair and maintenance, machinery repair, equipment damaged, dismantling retired property, fringe benefits, other casualties and insurance, lease rentals, joint facility rents, other rents, depreciation, joint facility, repairs billed to others, and other (Accounts XX–22–01, XX–22–42, XX–22–40, XX–22–48, XX–22–39, 12–22–00, 50–22–00, 31–22–00 to 38–22–00 inclusive, 62–22–00, 40–22–98 and XX–22–99).

These accounts pertain solely to freight service and contain no common expenses for separation herein.

OTHER EQUIPMENT

§ 1242.43 Administration (Accounts XX–27–01).

Separate common expenses according to freight/passenger separation of the following accounts:

Passenger and Other Revenue Equipment (XX–27–45).
Computers and Data Processing Equipment (XX–27–46).
Work and Other Non-Revenue Equipment (XX–27–47).

§ 1242.44 Trucks, trailers, and containers (Revenue Service) and floating equipment (Revenue Service) (Accounts XX–23–43 and XX–23–44).

These accounts pertain solely to freight service and contain no common expenses for separation herein.

§ 1242.45 Passenger and other revenue equipment (Accounts XX–27–45).

Separate as particular facts suggest.

§ 1242.46 Computers and data processing equipment (Accounts XX–27–46).

If the sum of the direct freight and the direct passenger expenses is more than 50 percent of the total charges to this account for an accounting division, separate the common expenses on the basis of the directly assigned expenses in this account for the accounting division involved. If the sum of the direct freight and the direct passenger expenses does not aggregate 50 percent of the total charges for an accounting division, the common expenses shall be separated on the basis of a special test. If common expenses exist in an accounting division but the direct expenses are applicable to only one service, i.e., freight or passenger, the common expenses shall be separated on the basis of a special test. If the accounting is performed on a system basis rather than by accounting divisions, follow the intent of the above instructions.

§ 1242.47 Machinery (Accounts XX–27–40).

Separate common expenses on the basis of the freight/passenger separation of administration (Accounts XX–27–01).

§ 1242.48 Work and other non-revenue equipment (Accounts XX–27–47).

Separate common expenses according to distribution of common expenses in Way and structures—administration—other (Accounts XX–19–06).

§ 1242.49 Equipment damaged (Accounts XX–27–48).

Separate common expenses according to distribution of common expenses in machinery, passenger and other revenue equipment, computer and data processing equipment and work and other non-revenue equipment accounts (Accounts XX–27–40, XX–27–45, XX–27–46, and XX–27–47).

§ 1242.50 Fringe benefits (Account 12–27–00).

Separate common expenses in proportion to the percentage separation of common salaries and wages in administration (Account 11–27–01).

§ 1242.51 Dismantling retired property and depreciation (Accounts XX–27–39 and 62–27–00).

Separate common expenses in proportion to the separation of common repair and maintenance expenses associated with the particular common property depreciated and/or dismantled.

§ 1242.52 Lease rentals—debit and credit, other rents—debit and credit, repairs billed to others—credit (Accounts 31–27–00, 32–27–00, 35–27–00, 36–27–00, and 40–27–98).

Separate common debit expense accounts in proportion to the separation of solely related (freight or passenger serv-

V 42 175 SEP 9 77 UMI

ice) in each individual account. If there are no solely related expenses or if the solely related expenses are assignable entirely to freight or passenger service, separate common debit expense accounts on the same percentages calculated for the separation of administration (Accounts XX–27–01).

§ 1242.53 Joint facility rents—debit and credit and joint facility—debit and credit (Accounts 33–27–00, 34–27–00, 37–27–00 and 38–27–00).

(a) Solely related freight and passenger service debit expense accounts shall be assigned according to the use made of each facility by the reporting carrier, regardless of the use made of the facility by other carriers. Common debit expense accounts shall be separated on the basis of the percentage separation of the solely related expenses in each individual account. If there are no solely related expenses or if the solely related expenses are assigned entirely to freight or passenger service, separate common expenses on the same percentages calculated for the separation of administration (Accounts XX–27–01).

(b) Separate all common credit expense accounts on the basis of the same percentages calculated for the separation of administration (Accounts XX–27–01).

§ 1242.54 Other and casualties and insurance (Accounts XX–27–99 and 50–27–00).

Separate common expenses on the basis of the percentages calculated for the separation of administration (Accounts XX–27–01).

TRANSPORTATION—TRAIN OPERATIONS

§ 1242.55 Administration (Accounts XX–51–01).

Separate common expenses according to distribution of common expenses in the following accounts:

Engine Crews (XX–51–56).
Train Crews (XX–51–57).
Dispatching Trains (XX–51–58).
Operating Signals and Interlockers (XX–51–59).
Operating Drawbridges (XX–51–60).
Highway Crossing Protection (XX–51–61).
Train Inspection and Lubrication (XX–51–62).
Locomotive Fuel (XX–51–67).
Electric Power Purchased/Produced for Motive Power (XX–51–68).
Servicing Locomotives (XX–51–69).
Clearing Wrecks (XX–51–63).

§ 1242.56 Engine crews and train crews (Accounts XX–51–56 and XX–51–57.)

Separate common expenses on the basis of direct assignment or if there are no directly assignable expenses, separate on the basis of train hours, including train switching hours.

§ 1242.57 Dispatching trains (Accounts XX–51–58).

Separate common expenses on the basis of train hours, including train switching hours.

§ 1242.58 Operating signals and interlockers, operating drawbridges, highway crossing protection (Accounts XX–51–59, XX–51–60 and XX–51–61).

Separate common expenses on the basis of total train hours (including train switching hours) of the particular common operating divisions or track segment on which the common signals, interlockers, drawbridges and highway crossings are located.

§ 1242.59 Train inspection and lubrication (Accounts XX–51–62).

Separate common expenses on basis of directly assigned expenses. If there are no directly assignable expenses, separate on the basis of train miles.

§ 1242.60 Locomotive fuel, electric power purchased/produced for motive power and servicing locomotives (Accounts XX–51–67, XX–51–68 and XX–51–69).

Separate common expenses in each account on basis of direct expenses. If there are no direct expenses, separate on the basis of train hours and way-switching service hours.

§ 1242.61 Freight lost or damaged—solely related (to train) (Accounts 51–51–00).

Separate common expenses on the basis of proportion of the solely related expenses assigned to freight and passenger services or on the basis of a special study.

§ 1242.62 Clearing wrecks (Accounts XX–51–63).

Separate common expenses according to specific circumstances.

§ 1242.63 Fringe benefits (Account 12–51–00).

Separate common expenses in proportion to the percentage separation calculated for the salaries and wages account—administration (Account 11–51–01).

§ 1242.64 Joint facility—debit and credit (Accounts 37–51–00 and 38–51–00).

(a) Solely related freight and passenger service debit expense accounts shall be assigned according to the use made of each facility by the reporting carrier, regardless of the use made of the facility by other carriers. Common debit expense accounts shall be separated on the basis of the percentage separation of the solely related expenses. If there are no solely related expenses or if the solely related expenses are assigned entirely to either freight or passenger service, separate common expenses on the same percentages calculated for the separation of administration (Accounts XX–51–01).

(b) Separate common credit expense accounts on the basis of the percentages calculated for the separation of administration (Accounts XX–51–01).

§ 1242.65 Other and casualties and insurance (Accounts XX–51–99 and 50–51–00).

Separate common expenses on the basis of the percentages calculated for the separation of administration (Accounts XX–51–01).

YARD OPERATIONS

§ 1242.66 Administration (Accounts XX–52–01).

Separate common expenses according to distribution of common expenses in the following accounts:

Switch Crews (XX–52–64).
Controlling Operations (XX–52–65).
Yard and Terminal Clerical (XX–52–66).
Operating Switches, Signals, Retarders and Humps (XX–52–59).
Locomotive Fuel (XX–52–67).
Servicing Locomotives (XX–52–69).
Electric Power Purchased/Produced for Motive Power (XX–52–68).
Clearing Wrecks (XX–52–63).

§ 1242.67 Switch crews; controlling operations; yard and terminal clerical; locomotive fuel; electric power purchased/produced for motive power; operating switches, signals, retarders, and humps; and servicing locomotives (accounts XX–52–64, XX–52–65, XX–52–66, XX–52–59, XX–52–67, XX–52–68 and XX–52–69).

Separate common expenses on the basis of the distribution of freight and passenger yard switching hours in those yards common to both freight and passenger services.

§ 1242.68 Freight lost or damaged—solely related (to yard) (Account 51–52–00).

Separate common expenses on the basis of the solely related freight and passenger expenses or on the basis of a special study.

§ 1242.69 Clearing wrecks (Accounts XX–52–63).

Separate common expenses according to specific circumstances.

§ 1242.70 Fringe benefits (Account 12–52–00).

Separate common expenses in proportion to the percentage separation calculated for the salaries and wages administration account (Account 11–52–01).

§ 1242.71 Joint facility—debit and credit (Accounts 37–52–00 and 38–52–00).

(a) Solely related freight and passenger service debit expenses accounts shall be assigned according to the use made of each facility by the reporting carriers, regardless of the use made of the facility by other carriers. Common debit expenses shall be separated on the basis of the percentage separation of the solely related expenses. If there are no solely related expenses or if the solely related expenses are assigned entirely to freight or passenger service, separate common expenses on the same percentages calculated for the separation of administration (Accounts XX–52–01).

(b) Separate common credit expense account on the basis of the percentages calculated for the separation of administration (Accounts XX–52–01).

§ 1242.72 Other and casualties and insurance (Accounts XX–52–99 and 50–52–00).

Separate common expenses on the basis of the percentages calculated for the separation of administration (Accounts XX–52–01).

TRAIN AND YARD OPERATIONS COMMON

§ 1242.73 Cleaning car interiors and freight lost and damaged—all other (Accounts XX–53–70 and 51–53–00).

Separate common expenses on basis of solely related freight and passenger expenses or special study.

§ 1242.74 Adjusting and transferring loads, and car loading devices and grain doors (Accounts XX–33–71 and XX–33–72).

These accounts pertain solely to freight service and contain no common expenses for separation herein.

§ 1242.75 Fringe benefits (Account 12–53–00).

Separate common expenses in proportion to the freight/passenger separation calculated for the salaries and wages—cleaning car interiors common account (Account 11–53–70).

SPECIALIZED SERVICE OPERATIONS

§ 1242.76 Administration; pickup and delivery, marine line haul, and rail substitute service; loading, unloading and local marine; protective services; freight lost or damaged—solely related; fringe benefits; casualties and insurance; joint faacility, and other (Accounts XX–34–01, XX–34–73, XX–34–74, XX–34–75, 51–34–00, 12–34–00, 50–34–00, 37–34–00, 38–34–00 and XX–34–99).

These accounts pertain solely to freight service and contain no common expenses for separation herein.

ADMINISTRATIVE SUPPORT OPERATIONS

§ 1242.77 Administration (Accounts XX–55–01).

Separate common expenses in the same proportion as common expenses are separated in employees performing clerical and accounting functions, communication systems operations and loss and damage claims processing (Accounts XX–55–76, XX–55–77 and XX–55–78).

§ 1242.78 Employees performing clerical and accounting functions, and loss and damage claims processing (Accounts XX–55–76 and XX–55–78).

If the sum of the direct freight and the direct passenger expenses is more than 50 percent of the total charges to this account for an accounting division, separate the common expenses on the basis of the directly assigned expenses in this account for the particular accounting division. If the sum of the direct freight and the direct passenger expenses does not aggregate 50 percent of the total charges for an accounting division, the common expenses shall be separated on the basis of special test. If common expenses exist in an accounting division but the direct expenses are applicable to only one service, i.e., freight or passenger, and even though the direct charges are over 50 percent of the total charges, the common expenses shall be separated on the basis of a special test. If the accounting is performed on a system basis rather than by accounting division, follow the intent of the above instructions.

§ 1242.79 Communication systems operations (Accounts XX–55–77).

Separate common expenses on basis of total common expense separations in the following administration and dispatching trains accounts:

Administration.
Way and Structures:
Track (XX–19–02).
Bridges and Structures (XX–19–03).
Signals (XX–19–04).
Other (XX–19–06).
Equipment:
Locomotives (XX–26–01).
Other Equipment (XX–27–01).
Transportation:
Train Operations (XX–51–01).
Yard Operations (XX–52–01).
Dispatching Trains—Transportation (XX–51–58).

§ 1242–80 Fringe benefits (Account 12–55–00).

Separate common expenses in proportion to the percentage separation calculated for the salaries and wages—administration account (Account 11–55–01).

§ 1242.81 Joint facility—debit and credit (Accounts 37–55–00 and 38–55–00).

(a) Solely related freight and passenger service debit expense accounts shall be assigned according to the use made of each facility by the reporting carriers, regardless of the use made of the facility by other carriers. Common debit expenses shall be separated on the basis of the percentage separation of the solely related expenses. If there are no solely related expenses or if the solely related expenses are assigned entirely to either freight or passenger service, separate common expenses on the same percentages calculated for the separation of administration (Accounts XX–55–01).

(b) Separate common credit expenses on the basis of the percentages calculated for the separation of administration (Accounts XX–55–01).

§ 1242.82 Other and casualties and insurance (Accounts XX–55–99 and 50–55–00).

Separate common expenses on the basis of the percentages calculated for the separation of administration (Accounts XX–55–01).

OPERATING EXPENSES, GENERAL AND ADMINISTRATIVE

§ 1242.83 Officers—general superintendence; accounting, auditing and finance; management services and data processing; personnel and labor relations; legal and secretarial; research and development; writedown of uncollectible accounts; property taxes; other taxes except on corporate income or payrolls; and other (Accounts XX–63–01, XX–63–86, XX–63–87, XX–63–91, XX–63–92, XX–63–94, 63–63–00, 64–63–00, 65–63–00 and XX–63–99).

Separate common expenses in proportion to the separation of all other common expenses except General and Administrative Expenses.

§ 1242.84 Marketing, sales, and public relations and advertising (Accounts XX–63–88, XX–63–89 and XX–63–93).

Separate each common expense account on the basis of the solely related freight and passenger expense accounts.

§ 1242.85 Fringe benefits (Account 12–63–00).

Separate the common expenses in proportion to the total common salaries and wages expense separation (Accounts 11–XX–XX) determined in Section 1242.83 and 1242.84.

§ 1242.86 Industrial development (Accounts XX–61–90).

These accounts pertain solely to freight service and contain no common expenses for separation herein.

§ 1242.87 Joint facility—debit and credit and casualties and insurance (Accounts 37–63–00, 38–63–00 and 50–63–00).

Separate the common expenses in proportion to the total of all common expense separations determined in §§ 1242.–83 and 1242.84 above.

NOTE.—If compliation of the data in compliance with any of the above separation rules results in an undue burden in accounting expense, the carrier may request relief from such rules by letter to the Director, Bureau of Accounts. If reliable data can be developed through other methods and procedures, the carrier may request substitution of such methods also by letter to the Director, Bureau of Accounts. In both cases, the carrier shall support the request with full details.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

CERTAIN STOCKYARDS AND LIVESTOCK MARKETS

Approval

The regulations in 9 CFR Part 76, as amended, contain restrictions on the interstate movement of swine and swine products to prevent the spread of hog cholera and other swine diseases. This document adds certain livestock markets to the list of livestock markets approved for purposes of the regulations on the basis of a determination of their eligibility for such approval under § 76.18 of the regulations and removes from the list certain other livestock markets which have been found no longer to qualify for such approval.

The following livestock markets preceded by an asterisk are specifically approved to handle any class of swine and those livestock markets not preceded by an asterisk are specifically approved to handle slaughter swine only:

ALABAMA

Casey's Selma Stockyard, Selma.
*Hodges Stockyard, Inc., Montgomery.
Pickens County Livestock Commission Co., Aliceville.
*Winfield Livestock Commission Co., Winfield.

ARKANSAS

Central Livestock Auction, Inc., Morrilton.
Ola Livestock Market, Ola.
White Livestock Auction, Russellville.

COLORADO

Clougherty Packing Co., Greeley.

GEORGIA

B. H. Harrison Livestock Co., Bainbridge.
Miller Livestock Co., Colquitt.

IDAHO

*Rexburg Livestock Auction, Inc., Rexburg.

ILLINOIS

*Paris Livesotck Sales Co., Paris.

IOWA

*Bowman Order Buyers, De Witt.
*Porth & Baxter, De Witt.

KANSAS

*Coffeyville Livestock Sales Co., Inc., Coffeyville.
*Concordia Sales Co., Concordia.
*Clay Center Livestock Co., Inc., Clay Center.
Farmland Foods, Seneca.
*Goodland Livestock Commision Co., Inc., Goodland.
*Hays Livestock Market Center, Inc., Hays.
*J. J. Livestock Commission Co., Effingham.
*Mid-Kansas Swine Improvement Association, Hutchinson.
*Moline Auction Co., Inc., Moline.

KENTUCKY

*Clark County Livestock Market, Winchester.
Elizabeth NFO Reload, Elizabethtown.
*Farmers Livestock Marketing Corp., Russellville.
*NFO Collection Point, Walton.
Purchase Reload NFO, Fancy Farm.
*Good Day Stockyards, Princeton.
*Garfield Auction Barn, Garfield.

MINNESOTA

*Minnesota Feeder Pig Market, Inc., Morris.
*Lewiston Livestock Market, Lewiston.
*Skelton Feeder Pig Market, Bemidji.
*Speldrich Feeder Pig Market, Belgrade.

MISSOURI

*Brookfield Livestock Auction, Inc., Brookfield.
*Jack Civils Sales Co., Inc., Butler.
*McDonald County Sale Co., Jane.
Meyer Livestock, Granada.
*Mid-West Livestock Market, Inc., Nevada.
*Moberly Auction Co., Inc., Moberly.
*Mountain View Sales Co., Mountain View.
*Platte County Livestock Co., Platte City.
Richland Livestock, Richland.
*Savannah Sales Co., Savannah.
*Summersville Livestock Market, Summersville.
*Van Meter Auction, Kingsville.

NEBRASKA

*Creighton Livestock Market, Inc., Creighton.
*Huss Platte Valley Auction, Inc., Kearney.
*Midwest Livestock Commission Co., Inc., McCook.
*Pawnee Livestock Inc., Pawnee City.
*Platte Valley Livestock Auction, Inc., Gering.

NORTH CAROLINA

Bill Martin, Greensboro.
Turner's Livestock, Inc., Elizabeth City.
William A. Crofton Livestock Market, Rowland.
W. H. Horney, Siler City.

NORTH DAKOTA

*Bowman Livestock Auction Market, Bowman.
*Park River Livestock Exchange, Park River.

SOUTH DAKOTA

*Eureka Sales Co., Eureka.
*Herreid Livestock Market, Herreid.

TENNESSEE

*Warren County Livestock Asen., McMinnville.

VIRGINIA

Blackstone Livestock Market, Blackstone.
Caret Livestock Market, Caret.
*Madison Livestock Market, Inc., Madison Mills.
Orange Livestock Market, Orange.
*Petersburg Livestock Market, Petersburg.
Roanoke-Hollins Stockyard, Hollins.

WISCONSIN

Peshtigo Livestock Sales, Peshtigo.

The following livestock markets are deleted from the specifically approved lists:

ALABAMA

*Hodges Stockyard, Inc., Montgomery.
Pickens County Livestock Co., Aliceville.

FLORIDA

*H. S. Camp & Sons, Ocala.

IDAHO

Rexburg Livestock Auction, Inc., Rexburg.

ILLINOIS

Paris Livestock Sales Co., Paris.

IOWA

*Marshall County Feeder Pig Association, Marshalltown.

KANSAS

*Clay Center Livestock, Inc., Clay Center.
*Coffeyville Livestock Sales, Coffeyville.

(Sec. 2, 32 Stat. 792, as amended; secs. 4 and 5, 23 Stat. 32, as amended; sec. 1, 75 Stat. 481; sec. 1, 32 Stat. 791, as amended; secs. 3 and 4, 33 Stat. 1265, as amended; secs. 3 and 11, 76 Stat. 130, 132 (21 U.S.C. 111–113, 114g, 120, 125, 126, 134b, 134f; 37 FR 28464, 28477, 38 FR 19140).)

Effective date. The foregoing notice shall become effective on Setpember 9, 1977.

This action imposes certain restrictions necessary to prevent the spread of hog cholera and relieves certain restrictions presently imposed. It should become effective promptly to accomplish its purpose in the public interest and to be of maximum benefit to persons subject to the restrictions which are relieved. Accordingly, under the administrative procedure provisions of 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this action are impracticable and contrary to the public interest, and good cause is found for making this notice effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 1st day of September 1977.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

J. K. ATWELL,
Acting Deputy Administrator, Veterinary Services.

Soil Conservation Service

BUCK CREEK WATERSHED, ET AL.

Authorization for Watershed Planning

Concerned State Conservationists of the Soil Conservation Service have been authorized to provide planning assistance to local organizations for the indicated watersheds. The State Conservationists may proceed with investigations and surveys as necessary to develop watershed plans under authority of the Watershed Protection and Flood Prevention Act, Pub. L. 83-566, and in accordance with requirements of the National Environmental Policy Act of 1969, Pub. L. 91-190.

Persons interested in these projects may contact the State Conservationists listed below:

Buck Creek Watershed, Covington County, Ala., State Conservationist—William B. Lingle, Soil Conservation Service, Wright Building, 138 South Gay St., P.O. Box 311, Auburn, Ala. 36830.

Saint David Watershed, Cochise County, Ariz., State Conservationist—Thomas G. Rockenbaugh, Soil Conservation Service, 230 North 1st Ave., 3008 Federal Building, Phoenix, Ariz. 85025.

Tyronza River Watershed, Miss., and Poinsett Counties, Ark., State Conservationist—Maurice J. Spears, Soil Conservation Service, Federal Building, Room 5029, 700 West Capitol St., P.O. Box 2323, Little Rock, Ark. 72203.

Track Ditch Watershed, Chaffee County, Colo., State Conservationist—Robert G. Halstead, Soil Conservation Service, Room 313, 2490 West 26th Ave., P.O. Box 17107, Denver, Colo. 80217.

Rock Creek Watershed, Cassia, Oneida, and Power Counties, Idaho, State Conservationist—Amos I. Garrison, Jr., Soil Conservation Service, Room 345, 304 North 8th St., Boise, Idaho 83702.

Lower Des Plaines Tributaries Watershed, Lake, Cook, Will, and DuPage Counties, Ill., State Conservationist—Daniel E. Holmes, Soil Conservation Service, Federal Building, 200 West Church St., P.O. Box 678, Champaign, Ill. 61820.

Hacklebarney Watershed, Montgomery and Adams Counties, Iowa, State Conservationist—William J. Brune, Soil Conservation Service, 823 Federal Building, 210 Walnut St., Des Moines, Iowa 50309.

Parkhurst Siding Watershed, Aroostook County, Maine, State Conservationist—Warwick M. Tinsley, Jr., Soil Conservation Service, USDA Building, University of Maine, Orono, Maine 04473.

Stevens-Callahan Watershed, Lancaster, Cass, and Saunders Counties, Nebr., State Conservationist—Benny Martin, Soil Conservation Service, Federal Building—U.S. Courthouse, Room 345, Lincoln, Nebr. 68508.

Dry Creek Watershed, Lincoln County, Okla., State Conservationist—Roland R. Willis, Soil Conservation Service, Agricultural Center Office Building, Farm Rd. and Brumley St., Stillwater, Okla. 74074.

Thomas-Cottonwood Creek Watershed, Lake County, Oreg., State Conservationist—Guy W. Nutt, Soil Conservation Service, Federal Office Building, 16th Floor, 1220 Southwest 3rd Ave., Portland, Oreg. 97204.

Quittapahilla Creek Watershed, Lebanon County, Pa., State Conservationist—Graham T. Munkittrick, Soil Conservation Service, Federal Building and U.S. Courthouse, Box 985, Federal Square Station, Harrisburg, Pa. 17108.

Six-Mile Creek Watershed, Brookings and Deuel Counties, S.Dak., State Conservationist—Robert D. Swenson, Soil Conservation Service, 239 Wisconsin Ave., SW., P.O. Box 1357, Huron, S.Dak. 57350.

Wolf Creek Watershed, Gibson and Carroll Counties, Tenn., State Conservationist—Donald C. Bivens, Soil Conservation Service, 561 U.S. Courthouse, Nashville, Tenn. 37203.

Upper Appomattox River Watershed, Appomattox, Buckingham, Cumberland, and Prince Edward Counties, Va., State Conservationist—David N. Grimwood, Soil Conservation Service, Federal Building, Room 9201, 400 North 8th St., P.O. Box 10026, Richmond, Va. 23240.

Swale Creek Watershed, Klickitat County, Wash., State Conservationist—Galen S. Bridge, Soil Conservation Service, 360 U.S. Courthouse, West 920 Riverside Ave., Spokane, Wash. 99201.

Middle Grave Creek Watershed, Marshall County, W. Va., State Conservationist—Craig M. Right, Soil Conservation Service, U S Post Office and Federal Office Building, P.O. Box 865, Morgantown, W. Va. 26505.

Dated: September 2, 1977.

Rural Electrification Administration

MINNKOTA POWER COOPERATIVE

Final Environmental Impact Statement

Notice is hereby given that the Rural Electrification Administration has prepared a Final Environmental Impact Statement in accordance with Section 102(2)(C) of the National Environmental Policy Act of 1969, in connection with a request for a long guarantee commitment from the Rural Electrification Administration for Minnkota Power Cooperative of Grand Forks, N. Dak. This loan guarantee commitment will assist in obtaining financing to purchase a 30 percent share in a new 440 MW generating plant to be constructed near Beulah, N. Dak., with associated transmission facilities.

Additional information may be secured on request, submitted to Mr. Richard F. Richter, Assistant Administrator—Electric, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250. The Final Environmental Impact Statement may be examined during regular business hours at the offices of REA in the South Agriculture Building, 12th Street and Independence Avenue SW., Washington, D.C., or at the borrower address indicated above.

Final REA action with respect to this matter (including any release of funds) may be taken after October 11, 1977, but only after REA has reached satisfactory conclusions with respect to its environmental effects and after the requirements set forth in the National Environmental Policy Act of 1969 have been met.

Dated at Washington, D.C., this 8th day of September 1977.

DAVID A. HAMIL,
Administrator, Rural Electrification Administration.

Bureau of the Census

CENSUS ADVISORY COMMITTEE OF THE AMERICAN STATISTICAL ASSOCIATION

Public Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C., Appendix I (Supp. V, 1975)), notice is hereby given that the Census Advisory Committee of the American Statistical Association will convene on September 29 and 30, 1977 at 9 a.m. The Committee will meet in Room 2424, Federal Building 3 at the Bureau of the Census in Suitland, Md.

The Census Advisory Committee of the American Statistical Association was established in 1919. It advises the Director, Bureau of the Census, on the Bureau's programs as a whole and on their various parts, considers priority issues in the planning of censuses and surveys, examines guiding principles, advises on questions of policy and procedures, and responds to Bureau requests for opinions concerning its operations.

The Committee is composed of 15 members appointed by the President of the American Statistical Association.

The agenda for the September 29 meeting, which will adjourn at 6 p.m. is: (1) Topics of current interest at the Bureau of the Census; (2) review of published Bureau revisions to the Manufacturers' Shipments, Inventories, and Orders Series; (3) review of the process for setting Census Bureau program priorities; (4) coverage improvements for the 1980 census; (5) evaluation of the Survey of Income and Education; and (6) development of Committee recommendations.

The agenda for the September 30 meeting, which will adjourn at 12:30 p.m. is: (1) Committee discussion of recommendations; (2) progress report on the National Science Foundation—American Statistical Association—Census Bureau Program to Improve the Social Science Data Base; (3) progress report on the new Census programs for fuels and energy; (4) professional audit review team for the Federal Government's energy conservation—progress report; (5) Census Bureau responses to prior Committee recommendations, and the status of specific Bureau activities described at earlier Committee meetings; and (6) recommendations, plans, and suggested agenda items for the next meeting.

The meeting will be open to the public, and a brief period will be set aside on September 30 for public comment and questions. Extensive questions or statements must be submitted in writing to the Committee Control Officer at least 3 days prior to the meeting.

Persons wishing additional information concerning this meeting or who wish to submit written statements may contact the Committee Control Officer, Mr. James L. O'Brien, Assistant Chief, Statistical Research Division, Bureau of the Census, Room 3573, Federal Building 3, Suitland, Md. (mail address: Washington, D.C. 20233); telephone 301-763-5350.

MANUEL D. PLOTKIN,
Director, Bureau of the Census.

SEPTEMBER 6, 1977.

Domestic and International Business Administration

SUBCOMMITTEE ON EXPORT ADMINISTRATION OF THE PRESIDENT'S EXPORT COUNCIL

Partially Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. I (Supp. V, 1975)), notice is hereby given that a meeting of the Subcommittee on Export Administration of the President's Export Council will be held on Friday, September 30, 1977, at 9:00 a.m., in Room 4830 of the Department of Commerce, Washington, D.C.

The Subcommittee on Export Administration was initially established on June 1, 1976. On January 6, 1977, the Assistant Secretary for Administration approved the recharter and extension through December 31, 1978, of the Subcommittee, pursuant to the provisions of Section 3 of Executive Order 11753 (December 20, 1973), as extended by Section 1(k) of Executive Order 11948 (December 20, 1976), and the Federal Advisory Committee Act.

The Subcommittee advises the Secretary of Commerce on matters pertinent to those portions of the Export Administration Act of 1969, as amended (50 U.S.C. App. 2401 et seq.) that deal with United States policy of encouraging trade with all countries with which the United States has diplomatic or trading relations and of controlling trade for national security and foreign policy reasons.

The Subcommittee meeting agenda has seven parts:

GENERAL SESSION

9:00-10:30

I. Unfinished business: Demo Policy; MacAvoy Report; Service Licenses; Bucy Report; Brief Explanation of the Export Administration Amendments of 1977; Simplification & Clarification of Export Administration Regulations.

II. Future Agenda Topics.

III. Panel Presentation on National Security & Foreign Policy Export Controls.

IV. Other Business.

(Coffee Break)

EXECUTIVE SESSION

10:45-4:00

V. Discussion of Panel's Presentation.

(Lunch)

VI. Update on COCOM List Review Preparations.

VII. Discussion of Technology Transfer Control Policy.

The General Session is open to the public. To the extent time permits, members of the public may present oral statements to the Subcommittee. Written statements may be submitted at any time before or after the meeting.

With respect to Agenda Items V, VI and VII, the Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on January 11, 1977, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended by section 5(c) of the Government In the Sunshine Act (Pub. L. 94-409), that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1). Such matters are specifically authorized under criteria established by Executive Order 11652 to be kept secret in the interest of the national defense or foreign policy. Materials to be reviewed and discussed by the Subcommittee during the Executive Session of the meeting have been properly classified under the Executive Order. All Subcommittee members have appropriate security clearances.

The complete Notice of Determination to close portions of the series of meetings of the Subcommittee on Export Administration of the President's Export Council is printed at 42 FR 3011 (January 14, 1977).

Copies of the minutes of the General Session will be available upon written request addressed to Mr. Lawrence J. Brady, Deputy Director, Office of Export Administration, Room 1886-C, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Brady either in writing at the address shown above or by telephone at 202-377-4188.

Dated: September 1, 1977.

STANLEY J. MARCUSS,
Deputy Assistant Secretary for Domestic Commerce.

Maritime Administration

LIST OF FREE WORLD AND POLISH VESSELS ARRIVING IN CUBA SINCE JANUARY 1, 1963

Notice

The National Security Action Memorandum No. 220, dated February 5, 1963, which prohibited the shipment of U.S. Government-owned or financed cargoes from the United States on foreign flag vessels if such vessels had called at a Cuban port on or after January 1, 1963, was rescinded by the National Security Council effective June 10, 1977.

In accordance with this action, the list of free world and Polish vessels arriving in Cuba since January 1, 1963, as noticed in the FEDERAL REGISTER issue of February 28, 1963 (28 FR 2011), and subsequent notices, is hereby discontinued.

By Order of the Assistant Secretary for Maritime Affairs.

Dated: September 1, 1977.

ROBERT J. BLACKWELL,
Assistant Secretary for Maritime Affairs.

[FR Doc.77-26265 Filed 9-8-77;8:45 am]

[Docket No. S-577]

STATES STEAMSHIP CO.

Application

Notice is hereby given that States Steamship Co. has applied for written permission from the Maritime Administration under section 805(a) of the Merchant Marine Act, 1936, as amended, for the carriage of passengers between California and Hawaii. Such written permission will be required in the event a new long-term operating-differential subsidy contract is concluded between States and the Maritime Subsidy Board, which long-term contract has been the subject of hearing before the Board in Docket S-447.

States has also applied for a short-term interim contract as described in the FEDERAL REGISTER of August 26, 1977 (42 FR 43112). In the event such a short-term contract application is granted, written permission for the above-described domestic service will be required under section 805(a).

As information, all of the vessels of States, both RO/RO and C4 types, have capacity for carrying 12 passengers each.

Interested parties may inspect the foregoing application in the Office of the Secretary, Maritime Administration, Room No. 3099B, Department of Commerce Building, Fourteenth and E Streets NW., Washington, D.C. 20230.

Any person, firm, or corporation having any interest (within the meaning of section 805(a)) in such application and desiring to be heard on issues pertinent to section 805(a) and desiring to submit comments or views concerning the application must, by close of business on Sept. 19, 1977 file same with the Secretary, Maritime Administration, in writing, in triplicate, together with petition for leave to intervene which shall state clearly and concisely the grounds of interest, and the alleged facts relied on for relief.

If no petitions for leave to intervene are received within the specified time or if it is determined that petitions filed do not demonstrate sufficient interest to warrant a hearing, the Maritime Administration will take such action as may be deemed appropriate.

In the event petitions regarding the relevant section 805(a) issues are received from parties with standing to be heard, a hearing will be held, the purpose of which will be to receive evidence under section 805(a) relative to whether the proposed operations (a) could result in unfair competition to any person, firm, or corporation operating exclusively in the coastwise or intercoastal service, or (b) would be prejudicial to the objects and policy of the Act relative to domestic trade operations.

(Catalog of Federal Domestic Assistance Program No. 11.504 Operating-Differential Subsidies (ODS))

By order of the Assistant Secretary for Maritime Affairs.

Dated: September 6, 1977.

JAMES S. DAWSON, Jr.,
Secretary.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

TEXTILE CATEGORY SYSTEM

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Amending Textile Category System.

SUMMARY: The Textile Category System, published in the FEDERAL REGISTER on August 10, 1977, is hereby amended by the changing of Tariff Schedules of the United States Annotated (TSUSA) numbers 382.0403 and 382.7805, Body Suits, from Category 639, Knit Shirts and Blouses, Women's, Girls' and Infants' to Category 659, Other Apparel. These changes are necessary to provide desired uniformity in the system. The Textile Category System is used in the bilateral textile agreements negotiated with other countries under the Arrange-

V 42 175
SEP 9 77
UMI

ment Regarding International Trade in Textiles. Recent negotiations under this Arrangement revealed that the placing of man-made fiber body suits in Category 639 was inconsistent with the placement of cotton body suits which were placed in Category 359. Cotton Body suits are not identified specifically in the TSUSA and are grouped in TSUSA's which include certain other knit wearing apparel. Full descriptions of the TSUSA numbers covered by this notice are available in the TSUSA.

EFFECTIVE DATE: January 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Leonard A. Mobley, Director, Trade Analysis Division, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230 (202–377–4212).

ARTHUR GAREL,
Acting Chairman, Committee for the Implementation of Textile Agreements, U.S. Department of Commerce.

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

PROCUREMENT LIST 1977

Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed additions to procurement list.

SUMMARY: The Committee has received proposals to add to Procurement List 1977 a commodity to be produced by and a service to be provided by workshops for the blind or other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: October 12, 1977.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street, North, Suite 610, Arlington, Va. 22201.

FOR FURTHER INFORMATION CONTACT:

C. W. Fletcher (703–557–1145).

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77.

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodity and service listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodity and service to Procurement List 1977, November 18, 1976 (41 FR 50975):

NOTICES

Class 5999

Circuit Card Assembly, 5999–00–111–4957.

SIC 0782

Grounds Maintenance, Fort Ord, Calif. For areas 1 thru 24 only.

C. W. FLETCHER,
Executive Director.

[FR Doc.77–26270 Filed 9–8–77;8:45 am]

PROCUREMENT LIST 1977

Proposed Deletions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed deletions from procurement list.

SUMMARY: The Committee has received proposals to delete from Procurement List 1977 a commodity produced by and services provided by workshops for the blind or other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: October 12, 1977.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Va. 22201.

FOR FURTHER INFORMATION CONTACT:

C. W. Fletcher (703–557–1145).

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77.

It is proposed to delete the following commodity and services from Procurement List 1977, November 18, 1976 (41 FR 50975):

Class 6532

Cap, Operating, Surgical, 6532–00–543–7378.

SIC 0872

Grounds Maintenance, Federal Aviation Administration, Palmdale, Calif.

SIC 7699

Repair and Maintenance of Adding Machines and Calculators, For the following locations: 1515 Broadway, 32 Old Slip, 26 Federal Plaza and U.S. Customs at 6 World Trade Center, New York, N.Y.

C. W. FLETCHER,
Executive Director.

COUNCIL ON ENVIRONMENTAL QUALITY

ENVIRONMENTAL IMPACT STATEMENTS

Availability

The following is a list of environmental impact statements received by the Council on Environmental Quality from August 29 through September 2, 1977. The date of receipt for each statement is noted in the statement summary. Under Council Guidelines the minimum period for public review and comment on draft environmental impact statements is forty-five (45) days from this FEDERAL REGISTER notice of availability. (October 24, 1977.) The thirty (30) day period for each final statement begins on the day the statement is made available to the Council and to commenting parties.

Copies of individual statments are available for review from the originating agency. Back copies are also available at 10 cents per page from the Environmental Law Institute, 1346 Connecticut Avenue, Washington, D.C. 20036.

DEPARTMENT OF AGRICULTURE

Contact: Mr. Errett Deck, Coordinator, Environmental Quality Activities, U.S. Department of Agriculture, Room 307A, Washington, D.C. 20250 (202–447–6827).

FARMERS HOME ADMINISTRATION

Draft

Megan Heights, Proposed Plat, Kitsap County, Wash., September 1: The proposed action is a request to subdivide 46 acres of wooded, undeveloped land into 148 lots for single-family detached dwelling units. The property involved in the proposed plat is approximately one mile from the unincorporated community of Manchester and fronts on the west side of California Avenue north of Polk Street. Adverse effects include the clearing of trees for roadway and residence construction, and the destruction of wildlife habitat caused by vegetation removal. (ELR Order No. 71016.)

FOREST SERVICE

Draft

Maumelle-Saline Unit Plan, Ouachita National Forest, Perry, Saline, and Garland Counties, Ark., August 30: The proposed action is to manage, administer, and utilize the forest resources of the Maumelle-Saline Unit, Ouachita National Forest, from October 1, 1976 to September 30, 1986 in accordance with the management direction in the Maumelle-Saline Unit Plan. This plan covers 66,590 acres of National Forest land located on the Winona and Jessieville Ranger Districts. Major actions include regeneration cutting on 6,800 acres in pine working group; construction of 6 miles of new road, reconstruction of 42 miles and restoration of 104 miles of existing roads; and construction of 11 family camping units and 1 group unit at Lake Sylvia Recreation Area. (ELR Order No. 71070.)

Final

Allegheny National Forest Timber Management Plan, several counties in Pennsylvania, August 29: Proposed is the establishment of a new 8-year timber management plan for the Allegheny National Forest, Pennsylvania, for the period July 1, 1976 through June 30, 1984. As a result of the sell program portion of the plan, an estimated 66 MCcf (40 MMBF) of sawtimber and 84 MCcf (106 M cords) of pulpwood per year will be harvested. Timber management activities may affect air and water quality and soil will be subjected to erosive forces. Other negative impacts include alteration of landscape and the loss of some roadless areas. Comments made by: DOI, USDA, EPA, State and local agencies and interest groups. (ELR Order No. 71062.)

Francis Marion National Forest Land Management Plan, Berkeley and Charleston Counties, S.C., August 29: The proposed

action is the implementation of a ten year management plan for the 249,412 acre Francis Marion National Forest in South Carolina. The plan provides for suitable public access as well as sustained yield of timber through silvicultural activities. Adverse effects include soil compaction, visual changes, periodic lowered air quality, increased noise levels and impacts related to limited use of pesticides. Comments made by: USDA, COE, EPA, DOI, State agencies, concerned groups, and individuals. (ELR Order No. 71064.)

Supplement

Central Nevada Unit, Toiyabe National Forest (S–1), several counties in Nevada, August 29: This statement supplements an EIS filed with CEQ in 1976. The Toiyabe Chapter of the Sierra Club and the Friends of Nevada Wilderness requested reconsideration of the decision to implement the land use plan regarding areas not selected for wilderness study. This statement involves the reconsideration of the wilderness study area alternative. After re-inventory and re-evaluation, two additional wilderness study areas have been recommended. These are located adjacent to the Arc Dome and Arc Dome Extension Wilderness Study Area, and provide an undeveloped foreground for these areas. (ELR Order No. 71053.)

RURAL ELECTRIFICATION ADMINISTRATION

Final

Gamerco Coal Mine, New Mexico, McKinley County, N. Mex., August 29: Proposed is the development, by Arizona Electric Power Cooperative, Inc., of 8,011 acres of land, located approximately 3 miles northwest of the City of Gallup, as a coal stripmine facility. Associated with the mine will be a proposed coal washing plant with associated settling and freshwater holding ponds, coal loadout facility, 2.1 mile railroad spur, 116 one-hundred-ton coal railroad cars, shops and offices, deepwater well, haul roads, and substation. Adverse effects include disturbances to topography, soils, air quality, and archaeological resources. Comments made by: DOI, USDA, EPA, DOT, and State agencies. (ELR Order No. 71052.)

SOIL CONSERVATION SERVICE

Draft

Southeast Choctawhatchee River Watershed, Dale, Houston, and Geneva Counties, Ala., September 1: Proposed is a project for watershed protection, land stabilization, and recreation to be implemented under authority of the Watershed Protection and Flood Prevention Act. The planned works of improvement include accelerated conservation land treatment, critical area treatment and roadside stabilization, stabilization of about 600 gullies, and construction of a 780-acre single-purpose recreation lake and recreational facilities. The project will reduce erosion and improve scenic and aesthetic qualities of the watershed. Adverse impacts include increased air and water pollution during project construction. (ELR Order No. 71065.)

Final

Marshyhope Creek Watershed, Maryland and Delaware, September 2: Proposed is the implementation of a plan for watershed protection, flood prevention, and drainage for Kent and Sussex Counties, Delaware, and Carolina and Dorchester Counties, Maryland, to be installed by the local sponsors with Federal assistance. The project consists of land treatment measures of 104,798 acres and about 260 miles of multi-purpose channel work. Adverse effects include the drainage of approximately 1,100 acres of type 1 and type 2 wetlands and 72 acres of type 7 wetlands immediately adjacent to the channels. Grassland will be decreased by 2,380 acres. Comments made by: DOC, HEW, DOI, EPA, AHP, State and local agencies. (ELR Order No. 71060.)

DEPARTMENT OF COMMERCE

OFFICE OF COASTAL ZONE MANAGEMENT

Contact: Dr. William Aron, Director, Office of Ecology and Environmental Conservation, NOAA, Room 5813, Department of Commerce, Washington, D.C. 20230 (202–377–5181).

Final

Rookery Bay Estuarine Sanctuary, Collier County, Fla., August 29: The proposed action is to award a grant to the State of Florida to acquire, develop, and operate an estuarine sanctuary in Rookery Bay. Boundaries of the existing 5,400 acre, privately maintained Rookery Bay Sanctuary would be expanded to include adjacent mangrove and upland transitional areas resulting in about 8,500 acres of land and water under State control. The action may result in potential conflicts between the sanctuary and adjacent owners in terms of drainage projects, mosquito control activities, and restrictions imposed by scientific research. Comments made by: USDA, USAF, HUD, DOI, NRC, GSA, DOC, and environmental groups. (ELR Order No. 71065.)

DEPARTMENT OF DEFENSE

ARMY

Contact: George A. Cunney, Jr., Acting Chief, Environmental Office, Office of the Assistant Chief of Engineers, Department of the Army, Room 1E676, Pentagon, Washington, D.C. 20310, (202–694–4269).

Final

Rocky Mountain Arsenal, Pilot Containment Operations, Adams County, Colo., August 29: The proposed action is the construction and operation of a pilot system for contaminated ground-water containment at Rocky Mountain Arsenal, Colorado. The proposed system consists of a ground-water collection subsystem, a water purification subsystem, and a ground-water recharge subsystem. This will be the first step taken toward compliance with Cease and Desist Orders issued by the State of Colorado against Rocky Mountain Arsenal. Alternatives to the action include no action and delayed action. Comments made by: HEW, DOI, EPA, State and local agencies. (ELR Order No. 71054.)

DEPARTMENT OF DEFENSE

Final

Bold Eagle 78—Joint Readiness Exercise, Florida, September 2: Proposed is the execution of Bold Eagle 78, a Joint Readiness Exercise, at the Eglin AFB Test Range Complex from Oct. 24 to Oct. 30, 1977. The objectives are to exercise and evaluate the planning and execution of an air superiority campaign; strategic deployment and tactical employment; and the planning and use of electronic warfare to penetrate air defense systems. Adverse impacts include increased air contamination through use of explosives, damage to underbrush and habitat caused by track vehicle operations, and disturbance of the Red-Cockaded Woodpecker and Okaloosa Darter, both endangered species. Comments made by: DOI, USDA, DOC, HEW, DOT, EPA, State and local agencies. (ELR Order No. 71091.)

DEPARTMENT OF DEFENSE

ARMY CORPS

Contact: Dr. C. Grant Ash, Office of Environmental Policy Department, Attention: DAEN–CWR–P, Office of the Chief of Engineers, U.S. Army Corps of Engineers, 1900 Independence Avenue SW., Washington, D.C. 20314, (202–693–6795).

Draft

Dickey-Lincoln School Lakes, Maine/Canada, Aroostook County, Maine, August 31: Proposed is the construction of a combination hydroelectric, flood control, and recreation project in northern Maine along the St. John River. Two earth-filled dams would impound 7.7 million acre feet of water at maximum pool heights; five dikes would be constructed to prevent flowage to other watersheds. The project would provide 830,000 KW of electric capacity and 1.2 billion kwh annually of peaking energy and 262 million kwh annually of intermediate range energy to the New England system. Adverse effects include relocation of 161 families in the project area. (New England Division.) (ELR Order No. 71083.)

Jarvis Creek Navigation Improvements, Northumberland County, Va., August 31: Proposed is the improvement of navigation at Jarvis Creek by dredging a channel about 2,000 feet long with a bottom width of 80 feet and total depth of 10 feet. Approximately 44,000 cubic yards of highly organic marine silts and clay will be removed by hydraulic pipeline dredge and disposed of in a 10-acre confined upland site. Adverse effects include displacement and extirpation of the flora and fauna of 1 10-acre terrestrial area, and increased suspended solids during dredging with potential for decreased dissolved oxygen. (Norfolk District.) (ELR Order No. 71080.)

Supplement

Trexler Lake Project (S–2), Lehigh County, Pa., September 1: This statement supplements a final EIS filed with CEQ in 1973. Proposed is an earth and rockfill embankment 130 feet high at the maximum section. The dam would have a surface area of 1,220 acres and extend about 5.6 miles upstream when filled to the top of the conservation pool. Relocation of 3.4 miles of roads, as well as power and telephone lines would occur. The recreation plan includes four public access recreation areas along the lake. Adverse effects include modification of the present environmental setting, the conversion of 5.6 miles of free-flowing stream to slack water, the acquisition of 50 percent of Lowhill Township, and the loss of productive farmland. (ELR Order No. 71086.)

ENVIRONMENTAL PROTECTION AGENCY

Contact: Please refer to the separate notice published by EPA in this issue of the FEDERAL REGISTER for the appropriate EPA contact.

Draft

North-Central Ocean Basin Wastewater Facility, Worcester County Md., August 29: Proposed is a regional wastewater treatment facility for the North-Central Ocean Basin area, Maryland. The project consists of four major components: Expansion of the Ocean City sewage treatment plan (STP) from a capacity of 12 to 20.5 mgd., construction of a 8.9 mgd.-capacity Mainland STP near West Ocean City, installation of a regional interceptor system, and local wastewater treatment and disposal. The Ocean City facility would receive wastewater only from Ocean City. The service area of the West Ocean City facility would include West Ocean City, Berlin, the community of Ocean Pines and extensive areas along the major highways

V 42 I 175
SEP 9 77
UMI

in the proposed service area. (Region III.) (ELR Order No. 71059.)

Martha's Vineyard Water Quality Plan, Massachusetts, August 29: Proposed is a water quality management plan for Martha's Vineyard, Massachusetts. The program has been developed to protect the Island's waters in three areas of concern: The protection of the groundwater and its recharged areas; the protection of coastal waters including harbors and areas of shell and fin-fish production; and the protection of the fragile ecology of the Island's ponds, marshes, and other surface water bodies. Specific actions recommended and their respective impacts are discussed. (Region I.) (ELR Order No. 71061.)

Old Colony 208 Area, "Towards Clean Water," several counties in Massachusetts, September 2: This EIS is a product of the cooperative efforts of the Old Colony Planning Council and the U.S. EPA, Region I, as part of a 2-year areawide water quality management planning process for the Old Colony 208 Area. It summarizes the alternative technical control and management alternatives developed towards a composite areawide plan. The Old Colony 208 Area includes about 172 square miles, located just south of the Boston SMSA. It contains the communities of Abington, Avon, Bridgewater, Brockton, East Bridgewater, Easton, Hanson, Pembroke, West Bridgewater, and Whitman. "Towards Clean Air: Alternatives for Action," Vol. 2 will be prepared following input from Vol. 1. (Region I.) (ELR Order No. 71088.)

Final

New Milford Wasterwater Collection & Treatment, Connecticut, August 29: This statement proposes the development of a regional wastewater treatment and collection system to serve the towns of New Milford and Brookfield, Conn. Included is the expansion in three phases of an already existing system which currently serves only the downtown area of New Milford. The treatment facility will be located in New Milford, on the west bank of the Housatonic River. Limited adverse effects are anticipated. (Region I.) Comments made by: DOC, DOI, AHP, EPA, State and local agencies, concerned groups and individuals. (ELR Order No. 71060.)

Tunnel Component, Lower Des Plaines TARP Cook County, Ill., August 31: This statement relates to the tunnel component of the Tunnel and Reservoir Plan, Lower Des Plaines Tunnel System, proposed by the Metropolitan Sanitary District of Greater Chicago. The proposed action identified and defined for this EIS is the Phase I conveyance tunnel systems and their associated subsystems only. The following information is included in the statement: Alternative plans, plan selector, TARP Tunnel Systems, TARP Subsystems, Des Plaines Tunnel Segments and Branches, cost of Tunnel System and Subsystems, and TARP financing. (Region 5.) Comments made by: DOI, USDA, DOC, State and local agencies, concerned groups and individuals. (ELR Order No. 71084.)

FEDERAL ENERGY ADMINISTRATION

Contact: Mr. Robert Stern, Director, Office of Environmental Programs, Federal Energy Administration, New Post Office Building, Room 7119, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, 202–566–9760.

Final

Petroleum Feedstocks to Synthetic Nat. Gas Plants, August 29: Proposed is the modification of FEA's current program of case-by-case review of applications for the allocation of naphtha and natural gas liquids (NGL) for use in the manufacture of synthetic natural gas (SNG). This programmatic EIS presents the impacts in 1980 and 1985 of (1) continuation of the current program (Review of each petition), and (2) modification of that program through 1 of 5 options ranging from the adoption of a more restrictive policy toward the use of naphtha and NGL for SNG manufacture, to complete removal of control on these products. Comments made by: EPA, HEW, DOI, ERDA, DOD, DOC, and concerned groups. (ELR Order No. 71055).

DEPARTMENT OF HUD

Contact: Mr. Richard H. Broun, Director, Office of Environmental Quality, Department of Housing and Urban Development, 451 7th Street SW., Washington, D.C. 20410, 202–755–6308).

Draft

Fox Trails Development, McHenry County, Ill., August 29: Proposed is the provision of FHA mortgage insurance for 1,644 housing units on 375 acres of land. The project is in the southwest edge of the Village of Cary in the southeast corner of McHenry County. Adverse effects include pollution from construction activities, disturbance of wildlife habitat, and overcrowding during Phase I in School District No. 26. (ELR Order No. 71063.)

Belle Terre Development, St. John the B County, La., August 31: The proposed action is the securing of home mortgage insurance for a total of 1,600 housing units located between U.S. Highway 61 (Airline Highway) and Interstate 10 in LaPlace, St. John the Baptist Parish, La., approximately 15 miles west of New Orleans. The units are to be built over the next seven years; they will utilize a 900-acre site, and will consist of single family residences and an 18-hole golf course with club house, swimming pools, and tennis courts. Increased population of the area will have a long-term adverse impact on air quality and will increase noise and traffic levels. (ELR Order No. 71079.)

Final

Bellehaven/Vista Grande Terrace/Clear View Estates, El Paso County, Colo., August 31: Proposed is the issuance of HUD/FHA mortgage insurance for the developers of Bellehaven, Vista Grand Terrace, and Clear View estates to build 205 single family detached units, 24-single family detached units, and 380 single family detached units, respectively. The former two developments are located in Colorado Springs and the latter in El Paso County. Adverse impacts include increased levels of air pollution, greater pressure on local facilities, and destruction of wildlife habitat. Comments made by: COE, DOI, AHP, FEA, USDA, EPA, Statt and local agencies, concerned groups and individuals. (ELR Order No. 71073.)

Eastwood Village Disposition, Hamilton County, Ohio, August 31: Proposed is the disposition of Secretary owned property of Eastwood Village as prescribed by the Department of HUD regulations. Eastwood Village consists of two sections of property, each having a separate deed. Section One contains 540 units on 39.3 acres and section two contains 370 units on 46.9 acres. The primary impact as a result of the disposition of Eastwood Village is the demolition of 910 housing units and the subsequent redevelopment of the land for different uses. Comments made by: DOT, COE, DOI, AHP, EPA, state agencies, interest groups. (ELR order No. 71076.)

Summerfields Community, Tarrant County, Tex., August 31: Proposed is the approval for home mortgage purposes of the application of the Cambridge Realty Development Corp. for the 1,561-acre Summerfields Development nine miles north of Fort Worth. Of the 6024 units in the project, 3,132 are low-density single family homes, 1,464 units are medium density apartments, and another 1,428 units are cluster housing and other types of units. Adverse effects include higher air and noise pollution levels, urban runoff, loss of croplands and pasturelands, effects on aquatic life, the deterioration of inner-city Forth Worth, and the irreversible commitment of 1,468 acres of land to manmade structures. Comments made by: EPA, USDA, AHP, DOI, DOT, DOC, COE, VA, State and local agencies. (ELR Order No. 71077.)

CandleRidge—So. Ridge Communities, Tarrant County, Tex., August 31: Proposed is the approval of an application by CandleRidge Development Corp. and the Foster Financial Co. for FHA mortgage insurance for the proposed communities of CandleRidge and South Ridge. The 1,684-acre project is located 8 miles southwest of the Fort Worth Central Business District and is designed to accomodate a 1985 population of 15,500 persons with a housing supply of 5,664 units. Of these units, 2,796 are low-density single family homes, 1,164 units are medium-density apartments, and another 1,704 units are cluster housing, condominiums, townhomes and duplexes. Adverse effects include loss of prairie lands, and degradation of water. Comments made by: EPA, AHP, COE, VA, DOC, DOI, State and local agencies, interest groups. (ELR Order No. 71078.)

Section 104(h)

The following are Community Development Block Grant statement prepared and circulated directly by applicants pursuant to section 104(h) of the 1974 Housing and Community Development Act. Copies may be obtained from the office of the appropriate local chief executive. (Copies are not available from HUD).

Draft

Carbondale, Ill.—Drainways/Greenways Demo Project, Jackson County, Ill., September 2: Proposed is the Drainways/Greenways demonstration project in Carbondale, Ill. The project represents the initial effort in implementing the city-wide Drainways/Greenways system. This system proposes a functional multiple-use open space system providing multiple benefits including drainage, recreation, and transportation. The project is located entirely within census tract 1601.02. Adverse effects include disruption of natural vegetation and wildlife, increased runoff, and erosion during construction. (ELR Order No. 71089.)

Tooele, Utah.—City W. Sewer Trunk Line, Tooele County, Utah, August 29: Proposed is the construction of a sewer mainline and collection lines on the west side of the city of Tooele, Utah, to connect approximately 250 homes to the sewage treatment plant. These homes are currently using sewer septic tank and drain field systems which are threatening the city water wells located in the same area. The primary impacts in the area will be the result of projected growth. Land use changes will take place as agricultural and unused lands are utilized for development projects. (ELR Order No. 71066.)

DEPARTMENT OF INTERIOR

Contact: Mr. Bruce Blanchard, Director, Environmental Project Review, Room 4256 Interior Bldg., Department of the Interior, Washington, D.C. 20240 (202–343–3891).

BUREAU OF LAND MANAGEMENT

Final

1977 OCS Oil and Gas Lease Sale, North Atlantic States, August 29: Proposed is the leasing of 178 tracts (410, 112 hectares) of OCS land offshore of southeastern New England. The tracts range in distance to shore from 47 to 167 miles and are situated in water depths from 36 to 210 meters. The major resultant adverse impact is the possibility of accidental or chronic oil spillage, which would seriously endanger the environment. In addition, 33 tracts present a particular risk to commercial fishing, pelagic birds or a combination of these resources. If implemented, this sale is tentatively scheduled to be held in fall of 1977. Comments made by: EPA, DOC, DOI, AHP, STAT, FPC, NRC, COE, State and local agencies, concerned groups and individuals. (ELR Order No. 71056.)

Alunite Mine and Processing Plant, Beaver County, Utah, August 31: Proposed is the development of an alunite mine and processing plant complex for the annual production of 370,000 tons of potassium sulfate fertilizer up to 1.7 million tons of phosphate fertilizer, and up to 20,000 tons of aluminum fluoride. Major components of the project would include: an open pit mine and waste rock pile, and a processing plant complex including a 75-MW power plant, tailings ponds, and necessary support facilities. Adverse impacts include increased air pollution and alteration of wildlife systems on 2,400 acres. Comments made by: DOI, USDA, EPA, HEW, DOC, DOT, FEA, HUD, and local agencies. (ELR Order No. 71072.)

BONNEVILLE POWER ADMINISTRATION

Final

Bonneville Power Administration Electrical Service to Addy, Stevens County, Wash., August 29: Proposed is the addition of a new point of delivery for electrical power to the Aluminum Company of America at the Northwest Alloys magnesium plant at Addy, Washington. Full service to the plant over new permanent electrical facilities is planned to commence on June 1, 1977. Continued plant operation would result in the continued loss of an undetermined acreage of timber and cropland to mining and other plant-related uses. Mining activities associated with plant operation would result in at least temporary visual degradation. Comments made by: FPC, AHP, USDA, HEW, HUD, DOI, ERDA, EPA, State and local agencies, concerned groups and individuals. (ELR Order No. 71058.)

NATIONAL PARK SERVICE

Draft

Glen Canyon National Recreation Area, Management, Arizona and Utah, August 30: Proposed is a General Management Plan and Preliminary Wilderness Proposal for the Glen Canyon National Recreation Area, Arizona and Utah. The general management plan consists of a management zoning proposal dividing the recreation area into four management zones: Natural (50 percent), Recreation and Resource Utilization (48 percent), Cultural (less than 0.1 percent), and Development (almost 2 percent). The preliminary Wilderness proposal calls for adding 519,000 acres (42 percent of the recreation area) to the National Wilderness System; an additional 68,030 acres (5 percent of the recreation area) are proposed for potential wilderness additions. (ELR Order No. 71068.)

INTERSTATE COMMERCE COMMISSION

Contact: Mr. Richard I. Chais, Chief, Section of Energy and Environment, Room 3373, 12th and Constitution Avenue, NW., Washington, D.C. 20423 (202–275–7692).

Draft

Maine Central RR Acquisition, Amoskeag and Dumaines, August 31: This revised draft updates a draft EIS filed with CEQ in November 1976, and relates to a formal complaint filed with the ICC by the Maine Central Railroad alleging that Amoskeag Company and its parent organization, Dumaines, which control the Bangor and Aroostook Railroad Company, are unlawfully in control of the Maine Central in violation of Section 5(4) of the Interstate Commerce Act. This statement includes a detailed Environmental Impact Report from Amoskeag et al., which was not included in the original draft, and considers the DEIR and comments received in response to the 1978 draft EIS. (ELR Order No. 71082.)

Louisville and Nashville RR Co., Grand Trunk Western RR, Illinois and Indiana, August 31: Proposed is the acquisition by Louisville and Nashville Railroad Company (L&N) of truckage rights over a portion of the Grand Trunk Western Railroad Company's (GTW) main-line extending approximately 5.6 miles between Munster, Lake County, Indiana, and Thorton Junction, Cook County, Illinois. Included in this action is a proposal by L&N to construct a 1,294 foot connecting track between the GTW and L&N lines at Munster, Indiana. The proposed action would allow the applicant's planned elimination of its South Hammond, Indiana marshalling yard and consolidation of activities at Yard Center, Illinois. (ELR Order No. 71081.)

Final

Radioactive Materials, Special Trains Service, August 31: This statement proposes the nationwide use of special trains for the transportation of radioactive materials. These special trains differ from regular trains in the following ways: (1) They carry only the designated radioactive commodity; (2) they consist of an engine, caboose, and a flat car with 100 ton casks containing the radioactive material; (3) train speeds are limited to 35 miles per hour; and (4) when passing another train, either the special train or the regular train must come to a complete stop. This EIS is generic in nature, and can be used by the Commission in any proceeding in which the issue is the health/safety effects associated with special train service. Comments made by: ERDA, DOI, HEW, DOC, TVA, EPA, NRC, and concerned groups. (ELR Order No. 71074.)

Contact: Mr. Martin Convisser, Director, Office of Environmental Affairs, U.S. Department of Transportation, 400 7th Street SW., Washington, D.C. 20590 (202–426–4357).

FEDERAL AVIATION ADMINISTRATION

Final

Whiteman Airport, Los Angeles, Los Angeles County, Calif., August 30: The statement concerns the improvement of Whiteman Airport, Los Angeles, California. Included is the proposed construction of a new lighted runway and extension of an existing runway, 2 warm-up pads, an aircraft apron, an extension of the taxiway, temporary runways and roads for use during construction, and other related work. Adverse impacts include increased air pollution and aircraft noise. A 4(f) determination will be necessary in regard to Roger Jessup Recreational Park. Comments made by: DOT, EPA, DOI, HEW, USDA, DOC, State and local agencies, concerned groups and individuals. (ELR Order No. 71071.)

FEDERAL HIGHWAY ADMINISTRATION

Draft

F.M. 1604 and I–10, I–10 to Babcock Road, Bexar County, Tex., August 31: Proposed is the improvement of F.M. 1604 in the vicinity of the University of Texas at San Antonio by stage construction to a freeway between I.H. 10 in northwest San Antonio and Babcock Road about 2 miles to the west. Interstate Highway 10 would have its frontage roads changed to one way facilities with ramp adjustments and relocations to meet the demands of the new traffic generator, the University. A three level cloverleaf interchange would be built in stages between F.M. 1604 and I.H. 10. Adverse effects include the potential threat to pollution of the Edwards Aquifer Recharge Zone. (Region 6.) (ELR Order No. 71075.)

Evanston Streets Improvement, Unita County, Wyo., September 2: Proposed are improvements to highways within the city of Evanston, Wyoming. The improvements consist of replacing an existing railroad, underpass, building new bridges over the Bear River, widening U.S. Highway 30 and Wyoming Highway 150 through Evanston, and relocating a portion of Wyoming Highway 89 in Evanston. Adverse impacts include removal of several houses, businesses and municipal buildings, the relocation of families, and increased noise, water, and air pollution during construction. (Region 8.) (ELR Order No. 71087.)

Final

U.S. 27 and KY–151, Southern RR Bridge to Alton, Anderson and Franklin Counties, Ky., August 30: Proposed is a replacement for the existing road from the Southern Railroad Bridge, northwest of Lawrenceburg, to U.S. 127, east of Alton, Kentucky. The 2-lane (ultimately 4-lane) roadway will extend from the bridge to I–64 at the KY–151 interchange, a distance of 6.9 miles, and then to U.S. 127 one mile from Alton, a distance of 1.75 miles. A grade séparated interchange at the route junction and a 40 foot depressed grass median are included in the project. Negative impacts include removal of one business, eight residences, and four farm buildings, and obtaining of sixty-six right-of-way parcels. (Region 4.) Comments made by: HEW, EPA, DOI, USDA, FPC, and State agencies. (ELR Order No. 71069.)

URBAN MASS TRANSPORTATION ADMINISTRATION

Final

Red Line Extension, Harvard Square-Arlington Heights, Massachusetts, August 30: Proposed is a 6.5 mile extension of the Red Line rapid transit from its present termini at Harvard Square to Arlington Heights, Massachusetts. The Harvard Station will be rebuilt on new location and 5 other stations will be constructed on various locations. Approximately 1.5 miles will be in a tunnel/deep hold and approximately 5 miles will be in a tunnel/cut-and-cover. Adverse impacts include disturbance of 3 acres of wetland vegetation, and degradation of air. A 4(f) statement is being prepared for the 3.5 acres of publicly owned park lands to be affected. (743 pages.) Comments made by: EPA, DOT, OD 2, State and local agencies, concerned groups and individuals. (ELR Order No. 71067.)

NICHOLAS C. YOST,
Acting General Counsel.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 787–8; PP 6G1850/T123]

ETHYL 3-METHYL-4-(METHYLTHIO) PHENYL (1-METHYLETHYL) PHOSPHORAMIDATE

Establishment of a Temporary Tolerance

The Pineapple Growers' Association of Hawaii, 1902 Financial Plaza of the Pacific, Honolulu, Hawaii 96813, has submit-

V 42 175
SEP 9 77
UMI

ted a pesticide petition (PP 6G1850) to the Environmental Protection Agency (EPA). This petition requests that a temporary tolerance be established for combined residues of the nematocide ethyl 3 - methyl-4-(methylthio) phenyl (1-methylethyl) phosphoramidate and its cholinesterase-inhibiting metabolites in or on the raw agricultural commodity pineapples at 0.2 part per million (ppm). (A related document establishing a feed additive tolerance for residues of the subject pesticide in dried pineapple bran at 10 ppm appears elsewhere in today's FEDERAL REGISTER.)

Establishment of this temporary tolerance will permit the marketing of the above raw agricultural commodity when treated in accordance with two experimental use permits that are being issued concurrently under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (86 Stat. 973, 89 Stat. 751; 7 U.S.C. 136(a) et seq.).

An evaluation of the scientific data reported and other relevant material has shown that the requested tolerance is adequate to cover residues resulting from the proposed experimental use, and it has been determined that the temporary tolerance will protect the public health. The toxicological data considered in support of the proposed tolerance were 90-day dog and rat-feeding studies, a two-year dog-feeding study, a rabbit teratology study, and a hen neurotoxicity study. The metabolism of the subject pesticide in plants and animals has been adequately described, and an adequate analytical method (gas chromatography with thermionic detection) is available for enforcement purposes. There is no reasonable expectation of residues from the proposed use in eggs, meat, milk, or poultry as delineated in 40 CFR 180.6(a)(3).

The available data and information is sufficient to support the proposed tolerance. The following data must be supplied prior to the establishment of a permanent tolerance or any expanded use: The manufacturing process for the pesticide, the toxicological significance of residues of phenolic hydrolysis products, the composition of one inert ingredient, correct nomenclature for the sulfoxide and sulfone metabolites of the pesticide, and additional residue data reflecting the proposed use in Hawaii. Also a mutagenicity study may be required.

Permanent tolerances have previously been established (40 CFR 180.349) for residues of the pesticide on peanut hulls at 0.4 ppm; bananas, brussels sprouts, and cabbage at 0.1 ppm; cottonseed and soybeans at 0.05 ppm; and peanuts at 0.02 ppm. The temporary tolerance is established for the pesticide, therefore, with the following provisions:

1. The total amount of the pesticide to be used must not exceed the quantity authorized by the experimental use permit.

2. The Pineapple Growers' Association of Hawaii must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of distribution and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This temporary tolerance expires August 31, 1980. Residues not in excess of 0.2 ppm remaining in or on pineapples after this expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permits and temporary tolerance. This temporary tolerance may be revoked if the experimental use permits are revoked or if any scientific data or experience with this pesticide indicates such revocation is necessary to protect the public health. Inquiries concerning this notice may be directed to Special Registrations Section, Registration Division (WH-567), Office of Pesticide Programs, Room 315, East Tower, 401 M Street SW., Washington, D.C. 20460 (202-755-4851).

(Sec. 408(j) Federal Food, Drug and Cosmetic Act (21 U.S.C. 346a(j)).)

Dated: August 26, 1977.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

[FRL 788-1]

SCIENCE ADVISORY BOARD

Open Meeting

The Executive Committee of the Science Advisory Board of EPA has authorized the establishment of an ad hoc study group (hereafter called the Study Group) to examine health and environmental problems that may be associated with polymeric materials used for encapsulating agricultural chemicals used on food crops. The Study Group is concerned with the encapsulating materials in general, and not with associated agricultural chemicals as capsule contents.

The Study Group will hold an open meeting on September 26-27, 1977, in the Conference Room of the Faculty Club of the University of California at Davis, beginning each day at 9:30 a.m. P.D.T. This meeting will address questions of health and environmental problems of the capsules as residuals on food crops after the chemical contents have been released. This is an informal meeting and not a "hearing." The Study Group does not "take testimony." Persons or groups desiring to attend the meeting or submit information to the Study Group must contact the Study Group Officer, Dr. Joel L. Fisher at 703-557-7710 by September 20, 1977. Submissions of materials should be substantive and scientifically supported, but bulky reference materials should be avoided to minimize distribution problems.

Neither the Study Group nor the Science Advisory Board will pass judgment on any specific commercial preparations or products with respect to any EPA regulatory actions involved in registration or deregistration.

LLOYD T. TAYLOR,
Acting Staff Director,
Science Advisory Board.

SEPTEMBER 2, 1977.

[FR 2747-6]

TOXIC SUBSTANCES CONTROL ACT

Notification of Substantial Risk Under Section 8(e)

AGENCY: Environmental Protection Agency.

ACTION: Proposed guidance.

SUMMARY: On March 11, 1977 a "Notice of Intent to Develop Regulations and Guidance Regarding Records, Health and Safety Studies, and Notices of Substantial Risk" was published in the FEDERAL REGISTER. In this action, guidance is proposed on submission of notices of substantial risk to the Administrator under section 8(e) of the Toxic Substances Control Act (TSCA) (Pub. L. 94-469, 90 Stat. 2029, 15 U.S.C. 2607). The provisions of that section went into effect on January 1, 1977.

Section 8(e) states that "Any person who manufactures, processes, or distributes in commerce a chemical substance or mixture and who obtains information which reasonably supports the conclusion that such substance or mixture presents a substantial risk of injury to health or the environment shall immediately inform the Administrator of such information unless such person has actual knowledge that the Administrator has been adequately informed of such information."

DATES: Interested persons are invited to submit written comments regarding this proposed guidance by October 15, 1977.

ADDRESS: Written views and comments should bear the document control number OTS-080004 and should be submitted in triplicate to the U.S. Environmental Protection Agency, Office of Toxic Substances (WH-557), 401 M Street SW., Washington, D.C. 20460, Attention: Vickie Briggs. All written comments filed pursuant to this notice will be available for public inspection in the Office of Toxic Substances, from 8:30 a.m. to 4:30 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT:

Edward M. Brooks (Project Leader) at the above address or by telephone 202-755-8043.

SUPPLEMENTARY INFORMATION: On February 1, 1977, comments on section 8(e) were solicited from an informed group of industry representatives, environmentalists and other interested parties. Their comments, as well as other comments received, are discussed below.

WHO IS SUBJECT TO THE REQUIREMENTS?

Several commenters suggested that the reporting requirements be applied only to establishments that manufacture, process, or distribute in commerce chemical substances or mixtures, and not to the employees of such establishments. These commenters argued that such establishments, by considering the variety of information at their disposal, could screen out inconsequential information and submit pertinent data in an orderly manner. They also noted that this would conform with corporate practice of regarding employees as agents of the establishment.

However, problems arise under this approach relating to the timing and extent of an establishment's discovery and evaluation procedures that would precede a finding on its part of "substantial risk." Also, all employees capable of recognizing substantial risks should have the responsibility to be alert to such information. Since the purpose of section 8(e) is to immediately acquaint the Administrator with information on substantial risks, the reporting requirements are construed to apply to all relevant establishments and to those employees of such establishments capable of appreciating pertinent information. Section 23 of TSCA prohibits any employer from discharging or otherwise discriminating against any employee because the employee has complied with section 8(e) requirements.

The Administrator does not intend to require burdensome, duplicative reporting, however, nor does he seek to interfere in internal company reporting practices. Therefore an employee need not report information that is reported by a formally designated company official within the specified time. It is assumed that companies will establish internal procedures whereby evidence of substantial risk is promptly transmitted by employees to a designated official who in turn forwards it to EPA, together with all relevant information, including internal company memoranda, and notifies all employees who have knowledge of the information of its transmittal to EPA.

Agency enforcement activities (see Part IX of this guidance) will be focused primarily on:

(a) Employees reasonably capable of appreciating pertinent information who fail to submit or delay submitting such information to supervisors for corporate processing,

(b) Supervisors who fail to process substantial-risk information for submission to the Administrator in a timely manner, and

(c) Establishments and their chief executive officers that fail to process and notify the Administrator of substantial-risk information in a timely manner (sec. Part IV of this guidance).

WHEN WILL A PERSON BE REGARDED AS HAVING "OBTAINED" INFORMATION?

Two commenters suggested that a person should not be considered to have obtained information until he has determined that such information should be reported. The Administrator disagrees. A person is deemed to have obtained such information as soon as he (or, in the case of an establishment, as soon as any officer or employee capable of appreciating the information) is aware that such information may suggest substantial risk—not after analyses or evaluations have been conducted to confirm or reject that risk. The schedule described in Part IV of this document allows ample time for such person to determine whether or not the information must be reported. In the event that effects as described in Part V occur in a work area where several chemicals are being manufactured, processed, or distributed in commerce, one report shall be submitted listing each of the chemicals.

Since establishments are regarded as having simultaneously obtained any risk information that their officers or employees have obtained, it is incumbent upon them to process such information promptly, in order to comply with the schedule set forth in Part IV.

HOW CAN THE ADMINISTRATOR BE BOTH "IMMEDIATELY" AND COMPREHENSIVELY INFORMED?

One commenter suggested a two-phase notification procedure, whereby the Administrator would be immediately alerted of a potential substantial risk, with delayed submission of a complete report. The option of a two-phase notification is provided if necessitated by the bulk of material or by lack of immediate access to all pertinent information—not to allow analyses and evaluations to confirm or reject the risk.

WHAT INFORMATION REASONABLY SUPPORTS A CONCLUSION OF SUBSTANTIAL RISK?

One commenter suggested that qualified experts determine, case-by-case, whether information "reasonably supports the conclusion (of) substantial risk of injury to health or the environment," and one further suggested that explicit and reasonable criteria would evolve through such a process. While more definitive criteria for "substantial risk" may evolve, the Administrator believes that the health and environmental effects outlined in Part V provide a basis for reporting at this time. In any event, the delay involved with convening "qualified experts" to review each risk report prior to submission is not warranted.

One commenter suggested that section 8(e) is intended to "red-flag" critically important information. The criteria set forth in Part V focus on the level of risk appropriately addressed by section 8(e). Section 8(e) is construed to cover information regarding (a) toxic effects, as outlined in Part V of this guidance, ascribed to a chemical substance or mixture, and (b) incidents of extraordinary exposure to a chemical substance or mixture whose adverse effects have already been established or are strongly suspected, which critically imperil human health or the environment, as described in Part V of this guidance.

WHAT INFORMATION NEED NOT BE REPORTED?

Several commenters suggested that information that has been submitted to EPA in response to other mandatory reporting requirements of TSCA or other authorities administered by EPA be exempted from section 8(e) requirements. Such information is exempted, subject to the conditions outlined in Part VI of this guidance. These conditions will ensure that information on substantial risks is surfaced for immediate attention. In addition, information contained in notifications of spills under section 311(b)(5) of the Federal Water Pollution Control Act is exempted.

Several commenters suggested that information submitted to other regulatory agencies be exempted from section 8(e) reporting requirements, focusing concern on information submitted to the Occupational Safety and Health Administration, the National Institute of Occupational Safety and Health, the Consumer Product Safety Commission and the Food and Drug Administration. The Agency intends within 12 months after issuance of this guidance to establish interagency arrangements for the timely exchange of such information and amend this guidance to eliminate the possibility of duplicative reporting. In the interim, however, reports to other agencies do not substitute for reports to EPA under section 8(e).

In conformance with a number of comments, information published in English language, scientific literature widely available in the United States is also exempted, since EPA would otherwise be continuously burdened with receiving and processing myriad, highly duplicative literature references. Several comments were received relating to information generated by the Agency, in consideration of which the proposed guidance exempts from section 8(e) requirements information published by EPA in reports. Information corroborative of well-established adverse effects already documented in the published, English language, scientific literature is also exempted (unless such information concerns emergency incidents of environmental contamination).

DOES TSCA SECTION 8(e) APPLY TO INFORMATION FIRST RECEIVED BY A PERSON PRIOR TO THE EFFECTIVE DATE OF TSCA?

Commenters have argued that because section 8(e) requires the reporting of information by "Any person • • • who obtains information • • •," the section should be contrued to apply only to information first received on or after January 1, 1977. The Administrator considers this an overly narrow and restrictive interpretation. The purpose of the section 8(e) requirement is to bring to the Administrator's immediate attention information dealing with substantial risks posed by substances or mixtures, so that appropriate action may be taken. This purpose would not be served

V 42 175 SEP 9 77 UMI

if such information went unreported simply because it was possessed by or known to a person before January 1, 1977. Accordingly the section 8(e) reporting requirement applies to risk information possessed by or known to a person before, on, or after January 1, 1977.

Several commenters stated that EPA should not use section 8(e) to require an immediate, exhaustive search of all health and environmental information in the historical files and archives of persons subject to section 8(e). This proposed guidance would require persons to report only that risk information of which they are aware after January 1, 1977, regardless of when they first obtain it. Thus, if a person obtained risk information prior to January 1, 1977 (but has not been aware of it since that date, that person would not be required to report. By limiting the scope of section 8(e) to risk information of which a person has been aware during 1977, EPA intends to limit the need for searchers of historical records and files.

In developing this guidance, EPA considered other approaches to risk information obtained prior to 1977. At this time EPA has not yet adopted an approach which establishes requirements for searching and reviewing information obtained before 1977. The emphasis in this proposed guidance upon a person's current awareness of such information appears to be consistent with the Congress' intent in including section 8(e) in TSCA. However, EPA solicits comments upon the best means for acquiring risk information obtained before 1977.

In this regard, it should be noted that section 8(d) will be used by EPA to selectively acquire information first obtained prior to 1977. That section requires EPA to issue rules under which persons must provide to EPA lists of health and safety studies conducted "at any time," as well as the studies themselves. The term "health and safety study" is defined broadly in section 3(6) of the Act to include "any study of any effect of a chemical substance or mixture on health or the environment." Furthermore, the Conference Report on TSCA states that the term "health and safety study" encompasses not only "formal, disciplined" studies, but also "[a]ny data which bears on the effects of a chemical substance on health or the environment • • •" (H.R. Rep. No. 94-1679, 94th Cong., 2d Sess. 58 (1976).) In the future EPA will propose rules under section 8(d) which will cover specific health and safety studies conducted before January 1, 1977.

PROPOSED GUIDANCE

Accordingly, the Administrator's proposed policy regarding TSCA section 8(e) is set forth below.

I. DEFINITIONS

For purposes of this guidance:

The term "chemical substance" means any organic or inorganic substance of a particular molecular identity, including (1) any combination of such substances occurring in whole or in part as a result of a chemical reaction or occurring in nature, and (2) any element or uncombined radical. The term "chemical substance" does not include: (i) any mixture; (ii) any pesticide (as defined in the Federal Insecticide, Fungicide, and Rodenticide Act) when manufactured, processed, or distributed in commerce for use as a pesticide; (iii) tobacco or any tobacco product; (iv) any source material, special nuclear material, or by-product material (as such terms are defined in the Atomic Energy Act of 1954 and regulations issued under such Act); (v) any article the sale of which is subject to the tax imposed by Section 4181 of the Internal Revenue Code of 1954 (determined without regard to any exemptions from such tax provided by Section 4182 or 4221 or any other provision of such Code); and (vi) any food, food additive, drug, cosmetic, or device (as such terms are defined in Section 201 of the Federal Food, Drug, and Cosmetic Act) when manufactured, processed, or distributed in commerce for use as a food, food additive, drug, cosmetic, or device. The term "food" includes poultry and poultry products (as defined in Sections 4(e) and 4(f) of the Poultry Products Inspection Act), meat and meat food products (as defined in Section 1(j) of the Federal Meat Inspection Act), and eggs and egg products (as defined in Section 4 of the Egg Products Inspection Act).

The term "commerce" means trade, traffic, transportation, or other commerce (1) between a place in a State and any place outside of such State; or (2) which affects trade, traffic, transportation, or commerce described in clause (1).

The terms "distribute in commerce" and "distribution in commerce" when used to describe an action taken with respect to a chemical substance or mixture or article containing a substance or mixture mean to sell, or the sale of, the substance, mixture, or article in commerce; to introduce or deliver for introduction into commerce, or the introduction or delivery for introduction into commerce of, the substance, mixture, or article; or to hold, or the holding of, the substance, mixture, or article after its introduction into commerce.

The term "manufacture" means to import into the customs territory of the United States (as defined in general headnote 2 of the Tariff Schedules of the United States), produce, or manufacture.

The term "manufacture or process for commercial purposes" means to manufacturer or process (1) for distribution in commerce; (2) for use as a catalyst or an intermediate; (3) for use by the manufacturer; or (4) for test marketing purposes.

The term "mixture" means any combination of two or more chemical substances if the combination does not occur in nature and is not, in whole or in part, the result of a chemical reaction; except that such term does include any combination which occurs, in whole or in part, as a result of a chemical reaction if none of the chemical substances comprising the combination is a new chemical substance and if the combination could have been manufactured for commercial purposes without a chemical reaction at the time the chemical substances comprising the combination were combined.

The term "person" means any natural or juridical person including any individual, corporation, partnership, or association, any State or political subdivision thereof, any municipality, any interstate body and any department, agency, or instrumentality of the Federal Government.

The term "process" means the preparation of a chemical substance or mixture, after its manufacture, for distribution in commerce: (1) in the same form or physical state as, or in a different form or physical state from, that in which it was received by the person so preparing such substance or mixture; or (2) as part of an article containing the chemical substance or mixture.

II. PERSONS SUBJECT TO THE REQUIREMENT

Persons subject to Section 8(e) requirements include both natural persons and juridical persons engaged in the manufacturing, processing, or distribution in commerce of a chemical substance or mixture. In the case of corporations or other business organizations, all officers and employees of the organization are subject to the notification requirement to the extent that they are capable of appreciating pertinent information.

III. WHEN A PERSON WILL BE REGARDED AS HAVING OBTAINED INFORMATION

A person obtains information at the time: (a) the person first comes into possession of information reasonably supporting the conclusion that the chemical substance or mixture presents a substantial risk; or (b) the person knows or should know of the existence of such information not in his possession but which would be delivered to him on request.

A person has obtained information as described in (a) or (b) above as soon as he is aware that such information may suggest substantial risk—not after analyses or evaluations have been conducted to confirm or reject that risk. An establishment obtains information at the time any of its officers or employees obtains information.

IV. REQUIREMENT THAT A PERSON "IMMEDIATELY INFORM" THE ADMINISTRATOR

With the exception of information on emergency incidents of environmental contamination (see Part V(d) of this guidance) a person has "immediately informed" the Administrator if the information is received by EPA not later than the fifteenth calendar day after the date the person obtained such information. Information currently in the possession of a person who is subject to reporting

must all be reported by November 15, 1977. For emergency incidents of environmental contamination, a person shall, as soon as he has knowledge of the incident, immediately by telephone report the incident to the Administrator (see Part VIII for appropriate telephone contacts), with the report containing as much of the information required by Part VIII of this guidance as possible. A written report in accordance with Part VIII (a) through (f) is to be submitted within 15 days.

In some cases, submission of all available information may not be possible within 15 days; for example, if a large amount of information is being compiled, or if the person lacks immediate access to all information known or suspected to be pertinent. In such cases an initial notice is to be submitted within 15 days, identifying the chemical substance or mixture and describing the nature and magnitude of the potential substantial risk, the need for delay, and a schedule for submitting the completed information. This schedule is to be followed unless the Agency notifies the sender otherwise within five working days following receipt of the notice. Under no circumstances may the time, from the date on which the person first obtained information to submission of all available information, exceed 30 days. Such an extension of the reporting period does not apply to information currently in the possession of persons subject to the reporting requirement.

V. INFORMATION WHICH REASONABLY SUPPORTS A CONCLUSION OF SUBSTANTIAL RISK

Any risk should be examined to determine if reporting is required. Economic or social benefits of use, or costs of restricting use, are not to be considered in determining whether a risk is "substantial."

Information which ascribes relatively serious risk to a chemical substance or mixture, including but not limited to any of the following health and environmental effects, should be reported.

a. *Human Health Effects*

Human health effects need not be conclusively demonstrated to be caused by the chemical substance or mixture as long as evidence links the chemical substance or mixture to the effects.

(1) Any instance of cancer, gene mutations, or birth defects. Any instance of toxicity that results in death, or serious or prolonged incapacitation (other than due to gross misuse).

(2) Any pattern of effects or evidence which reasonably supports the conclusion that the chemical substance or mixture produces cancer, gene mutations, birth defects or toxic effects resulting in death, or serious or prolonged incapacitation. Consideration should be given to the extent and seriousness of the ailment, and/or whether or not the immediate manifestation may be a precursor of a more serious affliction. Impaired health requiring reporting may include such effects as dermal ailments or nausea if they meet the above criteria.

b. *Scientific Studies*

Any evidence acquired as a result of epidemiological studies, bioassay tests, in vivo or in vitro experiments or any other formal studies that (1) reasonably supports the conclusion that the chemical substance or mixture presents a substantial risk of injury to human health (as outlined above), considering both toxicity and levels and extent of exposure; or (2) reasonably supports the conclusion that the chemical substance or mixture presents a substantial risk of significant ecological damage (as outlined below).

Such evidence is not to be withheld until completion of the studies but should be reported to the Administrator as soon as it reasonably supports the conclusion of substantial risk.

c. *Environmental Effects*

Environmental effects need not be conclusively demonstrated to be caused by the chemical substance or mixture as long as evidence links the chemical substance or mixture to the effects.

1. Extreme persistence of a chemical substance not naturally occurring or occurring in greater than natural concentrations as a result of commerce.

2. Pronounced bioaccumulation, including bioaccumulation in fish beyond 50,000 times water concentration in a 30-day exposure or having a n-octanol/water partition coefficient greater than 10,000.

3. Interference with critical biogeochemical cycles, such as the nitrogen cycle. Chemical substances which are known to be toxic to key organisms in the cycles (for example, nitrifying bacteria) would present a substantial risk.

4. Excessive stimulation of primary producers (algea, macrophytes) in aquatic ecosystems, e.g., resulting in nutrient enrichment, or eutrophication, of aquatic ecosystems.

5. Any ecologically significant effects on non-human organisms due to acute or chronic toxicity such as cancer, mutation, birth-defects, or serious or prolonged incapacitation.

6. Facile transformation or degradation to a chemical having an unacceptable risk as defined above.

d. *Emergency Incidents of Environmental Contamination*

Any environmental contamination by a chemical substance or mixture to which has been ascribed any of the above adverse effects which, because of the pattern, extent and amount of contamination, critically imperils a human population or critically threatens non-human organisms with large-scale and ecologically significant population destruction.

VI. INFORMATION WHICH NEED NOT BE REPORTED

Information need not be reported if such information: (a) has been published by EPA in reports; (b) has been submitted in writing to EPA within the time constraints set forth in Part IV of this guidance, pursuant to this guidance, or pursuant to mandatory reporting reporting requirements under TSCA or any other authority administered by EPA (including the Federal Insecticide, Fungicide and Rodenticide Act, the Clean Air Act, the Federal Water Pollution Control Act, the Marine Protection, Research, and Sanctuaries Act, the Safe Drinking Water Act, and the Resource Conservation and Recovery Act), provided that the information encompasses that required by Part VIII of this guidance, including, from now on, Part VIII(b); (c) has been published in the English language, scientific literature widely available in the United States; (d) is corroborative of well-established adverse effects already documented in the published, English language, scientific literature, unless such information concerns emergency incidents of environmental contamination as described in Part V of this guidance, or (e) is contained in notification of spills under Section 311(b)(5) of the Federal Water Pollution Control Act.

VII. INFORMATION FIRST RECEIVED BY A PERSON PRIOR TO THE EFFECTIVE DATE OF TSCA

Any information obtained by a person prior to January 1, 1977, of which the person is aware after January 1, 1977, shall be reported by November 15, 1977, if the information is otherwise subject to the requirements of Section 8(e).

VIII. REPORTING REQUIREMENTS

Notices shall be delivered to the Director of the Office of Toxic Substances (WH-557), Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460.

A notice should: (a) be sent by certified mail, or in any other way permitting verification of its receipt by the Agency; (b) state that it is being submitted in accordance with Section 8(e); (c) contain the job title, name, address, telephone number and signature of the person reporting and the name and address of the manufacturing, processing or distributing establishment with which he is associated; (d) identify the chemical substance or mixture; (e) summarize the adverse effects being reported, describing the nature and the extent of the risk involved; and (f) contain the specific source of the information together with a summary and the source of any available supporting technical data.

If all available information cannot be submitted within 15 days the initial notice shall be submitted in accordance with instructions (a) through (d) above, and, in addition: (1) describe the potential hazard insofar as possible; (2) explain the need for delay; and (3) propose a schedule, not to exceed an additional 15 days, for submitting the complete data.

For emergency incidents of environmental contamination (see Part V(d) of the Guidance), a person shall, as soon as he has knowledge of the incident, immediately by telephone report the incident to the Administrator (see below for ap-

V 42 175 SEP 9 77 UMI

propriate telephone contacts), with the report containing as much of the information required by instructions (b) through (f) above as possible. A written report, in accordance with instructions (a) through (f) above, is to be submitted within 15 days.

Twenty-four hour emergency telephone numbers are:

Region III, 215-597-9898 (PA, W. VA, VA, MD, NH).
Region II, 201-548-8730 (NY, NJ, Puerto Rico, Virgin Islands).
Region III, 215-597-9898 (PA, W.VA, VA, MD, DE, DC).
Region IV, 404-881-4062 (KY, TN, NC, SC, GA, AL, MS, FL).
Region V, 312-353-6188 (WI, IL, IN, MI, OH, MN).
Region VI, 214-749-3840 (N. MX, TX, OK, AR, LA).
Region VII, 816-374-3778 (NE, IA, MO, KS).
Region VIII, 303-837-3880 (CO, UT, WY, MT, ND, SD).
Region IX, 415-556-6254 (CA, NV, AZ, HI).
Region X, 206-442-1200 (WA, OR, ID, AK).

IX. FAILURE TO REPORT INFORMATION

Section 15(3) of TSCA makes it unlawful for any person to fail or refuse to submit information required under Section 8(e). Section 16 provides that a violation of Section 15 renders a person liable to the United States for a civil penalty and possible criminal prosecution. Pursuant to Section 17, the Government may seek judicial relief to compel submittal of Section 8(e) information and to otherwise restrain any violation of Section 8(e).

APPENDIX

QUICK REFERENCE SUMMARY FOR EMERGENCY INCIDENTS OF ENVIRONMENTAL CONTAMINATION

A. *What Should be Reported as an "Emergency Incident"*: An emergency incident of environmental contamination is "any environmental contamination by a chemical substance or mixture . . . which, because of the pattern, extent and amount of contamination, critically imperils a human population or critically threatens non-human organisms with large scale and ecologically significant population destruction." (See Part V of the Guidance for complete description.)

B. *What Need Not be Reported as an Emergency Incident*: Information contained in notification of spills under Section 311(b)(5) of the Federal Water Pollution Control Act (FWPCA). (For a complete list of exemptions to reporting, see Part VI of the Guidance.)

C. *When and Where to Report Emergency Incidents*: Emergency incidents of environmental contamination are to be reported immediately by telephone to the appropriate EPA Regional 24-hour telephone emergency line listed below.

Region I, 617-223-7265 (ME, RI, CT, VT, MA, NH).
Region II, 201-548-8730 (NY, NJ, Puerto Rico, Virgin Islands).
Region III, 215-597-9898 (PA, W.VA, VA, MD, DE, DC).
Region IV, 404-881-4062 (KY, TN, NC, SC, GA, AL, MS, FL).
Region V, 312-353-6188 (WI, IL, IN, MI, OH, MN).
Region VI, 214-749-3840 (N.MX, TX, OK, AR, LA).
Region VII, 816-374-3778 (NE, IA, MO, KS).
Region VIII, 303-837-3880 (CO, UT, WY, MT, ND, SD).
Region IX, 415-556-6254 (CA, NV, AZ, HI).
Region X, 206-442-1200 (WA, OR, ID, AK).

In addition, a written report, in accordance with instructions (a) through (f) of Part VIII of this Guidance, is to be submitted within 15 days to the Director, Office of Toxic Substances (WH-557), 401 M Street SW., Washington, D.C. 20460.

Dated: August 3, 1977.

DOUGLAS M. COSTLE,
Administrator.

FEDERAL ENERGY ADMINISTRATION

ENERGY SUPPLY AND ENVIRONMENTAL COORDINATION ACT

Negative Determination of Environmental Impact Re Iowa Electric Light and Power Company's Sutherland Generating Station, Powerplants 1, 2, and 3

Pursuant to 10 CFR 208.4, and 305.9, the FEA hereby gives notice that it has performed an analysis and review of the environmental impact of the proposed issuance of a Notice of Effectiveness for the prohibition order to Iowa Electric Light and Power Company, Sutherland Generating Station, Powerplants 1, 2, and 3.

On June 30, 1975, the FEA issued prohibition orders to the above-listed powerplants which prohibited the powerplants from burning natural gas or petroleum products as their primary energy source. The prohibition orders provided, however, that in accordance with the requirements of 10 CFR Parts 303 and 305, the orders would not become effective until either, (1) the Administrator of the Environmental Protection Agency (EPA) notifies the FEA, in accordance with section 119(d)(1)(B) of the Clean Air Act, that a particular powerplant will be able on and after July 1, 1975, to burn coal and to comply with all applicable air pollution requirements without a compliance date extension under section 119, or (2) if no notification is given by EPA, the date that the Administrator of EPA certifies pursuant to section 119(d)(1)(B) of the Clean Air Act is the earliest date that a particular power plant will be able to comply with all applicable air pollution requirements under section 119 of the Act; and, until FEA has performed an analysis of the environmental impact of the issuance of a Notice of Effectiveness, pursuant to 10 CFR 305.9, and has served the powerplant the Notice of Effectiveness, as provided in 10 CFR 303.10(b), 303.37(b) and 305.7.

The FEA has analyzed and reviewed the effect on the human environment of issuance of the Notice of Effectiveness, and has determined that issuance of a Notice of Effectiveness for the prohibition orders to the above-listed powerplants is not a "major Federal action significantly affecting the quality of the human environment" within the meaning of the National Environmental Policy Act, 42 U.S.C. 4332(2)(C). Therefore, pursuant to 10 CFR 208.4(e) FEA concludes that an environmnetal impact statement is not required.

Additional copies of this negative determination of environmental impact and copies of the environmental assessment upon which it is based are available upon request from the FEA National Energy Information Center, Room 1404, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461. Copies of the documents are also available for public review in the FEA Freedom of Information Reading Room, Room 2107, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Interested persons are invited to submit data, views, or arguments with respect to the environmental impacts of the Notice of Effectiveness and the associated negative determination and environmental assessment to Executive Communications, Box PG, Room 3317, Federal Energy Administration, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on documents submitted to FEA Executive Communications with the designation, "Negative Determination-Proposed NOE to Iowa Electric Light and Power Company's Sutherland Generating Station, Powerplants 1, 2, and 3." Fifteen copies should be submitted on or before September 29, 1977.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Issued in Washington, D.C., on September 2, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

[FR Doc.77-26337 Filed 9-8-77;8:45 am]

FLYING DIAMOND OIL CO.

Proposed Consent Order

I. INTRODUCTION.

Pursuant to 10 CFR 205.197(c), the Federal Energy Administration (FEA) hereby gives notice of a Consent Order which was executed between Flying Diamond Oil Co. (Flying Diamond) and FEA on August 3, 1977. In accordance with that Section, FEA will receive comments with respect to this Consent Order. Although this Consent Order has been signed and tentatively accepted by FEA, FEA may, after consideration of comments received, withdraw its acceptance and, if appropriate, attempt to negotiate an alternative Consent Order.

II. THE CONSENT ORDER

Flying Diamond is a publicly held corporation engaged in the production and sale of crude oil and is therefore subject to FEA regulations.

As a result of an audit conducted by FEA of Flying Diamond's pricing practices for the period January 1, 1974, through May 31, 1975, FEA advised Flying Diamond that Flying Diamond had apparently overcharged two purchasers of crude oil by charging prices in excess of those permitted under the Cost of Living Council price rule set forth in 6 CFR 150.354 and FEA's price rule set forth in 10 CFR 212.73. FEA contended that those overcharges resulted from Flying Diamond's improper computation of the base production control level for its properties from which crude oil was produced, with the consequence that "old" crude oil was sold as "new" and "released" crude oil.

In an effort to conclude this compliance proceeding and to resolve the issues raised by the audit results, FEA and Flying Diamond entered into a Consent Order, the significant terms of which are:

(1) Flying Diamond shall refund to its crude oil purchasers all amounts charged in excess of maximum lawful selling prices together with appropriate interest payments. FEA has computed the total overcharge (excluding interest) at $740,062.63. Refunds shall be made to Husky Oil Corp. in the form of a cash payment and to Major Oil Corp. through a special interest-bearing escrow account to be controlled by FEA.

(2) All refunds and interest payments will be made within thirty days from the effective date of this Consent Order.

(3) The provisions of 10 CFR 205.197, including the publication of this Notice, are applicable to the Consent Order.

III. SUBMISSION OF WRITTEN COMMENTS

Interested persons are invited to comment on this Consent Order by submitting such comments in writing to: Dudley E. Faver, Regional Administrator, P.O. Box 26247—Belmar Branch, 1075 South Yukon Street, Lakewood, Colo. 80226. Copies of this Consent Order may be received free of charge by written request at this same address or by calling 303-234-2420.

Comments should be identified on the outside of the envelope and on documents submitted with the designation "Comments on Flying Diamond Consent Order." All comments received by 4:30 MDT on the 30th calendar day folowing publication of this Notice in the FEDERAL REGISTER will be considered by FEA in evaluating the Consent Order. Any information or data which, in the opinion of the person furnishing it, is confidential, must be identified as such and submitted in accordance with the procedures outlined in 10 CFR 205.9(f).

Issued in Washington, D.C., on this 2d day of September 1977.

ERIC J. FYGI,
Acting General Counsel.

[FR Doc.77-26186 Filed 9-8-77;8:45 am]

FEDERAL POWER COMMISSION

[Docket No. ER77-570]

CAROLINA POWER & LIGHT CO.

Filing of Revised Agreements

SEPTEMBER 2, 1977.

Take notice that Carolina Power & Light Co. (CP&L) on August 29, 1977, tendered for filing with the Federal Power Commission changes outlined below in its tariff filings with certain electric membership corporations and municipalities.

1. *Central EMC.*—For the Sanford Point of Delivery a correction to properly reflect the actual location of the point of delivery. For the Siler City Point of Delivery the existing 12 KV point of delivery is cancelled and a new point of delivery is established at 115 KV.

2. *Lumbee River EMC.*—Laurinburg 23 KV, Red Springs 23 KV, Rockfish 115 KV, and South Lumberton 23 KV—For these points of delivery the Agreement is amended to incorporate the supplying of metering pulse information by the Company to the Customer.

3. *Piedmont EMC.*—The Customer is extending, from the Roxboro Point of Delivery, a 115 KV line into its service area. The point of delivery is relocated approximately 100 feet and the metered voltage is changed to 115 KV.

4. *Pitt & Green EMC.*—The establishment of a new point of delivery at 115 KV, to be known as Hugo, near Structure No. 225 on the Company's Lee-New Bern 115 KV line. The initial load to be served at this point of delivery will be transferred from existing points of delivery.

5. *City of Lumberton.*—The initial filing of the Company with the Commission incorrectly stated the location of the point of delivery as being "Company pole one span from the Lumberton City 115/23 KV Substation;" whereas, the actual point of delivery is on the secondary bus of Company's Lumberton City 115/23 KV Substation.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 19, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-26227 Filed 9-8-77;8:45 am]

[Docket No. CP77-588]

CITIES SERVICE GAS CO.

Application

(SEPTEMBER 2, 1977).

Take notice that on August 25, 1977, Cities Service Gas Co. (Applicant), P.O. Box 25128, Oklahoma City, Okla. 73125, filed in Docket No. CP77-588 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of a town border meter station on Applicant's Neodesha 8-inch transmission pipeline in Wilson County, Kans., for delivery of natural gas to the City of Neodesha for resale and distribution to consumers in and around the City of Neodesha, Kans., all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it is authorized to provide natural gas service to the City of Neodesha by the Commission's order issued October 6, 1958, in Docket No. G-14721 (20 FPC 460). Applicant further states that the City of Neodesha's distribution system is a low pressure system and is regulated only at existing delivery points and that pressures at the existing delivery points cannot be increased above present levels. It is indicated that the City of Neodesha has experienced difficulty in maintaining service in the northeastern section of the city during the past two winters and has requested that Applicant install an additional town border meter station to alleviate this problem.

The construction costs are estimated to be $10,140, which will be reimbursed by the City of Neodesha, it is said.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 26, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to inter-

V 42 175 SEP 9 77 UMI

vene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc 77-26228 Filed 9-8-77;8:45 am]

[Docket No. CP77-590]

FAIR ENVIRONMENTAL DEALS FOR UNITED PEOPLE v. NATIONAL FUEL GAS SUPPLY CORP. AND NATIONAL GAS STORAGE CORP.

Complaint

SEPTEMBER 2, 1977.

Take notice that on August 5, 1977, Fair Environmental Deals for United People (Complainant), Basset Road R.D. 2, Andover, N.Y. 14806, filed in Docket No. CP77-590, a complaint pursuant to Section 1.6 of the Commission's Rules of Practice and Procedure (18 CFR 1.6) praying for expedited investigation, injunctive, declaratory, and other relief, inter alia, restraining National Fuel Gas Supply Corp. (NFG) and National Gas Storage Corp. (NG) from alleged violations of the Natural Gas Act and other laws in connection with NFG's and NG's storage projects in Allegany County, NY., all as more fully set forth in the complaint which is on file with the Commission and open to public inspection.

Complainant states that on August 10, 1975, NFG and NG jointly filed in Docket No. CP76-492 an application pursuant to Section 7(c) of the Natural Gas Act for authority to construct and operate substantial facilities for underground storage of interstate gas in the West Independence Pools and Beach Hill Pools, Allegany County, N.Y.

It is said that on December 2, 1976, December 10, 1976, February 16, 1977, April 4, 1977, and May 11, 1977, NFG and NG sought temporary certificates of public convenience and necessity for authority to begin construction on the proposed underground gas storage facilities at West Independence and that in each instance the requested temporary authority was denied by orders dated November 2, 1976, February 1, 1977, May 6, 1977, and June 10, 1977.

Complainant further states that on or about May 15, 1977, in violation of the above orders, the National Environmental Policy Act, and the Natural Gas Act (15 U.S.C. 717(f)(c)), NFG and NG did begin construction on the proposed Beech Hill Storage Project and prepared the Beech Hill Compressor Station site for construction.

Accordingly, Complainant requests that the Commission:

(1) Investigate and find, pursuant to 15 U.S.C. 717m, that NFG and NG are or have been unlawfully constructing jurisdictional facilities on Beech Hill, Independence, and Willing Townships, Allegany County, State of New York, without having first secured the proper authorization from the Commission to do so, in violation of 15 U.S.C. 717f(c);

(2) Issue a Cease and Desist Order, ordering Defendants to cease and desist from continuing said violations of 15 U.S.C. 717f(c);

(3) Petition the United States District Court for the Western District of New York, pursuant to 15 U.S.C. 717s et seq. for an injunction restraining defendants from continuing said violations of 15 U.S.C. 717f(c);

(4) Transmit to the Attorney General of the United States, pursuant to 15 U.S.C. 717s(a), evidence of defendants said violations of 15 U.S.C. 717f(c) for his consideration regarding proceedings which should be instituted.

Secondly, Complainant alleges that on May 7, 1976, NFG filed in Docket No. CP76-364 an application for a temporary certificate authorizing emergency construction on 13 gas wells in the West Independence Field located in the Towns of Independence and Willing, Allegany County, N.Y., and that in its application NFG stated that "* * * immediate steps are necessary to protect residents and gas company work crews from the possibility of blow outs." Complainant further indicates that NFG stated that the proposed construction would "also be directed towards ultimate development of this pool for storage purposes."

It is alleged that after May 7, 1976, and before June 11, 1977, an unknown agent of NFG requested that the Commission dismiss the application because the Commission lacked jurisdiction over its proposed activities because the activities were unrelated to development of the West Independence pool for storage of interstate gas and were part of its "normal maintenance program." Relying on the truth of this statement, the Secretary of the Commission sent a letter to John H. Comet, President of LFG dismissing the application in CP76-364 and finding that Commission authorization is not required for the construction proposed, it is said. It is indicated that on or after July 1, 1977, LFG began the proposed construction on 13 wells, constructed access roads, cleared well sites, and commenced drilling activities without conducting environmental studies or complying with environmental guidelines of the Commission or any other Federal or State agency in conducting said construction. Consequently, Complainant alleges that NFG's activities caused injury to its individual members and to local residents including environmental damage, invasion of privacy, nuisance, loss of timber, water and other natural resources, exposure to unsafe conditions and hazards, right to quiet enjoyment of property, etc.

Accordingly, Complainant requests that the Commission:

(1) Investigate and Find, pursuant to 15 U.S.C. 717m, that defendants NFG knowingly and willfully communicated false information to the Commission for the purpose of evading Commission jurisdiction over proposed construction in Docket No. CP76-364 in violation of 18 U.S.C. 1001;

(2) Declare the Commission's letter dated June 11, 1976, to John A. Comet to have been erroneously issued, void ab initio, and of no effect;

(3) Issue a Cease and Desist Order ordering defendant NFG to cease and desist from all construction and other activity conducted pursuant to Commission's letter to John A. Comet dated June 11, 1976;

(4) Petition the United States District Court for the Western District of New York, pursuant to 15 U.S.C. 717s et seq., for an injunction restraining defendants from continuing construction and other activity conducted pursuant to Commission's letter to John A. Comet dated June 11, 1976;

(5) Transmit to the Attorney General of the United States, pursuant to 15 U.S.C. 717s(a), evidence of defendant's said violations of 18 U.S.C. 1001 for his consideration regarding proceedings which should be instituted.

Thirdly, Complainant alleges that NFG's enlarging and extending the storage capacity of the East Independence Pool beyond the 5,000,000 Mcf authorized by the Commission's order dated February 15, 1972, in Docket No. CP71-263 violated the certificate issued in said docket.

Accordingly, Complainant requests that the Commission:

(1) Investigate and find, pursuant to 15 U.S.C. 717m, that defendants are or have been unlawfully constructing jurisdictional facilities on West Independence Pool, Independence Township, Allegany County, State of New York, without having first secured proper authorization from the Commission, in violation of 15 U.S.C. 717f(c).

(2) Issue a Cease and Desist Order, ordering defendants to cease and desist from continuing said violations of 15 U.S.C. 717f(c);

(3) Petition the United States District Court for the Western District of New York, pursuant to 15 U.S.C. 717s et seq for an injunction restraining defendants from continuing said violations of 15 U.S.C. 717f(c);

(4) Transmit to the Attorney General of the United States, pursuant to 15 U.S.C. 717s(a), evidence of defendants said violations of 15 U.S.C. 717f(c) for his consideration regarding proceedings which should be instituted.

Finally, Complainant indicated that prior to January 1, 1975, NFG's maps defining the boundary of the West Independence storage reservoir showed the property of Jack Mason to be within the reservoir and showed two storage wells proposed to be constructed on the Mason property. It is stated that New York State Environmental Conservation Law provides that an underground gas storage permit will not issue until the prospective

operator "has acquired by grant, lease or other agreement at least 75 percent of the storage rights in said reservoir * * *" According to NFG's then existing maps, NFG held or controlled less than 75 percent of the storage rights in said reservoir, it is said.

Complainant alleges that subsequent to January 1, 1975, NFG did fraudulently and with intent to deceive the State of New York and United States of America falsely redraw the reservoir boundary on its maps so as to exeise the Mason property from the reservoir for the purpose of increasing the percentage of the surface acreage of the reservoir controlled by NFG to greater than 75 percent. Accordingly, Complainant requests that the Commission:

(1) Investigate and find, pursuant to 15 U.S.C. 717m, that defendants did knowingly and willfully falsify data provided to the Commission concerning the size and shape of the West Independence reservoir in violation of 18 U.S.C. 1001;

(2) Transmit to the Attorney General of the United States, pursuant to 15 U.S.C. 717s(a) and 18 U.S.C. 1001, evidence of defendant's said violations of 18 U.S.C. 1001 for his consideration regarding proceedings which should be instituted.

Any person desiring to be heard or to make any protest with reference to said complaint should on or before October 3, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-26229 Filed 9-8-77;8:45 am]

[Docket Nos. G-2801, CI72-50, G-10020, and CI71-722]

GETTY OIL CO. (OPERATOR), ET AL., AND PHILLIPS PETROLEUM CO. (OPERATOR), ET AL.

Certification of Stipulation and Settlement Proposal

SEPTEMBER 2, 1977.

Take notice that on August 22, 1977, the Presiding Administrative Law Judge certified to the Commission a proposed stipulation and settlement together with the related hearing record in the above referenced proceeding. The proposed settlement relates to Phillips Petroleum Co., Docket Nos. G-10020 and CI71-722.

At a hearing convened, pursuant to the notice of the Presiding Judge issued August 18, 1977, for the purpose of receiving the proposed settlement, Phillips Petroleum Co. (Phillips) requested that the Presiding Judge certify to the Commission the settlement proposal. All parties present at the hearing, including the Commission Staff, indicated that they agreed to said settlement.

The proposed settlement relates to gas production attributable to the interest of Phillips Petroleum Co. in the Erath Field Unit, Vermilion Parish, La. Presently, Phillips delivers its Erath Field Unit interest to Columbia Gas Transmission Corp. (Columbia). Phillips had claimed, however, that Trunkline Gas Co. (Trunkline) was contractually entitled to Phillips' Erath Field Unit gas, 80% of which gas Trunkline was obligated to redeliver for Phillips' use. Under the proposed settlement Phillips would waive any right to receive a portion of such volumes for company use, and Phillips' Erath Field Unit interest would be apportioned 50% each to Columbia and Trunkline. The proposed settlement would resolve all outstanding issues relating to Docket Nos. G-10020 and CI71-722.

Any person desiring to comment on the Stipulation and Settlement Proposal should file such comments with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426 on or before September 16, 1977.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76-555]

INTERSTATE POWER CO.

Compliance Filing

SEPTEMBER 2, 1977.

Take notice that Interstate Power Co. (Interstate), on August 25, 1977, tendered for filing revised rate schedules as First Revised Supplement No. 2 to Rate Schedule FPC Nos. 38, 40, 67, 101, 103 and 105, and First Revised Supplement No. 3 to Rate Schedule FPC No. 108. Interstate states that the effective dates of the rate schedules for the cities of Jackson, Windom, and Lakefield conform to the contract expiration dates of August 2, 1978, April 6, 1979, and March 16, 1979, and that the revised settlement rate levels to Adrian, Luverne, Westbroke and Worthington, Minn., are effective with the August billing month.

Interstate states that the filing is made pursuant to the Order Approving Settlement Agreement issued by he Commission on August 3, 1977.

Interstate states that copies of the filing were sent to each municipal customer.

Any person desiring to be heard or to protest said settlement agreement should file comments with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, on or before September 26, 1977. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this agreement are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-573]

IOWA-ILLINOIS GAS AND ELECTRIC CO.

Filing of Facilities Agreement

SEPTEMBER 2, 1977.

Take notice that Iowa-Illinois Gas and Electric Co., Davenport, Iowa (Company) on August 29, 1977, tendered for filing a Facilities Agreement with Eastern Iowa Light and Power Cooperative, Wilton, Iowa (Eastern Iowa), dated February 15, 1977.

Relating to facilities to be rearranged or provided by Company at an estimated cost of $122,000, consisting principally of a 69-kV circuit breaker-equipped terminating bay at Company's Hills Substation near Hills, Johnson County, Iowa, the Facilities Agreement, augmenting Eastern Iowa's transmission capacity to its loads, is proposed to become effective on the in-service date of facilities, and Company seeks waiver of the notice requirements accordingly.

Company states the purpose of the proposed rates and charges are to recover reflected costs of the facilities to be provided and for associated operation and maintenance of those facilities, for transformation and associated operation and maintenance, and for transformation copper and core losses, under a variety of foreseeable circumstances, all as more fully set forth in the Agreement.

Company states copies of the filing have been mailed to Eastern Iowa and to the Iowa State Commerce Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 19, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP70-239]

KANSAS-NEBRASKA NATURAL GAS CO., INC.

Petition To Amend

SEPTEMBER 2, 1977.

Take notice that on August 26, 1977, Kansas-Nebraska Natural Gas Co., Inc.,

V 42 175 SEP 9 77 UMI

(Petitioner), P.O. Box 608, Hastings, Nebr. 68901, filed in Docket No. CP70-239 a petition to amend the Commission's order of July 22, 1970 (44 FPC 149), as amended by orders issued June 30, 1972 (47 FPC 1747), and May 9, 1977 (57 FPC ____) in the instant docket pursuant to section 7(c) of the Natural Gas Act so as to authorize Petitioner to deliver gas to Cities Service Gas Co. (Cities Service) at an existing exchange point which has been used only as a point for receipt of gas from Cities Service to Petitioner, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner says that by its order of July 22, 1970, in Docket No. CP70-258 (44 FPC 149), the Commission authorized Cities Service to exchange up to 150,000 Mcf of natural gas per day with Petitioner pursuant to an exchange agreement dated March 27, 1970. Under the terms of the exchange agreement, says Petitioner, Cities Service delivers gas to Petitioner at the discharge of Cities Service's Hugoton Compressor station in Grant County, Kans.; and Petitioner delivers equivalent volumes to Cities Service at the Haven Exchange Point on Cities Service's Hugoton-Kansas City pipeline near the town of Haven in Reno County, Kans.

By amendments on February 4, 1972, July 26, 1973, and April 13, 1976, the exchange agreement was amended to provide for additional points of delivery from Cities Service to Applicant at the Copeland Exchange Point in Haskell County, Kans., the Unruh Exchange Point in Edwards County, Kans., and the Deerfield Exchange Point in Kearny County, Kans., respectively. On May 28, 1975, an order was issued in Docket No. CP74-23 authorizing Applicant to receive gas from Cities at these delivery points.

Petitioner says that on June 30, 1977, the exchange agreement was further amended to provide that the enlisting exchange point at Cities Service's Hugoton Compressor Station may be used for either the delivery or receipt of gas by either party. Accordingly, Petitioner now proposes to deliver gas which it receives from Cities Service at the Deerfield exchange point back to Cities Service at the Hugoton Compressor Station. Petitioner states that it can deliver gas to Cities Service at the Hugoton Station without the addition of any facilities and without significant changes in the operation of its pipeline system.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before September 26, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-572]

KANSAS POWER AND LIGHT CO.

Proposed Changes in Rates and Charges

SEPTEMBER 2, 1977.

Take notice that on August 29, 1977, The Kansas Power and Light Co. (Kansas) tendered for filing a newly executed contract dated July 28, 1977, with the City of Osage City, Kans. for wholesale electric service to that community. The proposed effective date is not later than July 1, 1978. Kansas states that copies of the contract have been mailed to the City of Osage City and the State Corporation Commission of Kansas.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.-10). All such petitions or protests should be filed on or before September 19, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-569]

MONTANA LIGHT AND POWER CO.

Filing of Rate Schedule

SEPTEMBER 2, 1977.

Take notice that Montana Light and Power Co. (ML&P) on August 24, 1977, tendered for filing ML&P Rate Schedule FPC No. 2, consisting of an agreement dated May 1, 1977, between ML&P and Pacific Power & Light Co. (PP&L). ML&P states that this rate schedule is filed in compliance with the Commission's Order Approving Settlement issued July 25, 1977, in Docket No. ER77-43.

ML&P indicates that the agreement sets forth the basis for the pricing of energy sold by ML&P to PP&L.

ML&P requests waiver of the Commission's notice requirements to allow said rate schedule to become effective as of May 1, 1977.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 19, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-26235 Filed 9-8-77;8:45 am]

[Docket No. ER77-43]

MONTANA LIGHT AND POWER CO.

Compliance Filing

SEPTEMBER 2, 1977.

Take notice that Montana Light & Power Co. (ML&P) on August 24, 1977, tendered for filing ML&P Rate Schedule FPC No. 2, consisting of an agreement dated May 1, 1977, between ML&P and Pacific Power & Light Co. (PP&L), and a letter dated April 22, 1977, from PP&L to ML&P. ML&P states that this rate schedule is filed in compliance with the Commission's Order Approving Settlement issued on July 25, 1977, in the above-named docket.

ML&P indicates that the agreement sets forth the basis for the pricing of energy sold by ML&P to PP&L. PP&L states in its letter of April 22, 1977, in view of current water conditions in the Pacific Northwest, beginning May 1, 1977, and until further notice, PP&L will purchase all electric energy that may flow or be delivered into PP&L's system from ML&P, at the Tibby point of delivery, at a rate of 10 miles per kilowatt-hour.

Any person desiring to be heard or to protest said filing should file a petition to protest with the Federal Power Commission, 825 North Capitol Street NW., Washington, D.C., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 16, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-26236 Filed 9-8-77;8:45 am]

[Docket No. CP76-247]

NORTHERN NATURAL GAS CO. AND PANHANDLE EASTERN PIPE LINE CO.

Petition To Amend

SEPTEMBER 2, 1977.

Take notice that on August 25, 1977, Northern Natural Gas Co. (Northern), 2223 Dodge Street, Omaha, Nebr. 68102, and Panhandle Eastern Pipe Line Co. (Panhandle), P.O. Box 1642, Houston, Tex. 77001, (Petitioners) filed in Docket No. CP76-247 a petition to amend the Commission's order issued August 9, 1976 (56 FPC ____), as amended on January 11, 1977 (57 FPC ____), and June 10, 1977 (57 FPC ____), pursuant to section 7(c) of the Natural Gas Act in the instant docket to authorize Petitioners to add and delete wells to the exchange of natural gas as required from time to time in the Anadarko Area, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioners state that by the Commission's order of August 9, 1976, they are authorized to transport and exchange gas on volume-for-volume basis in accordance with two Gas Exchange Agreements dated August 11, 1957. It is stated that said order was amended on June 10, 1977, by adding two wells on Northern's system and on January 11, 1977, by adding two wells on Panhandle's system.

Petitioners assert that the purpose of this exchange is to enable them to receive into their respective pipeline systems for general system use, by displacement, gas that has been committed by producers from properties which would not otherwise be feasible or economical to connect the existing system of the Petitioner to which the gas is committed. Petitioners state that the grant of the certificate authorizaion requested would materially assist Petitioners in being able to assure producers in the area of prompt connection of wells while at the same time avoiding delay incident to the filing and processing of individual applications for each addition or deletion.

Petitioners indicate that they would install jurisdictional facilities required to connect such exchange wells to their systems pursuant to their respective budget-type certificates for gas-purchase facilities, which, they state, specifically include authorization to construct and operate such facilities and to deliver gas in the implementation of authorized exchange arrangements with other pipelines.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before September 26, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-26237 Filed 9-8-77;8:45 am]

[Docket No. ER77-530]

OHIO EDISON CO.

Order Accepting for Filing and Suspending Proposed Increased Rates, Granting Intervention, Providing for a Hearing and Establishing Procedures

AUGUST 31, 1977.

On July 29, 1977, Ohio Edison Co. (Ohio) submitted for filing a proposed rate increase of $8,010,000 (35.9 percent) for the 12-month period succeeding the proposed effective date of September 1, 1977. The proposed increase is applicable to the customers itemized on Attachment A.[1]

The Company's case-in-chief is based on a test period consisting of the 12 months ended June 30, 1978. Attachment B is a copy of the Company's Statement N for this period which indicates that with the proposed rate increase, revenues will substantially equal the cost of service at the claimed rate of return of 10.4 percent on equity.

Notice of Ohio's filing was issued on August 9, 1977, with comments, protests, or petitions to intervene due on or before August 19, 1977.

On August 19, 1977, a joint petition to intervene and motion to reject the proposed rates was filed by the Cities of Amherst, Beach City, Brewster, Colombiana, Cuyahoga Falls, Galion, Grafton, Hubbard, Hudson, Lodi, Lucas, Milan, Monroeville, Newton Falls, Niles, Oberlin, Prospect, Seville, South Vienna, Wadsworth, and Wellington, Ohio (Ohio Cities). Alternatively, Ohio Cities request that the Commission suspend Ohio's rates for five months.

Ohio Cities state that Ohio's filing with a requested effective date of September 1, 1977, violates a moratorium agreed to by the parties in the Settlement Agreement in Docket Nos. E-9497, et al., as approved by Commission order issued July 6, 1977. They maintain that the terms of the Agreement foreclose Ohio from seeking any increase in its wholesale rates if such increase is effective prior to November 16, 1977.

Ohio Cities argue that the filing should be rejected because (1) it was tendered for filing on July 29, 1977, more than 90 days prior to the date when Ohio could first have the rates become effective under the terms of the Docket No. E-9497, et al. Settlement and is thus contrary to Section 35.3(a) of the Commission's Regulations; and (2) Ohio's Period I Exhibit fails to comply with the seven month requirement of Section 35.13(b)(4)(iii) of the Commission's Regulations to the extent that August 16, 1977, is the first date on which Ohio's filing could have lawfully been submitted, and the last day of Ohio's Period I (December 31, 1976) is more than seven months prior to that date.

On August 29, 1977, Ohio filed an Answer to the Cities' Petition For Leave to Intervene, Motion to Reject Rate Filing, and Complaint And Request For Suspension of Rate Schedules and Hearing.

The Commission does not agree with Ohio Cities' contention that Ohio's proposed rate increase should be rejected because the proposed effective date violates the terms of the above-mentioned settlement agreement. The agreement only indicated when a rate increase could first become effective, not when a filing could be made or what cost support should be utilized. Although Ohio requested an effective date of September 1, 1977, it acknowledges that the agreement precludes an increase from becoming effective prior to November 16, 1977. Consequently, it requested suspension of the filing at least until that date.

Alternatively, good cause would exist to waive the 90-day filing requirement of section 35.3(a) of the Regulations. Otherwise, Ohio would be obligated to resubmit a cost of service study containing a Period I ending no earlier than January 16, 1977, only 16 days after December 31, 1976, the termination date of the Period I study submitted by Ohio. We do not believe that the difference of 16 days warrants the expense that would be incurred by Ohio in revising its study.

The proposed increase in rates and charges tendered by Ohio on July 29, 1977, have not been shown to be justified and may be unjust, unreasonable, unduly discriminatory, preferential, or otherwise unlawful.

The Commission will therefore accept Ohio's rates for filing, suspend them from operation for four months, until January 1, 1978, when they will become effective subject to refund and establish hearing procedures.

The Commission finds: (1) It is necessary and proper in the public interest and to aid in the enforcement of the Federal Power Act that the Commission order a hearing concerning the lawfulness of the proposed increased rates tendered by Ohio on July 29, 1977, establishing procedures for that hearing, and that the proposed increased rates and charges be accepted for filing, suspended, and the use thereof deferred, all as hereinafter provided.

(2) Participation of Ohio Cities in this proceeding may be in the public interest.

The Commission orders: (A) Pursuant to the Federal Power Act, particularly Sections 205, 206, 301, 307, 308, and 309 thereof, the Commission's rules and regulations, a public hearing shall be held concerning the justness and reasonableness of the rates proposed by Ohio in this proceeding.

(B) Pending such hearing and decision thereon, the proposed increased rates filed by Ohio are hereby accepted for filing and suspended for 4 months, until January 1, 1978, when they shall become effective subject to refund.

(C) The Staff shall prepare and serve top sheets on all parties for settlement purposes on or before January 16, 1978. (See Administrative Order No. 157).

(D) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (See Delegation of Authority, 18 CFR § 3.5(d)) shall convene a settlement con-

[1] Attachment A contains the designations and descriptions.

V 42 175 SEP 9 77 UMI

ference in this proceeding on a date certain within 10 days after the service of top sheets by the Staff, in a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426. Said Presiding Administrative Law Judge is hereby authorized to establish all procedural dates and to rule upon all motions (with the exceptions of petitions to intervene, motions to consolidate and sever, and motions to dismiss), as provided for in the rules of practice and procedure.

(E) Ohio Cities are hereby permitted to intervene in this proceeding subject to the Commission's rules and regulations: *Provided, however,* that participation of such intervenors shall be limited to the matters affecting asserted rights and interests specifically set forth in the petition to intervene; and *Provided, further,* that the admission of such intervenors shall not be construed as recognition by the Commission that they might be aggrieved by any orders issued in this proceeding.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[Docket No. ES77-57]

OKLAHOMA GAS AND ELECTRIC CO.

Application

SEPTEMBER 2, 1977.

Take notice that on August 26, 1977, Oklahoma Gas and Electric Co. (Applicant), filed an application pursuant to section 204 of the Federal Power Act seeking an order authorizing the issuance of unsecured Promissory Notes to commercial banks and to commercial paper dealers in amounts not exceeding in the aggregate $125,000,000 outstanding at any one time.

The Promissory Notes to be issued by the Applicant to commercial banks will be issued on various days during the period ending December 31, 1979, but no Note will mature more than twelve months after date of issue or renewal. The interest rate of such Notes will be at the prime loan interest rate of the banks in effect from time to time.

The Promissory Notes issued to commercial paper dealers will be issued on various days during the period ending December 31, 1979, but no Note will mature more than nine months after date of issue nor will any Note be extended or renewed. The interest rate on such Notes will be dependent upon the term of the Notes and the money market conditions at the time of issuance.

According to the application, the aggregate amount of commercial paper to be outstanding at any one time will not exceed the sum of (1) the dollar amount of Applicant's receivables arising out of the sale of electric service and (2) the dollar amount of depreciation and amortization charges on plant and equipment for the preceding year.

Applicant states that the proceeds from the issuance of the Notes will be added to the general funds of the Applicant, which general funds will be used, among other things, to finance in part the Applicant's 1978 and 1979 construction program. Applicant estimates that construction expenditures for the year ending December 31, 1978 will total about $184,000,000 and for the year ending December 31, 1979 will total about $177,000,000.

Any person desiring to be heard or to make any protest with reference to said application should, on or before September 16, 1977, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). The application is on file and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-26238 Filed 9-8-77;8:45 am]

[Docket No. CP77-580]

SEA ROBIN PIPELINE CO.

Pipeline Application

SEPTEMBER 2, 1977.

Take notice that on August 22, 1977, Sea Robin Pipeline (Sea Robin), filed an application for a certificate of public convenience and necessity in Docket No. CP77-580, pursuant to section 7(c) of the Natural Gas Act, requesting authorization to acquire, through assignment of lease, all rights and interests in a 1,200-horsepower compressor facility and related equipment at Block 222 Ship Shoal Area, Offshore Louisiana. Furthermore, Sea Robin requests permission to reimburse the Operator of the subject block, Southern Natural Gas Exploration and Production Division (Southern E & P), for all expenses incurred in the transportation, installation, operation, maintenance and rental of such compressor and related equipment.

Sea Robin states that it purchases gas from Southern E & P, The Offshore Co., Chater Exploration & Production Co., Pennzoil Producing Co., Oxy Petroleum Inc., Amoco Production Co. and Dixilyn Corp. at Block 222, Ship Shoal Area. Sea Robin further states that in order to increase production and to recover additional reserves it will be necessary to install compression at the Block 22 location. Both the subsequent accelerated production and enhanced recovery of volumes to be realized by such compression are vital to Sea Robin's continued efforts to not only take all available steps toward assuring the continued availability of its current gas supply but also to strive toward expediting the flow of gas volumes whenever possible, all as more fully described in the application which is on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said application, on or before September 26, 1977, should file with the Federal Power Commission, Wshington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed wth the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if not petition to intervene is filed within the time required herein, if the Commission on it own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-26239 Filed 9-8-77;8:45 am]

[Docket No. CP77-589]

UNITED GAS PIPE LINE CO.

Application

SEPTEMBER 2, 1977.

Take notice that on August 25, 1977, United Gas Pipe Line Co. (Applicant), P.O. Box 1478, Houston, Tex. 77001, filed in Docket No. CP77-589 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of tap facilities and the transportation of natural gas in interstate commerce all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport natural gas for Mid-Louisiana Gas Co. (Mid-La) in accordance with the terms and agreement between Applicant and Mid-La dated July 15, 1977. According to Applicant, the agreement provides that Mid-La will deliver to Applicant up to 2,500 Mcf per day of gas for transportation. The gas is proposed to be delivered at one or more taps to be installed by Applicant at Mid-La's expense at a point on United's 18-inch Baton Rouge-New Orleans line in Section 67, T. 11 S., R. 5 E., St. James Parish, La. Under the terms of the agreement, Applicant states, it will redeliver an equivalent volume to Mid-La, less one and one-half percent or such greater percentage as may be determined on a yearly basis as a charge for fuel and gas used by the company. Redelivery is proposed to be at the existing authorized point of interconnection between Applicant's system and Mid-La's system at Scotland, East Baton Rouge Parish, La., or at other mutually agreeable existing authorized points of interconnection between the two systems.

Applicant states that the term of the agreement is five years beginning on the date deliveries of gas commence thereunder. The agreement will continue from year to year thereafter until cancelled by either party on proper notice. Mid-La, it is said, has agreed to pay Applicant for all gas transported an amount equal to Applicant's average jurisdictional transmission cost of service in effect from time to time in Applicant's Southern or Northern Rate Zone, as applicable, less any amount attributable to gas consumed in the operation of Applicant's pipeline system. Applicant says that its current average jurisdictional transmission cost of service, excluding a component for gas consumed in the operation of its pipeline system, is 17.92 cents per Mcf in its Southern Rate Zone and 20.04 cents per Mcf in its Northern Rate Zone. The Northern Rate Zone rate will apply if the redelivery point is located in the Northern Rate Zone; otherwise the Southern Rate Zone rate will apply.

Applicant estimates that the cost of the proposed tap will be $950. It is said that no new financing will be required.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 26, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-26240 Filed 9-8-77;8:45 am]

FEDERAL RESERVE SYSTEM

FIRST NATIONAL FAIRBURY CORP.

Formation of Bank Holding Company

First National Fairbury Corporation, Lincoln, Nebraska, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) to become a bank holding company by acquiring 100 percent of the voting shares of The First National Bank of Fairbury, Fairbury, Nebraska. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received no later than September 30, 1977.

Board of Governors of the Federal Reserve System, September 1, 1977.

ROBERT E. MATTHEWS,
Assistant Secretary of the Board.

[FR Doc.77-26301 Filed 9-8-77;8:45 am]

FIRST SECURITY NATIONAL CORP.

Order Approving Acquisition of FSN Life Insurance Company

First Security National Corporation, Beaumont, Texas, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under § 4(c)(8) of the Act (12 U.S.C. § 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR § 225.4(b)(1)), to acquire FSN Life Insurance Company, Beaumont, Texas ("Company"), a company that will engage de novo in the activity of underwriting, directly and as reinsurer, credit life and credit accident and health insurance that is directly related to extensions of credit by Applicant's subsidiary banks. Such activity has been

V 42 175 SEP 9 77 UMI

determined by the Board to be closely related to banking (12 CFR § 225.4(a)(10)).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (42 FR 33065 (1977)). The time for filing comments and views has expired, and the Board has considered the application and all comments received, including those of Dial M. Dunkin, Harlingen, Texas ("Protestant"), in the light of the public interest factors set forth in § 4(c)(8) of the Act (12 U.S.C. § 1843(c)(8)).

Applicant, the 16th largest banking organization in Texas, controls ten subsidiary banks with combined total deposits of $325.8 million,[1] representing 0.6 percent of the total deposits in commercial banks in the State. Applicant also controls one nonbanking subsidiary, a mortgage lender, that is dormant and funding no new loans.

Company is chartered under the laws of Texas and will engage in the activity of underwriting, directly and as reinsurer, credit life and credit accident and health insurance sold in connection with extensions of credit by Applicant's subsidiary banks.[2] Inasmuch as the subject proposal involves engaging in this activity de novo, consummation of this transaction would not have any significant adverse effects upon existing or potential competition in any relevant market.

Credit life and credit accident and health insurance is generally made available by banks and other lenders and is designed to assure repayment of a loan in the event of death or disability of the borrower. In connection with its addition of the underwriting of such insurance to the list of permissible activities for bank holding companies, the Board stated:

To assure that engaging in the underwriting of credit life and credit accident and health insurance can reasonably be expected to be in the public interest, the Board will only approve applications in which an applicant demonstrates that approval will benefit the consumer or result in other public benefits. Normally, such a showing would be made by a projected reduction in rates or increase in policy benefits due to bank holding company performance of this service. (12 CFR § 225.4(a)(10), fn. 7).

Applicant proposes to offer, through Company, various credit life and credit accident and health insurance coverages to its customers at rates ranging from 3.4 to 3.8 percent below the approved and prima facie rates established in Texas.[3] In addition, upon consummation of the subject proposal, Company will retain the option of reinsuring any credit-related policies written by Allied for Applicant's customers since August 1, 1976. If such insurance is ceded, Applicant has committed to rebate to such in-force policy holders the differences between the rates originally paid and the rates that would have been paid if such policies had been written by Company at the proposed reduced rates, thus assuring that all policy holders insured by Company will receive the benefits of the proposed reduced rates. Based upon these factors and other facts of record,[4] the Board concludes that the subject proposal is in the public interest.

Protestant contends that the interim agreement[5] entered into between Applicant and Allied that requires Allied to cede to and reinsure with Company all credit life and credit accident and health insurance originated by Applicant between the effective date of the agreement, August 1, 1976, and the date of approval of this application, would violate the prior approval provisions of § 4(c)(8) of the Act in that Company would, in effect, be engaging in the activity for which it is now seeking Board approval prior to securing such approval. It is the Board's view, however, that the agreement between Applicant and Allied does not violate the Act. The activity for which Applicant and Company seek approval, as set forth at 12 CFR § 225.4(a)(10), is "acting as underwriter for credit life insurance and credit accident and health insurance which is directly related to extensions of credit by the bank holding company system." If such approval is given, Company will be allowed to begin such underwriting activities. The insurance business ceded to or reinsured with Company will have been underwritten by Allied, not by Company. Inasmuch as Applicant is not engaging in the activity of underwriting, the Board concludes that it does not require prior Board approval to enter into the existing agreement with Allied. The Board also notes that if this application is approved, those customers purchasing insurance underwritten by Allied pursuant to the agreement with Company will receive a rebate from Company based upon the difference between the rate charged by Allied and the proposed lower rate to be charged by Company. Therefore, it is concluded, based on the foregoing, that the agreement does not cause Applicant to engage in any activities requiring prior Board approval.

Based upon the foregoing and other considerations reflected in the record, including a commitment by Applicant to maintain on a continuing basis the public benefits which the Board has found to be reasonably expected to result from this proposal and upon which the approval of this proposal is based, the Board has determined that the balance of the public interest factors the Board is required to consider under § 4(c)(8) is favorable. Accordingly, the application is hereby approved. This determination is subject to the conditions set forth in § 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

This transaction shall be made not later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Dallas pursuant to delegated authority.

By order of the Board of Governors,[6] effective September 1, 1977.

ROBERT E. MATTHEWS,
Assistant Secretary of the Board.

[FR Doc.77-26302 Filed 9-8-77;8:45 am]

[1] Unless otherwise indicated, all banking data are as of December 31, 1976.

[2] Following the decision to file for permission to enter the credit life and credit accident and health insurance business, Applicant entered into an agreement, effective August 1, 1976, with Allied Bankers Life Insurance Company ("Allied"), Dallas, Texas, which provides that Allied will underwrite all credit life and credit accident and health insurance submitted by Applicant or its subsidiaries. When Applicant acquires Company, Allied agrees to cede to and reinsure with Company all insurance business originated by Applicant or its subsidiaries. If this application were denied, Allied would continue as the underwriter of credit-related insurance for customers of Applicant's subsidiaries.

[3] *Prima facie* rates are the maximum rates allowed by the state for particular types of insurance coverage. Where no *prima facie* rate exists for a particular type of coverage, the insurance company may apply to the State insurance department for approval of a proposed rate.

[4] Upon consummation, Company will enter into a service agreement with Jim Stewart and Associates ("Stewart"), Dallas, Texas, which will provide technical assistance in the management of Company. This will enable Applicant to minimize the burden of extensive training and staffing requirements. In exchange for such technical assistance, Company will pay Stewart a fee equal to 6 percent of the net premiums written by Company.

[5] See footnote 2.

[6] Voting for this action: Vice Chairman Gardner and Governors Wallich, Coldwell, Jackson, Partee, and Lilly. Absent and not voting: Chairman Burns.

GENERAL SERVICES ADMINISTRATION

[GSA Bulletin FPR 29]

FEDERAL PROCUREMENT

Current Interest Rate of 7⅞ Percent Pursuant to Public Law 92-41

1. *Purpose.* This bulletin provides, for the information of executive agencies, the current interest rate established by the Secretary of the Treasury pursuant to Pub. L. 92-41 (50 U.S.C. App. 1215(b)(2)) for the Renegotiation Board.

2. *Expiration date.* This bulletin expires January 1, 1978, unless sooner revised or superseded.

3. *Background.* Pub. L. 92-41 provides that the Secretary of the Treasury shall set the interest rate to be paid by contractors on excessive profits as determined by the Renegotiation Board. Various provisions of the FPR require contractors to pay interest on amounts owed the Government at the rate established by the Secretary of the Treasury pursuant to Pub. L. 92-41. The FPR also provides that the same rate of interest shall be paid by the Government when a contractor's claim is decided in his favor under the Disputes clause.

4. *Agency information.* The Secretary of the Treasury has established an interest rate of 7⅞ percent as applicable to the 6-month period beginning on July 1, 1977, and ending on December 31, 1977. The following sections of the Federal Procurement Regulations are affected by the interest rate:

(Sections 1-1.322, 1-7.203-15, 1-8.212-1(f), 1-8.701(j), 1-8.702(j), 1-8.703(j), 1-8.704-1(f), 1-8.706(h), 1-8.804-2(b), 1-8.806-4 (article 6, paragraph (e)), 1-30.403, 1-30.414-2(k)(2), and 1-30.414-2(n)(3).)

Dated: August 25, 1977.

ROBERT P. GRAHAM,
Commissioner, Federal Supply Service.

[FR Doc.77-26191 Filed 9-8-77;8:45 am]

QUARTERLY REPORT ON ENVIRONMENTAL ACTIONS

March 1, 1977, Through May 31, 1977

Pursuant to the provisions of the National Environmental Policy Act of 1969 (42 U.S.C. 4321, et seq.), and section 1500.6(e) of the Council on Environmental Quality Guidelines for the Preparation of Environmental Impact Statements (38 FR 20550) the following is a list of administrative actions for which environmental impact statements were under preparation by the General Services Administration from March 1, 1977, through May 31, 1977, and a list of administrative actions for which environmental impact statements are planned in the future. Also listed are actions for which environmental assessments were completed with negative declarations.

Dated: August 29, 1977.

JAMES B. SHEA, JR.,
Commissioner,
Public Buildings Service.

ENVIRONMENTAL IMPACT STATEMENTS/NEGATIVE DECLARATIONS

REGION 1

A. EIS' in preparation:
Ft. Kent, Maine.—Preliminary draft EIS for construction of a new Border Station.
Springfield, Mass.—Draft EIS for construction of a new Courthouse-Federal Office Building and Parking Facility.
Providence, R.I.—Preliminary draft EIS for construction of a Federal Office Building and the repair and alteration of the existing Federal Building-U.S. Courthouse.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Alcohol, Drug Abuse, and Mental Health Administration

ADVISORY COMMITTEES

Meetings

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory bodies scheduled to assemble during the month of October 1977:

SOCIAL WORK EDUCATION REVIEW COMMITTEE

Date and time: October 11, 9 a.m.
Place: Conference Room A, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857.
Type of meeting: Open meeting.
Contact: Dr. Milton Wittman, Parklawn Building, Room 8C-26, 5600 Fishers Lane, Rockville, Md. 20857 (301-443-4187).
Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute of Mental Health relating to social work education and makes recommendations to the National Advisory Mental Health Council for final review.
Agenda: from 9 a.m. to 4 p.m., on October 11, the meeting will be open for administrative announcements and discussion of review criteria in the light of new program initiatives and priorities of the Institute.

V 42 175 SEP 9 77 UMI

DRUG ABUSE RESEARCH REVIEW COMMITTEE

Date and time: October 25–28; 9 a.m.
Place: Conference Rooms M, J, and I, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857.
Type of meeting: Open—October 25, 9–9:30 a.m. Closed—Otherwise.
Contact: Mrs. Lucy Stevens, Rockwall Building, Room 750, 11400 Rockville Pike, Rockville, Md. 20852.
Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute on Drug Abuse relating to research activities and makes recommendations to the National Advisory Council on Drug Abuse for final review.
Agenda: From 9 a.m. to 9:30 a.m., October 25, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public, in accordance with the determination by the Acting Administrator, Alcohol, Drug Abuse and Mental Health Administration, pursuant to the provisions of section 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463 (5 U.S.C. Appendix I).

Substantive program information may be obtained from the contact persons listed above. The NIMH Information Officer who will furnish upon request summaries of the meeting and rosters of the committee members is Mr. Edwin Long, Deputy Director, Division of Scientific and Public Information, NIMH, Parklawn Building, Room 15–105, 5600 Fishers Lane, Rockville, Md. 20857 (301–443–3600). The NIDA Information Officer who will furnish summaries of the meeting and a roster of the committee membership on request is Mr. Kenneth Howard, Director, Office of Communications and Public Affairs, Rockwall Building, Room 110, 11400 Rockville Pike, Rockville, Md. 20852 (301–443–6500).

Dated: September 2, 1977.

CAROLYN T. EVANS,
Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

ADVISORY COMMITTEES

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory body scheduled to assemble during the month of October 1977:

NATIONAL ADVISORY COUNCIL ON DRUG ABUSE

Date and time: October 3–4; 9:30 a.m.
Place: Conference Room 873, Rockwall Building, 11400 Rockville Pike, Rockville, Md. 20852.
Type of meeting: Closed—9:30 a.m.–noon, October 3. Open—Otherwise.
Contact: Ms. Pamela Thurber, Room 844, Rockwall Building, 11400 Rockville Pike, Rockville, Md. 20852. (301–443–6618).
Purpose: The National Advisory Council on Drug Abuse advises and makes recommendations to the Secretary, Department of Health, Education, and Welfare, the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, and the Director, National Institute on Drug Abuse, on the development of new initiatives and priorities and the efficient administration of drug abuse research, training, demonstration, prevention, and community services programs. The Council also gives advice on policies and priorities for drug abuse grants and contracts and reviews and makes recommendations on grant applications.
Agenda: From 9:30 a.m. to 12 noon, October 3, the meeting will be closed for final review of grant applications for Federal assistance in accordance with the determination by the Acting Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of section 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463 (5 U.S.C. Appendix I).

The remainder of the meeting from 1 p.m., on October 3 until 5 p.m., on October 4 will be open to the public for a discussion of issues in the field of drug abuse, orientation to the programs of the Institute, development of priorities for action by the Council, and administrative announcements.

Agenda items are subject to change as priorities dictate.

Substantive information, summaries of the meeting and rosters of the Council members can be obtained from contact person listed above.

Dated: September 2, 1977.

CAROLYN T. EVANS,
Committee Management Officer Alcohol, Drug Abuse, and Mental Health Administration.

Health Resources Administration

TASK FORCE ON COST-SHARING OF THE COOPERATIVE HEALTH STATISTICS ADVISORY COMMITTEE

Notice of Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), announcement is made of the following National Advisory body scheduled to assemble during the month of September 1977:

TASK FORCE ON COST-SHARING OF THE COOPERATIVE HEALTH STATISTICS ADVISORY COMMITTEE

Date and Time: September 26–27, 1977, 12 Noon.
Place: Conference Room 1–25, Center Building, 3700 East-West Highway, Hyattsville, Md. 20782.
Type of meeting: Open the entire meeting.
Purpose: The Cooperative Health Statistics Advisory Committee felt that one of the key issues that should be explored and developed by a Task Force was the matter of cost-sharing as it relates to the Cooperative System. As the funding of the Cooperative Health Statistics System continues and increases, it is essential that valid evaluation criteria and cost-sharing mechanisms be developed in support of this funding to insure that each participating level of government contributes its fair share to the System and that each of the seven components is funded adequately and on the basis of equitable formulae.
Agenda: Review the problems with implementation of the Cost-Sharing formula in the vital statistics components of the Cooperative Health Statistics System.

The meeting is open to the public for observation and participation. Anyone wishing to participate, obtain a roster of members, or other relevant information, should contact Mr. James A. Smith, National Center for Health Statistics, Room 2–12, Center Building, 3700 East-West Highway, Hyattsville, Maryland 20782, Telephone (301) 436–7122.

Agenda items are subject to change as priorities dictate.

Dated: September 6, 1977.

JAMES A. WALSH,
Associate Administrator for Operations and Management.

Health Services Administration

GRANTS FOR BLIND AND DISABLED CHILDREN

Availability of Information and Clearance for State Plan Submission

Section 501(a) of Pub. L. 94-566 amended Title XVI of the Social Security Act by revising section 1615. The revised section 1615(b) requires the establishment of criteria for the approval of State plans for services for blind and disabled children under the age of 16 years.

Blind or disabled persons under 16 years of age receiving benefits under the Supplemental Security Income Program are to be referred to an identifiable unit of the State for certain enumerated services.

Under the revised section 1615(b), the State agency administering the State plan for Crippled Children's Services must establish an identifiable unit for serving blind or disabled children and must coordinate its activities with other agencies serving disabled children. An agency other than the agency administering the Crippled Children's Services plan may be designated by the Governor of a State as the responsible agency under this program if he finds that such other agency can carry out the function in a more efficient and effective manner.

The designated agency must submit a plan acceptable to the Secretary for carrying out section 1615(b). That section directs the Secretary to prescribe, by regulation, criteria for approval of State plans for:

(a) Assuring appropriate counseling for disabled children so referred and their families;

(b) Establishment of individual service plans for such disabled children, and prompt referral to appropriate medical, educational, and social services;

(c) Monitoring to assure adherence to such service plan; and

(d) Provision for such disabled children who are 6 years of age and under, or who have never attended public school and require preparation to take advantage of public educational services and of medical, social, developmental, and rehabilitative services, in cases where such services reasonably promise to enhance the child's ability to benefit from subsequent education or training, or otherwise to enhance his opportunities for self-sufficiency or self-support as an adult.

Regulations for establishing such criteria will be forthcoming. To facilitate the development of State plans for carrying out the program under section 1615, however, the Secretary has concluded that he should provide the States with preliminary information and guidance in developing such plans. Accordingly, notice is hereby given that preliminary information and guidance on developing applications for funds under section 1615 for blind and disabled children under the age of 16 may be obtained by writing to the DHEW Regional Health Administrator or to the Office of Maternal and Child Health, Bureau of Community Health Services, Room 7–15, 5600 Fishers Lane, Rockville, Md. 20857. All information and guidance so obtained is provided subject to the qualification that it reflects preliminary policies only and that subsequent changes contained in regulations may require appropriate revisions in a proposed State plan as a condition to approval of such plan by the Secretary.

The revised section 1615 authorizes $30 million for implementation of this program. Under the statute, payments to a State or the District of Columbia may not exceed an amount which bears the same ratio to $30 million as the under-age-7 population of such States or the District of Columbia bears to the total under-age-7 population of the 50 States and the District of Columbia. The Secretary is directed under section 1615 to publish the limitation applicable to each State for each fiscal year, based on the most recent satisfactory Department of Commerce data. The limits of the amounts available to each State and the District of Columbia for the last quarter of fiscal year 1977, appear at Appendix A to this notice.

Dated: September 1, 1977.

GEORGE I. LYTHCOTT,
Administrator, Health Services Administration.

APPENDIX A—LIMITS OF AMOUNTS AVAILABLE TO STATES PURSUANT TO SECTION 1615(b) OF THE SOCIAL SECURITY ACT, AS AMENDED BY PUB. L. 94-566, REHABILITATION SERVICES FOR BLIND AND DISABLED CHILDREN, FISCAL YEAR 1977[1]

Office of Education

COMMUNITY EDUCATION ADVISORY COUNCIL

Meeting

AGENCY: Office of Education, HEW, Community Education Advisory Council.

ACTION: This notice sets forth the schedule and proposed agenda of the forthcoming meeting of the Community Education Advisory Council. It also describes the functions of the Council. Notice of these meetings is required under section 10(a)(2) of the Federal Advisory Committee Act, Pub. L. 92-634. This document is intended to notify the general public of their opportunity to attend.

DATES: Meeting: September 26 and 27, 1977.

ADDRESS: Sheraton National Motor Hotel, Columbia Pike and Washington Boulevard, Arlington, Va.

FOR FURTHER INFORMATION CONTACT:

Paul Tremper, Office of Education, Department of Health, Education, and Welfare, Room 5622—ROB 3, 7th and D Streets SW., Washington, D.C. 20202; telephone 202–245–0691.

SUPPLEMENTARY INFORMATION: The Community Education Advisory Council is authorized under Pub. L. 93-380. The Council is established to advise the Commissioner of Education on policy matters relating to the interest of community schools.

All sessions of this meeting will be open to the public.

The meeting on September 26 will begin at 9 a.m. and end at 5 p.m. On September 27, the meeting will begin at 9 a.m. and end at 3:30 p.m.

The Community Education Advisory Council has been interested in the impact community education can have on problems of school violence, vandalism, and juvenile delinquency. During this meeting the Council will have the opportunity to examine components of community education which could be relevant to the prevention of juvenile delinquency. The Council has a special interest in promoting working relationships with other agencies, associations, and organizations in order to enhance the services provided through these programs and the Federal Community Education Program.

The proposed agenda includes:

(1) Special reports;
(2) Status of Advisory Council special projects;
(3) Update on evaluation;
(4) Discussion on juvenile delinquency;
(5) Future programmatic directions of the Federal community education program;
(6) Schedule of future meetings;
(7) Report on community education grantees;
(8) Update on study of State education agency community education programs;
(9) Other administrative matters and related business.

Records shall be kept of all Council proceedings and shall be available for public inspection in Room 5622, Regional Office Building 3, 7th and D Streets SW., Washington, D.C. 20202.

Signed at Washington, D.C., on September 6, 1977.

PAUL TREMPER,
Acting Director, Community Education Program.

NATIONAL ADVISORY COUNCIL ON BILINGUAL EDUCATION

Meeting

AGENCY: Office of Education, HEW, National Advisory Council on Bilingual Education.

ACTION: Notice.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the National Advisory Council on Bilingual Education. Notice of this meeting is required under the Federal Advisory Committee Act (5 U.S.C. Appendix 1, 10(a)(2)). This document is intended to notify the general public of their opportunity to attend.

DATES: September 19, 1977, November 1 Report Committee Meeting, 9 a.m.–10 a.m. September 19, 1977, Non-Spanish Minority Languages Committee Meeting, 10 a.m.–11 a.m. September 19, 1977,

V 42 175 SEP 9 77 UMI

Budget Committee Meeting, 11 a.m.–12 noon. September 20, 1977, Business Meeting, 9 a.m.–4:30 p.m.

ADDRESS: NASA Auditorium, Room 6104 FOB–6, 400 Maryland Avenue SW., Washington, D.C. 20202.

FOR FURTHER INFORMATION CONTACT:

Dr. John C. Molina, Director, Office of Bilingual Education, Reporters' Bldg., Room 421, Office of Education, 400 Maryland Avenue SW., Washington, D.C. 20202 (202–245–2600).

The National Advisory Council on Bilingual Education is established under Section 732(a) of the Bilingual Education Act (20 U.S.C. 880b–11) to advise the Secretary of Health, Education, and Welfare and the Commissioner of Education concerning matters arising in the administration of the Bilingual Education Act.

On September 19, 1977, three of the council's standing committees will meet: November 1 Report—discussion on the August 22, 1977 meeting held in Washington, D.C. regarding the first draft of the Third Annual Report to Congress (9–10 a.m.); Non-Spanish Minority Languages—review of recommendations relating to issue paper on "Serving diverse language groups" (10 a.m.–11 a.m.); and Budget—update Report of FY 1977 expenditures (11 a.m.–12 noon); On-going council business and Office of Bilingual Education Report to the Council (1:30–4:30).

The proposed agenda for the Council meeting on September 20, 1977 includes: (1) Committee Reports; (2) FY 1978 Work Plans; (3) Review of second draft of the Report to Congress with contractor.

Records will be kept of all Council proceedings and shall be available for public inspection in Room 421, Reporters' Bldg., 300 7th Street SW., Washington, D.C. 20202. In the event that the proposed agenda is completed prior to the projected date or time, the Council will adjourn the meeting.

Signed at Washington, D.C., on August 25, 1977.

JOHN C. MOLINA,
Director,
Office of Bilingual Education.

Statement of Organization, Functions and Delegations of Authority

Part EE, Office of Education (formerly Part 2B), Section EE.10 of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health, Education, and Welfare is amended to reflect the additions of Divisions in the Bureau of Student Financial Assistance which was created by the Secretary of Health, Education, and Welfare and the Commissioner of Education at 42 FR 13263 (March 9, 1977). A statement for an Office of Student Financial Assistance in each Region has been added in order to conform with an order by the Secretary on July 19, 1977.

The specific changes are as follows:

(1) A new functional statement for the Bureau of Student Financial Assistance and the regional Offices of Student Financial Assistance is aded as follows immediately after the statements for the Bureau of Education for the Handicapped and its Divisions:

BUREAU OF STUDENT FINANCIAL ASSISTANCE (EEM)

The Bureau of Student Financial Assistance formulates policy for and directs and coordinates activities of the Office of Education which provide financial assistance through grants, work and loan programs to students pursuing a postsecondary education. Programs include a grant program which provides for payment of entitlements to students enrolled or accepted for enrollment as undergraduates in eligible postsecondary educational institutions who are in financial need; programs which provide funds to eligible postsecondary educational institutions to provide grants to undergraduate students in exceptional financial need, to provide for part-time employment of needy students, and to establish and maintain loan funds to provide assistance to needy students; programs which provide for long-term low interest insured loans to students under which loans made by commercial and other lending institutions are insured or reinsured by the Federal government and for which payments are made to reduce interest costs for student borrowers, and special incentive allowances are paid to lenders; programs which provide for insured loans to students enrolled in health profession schools, under which loans made by commercial and other lending institutions are insured by the Federal government and payments are made for claims on insured loans; and programs which provide incentive grants to State agencies to provide financial assistance to students enrolled in postsecondary education and funds for training of institutional student financial aid officers. Provides direction to regional offices on regional program activities.

Division of Certification and Program Review (EEMC). Develops and disseminates standards for institutional certification for student assistance programs; develops and disseminates operating procedures for internal program reviews based on standards. Resolves audit exceptions and initiates actions which may result in limitation, suspension and termination proceedings for institutional participation in student assistance programs. Provides direction to regional offices on certification and review activities.

Division of Policy and Program Development (EEMF). Develops short and long-terms issues for program planning purposes and formulates program requirements, including legislative initiatives and fund requirements for student assistance programs; directs development of revised program policies and requirements; coordinates planning initiatives and provides authoritative advice on student assistance programs.

Division of Program Operations (EEMP). Provides the operational support for student assistance programs including the processing of fund requests and the issuing of award documents and authorizations; fund reconciliation, payment of interest billings and special allowances for insured loans; payment of claims to lenders, collection of insurance premiums, payment of claims for death and disability and teacher cancellations. Provides direction to the regional offices on operational activities.

Division of Quality Assurance (EEMQ). Determines the need for data and reports; prepares reports for management and planning purposes. Determines the impact of Bureau programs by analyzing statistical trends; analyzes program characteristics and recommends appropriate changes in policies or operating procedures. Reviews results of regional office operations to determine their effectiveness.

Division of Systems Design and Development (EEMR). Designs and develops automated systems for student assistance programs to meet operational objectives, both short and long-term. Directs system implementation and monitors contracts for system performance. Establishes controls over, and designs forms for system operations. Determines and authorizes expenditures for system contracts. Provides direction and support to regional offices on systems.

Division of Training and Dissemination (EEMT). Determines need for and provides for training of institutional student financial aid officers and staff, including development of training materials; develops and disseminates program brochures and program information to institutions, students, and the general public. Prepares program manuals for school and lender use in program administration. Provides direction to regional offices on training and dissemination activities.

Division of Compliance (EEMU). Develops standards and procedures for compliance and investigative reviews of problem schools in conjunction with the Office of the Inspector General/HEW and the Department of Justice; conducts and coordinates investigations; provides direction to regional staff and maintains liaison with the Inspector General and Department of Justice including providing support for potential criminal and civil proceedings.

The title and statement for the Division of Guaranteed Student Loans in each of the ten Regional Offices are deleted in their entirety and are replaced by the title and statement for the Office of Student Financial Assistance as follows:

Office of Student Financial Assistance (EEDIS-EEDXS). Conducts the field activities of the Bureau of Student Financial Assistance in accordance with direction and supervision from the Deputy Commissioner for Student Financial Assistance. Regional student assistance activities include, but are not limited to: Institutional program reviews and compliance; examination of loans' claims and collections; review of institutional funding requests; operation of automated system; and dissemination of information to institutions, students and the general public.

The titles and statements for the Division of Basic and State Student Grants published at 39 FR 36368, October 9, 1974, the Division of Student Financial Aid published at 41 FR 7980, February 23, 1976, and the Office of Guaranteed Student Loans and its three Divisions, the Division of Operational Support, the Division of Program Development, and the Division of Program Systems published at 39 FR 26185, July 17, 1974, are deleted in their entirety.

Dated: September 1, 1977.

HALE CHAMPION,
Acting Secretary.

National Institutes of Health

BOARD OF SCIENTIFIC COUNSELORS

Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Institute of Arthritis, Metabolism, and Digestive Diseases, October 28–29, 1977, National Institutes of Health, Building 4, Room 336.

This meeting will be open to the public from 9:30 a.m. to 4:30 p.m. on October 28 and from 9 to 11 a.m. on October 29. The open portion will be devoted to scientific presentations by various laboratories of NIAMDD intramural research. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Section 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public from 4:30 p.m. to closing on October 28 and from 11 a.m. to adjournment on October 29 for the review, discussion, and evaluation of individual programs and projects conducted by the National Institutes of Health, including consideration of personnel qualifications and performance, the competence of individual investigators, and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Messrs. James N. Fordham or Leo E. Treacy, Office of Scientific and Technical Reports, NIAMDD, National Institutes of Health, Building 31, Room 9A04, Bethesda, Md. 20014, will provide summaries of the meeting and rosters of the committee members.

Dated: August 26, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

BOARD OF SCIENTIFIC COUNSELORS

Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Institute of Allergy and Infectious Diseases, October 24, 25, and 26, 1977, at Rocky Mountain Laboratory in Hamilton, Mont.

This meeting will be open to the public on October 24 and 25 from 8:00 a.m. until recess. During this open session, the permanent staff of the Rocky Mountain Laboratory will present and discuss their immediate, past, and present research activities.

In accordance with the provisions set forth in sections 552b(c)(6), title 5, U.S. Code, and section 10(d) of Pub. L. 92–463, the meeting of the Board will be closed to the public on October 26 from 9:00 a.m. to adjournment for the review, discussion, and evaluation of individual intramural programs and projects conducted at the Rocky Mountain Laboratory of the National Institute of Allergy and Infectious Diseases, including consideration of personal qualifications and performance, and the competence of individual investigators.

Mr. Robert L. Schreiber, Chief, Office of Research Reporting and Public Response, National Institute of Allergy and Infectious Diseases, Building 31, Room 7A32, National Institutes of Health, Bethesda, Md., telephone 301–496–5717, will provide summaries of the meetings and rosters of the Board members.

Dr. Franklin A. Neva, Acting Executive Secretary, Board of Scientific Counselors, NIAID, NIH, Building 5, Room 116, telephone 301–496–2486, will provide substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.301, National Institutes of Health.)

Dated: September 2, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

BOARD OF SCIENTIFIC COUNSELORS

Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the National Heart, Lung, and Blood Institute Board of Scientific Counselors, November 10 and 11, 1977, National Institutes of Health, Building 10, Room 7N214. This meeting will be open to the public from 9:00 a.m. to 5:00 p.m. on November 10 and from 9:00 to 12 noon on November 11 for discussion of the general trends in research relating to cardiovascular, pulmonary and certain hematologic diseases. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in section 552(b)(c)(6), title 5, U.S. Code Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public from 1:30 p.m. to adjournment November 11 for the review, discussion, and evaluation of individual programs and projects conducted by the National Institutes of Health, including consideration of personnel qualifications and performance, the competence of individual investigators, and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mr. York Onnen, Chief, Public Inquiries and Reports Branch, National Heart, Lung, and Blood Institute, Building 31, Room 5A21, National Institutes of Health, Bethesda, Md. 20014, phone 301–496–4236, will provide summaries of the meeting and rosters of the Board members. Substantive program information may be obtained from Dr. Jack Orloff, Director, Division of Intramural Research, NHLBI, NIH Building 10, Room 7N214, phone 301–496–2116.

Dated: September 2, 1977.

NATIONAL ADVISORY RESEARCH RESOURCES COUNCIL

Amended Meeting

Notice is hereby given of a change in the agenda in the meeting of the National Advisory Research Resources Council, Division of Research Resources, September 19-21, 1977, Conference Room 9, Building 31, National Institutes of Health, Bethesda, Md. 20014, which was published in the FEDERAL REGISTER on August 23, 1977 (42 FR 42382).

The open portion of the meeting, scheduled for September 19, from 9:00 a.m. to recess, will include a status report and discussion of the Biotechnology Resources Program Work Group. The meeting will reconvene on September 19, at 7:30 p.m. to recess, in closed session, for the review and discussion of an application requesting support for the maintenance of a non-human primate blood grouping research resource, including the review of the administrative handling of the application. On September 20, the meeting will reconvene at 8:30 a.m. to recess, in closed session, for review, discussion, and evaluation of individual grant applications, and on September 21, the meeting will reconvene from 8:30 a.m. to adjournment, in closed session, for further review and discussion of an application requesting support for the maintenance of a non-human primate blood grouping research resource.

Dated: September 2, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

NATIONAL COMMISSION ON DIGESTIVE DISEASES

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the National Commission on Digestive Diseases, October 10, 11, 12, 1977, at the times and locations listed below. The entire meeting will be open to the public. Attendance by the public will be limited to space available.

On October 10, from 7:00-10:00 p.m., at the Barclay Hotel, Hamilton Suite, 111 E. 48th Street, New York, N.Y., the Commission will have a business and planning meeting. On October 11, from 8:30 to 10:00 a.m., in Room 109, Memorial Sloan Kettering Cancer Center, 1275 York Avenue, New York City, the Commission will continue the business and planning meeting; from 10:00 a.m. to 6:00 p.m., in Room 107, the Commission will hear public testimony. On October 12, from 8:30-10:00 a.m., Room C677, College of Medicine and Dentistry of New Jersey, 100 Bergen Street, Newark, N.J., the Commission will hold a business meeting; from 10:00 a.m. to 6:00 p.m., Room B515, the Commission will hear public testimony.

Any member of the public who wishes to appear before the Commission between 10:00 a.m. and 6:00 p.m., October 11 and 12 shall file a written statement or detailed summary of his remarks with the Commission before October 1, 1977. Statements or summaries shall be sent to Dr. Thomas P. Vogl, Executive Secretary, National Commission on Digestive Diseases, Room 6C16, the Federal Building, 7550 Wisconsin Avenue, Bethesda, Md. 20014. The time allotted to each participant will be determined by the Commission Chairman based upon the number of individuals who request an opportunity to make presentations.

Messrs. James N. Fordham or Leo E. Treacy, Office of Scientific and Technical Reports, NIAMDD, National Institutes of Health, Building 31, Room 9A04, Bethesda, Md. 20014, will provide summaries of the Commission meeting.

(Catalog of Federal Domestic Assistance Program No. 13.484, National Institutes of Health.)

Dated: August 29, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

NATIONAL HEART, LUNG, AND BLOOD INSTITUTE

Meeting

In compliance with the intent of Congress, as stated in the Report of the House Committee on Appropriations (95th Congress), to assess the state-of-the-art in Cooley's anemia research and treatment, the National Heart, Lung, and Blood Institute is holding a meeting with pediatric hematologists; basic scientists; epidemiologists; and family health, public health, and nurse practitioners who have had experience with Cooley's anemia patients and their families. The participants will also consider the epidemiology of the disease; the public and private resources for the diagnosis of, screening for, and research on Cooley's anemia; and the most fruitful areas for future research.

The entire meeting is open to the public from 9:30 a.m. to adjournment on Monday, October 3, 1977, in Building 31, Conference Room 4, National Institutes of Health, Bethesda, Md. 20014. Individuals interested in obtaining further information about this meeting should contact Mr. John B. Lyons, Division of Blood Diseases and Resources, National Heart, Lung, and Blood Institute, Building 31, Room 4A21, Bethesda, Md. 20014, phone 301-496-3533. Attendance will be limited to the space available.

Dated: September 2, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

NEUROLOGICAL DISORDERS PROGRAM-PROJECT REVIEW A COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Neurological Disorders Program-Project Review A Committee, National Institutes of Health, October 20-22, 1977, in the Chancery Room A, Embassy Row Hotel, 2015 Massachusetts Avenue, Washington, D.C. 20036.

The meeting will be open to the public from 8:30 p.m. until 10:30 p.m. on October 20th, to discuss program planning and program accomplishments. Attendance by the public will be limited to space available. In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on October 21st, from 8:30 a.m. to adjournment on October 22nd, for the review, discussion and evaluation of individual initial pending and renewal grant applications. These applications and the discussion could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

Mr. Robert N. Hinkel, Acting Chief, Office of Scientific and Health Reports, Building 31, Room 8A03, NIH, NINCDS, Bethesda, Md. 20014, telephone 301-496-5751, will furnish summaries of the meeting and rosters of committee members.

Dr. Leon J. Greenbaum, Jr., Executive Secretary, Federal Building, Room 9C14B, Bethesda, Md. 20014, 301-496-9223, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.852, National Institutes of Health.)

Dated: August 29, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

NEUROLOGICAL DISORDERS PROGRAM-PROJECT REVIEW B COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Neurological Disorders Program-Project Review B Committee, National Institutes of Health, October 20-22, 1977, in the Chancery Room B, Embassy Row Hotel, 2015 Massachusetts Avenue, Washington, D.C. 20036.

This meeting will be open to the public from 8:30 p.m. until 10:30 p.m. on October 20th, to discuss program planning and program accomplishments. Attendance by the public will be limited to space available. In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on October 21st, from 8:30 a.m. to adjournment on October 22nd, for the review, discussion and evaluation of individual initial pending and renewal grant applications. These applications and the discussion could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

Mr. Robert N. Hinkel, Acting Chief, Office of Scientific and Health Reports, Building 31, Room 8A03, NIH, NINCDS, Bethesda, Md. 20014, telephone 301-496-5751, will furnish summaries of the meeting and rosters of committee members.

Dr. John W. Diggs, Executive Secretary, Federal Building, Room 9C10B Bethesda, Md. 20014 (301-496-9223), will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.852, National Institutes of Health.)

Dated: August 29, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

STUDY SECTIONS

Meetings

Pursuant to Pub. L. 92–463, notice is hereby given of the meetings of the following study sections for October and November 1977, and the individuals from whom summaries of meetings and rosters of committee members may be obtained.

These meetings will be open to the public to discuss administrative details relating to Study Section business for approximately one hour at the beginning of the first session of the first day of the meeting. Attendance by the public will be limited to space available. These meetings will be closed thereafter in accordance with the provisions set forth in sections 552(b)(c)(4) and 552(b)(c)(6), Title 5 U.S. Code and section 10(d) of Pub. L. 92–463, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

Mr. Richard Turlington, Chief, Grants Inquiries Office of the Division of Research Grants, Westwood Building, National Institutes of Health, Bethesda, Md. 20014, telephone area code 301–496–7441 will furnish summaries of the meetings and rosters of committee members. Substantive program information may be obtained from each Executive Secretary whose name, room number, and telephone number are listed below each study section. Anyone planning to attend a meeting should contact the Executive Secretary to confirm the exact meeting time.

OCTOBER TO NOVEMBER

Public Health Service

QUALIFIED HEALTH MAINTENANCE ORGANIZATIONS

Notice

Notice is hereby given, pursuant to 42 CFR § 110.605, that in the month of July 1977 the following entities have been determined to be qualified health maintenance organizations under section 1310(d) of the Public Health Service Act (42 U.S.C. 300e–9(d)):

LIST OF QUALIFIED HEALTH MAINTENANCE ORGANIZATIONS

NAME, ADDRESS, SERVICE AREA, AND DATE OF QUALIFICATION

(Operational Qualified Health Maintenance Organization: 42 CFR § 110.603(a))

1. Group Health Plan of New Jersey, Inc. (Staff model, see section 1310(b)(1) of the Public Health Service Act), 501–70th Street, Guttenberg, N.J. 07093. Service area as follows:

Cliffside PK., 07010.	Union City, 07087.
Edgewater, 07020.	Weehawken, 07087.
Fairview, 07020.	Guttenberg, 07093.
Fort Lee, 07024.	West New York, 07093.
East Newark, 07024.	Secaucus, 07094.
Harrison, 07024.	Jersey City, 07302, 07304, 07306, 07307.
Hoboken, 07030.	Teterboro, 07608.
Kearny, 07032.	Little Ferry, 07643.
No. Arlington, 07032.	Palisades Park, 07650.
No. Bergen, 07047.	Ridgefield, 07657.
Lyndhurst, 07071.	
Carlstadt, 07072.	
E. Rutherford, 07073.	
Moonachie, 07074.	

Date of qualification: July 1, 1977. (Achieved preoperational status on June 27, 1977, see 42 FR 38649–50, July 29, 1977.)

(Transitionally Qualified Health Maintenance Organizations: 42 CFR § 110.603(b))

1. American Health Plan, Inc. (Medical Group Model, see section 1310(b)(1) of the Public Health Service Act), 1701 Northeast 164th Street, North Miami Beach, Fla. 33162. Service area: Dade and Broward Counties in the State of Florida. Date of qualification: July 29, 1977.

2. Family Health Program, Inc. (Staff Model, see section 1310(b)(1) of the Public Health Service Act), 2925 No. Palo Verde Avenue, Long Beach, Calif. 90815. Service area as follows: Orange County, Calif. and that portion of Los Angeles County, Calif. South of Firestone Boulevard (Manchester Boulevard). Salt Lake County and Davis County, Utah, and those portions of Utah, Tooele and Summit Counties, Utah within a thirty (30) mile radius of the FHP/Utah Medical Centers. The Island of Guam.

Zip codes in the service area are as follows:

Los Angeles County, California

Office of the Secretary

NATIONAL INSTITUTE OF EDUCATION

Statement of Organization, Functions, and Delegations of Authority

Part E of the Statement of Organization, Functions, and Delegations of Authority for the Education Division of the Department of Health, Education, and Welfare is amended to revise Chapter EN, "National Institute of Education", published in the FEDERAL REGISTER (40 FR 22019, May 20, 1075) and amended (40 FR 37071, August 25, 1975, and 42 FR 2544, January 12, 1977) to provide for a new Order of Succession by making the Deputy Director for Management the Acting Director in the absence of, or vacancy in the Office of, the Director and the Deputy Director.

Section EN.40, Order of Succession, is amended to read as follows: In the absence of the Director or in the event that there is a vacancy in that office, the Deputy Director shall serve as the Acting Director. In the event that both the Director and the Deputy Director are absent, or there is a vacancy in both offices, the following shall serve as Acting Director in the order indicated: Deputy Director for Management; Associate Director for Planning, Budget and Program Analysis; Associate Director for Administration and Management.

Dated: August 31, 1977.

JOHN YOUNG,
Assistant Secretary for
Budget and Management.

PRESIDENT'S COMMITTEE ON MENTAL RETARDATION

Meeting

The President's Committee on Mental Retardation was established by Executive Order to provide advice and assistance in the area of mental retardation to the President including evaluation of the adequacy of the national effort to combat mental retardation; coordination of activities of Federal agencies; provision of adequate liaison between foundations and other private organizations; and development of information designed for dissemination to the general public.

The Committee in cooperation with the National Association for Retarded Citizens and other national, public and private agencies will meet on Tuesday, September 27, 1977, 6 p.m. to 9:30 p.m., Wednesday, September 28, 1977, 9 a.m. to 9:30 p.m., and Thursday, September 29, 1977, 8:30 a.m. to 4 p.m., at the Airlie House, Warrenton, Va. At the meeting the Committee will discuss legal rights and issues as they relate to retarded citizens obtaining a status of full citizenship.

These meetings are open to the public.

Further information on the President's Committee on Mental Retardation may be obtained from Fred J. Krause, Executive Director, President's Committee on Mental Retardation, Room 2614, ROB No. 3, 7th & D Streets SW., Washington, D.C. 20201, telephone: 202–245–7634.

Dated: September 1, 1977.

FRED J. KRAUSE,
Executive Director, President's
Committee on Mental Retardation.

DEPARTMENT OF HOUSING URBAN DEVELOPMENT

Office of the Secretary

[Docket No. N–77–506]

PRIVACY ACT OF 1974

Deletion of Systems of Records

AGENCY: Department of Housihg and Urban Development.

ACTION: Deletion of Systems of Records.

SUMMARY: Notice is given that nine Privacy Act Systems of Records are deleted.

EFFECTIVE DATE: September 8, 1977.

ADDRESS: Rules Docket Clerk, Office of the Secretary, Room 5218, Department of Housing and Urban Development, 451 Seventh St. SW., Washington, D.C. 20410.

FOR FURTHER INFORMATION CONTACT:

Mr. Harold Rosenthal, Departmental Privacy Officer, Room 3176, Office of Organization and Management Information, Department of Housing and Urban Development, 451 Seventh St., S.W., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: On November 16, 1976, the Department published in the FEDERAL REGISTER (41 FR 50599) an annual notice of systems of records as required by the Privacy Act of 1974. This notice deletes the systems of records listed below since, with the exception of HUD/DEPT–33 which will be covered by HUD/DEPT–34 (Pay and Leave Records of Employees), the systems do not contain records with personal data that is retrievable by name or other individual personal identifier.

A Finding of Inapplicability respecting the National Environmental Policy Act of 1969 has been made in accordance with HUD Handbook 1390.1. A copy of this Finding of Inapplicability will be available for public inspection during regular business hours at the Rules Docket Clerk address set forth above.

HUD/DEPT–13

System name:
Cost Analyses of Projects.
Reason:
Records contained in this system have been determined not to be subject to the Privacy Act. The system contains records about HUD insured projects, corporations, businesses, and firms.

HUD/DEPT–30

System name:
Mobile Home Park Inspection.
Reason:
Records contained in this system have been determined not to be subject to the Privacy Act. The system contains records on mobile home park inspections.

HUD/DEPT–33

System name:
Multi-family Project Case Files.
Reason:
Records contained in this system have been determined not to be subject to the Privacy Act. The system contains records about HUD insured projects, corporations, businesses, and firms.

HUD/DEPT–36

System name:
Personnel Timekeeping System.
Reason:
This system is being covered by the Pay and Leave Records of Employees system, numbered HUD/DEPT–34.

HUD/DEPT–39

System name:
Project Files.
Reason:
Records contained in this system have been determined not to be subject to the Privacy Act. The system contains records about HUD insured projects, corporations, businesses, and firms.

HUD/DEPT–50

System name:
Freedom of Information Act Files.
Reason:
Records contained in this system have been determined not to be subject to the Privacy Act. The records do not contain information of a personal nature which is retrievable by name or other individual personal identifier.

HUD/FIA–2

System name:
Flood Insurance Files.
Reason:
Records contained in this system have been determined not to be subject to the Privacy Act. The system contains records relating to community participation in the Flood Insurance Program.

V 42 175 SEP 9 77 UMI

HUD/OILSR–1

System name:
Interstate Land Sales Registration.
Reason:
Records contained in this system have been determined not to be subject to the Privacy Act. The system contains records about developers, corporations, and subdivisions in interstate land sales.

HUD/OILSR–2

System name:
Interstate Land Sales Registration Investigations.
Reason:
Records contained in this system have been determined not to be subject to the Privacy Act. The system contains records about investigations of violations of the Interstate Land Sales Full Disclosure Act and the records are retrieved by name of subdivision or by name of subdivision developer.

(AUTHORITY: (5 U.S.C. 552a, 88 Stat. 1896; Sec. 7(d) Department of HUD Act (42 U.S.C. 3535(d))).)

NOTE.—It is hereby certified that the economic and inflationary impacts of this Notice have been carefully evaluated in accordance with OMB Circular A-107.

Issued at Washington, D.C., August 26, 1977.

PATRICIA ROBERTS HARRIS,
Secretary of Housing and Urban Development.

DEPARTMENT OF JUSTICE

UNITED STATES COMMITTEE ON SELECTION OF FEDERAL JUDICIAL OFFICERS

Meeting

The first and second scheduled meetings of the nominating panel for the United States Committee on Selection of Federal Judicial Officers is as follows:

(1) The first meeting will be held on Friday, September 16, 1977, at 9:30 a.m., in the United States Court of Claims, 717 Madison Place NW., Washington, D.C. The morning session will be concerned with the discussion of the procedural and substantive work of the Court of Claims and will be open to the public. The afternoon session will be devoted to procedures to be adopted by the Committee to accomplish its work and a discussion of the candidates. The afternoon session will be closed to the public pursuant to Pub. L. 92–463, Section 10(D) as amended. (Cf. 5 U.S.C. 552b(c)(6).)

(2) The second meeting will begin on Monday, October 10, 1977, at 9:30 a.m., in the United States Court of Claims, 717 Madison Place NW., Washington, D.C., and will continue, if necessary, through Wednesday, October 12, 1977. The purpose of this meeting will be to conduct interviews of applicants and to determine the recommendations to be made to the President. This meeting will be closed to the public pursuant to Pub. L. 92–463, Section 10(D) as amended. (Cf. 5 U.S.C. 552b(c)(6).)

JOSEPH A. SANCHES,
Advisory Committee Management Officer.

AUGUST 30, 1977.

DEPARTMENT OF LABOR

Bureau of Labor Statistics

BUSINESS RESEARCH ADVISORY COUNCIL'S COMMITTEE ON MANPOWER AND EMPLOYMENT

Meeting

The BRAC Committee on Manpower and Employment will meet at 1:30 p.m., September 29, 1977, at the General Accounting Office Building, 441 G Street NW., Room 4454A, Washington, D.C. The agenda for the meeting is as follows:

1. Local Area Unemployment Statistics.
2. Job Vacancies.
3. National Occupational Information Coordinating Committee (NOICC).
4. Collection of weekly earnings in CPS.

This meeting is open to the public. It is suggested that persons planning to attend this meeting as observers contact Kenneth G. Van Auken, Executive Secretary, Business Research Advisory Council on area code 202–523–1559.

Signed at Washington, D.C. this 1st day of September 1977.

JULIUS SHISKIN,
Commissioner of Labor Statistics.

[FR Doc.77-26354 Filed 9-8-77;8:45 am]

BUSINESS RESEARCH ADVISORY COUNCIL'S COMMITTEE ON PRODUCTIVITY AND TECHNOLOGICAL DEVELOPMENTS

Meeting

The BRAC Committee on Productivity and Technological Developments will meet at 9:30 a.m., September 27, 1977, in Room S4215 (A, B, and C) of the New Department of Labor Building located at 200 Constitution Avenue NW., Washington, D.C. The agenda for the meeting is as follows:

1. The role of the National Academy of Science's Productivity Measurement Review Committee.
2. Developments in BLS studies of technology.
3. Status of studies on construction labor and material requirements.

This meeting is open to the public. It is suggested that persons planning to attend this meeting as observers contact Kenneth G. Van Auken, Executive Secretary, Business Research Advisory Council on Area Code 202–523–1559.

Signed at Washington, D.C. this 1st day of September 1977.

JULIUS SHISKIN,
Commissioner of Labor Statistics.

Employment and Training Administration

EMPLOYMENT TRANSFER AND BUSINESS COMPETITION DETERMINATIONS UNDER THE RURAL DEVELOPMENT ACT

Applications

The organizations listed in the attachment have applied to the Secretary of Agriculture for financial assistance in the form of grants, loans, or loan guarantees in order to establish or improve facilities at the locations listed for the purposes given in the attached list. The financial assistance would be authorized by the Consolidated Farm and Rural Development Act, as amended, 7 U.S.C. 1924(b), 1932, or 1942(b).

The Act requires the Secretary of Labor to determine whether such Federal assistance is calculated to or is likely to result in the transfer from one area to another of any employment or business activity provided by operations of the applicant. It is permissible to assist the establishment of a new branch, affiliate or subsidiary, only if this will not result in increased unemployment in the place of present operations and there is no reason to believe the new facility is being established with the intention of closing down an operating facility.

The Act also prohibits such assistance if the Secretary of Labor determines that it is calculated to or is likely to result in an increase in the production of goods, materials, or commodities, or the availability of services or facilities in the area when there is not sufficient demand for such goods, materials, commodities, services, or facilities to employ the efficient capacity of existing competitive commercial or industrial enterprises, unless such financial or other assistance will not have an adverse effect upon existing competitive enterprises in the area.

The Secretary of Labor's review and certification procedures are set forth at 29 CFR Part 75. In determining whether the applications should be approved or denied, the Secretary will take into consideration the following factors:

1. The overall employment and unemployment situation in the local area in which the proposed facility will be located.
2. Employment trends in the same industry in the local area.
3. The potential effect of the new facility upon the local labor market, with particular emphasis upon its potential impact upon competitive enterprises in the same area.
4. The competitive effect upon other facilities in the same industry located in other areas (where such competition is a factor).
5. In the case of applications involving the establishment of branch plants or facilities, the potential effect of such new facilities on other existing plants or facilities operated by the applicant.

All persons wishing to bring to the attention of the Secretary of Labor any information pertinent to the determinations which must be made regarding these applications are invited to submit such information in writing within two weeks of publication of this notice to: Deputy Assistant Secretary for Employment and Training, 601 D St. NW., Washington, D.C. 20213.

Signed at Washington, D.C. this Sixth day of September 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

Applications received during the week ending Sept. 2, 1977

Name of applicant	Location of enterprise	Principal product or activity
C Y R Bros. Meat Packing, Inc.	Caribou, Maine	Potato processing and food wholesaling.
Gerald Dwight Paul	Hernando, Miss.	Roadway inn.

FEDERAL-STATE EXTENDED BENEFITS

Availability of Extended Benefits in All States

This notice announces the beginning of a national Extended Benefit Period in all States, effective on August 28, 1977.

BACKGROUND

The Federal-State Extended Unemployment Compensation Act of 1970 (title II of Public Law 91–373; 84 Stat. 695, 708) created a program of extended unemployment benefits (referred to as Extended Benefits) as a permanent part of the Federal-State Unemployment Compensation Program, for unemployed individuals who have exhausted their rights to regular unemployment benefits under State and Federal unemployment compensation laws. Extended Benefits are payable during an Extended Benefit Period, which is triggered on in a State when unemployment in the State or nation reaches the high levels set in the Act. An Extended Benefit Period actually begins at the beginning of the third week after the week for which there is an "on" indicator. During an Extended Benefit Period the maximum amount of Extended Benefits which is payable to eligible individuals is up to 13 weeks.

There is a national Extended Benefit "on" indicator for a week if the United States Secretary of Labor determines that for the thirteen week period ending with that week the average rate of insured unemployment (seasonably adjusted) for all States equalled or exceeded 4.5 per centum. Whenever there is a national "on" indicator under the Act, an Extended Benefit Period will commence in every State in which an Extended Benefit Period is not already in effect, on the first day of the third week following the week for which there was an "on" indicator.

During an Extended Benefit Period, individuals who are unemployed and qualified may receive up to 13 weeks of Federal-State Extended Benefits, after they have exhausted their rights to regular unemployment benefits under State laws and benefits under the federal unemployment compensation programs for federal government employees and for ex-servicemen and ex-servicewomen. An Extended Benefit Period in any State will last for a minimum period of 13 weeks, and will end with the third week after which there is both a State and national "off" indicator in accordance with the State's unemployment compensation law and the Federal-State Unemployment Compensation Act of 1970.

DETERMINATION OF "ON" INDICATOR

The United States Secretary of Labor has determined in accordance with Section 203(d)(1) of the Federal-State Extended Unemployment Compensation Act of 1970 that the average rate of insured unemployment (seasonably adjusted) for all States for the period consisting of the week ending on August 13, 1977, and the immediately preceding twelve weeks, equalled 4.5 per centum.

Therefore, I have determined in accordance with the Federal-State Unemployment Compensation Act of 1970 and applicable regulations, and as authorized by Secretary of Labor's Order No. 4–75, dated April 16, 1975 (published in the FEDERAL REGISTER on April 28, 1975, at 40 FR 18515), that there was a national Extended Benefit "on" indicator for the week ending on August 13, 1977, and that an Extended Benefit Period begins on August 28, 1977, in all States not currenty in Extended Benefit Periods.

INFORMATION FOR CLAIMANTS

The Extended Benefit Period announced in this notice will last for not less than thirteen weeks. During the Extended Benefit Period, eligible individuals will be able to receive up to thirteen weeks of Extended Benefits.

The State employment security agency will furnish a written notice of potential entitlement to Extended Benefits to each individual who is an "exhaustee" (as defined in the Act and in Section 615.4(b) of Title 20, Code of Federal Regulations) of regular benefits payable under State unemployment compensation laws and under the federal unemployment compensation laws for federal government employees and for ex-servicemen and ex-servicewomen.

Persons who believe they may be entitled to Extended Benefits in any State (including the District of Columbia and the Commonwealth of Puerto Rico), or who wish to inquire about their rights under this program, should contact the nearest employment office or unemployment compensation claims office in their locality.

Signed at Washington, D.C., on Aug. 31, 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

[FR Doc 77-26350 Filed 9-8-77;8:45 am]

FEDERAL-STATE EXTENDED BENEFITS

Clarification of Notice of Ending of Extended Benefit Period in Vermont

A Notice of Ending of Extended Benefit Period and Federal Supplemental Benefit Period in Vermont was published in the FEDERAL REGISTER on September 2, 1977 (42 FR 44296). That notice announced that the average rate of insured unemployment in the State of Vermont had lowered in the 13-week period ending August 13, 1977, so that the Extended Benefit Period and Federal Supplemental Benefit Period in that State would end on September 3, 1977. Subsequently, it was determined that the average rate of insured unemployment (seasonally adjusted) for all States for the 13-week period ending on August 13, 1977, equalled 4.5 per centum, and this national "on" indicator was effective for Extended Benefit Periods with the week beginning on August 28, 1977. For that reason, the Extended Benefit Period in the State of Vermont will not terminate on September 3, 1977, and Extended Benefits will remain available to eligible individuals in that State.

As announced in the notice of September 2, 1977, the Federal Supplemental Benefit Period which began in the State on January 5, 1975, terminated on September 3, 1977.

Signed at Washington, D.C., on September 2, 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment & Training.

[FR Doc.77-26351 Filed 9-8-77;8:45 am]

FEDERAL SUPPLEMENTAL BENEFITS (EMERGENCY UNEMPLOYMENT COMPENSATION)

Notice of Ending of Federal Supplemental Benefit Period in Oregon

This notice announces the ending of the Federal Supplemental Benefit Period in the State of Oregon, effective on September 10, 1977.

V 42 175 SEP 9 77 UMI

BACKGROUND

The Emergency Unemployment Compensation Act of 1974 (Pub. L. 93-572, enacted December 31, 1974) created a temporary program of supplementary unemployment benefits (referred to as Federal Supplemental Benefits) for unemployed individuals who have exhausted their rights to regular and extended benefits under State and Federal unemployment compensation laws. Federal Supplemental Benefits are payable during a Federal Supplemental Benefit Period in a State which has entered into an Agreement under the Act with the United States Secretary of Labor. A Federal Supplemental Benefit Period is triggered on in a State when unemployment in the State or in the State and the Nation reaches the high levels set in the Act. During a Federal Supplemental Benefit Period the maximum amount of Federal Supplemental Benefits which are payable to eligible individuals is up to 13 weeks. A Federal Supplemental Benefit Period commenced in the State of Oregon on January 5, 1975.

The Act also provides that a Federal Supplemental Benefit Period in a State will trigger off when the rate of insured unemployment in the State averages less than 5.0 percent over a period of thirteen consecutive calendar weeks. The benefit period actually terminates at the end of the third week after the week for which there is an "off" indicator, if the benefit period will have been in effect for a minimum duration of 13 weeks.

DETERMINATION OF "OFF" INDICATOR

The employment security agency of the State of Oregon has determined under the Act and 20 CFR 618.19(b) (published in the FEDERAL REGISTER on March 23, 1976, at 41 FR 12151, 12157) that the average rate of insured unemployment in the State for the period consisting of the week ending on August 20, 1977, and the immediately preceding twelve weeks, was less than 5.0 percent.

Therefore, I have determined in accordance with the Act and 20 CFR 618.19(b), and as authorized by the Secretary of Labor's Order 4-75, dated April 16, 1975 (published in the FEDERAL REGISTER on April 28, 1975, at 40 FR 18515), that there was a Federal Supplemental Benefit "off" indicator in the State of Oregon for the week ending August 20, 1977, and that the Federal Supplemental Benefit Period in that State terminates on September 10, 1977.

Benefits to the same extent as if the Federal Supplemental Benefit Period continued to be in effect. The additional eligibility period will have a duration of 13 weeks, unless it is terminated sooner by reason of the beginning of a new Federal Supplemental Benefit Period in the State.

Any individual to whom Federal Supplemental Benefits or Federal-State Extended Benefits were payable in the State (whether or not any payment actually was made), for any portion of the last week of the Federal Supplemental Benefit Period, will have an additional eligibility period beginning immediately

INFORMATION FOR CLAIMANTS

following the end of the Federal Supplemental Benefit Period. During the additional eligibility period the individual will be entitled to Federal Supplemental

Individuals currently filing claims for Federal Supplemental Benefits will receive written notices from the Oregon Employment Division of the end of the Federal Supplemental Benefit Period in that State and its effect on their entitlement to Federal Supplemental Benefits. The notice to any individual who will have an aditional eligibility period following the Federal Supplemental Benefit Period will include information concerning potential entitlement to Federal Supplemental Benefits during the additional eligibility period.

Persons who wish information about their rights to Federal Supplemental Benefits in the State of Oregon should contact the nearest State Employment Office of the Oregon Employment Division in their locality.

Signed at Washington, D.C., on September 6, 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

Occupational Safety and Health Administration

ADVISORY COMMITTEE ON CONSTRUCTION SAFETY AND HEALTH

Meeting

Notice is hereby given that the Advisory Committee on Construction Safety and Health, established under section 107(e)(1) of the Contract Work Hours and Safety Standards Act (40 U.S.C. 333) and section 7(b) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 656) will meet on Tuesday October 4, and Wednesday October 5, 1977, at the Broadway Arms Room, The Cosmopolitan Hotel, 1780 Broadway, Denver, Colo. The meeting is open to the public.

The purpose of this meeting is to review and develop recommendations on Subpart M (floor and wall openings, and stairways) and Subpart L (ladders and scaffolds) of Part 1926—Construction Standards.

Written data, views or arguments may be submitted, preferably with 20 copies, to the Division of Consumer Affairs. Any such submissions received prior to the meeting will be provided to the members of the Committee and will be included in the record of the meeting.

Anyone wishing to make an oral presentation should notify the Division of Consumer Affairs before the meeting. The request should state the amount of time desired, the capacity in which the person will appear, and a brief outline of the content of the presentation. Oral presentations will be scheduled at the discretion of the Chairman, depending on the extent to which time permits.

Communications may be mailed to:

Ken Hunt, Office of Public and Consumer Affairs, Department of Labor, Occupational Safety and Health Administration, Third Street and Constitution Avenue NW., Room N-3635, Washington, D.C. 20210. Phone: 202-523-8024.

Materials provided to members of the Committee are available for inspection and copying at the above address.

Signed at Washington, D.C. this 31st day of August 1977.

BASIL WHITING,
Deputy Assistant Secretary of Labor, Occupational Safety and Health.

[V-74-28]

INTERLAKE STAMPING CORP.

Extension of Variance

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Extension of variance.

SUMMARY: This notice announces the extension of an experimental variance to Interlake Stamping Corp. from the standards prescribed in 29 CFR 1910.217 power presses.

DATES: The effective date of the variance is September 1, 1977.

FOR FURTHER INFORMATION CONTACT:

James J. Concannon, Director, Office of Variance Determination, Occupational Safety and Health Administration, U.S. Department of Labor, 3rd Street and Constitution Avenue NW., Room N-3668, Washington, D.C. 20210. Telephone: 202-523-7121.

or the following Regional and Area Offices:

U.S. Department of Labor, Occupational Safety and Health Administration, 32nd Floor—Room 3263, 230 South Dearborn Street, Chicago, Ill. 60604.

U.S. Department of Labor, Occupational Safety and Health Administration, 1240 East Ninth Street, Cleveland, Ohio 44199.

I. BACKGROUND

Pursuant to the authority in section 6(b)(6)(C) of the Occupational Safety and Health Act of 1970 (84 Stat. 1595; 29 U.S.C. 655) an experimental variance from the safety standards prescribed in 29 CFR 1910.217(c)(3)(iii)(b) was granted to Interlake Stampng Corp., 4732 East 355th Street, Willoughby, Ohio 44094 on August 31, 1976 (41 FR 36702-5).

II. FACTS

The variance granted authorized the use of Erwin Sick electronic light curtains as a tripping means as well as a presence sensing device on 5 Bliss-OBI mechanical power presses. This system has been used in Sweden and West Germany with excellent safety records, but has not been permitted in this country. Five additional Bliss-OBI mechanical power presses were used as a control group with conventional tripping means in order to compare the safety, worker acceptance and productivity of the two methods. It was anticipated that through this experiment sufficient information would be developed to enable OSHA to determine whether this system should be approved for general or limited use, and, if so, to develop appropriate regulations governing its use.

This experimental year has been successful, both from safety and informational aspects. There were only two minor malfunctions on the 5 presses equipped with the light curtain as a tripping means. In each instance the press failed in a safe manner. On the control group of 5 presses there were 18 minor malfunctions. There have been no injuries on any of the presses involved in the experiment. On 12 occasions the operator inadvertently broke the presence sensing light field. In each instance the press stopped immediately without completing its downstroke.

The press operators stated that they found the automatic tripping with the light curtain to be less fatiguing and, therefore, the preferred method of operation. In addition, Interlake Stamping Corp. reported increased production averaging approximately 34 percent.

Personnel from the OSHA National, Regional and Area Offices made visits to the Interlake facility to observe the operation during the experimental year.

III. DECISION

In spite of the success of the experiment to date, it has been determined that additional information would be obtained through an extension of this variance. Because of the learning curve associated with the new tripping method, less use was made of it during the first part of the year than subsequently. Extending the experiment will thus enable OSHA to obtain a broader data base on which to base its subsequent decisions concerning this issue. In addition, the extension will enable OSHA to observe the presses and obtain data concerning their use after the novelty has worn off and the presses are being operated as a part of the regular industrial environment.

IV. ORDER

Pursuant to authority in section 6(b)(6)(C) of the Occupational Safety and Health Act of 1970, and in Secretary of Labor's Order No. 8-76 (41 FR 25059), it is ordered that Interlake Stamping Corp. be, and it is hereby, authorized to continue the use of the Erwin Sick electronic light curtain as a means of initiating slide motion on its Bliss-OBI power presses under the terms of the experimental variance granted August 31, 1976 (41 FR 36702-5), except that item No. 17 shall be struck from the terms of the order and the following item inserted:

17. This variance shall continue in effect for 6 months, unless it is determined by OSHA that sufficient information has been obtained before the 6 months has expired. The Assistant Secretary for Occupational Safety and Health reserves the right to again extend the experiment if additional information is desired at the end of the 6 month period.

As soon as possible Interlake Stamping Corp. shall give notice to affected employees of the terms of this order by the same means required to be used to inform them of the application for variance.

Effective date: This order shall become effective on September 1, 1977, and shall remain in effect for 6 months, unless revoked or extended.

Signed at Washington, D.C. this 3rd day of September 1977.

EULA BINGHAM,
Assistant Secretary of Labor.

[FR Doc 77-26348 Filed 9-8-77;8:45 am]

Office of the Secretary

[TA-W-1501]

BETHLEHEM STEEL CORP., JOHNSTOWN, PA.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1501: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on December 15, 1976, in response to a worker petition received on that date which was filed by the United Steelworkers of America on behalf of workers and former workers producing wire products, wheels and axles at the Johnstown, Pa., plant of the Bethlehem Steel Corp.

The Notice of Investigation was published in the FEDERAL REGISTER on January 18, 1977 (42 FR 3367). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Bethlehem Steel Corp., its customers, the United Steelworkers of America, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assist-

V 42 175 SEP 9 77 UMI

ance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion (2) has not been met with respect to workers engaged in the production of wire products and criterion (3) has not been met with respect to workers engaged in the production of wheels and axles.

WIRE PRODUCTS

Sales of wire products at the Johnstown plant increased 17 percent in quantity in 1976 compared to 1975.

Production of wire products increased 21 percent in 1976 compared to 1975.

WHEELS AND AXLES

Imports of wheels and axles increased each year from 1972 through 1975, from 24,391 tons in 1972 to 74,955 tons in 1975. Imports decreased in 1976 by 57 percent to 32,197 tons. The ratio of imports to domestic production of wheels and axles decreased in 1973 to 6.7 percent from 7.1 percent in 1972, increased to 14.2 percent in 1974, increased further in 1975 to 19.9 percent, then decreased in 1976 to 10.6 percent.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that neither sales nor production of wire products produced at the Johnstown, Pa., plant of Bethlehem Steel Corp. has decreased as required for certification under section 222 of the Trade Act of 1974; and that imports of articles like or directly competitive with wheels and axles produced at the Johnstown, Pa., plant of Bethlehem Steel Corp. has not increased as required for certification under section 222 of the Trade Act of 1974. Therefore, workers engaged in employment related to the production of wire products, wheels, and axles are not eligible to apply for adjustment assistance.

Signed at Washington, D.C., this 26th day of August 1977.

HARRY GRUBERT,
Director, Office of Foreign Economic Research.

[FR Doc.77-25933 Filed 9-8-77;8:45 am]

[TA-W-1534]

BETHLEHEM STEEL CORP., SPARROWS POINT, MD.

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1534: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on December 15, 1976, in response to a worker petition received on December 15, 1976, which was filed by the United Steelworkers of America on behalf of workers and former workers producting nails and staples, carbon steel wire, cold rolled carbon steel sheet, and hot rolled carbon steel sheet at the Sparrows Point plant of the Bethlehem Steel Corp.

The Notice of Investigation was published in the FEDERAL REGISTER on January 18, 1977 (42 FR 3368). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Bethlehem Steel Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articels like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales and production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four criteria have been met with regard to workers engaged in employment related to the production of nails and staples. The investigaton also revealed that without regard to whether any of the other criteria have been met, criterion (2) has not been met for workers engaged in employment related to the production of wire, cold rolled sheet, and hot rolled sheet.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Workers at the Sparrows Point plant are separately identifiable by mill.

A. WIRE MILL (INCLUDES WORKERS ENGAGED IN THE PRODUCTION OF NAILS AND STAPLES AND WIRE)

The average number of workers engaged in employment related to the production of nails and staples and wire decreased 35 percent in 1975 compared to 1974. Employment declined 1 percent in 1976 compared to 1975.

Employment decreased 45 percent in the fourth quarter of 1975 and 27 percent in the first quarter of 1976 compared to the same quarters one year earlier. In the second quarter of 1976, employment increased 11 percent compared to the first quarter of 1976 (and showed no change from the second quarter of 1975). Employment increased 20 percent and 15 percent, respectively, in the third and fourth quarters of 1976 compared to the like quarters one year earlier.

Separate data were not available for workers engaged in the production of nails and staples and workers engaged in the production of wire.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

A. NAILS AND STAPLES

Sales in quantity declined 51 percent from 1974 to 1975 and further declined 13 percent from 1975 to 1976. Sales decreased 54 percent in quantity in the fourth quarter of 1975 and 56 percent in the first quarter of 1976 compared to the like quarters one year earlier. Sales then increased in the second and third quarters of 1976 compared to the like quarters one year earlier.

Production in quantity declined 44 percent from 1974 to 1975 and further declined 14 percent from 1975 to 1976. Production decreased 51 percent in quantity in the fourth quarter of 1975 and 60 percent in quantity in the first quarter of 1976 compared to the like quarters one year earlier. Production then increased in the second, third, and fourth quarters of 1976 compared to the like quarters one year earlier.

B. WIRE

Sales in quantity declined 44 percent from 1974 to 1975. Sales increased 31 percent from 1975 to 1976. Sales increased in every quarter of 1976 compared to the like quarter in 1975.

Production in quantity declined 33 percent from 1974 to 1975. Production increased 26 percent from 1975 to 1976. Production increased in every quarter of 1976 compared to the like quarter in 1975.

C. COLD ROLLED SHEET

Sales in quantity declined 45 percent from 1974 to 1975. Sales increased 49 percent from 1975 to 1976. Sales increased in every quarter of 1976 compared to the like quarter in 1975.

Production in quantity declined 45 percent from 1974 to 1975. Production increased 52 percent from 1975 to 1976. Production increased in every quarter of 1976 compared to the like quarter in 1975.

D. HOT ROLLED SHEET

Sales in quantity declined 35 percent from 1974 to 1975. Sales increased 26 percent from 1975 to 1976.

Production in quantity declined 27 percent from 1974 to 1975. Production increased 23 percent from 1975 to 1976.

INCREASED IMPORTS

A. NAILS AND STAPLES

Imports of nails and staples decreased from 359 thousand tons in 1972 to 326 thousand tons in 1973. In 1974 imports increased to 340 thousand tons, decreased to 210 thousand tons in 1975, then increased to 340 thousand tons in 1976.

The ratio of imports to domestic production of nails and staples decreased from 101.1 percent in 1972 to 90.4 percent in 1973. In 1974 the ratio increased to 102.4 percent, decreased to 79.2 percent in 1975, then increased to 121.4 percent in 1976.

CONTRIBUTED IMPORTANTLY

A. NAILS AND STAPLES

A survey of customers who purchase nails and staples from the Sparrows Point plant indicated that many customers had decreased purchases of nails and staples from the Sparrows Point plant and increased purchases of imported nails and staples. The lower prices of the imports was the reason most frequently cited for switching.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with nails and staples produced at the Sparrows Point, Md., plant of Bethlehem Steel Corp. contributed importantly to the total or partial separations of workers engaged in the production of those products at that plant. In accordance with the provisions of the Act, I make the following certification:

All workers at the Sparrows Point, Md., plant of Bethlehem Steel Corp. engaged in the production of nails and staples who became totally or partially separated from employment on or after November 15, 1975, and before April 1, 1976, are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Trade Act of 1974.

It is further concluded that neither sales nor production of wire, cold rolled sheet, or hot rolled sheet have declined at the Sparrows Point, Md., plant of the Bethlehem Steel Corp. as required for certification under section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 26th day of August 1977.

HARRY GRUBERT,
Director, Office of Foreign Economic Research.

[FR Doc.77-25934 Filed 9-8-77;8:45 am]

[TA-W-1775]

HAMILTON STANDARD DIVISION, UNITED TECHNOLOGIES, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1775: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 8, 1977, in response to a worker petition received on March 7, 1977, which was filed by Local 743 of the International Association of Machinists and Aerospace Workers on behalf of workers and former workers producing aircraft accessory parts at the Windsor Locks, Conn., plant of the Hamilton Standard Division of United Technologies, Inc.

The Notice of Investigation was published in the FEDERAL REGISTER on March 22, 1977 (42 FR 15477). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Hamilton Standard Division of United Technologies, Inc. and its customers.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion (4) has not been met for workers employed in Buildings 1 and 2 and criterion (1) has not been met for workers employed in Building 3.

The Windsor Locks facility of Hamilton Standard consists of a main plant (Buildings 1 and 2) and an electronic plant (Building 3).

Evidence developed in the Department's investigation revealed that there have been no total or partial separations of workers at Building 3 from February 28, 1976, one year prior to the signature date on the petition, to the present. In addition, company officials indicated that there were no expectations that separations would occur in the future at Building 3.

Further evidence developed during the Department's investigation revealed that separations of employment from Buildings 1 and 2 principally involved workers engaged in employment related to the production of fuel controls and environmental control systems (ECS's) for jet aircraft.

The Department conducted a survey of Hamilton Standard's customers for these fuel controls and ECS's. The survey revealed that none of the customers had bought fuel controls or ECS's from foreign sources. The customers contacted indicated that they rescheduled or cancelled orders with Hamilton Standard as a result of decreased demand for the jet aircraft they produced.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increased imports of articles like or directly competitive with the fuel controls and environmental control systems produced at Buildings 1 and 2 at the Windsor Locks, Conn., plant of United Technologies, Inc. have not contributed importantly to the total or partial separation of workers at these plants. I further conclude that a significant number or proportion of workers in building 3 at the Windsor Locks, Conn., plant have not become totally or partially separated, or threatened to become separated, as required for certification in Section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 26th day of August 1977.

HARRY GRUBERT,
Director, Office of Foreign Economic Research.

[TA-W-1789]

MR. POWELL, ARANSAS PASS, TEX.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1789: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on March 10, 1977 in response to a worker petition received on March 1, 1977 which was filed by three workers on behalf of workers and former workers engaged in shrimp fishing aboard the trawler Mr. Powell in Aransas Pass, Texas.

The Notice of Investigation was published in the FEDERAL REGISTER on March 23, 1977 (42 FR 16200). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the trawler Mr. Powell, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion (4) has not been met.

The Department's investigation has revealed that Mr. Powell's major customer purchases all the shrimp that Mr. Powell is able to supply. This customer only purchases imported shrimp when Mr. Powell and other domestic suppliers are unable to meet its requiremen's. Several factors tended to depress levels of shrimp production in 1976 and consequently the quantities made available to Mr. Powell's customer. These factors included adverse weather conditions, a lack of shrimp available in known fishing grounds in the first quarter of 1977 and the imposition by the Mexican government of a 200-mile fishing restriction which prevented domestic shrimpers from fishing within Mexican coastal waters.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that imports of articles like or directly competitive with the shrimp produced by the trawler Mr. Powell of Aransas Pass, Tex., have not contributed importantly to the total or partial separations of workers or threat thereof of that company as required for a certification under Section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 19th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-25935 Filed 9-8-77;8:45 am]

[TA-W-1686]

OHIO FERRO-ALLOYS CORP., PHILO, OHIO

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1686: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on February 24, 1977, in response to a worker petition received on February 8, 1977, which was filed by the United Steelworkers of America on behalf of workers and former workers producing high carbon ferromanganese, silicomanganese and ferrosilicon at the Philo, Ohio plant of Ohio Ferro-Alloys Corp.

The notice of investigation was published in the FEDERAL REGISTER on March 8, 1977 (42 FR 13091). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Ohio Ferro-Alloys Corp., its customers, the U.S. International Trade Commission, U.S. Department of Commerce, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that criterion four (4) has not been met with respect to ferromanganese and silicomanganese and that criteria two (2) and four (4) have not been met with respect to ferrosilicon.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average employment of production workers at the Philo, Ohio plant declined 4.2 percent in 1975 compared to 1974 and declined 3.8 percent in 1976 compared to 1975.

Production workers are used interchangeably in the production of high carbon ferromanganese, silicomanganese and ferrosilicon.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Plant sales of high carbon ferromanganese, in net tons, declined 16.0 percent in 1975 compared to 1974 and 9.5 percent in 1976 compared to 1975. Plant production, in net tons, declined 12.5 percent in 1975 compared to 1974 and 17.6 percent in 1976 compared to 1975.

Plant sales of silicomanganese, in net tons, declined 17.6 percent in 1975 compared to 1974 and 3.2 percent in 1976 compared to 1975. Plant production, in net tons, declined 6.6 percent in 1975 compared to 1974 and 14.2 percent in 1976 compared to 1975.

Plant sales of ferrosilicon, in net tons, declined 11.0 percent in 1975 compared to 1974 and increased 6.3 percent in 1976 compared to 1975. Sales declined 3.2 percent in the last quarter of 1976 compared to the same quarter in 1975. Plant production, in net tons, declined 7.8 percent in 1975 compared to 1974 and increased 5.6 percent in 1976 compared to 1975. Production declined 12.6 percent in the first quarter of 1976 compared to the same quarter in 1975.

INCREASED IMPORTS

Imports of high carbon ferromanganese increased from 290,281 short tons in 1972 to 374,228 short tons in 1974, declined to 369,821 short tons in 1975 and increased to 461,802 short tons in 1976.

Imports of silicomanganese increased from 38,674 short tons in 1972 to 67,751 short tons in 1974, declined to 55,567 short tons in 1975 and increased to 80,118 short tons in 1976.

Imports of ferrosilicon increased from 39,600 short tons in 1972 to 142,204 short tons in 1974, declined to 70,577 short tons in 1975 and increased to 96,775 short tons in 1976.

CONTRIBUTED IMPORTANTLY

A representative sample of the Philo plant's customers of ferromanganese indicated that most companies do not purchase imports. These firms cited availability of supply and price as the factors that most influenced their purchasing decisions.

A representative sample of the plant's customers of silicomanganese indicated that most do not purchase imports. The only customer that reported increased purchases of imported silicomanganese also increased purchases from the Philo plant.

A representative sample of the plant's customers of ferrosilicon indicated that customers which decreased purchases of ferrosilicon either do not purchase imported ferrosilicon or decreased purchases of imported ferrosilicon.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with ferrosilicon, ferromangense and ferrosilicon produced at the Philo, Ohio plant of Ohio Ferro-Alloys Corporation did not contribute importantly to the total or partial separations of the workers engaged in the production of such products at that plant as required in Sectin 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 29th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-25937 Filed 9-8-77;8:45 am]

[TA-W-1446]

PITTSBURG WORKS, PITTSBURG, CALIFORNIA, U.S. STEEL CORP.

Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1446: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on December 15, 1976, in response to a worker petition received on December 15, 1976, which was filed by the United Steelworkers of America on behalf of workers and former workers engaged in employment related to the production of carbon steel wire rod, wire and wire products, and pipe and tubing at the Pittsburg Works of the U.S. Steel Corp. in Pittsburg, Calif.

The Notice of Investigation was published in the FEDERAL REGISTER on January 7, 1977 (42 FR 1541). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the U.S. Steel Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

A. WIRE ROD

Average employment declined 20.4 percent in the fourth quarter of 1975 as compared to the like 1974 quarter. Average employment declined 26.4 percent and 7.2 percent in the first and second quarters, respectively, of 1976 as compared to the like 1975 quarters before increasing 25.9 percent in the July–November period of 1976 as compared to the like 1975 period.

Although plant sales of carbon steel wire rod began increasing in the second quarter of 1976, plant employment of workers engaged in the production of carbon steel wire rod did not begin to increase until the third quarter of 1976 as the company was reducing inventories.

B. WIRE AND WIRE PRODUCTS

Average employment declined 63.3 percent in the fourth quarter of 1975 as compared to the like 1974 quarter and declined 29.3 percent and 10.6 percent in the first and second quarters of 1976, respectively, as compared to the like 1975 quarters before increasing 20.9 percent in the July–November period of 1976 as compared to the like 1975 period.

Although plant sales of carbon steel wire and wire products began increasing in the second quarter of 1976, plant employment of workers engaged in the production of carbon steel wire and wire products didn't begin to increase until the third quarter of 1976 as the company was reducing inventories.

C. PIPE AND TUBING

Average employment declined 68.6 percent in the fourth quarter of 1975 as compared to the like 1974 quarter and declined 26.2 percent in the first eleven months of 1976 as compared to the like 1975 period.

SALES OR PRODUCTION OR BOTH, HAVE DECREASED ABSOLUTELY

A. WIRE ROD

Plant sales of carbon steel wire rod declined 14.5 percent in quantity in the fourth quarter of 1975 as compared to the like 1974 quarter. Plant sales declined 35.8 percent in the first quarter of 1976 as compared to the like 1975 quarter before increasing 36.4 percent in the April–November period of 1976 as compared to the like 1975 period.

B. WIRE AND WIRE PRODUCTS

Plant sales of carbon steel wire and wire products declined 60.4 percent in quantity in the fourth quarter of 1975 as compared to the like 1974 quarter. Plant sales continued to decline 39.6 percent in quantity in the first quarter of 1976 as compared to the like 1975 quarter before increasing 27.4 percent in the April–November period of 1976 as compared to the like 1975 period.

C. PIPE AND TUBING

Plant sales of carbon steel pipe and tubing declined 65.4 percent in the fourth quarter of 1975 as compared to the like 1974 quarter and declined 16.6 percent in the first eleven months of 1976 as compared to the like 1975 period.

INCREASED IMPORTS

A. WIRE ROD

Imports of carbon steel wire rod declined from 1,313,200 tons in 1972 to 1,306,400 tons in 1973, increased to 1,827,600 tons in 1974, declined to 1,027,600 tons in 1975, and increased to 1,032,900 tons in 1976.

The ratio of imports of carbon steel wire rod to domestic shipments declined from 52.3 percent in 1972 to 46.0 percent in 1973, increased to 71.8 percent in 1974, declined to 65.1 percent in 1975, and continued to decline to 35.7 percent in 1976.

B. WIRE AND WIRE PRODUCTS

Imports of carbon steel wire and wire products increased from 628,500 tons in 1972 to 894,200 tons in 1973 and continued to increase to 991,500 tons in 1974, then declined to 602,600 tons in 1975, and increased to 695,600 tons in 1976.

The ratio of imports of carbon steel wire and wire products to domestic shipments increased continuously from 21.7 percent in 1972 to 32.0 percent in 1974 and then declined to 28.5 percent in 1975 before increasing to 28.9 percent in 1976.

C. PIPE AND TUBING

Imports of carbon steel pipe and tubing declined from 1,768,100 tons in 1972 to 1,574,600 tons in 1973, increased to 1,761,500 tons in 1974, declined to 1,542,500 tons in 1975, and increased to 1,820,700 tons in 1976.

The ratio of imports of carbon steel pipe and tubing to domestic shipments declined from 28.6 percent in 1972 to 20.3 percent in 1973 and then increased continuously to 35.8 percent in 1976.

CONTRIBUTED IMPORTANTLY

The Department conducted surveys of customers of the Pittsburg plant that purchased one of the following products: carbon steel wire rod, carbon steel wire and wire products, and carbon steel pipe and tubing. For each product surveyed the comments of customers revealed that there is import influence in the domestic markets of these products. Some custom-

V 42 175 SEP 9 77 UMI

ers of each product that were surveyed indicated that they reduced purchases of the respective steel product made at the Pittsburg Works and switched to foreign sources to fill some of their needs.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increased imports of articles like or directly competitive with the carbon steel wire rod, carbon steel wire and wire products, and carbon steel pipe and tubing produced at the Pittsburg Works of the United States Steel Corp. in Pittsburg, Calif., have contributed importantly to the total or partial separations of workers engaged in employment related to the production of the above products at the plant as required for certification under Section 222 of the Trade Act of 1974.

In accordance with the provisions of the act, I make the following determinations:

All workers engaged in employment related to the production of either carbon steel wire rod or carbon steel wire and wire products at the Pittsburg Works of the United States Steel Corp. in Pittsburg, Calif., who became totally or partially separated from employment on or after November 15, 1975, and before July 1, 1976, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974. All workers engaged in the production of carbon steel wire rod or carbon steel wire and wire products that were separated on or after July 1, 1976, are not eligible to apply for adjustment assistance.

All workers engaged in employment related to the production of carbon steel pipe and tubing at the Pittsburg Works of the United States Steel Corp. in Pittsburg, Calif., who became totally or partially separated from employment on or after November 15, 1975, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 26th day of August 1977.

HARRY GRUBERT,
Director, Office of Foreign Economic Research.

[FR Doc.77-25938 Filed 9-8-77;8:45 am]

[TA-W-602]

RCA CORP., HARRISON, N.J.

Revised Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, on April 19, 1976, the Department of Labor issued a negative determination applicable to workers formerly engaged in employment related to the production of electronic test equipment at RCA Corp., Harrison, N.J. Notice of the determination was published in the FEDERAL REGISTER on April 30, 1976 (41 FR 18189).

At the request of a petitioning worker and following the issuance of a certification applicable to workers employed by a firm which produced the electronic test equipment under contract for RCA (Kenbar Industries, TA-W-1674), a review investigation was instituted by the Director of the Office of Trade Adjustment Assistance. The review investigation developed further information concerning operations performed in test equipment-related activities at the Harrison plant.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision thereof the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

After remaining unchanged throughout 1973 and 1974, employment of workers engaged in the designing and other activities related to the production of electronic test equipment at RCA declined 50 percent in December 1975 when RCA sold its test equipment operations. Remaining test equipment workers were separated in the first half of 1976.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales of electronic test equipment by RCA declined 10 percent in 1975 from 1974.

Production of one model of test equipment, designed in Harrison, N.J., and produced for two months by RCA in Asheville, N.C., was terminated in mid-1975.

INCREASED IMPORTS

Imports of electronic testing equipment increased in each year from 1972 through 1976. Imports increased from $88 million in 1972 to $179 million in 1976. Imports increased relative to domestic production from 10.6 percent in 1972 to 11.2 percent in 1975 and 12.2 percent in 1976.

CONTRIBUTED IMPORTANTLY

Sales of test equipment imported by RCA increased from 31 percent of total test equipment sales in 1974 to 46 percent of sales in 1975.

Purchases of imported test equipment by RCA relative to total sales increased from 34 percent in 1973 to 39 percent in 1974 and 53 percent in 1975.

Separations of workers from RCA's test equipment activity were due to both RCA's increased reliance on imported test equipment and the firm's ultimate sale of its test equipment operations. Separations of workers began in August 1975, several months prior to RCA's decision to leave the test equipment market, and at a time when imports were significantly increasing their share of RCA's total test equipment sales. All test equipment produced by and for RCA domestically was designed, tested, and shipped by RCA employees; employees separated between July 31, 1975 and mid-January 1976, when RCA left the test equipment market, were thus adversely affected by RCA's increased reliance on imported test equipment.

CONCLUSION

The revised determination applicable to TA-W-602 is hereby issued as follows:

All workers engaged in employment related to the production of electronic test equipment at RCA Corp., Harrison, N.J., who became totally or partially separated from employment on or after July 31, 1975, and before January 15, 1976, are eligible to apply for adjustment under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 29th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-1977]

S. KLEIN DIE CUTTING, INC. NEW YORK, N.Y.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1977: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on April 12, 1977 in response to a worker petition received on April 11, 1977 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers cutting brassieres and corsets at the New York, N.Y. plant of S. Klein Die Cutting, Inc.

The Notice of Investigation was published in the FEDERAL REGISTER on April 29, 1977 (42 FR 21873). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of S. Klein Die Cutting, Inc., its customers, the American Textile Manufacturers Institute, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the worker's firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion (4) has not been met.

The Department's investigation revealed that S. Klein Die Cutting is engaged only in the cutting of brassieres (and negligible amounts of corsets). S. Klein receives material from brassiere and corset manufacturers, cuts the material to specifications, and returns the cut pieces to the manufacturers for assembly into finished garments.

Customers (manufacturers of brassieres) of S. Klein decreased the absolute amount and the percentage of their cutting work contracted to S. Klein in the first half of 1977 compared to the first half of 1976 in favor of performing this work in-house. A small amount of cutting work has been contracted by the manufacturers to Puerto Rico. Thus, all cutting of the brassieres produced by these manufacturers continues to be performed domestically.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that imports of articles like or directly competitive with brassiere cuttings produced at the New York, N.Y. plant of S. Klein Die Cuting, Inc., did not contribute importantly to the decline in sales or producton or separation of workers of that plant as required for certification under section 222 of the Act.

Signed at Washington, D.C., this 29th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-25936 Filed 9-8-77;8:45 am]

[TA-W-2041]

SANDLER OF BOSTON NEW BEDFORD, MASS.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2041: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on May 2, 1977, in response to a worker petition received on May 2, 1977, which was filed on behalf of workers and former workers producing women's footwear at the New Bedford, Mass. plant of Sandler of Boston.

The notice of investigation was published in the FEDERAL REGISTER on May 13, 1977 (42 FR 24336). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Sandler of Boston, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, the investigation revealed that the second criterion has not been met.

The Department's investigation revealed that production in quantity at the New Bedford plant increased 25.8 percent in 1975 compared to 1974 and increased 63.8 percent in 1976 compared to 1975. For the January–April period of 1977, production increased 20.4 percent compared to the same period of 197. There is no indication that current workers are threatened with any involuntary separations.

Sandler of Boston also sells footwear purchased from outside sources and does not maintain separate sales data for the New Bedford plant.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that sales or production at the New Bedford, Mass. plant of Sandler of Boston have not decreased as required in Section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 29th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-25940 Filed 9-8-77;8:45 am]

[TA-W-1582]

UNION CARBIDE CORP., MARIETTA, OHIO, METALS DIVISION PLANT

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1582: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 18, 1977 in response to a worker petition received on that date which was filed by the Oil, Chemical and Atomic Workers' International Union on behalf of workers and former workers at the Marietta, Ohio Metals Division plant of Union Carbide Corp.

The notice of investigation was published in the FEDERAL REGISTER on January 28, 1977 (42 FR 5455). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Union Carbide Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that with respect to Medium Carbon/Medium Silicon Ferromanganese and Silicomanganese, criteria (2) and (4) have not been met and with respect to High Carbon Ferrochrome criterion (3) has not been met. However, with respect to Low Carbon Ferrochrome and High Carbon

V 42 175 SEP 9 77 UMI

Ferromanganese all of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average weekly production employment at the plant decreased 10 percent in 1975 from 1974 and 3 percent in 1976 from 1975.

Workers at the plant are generally not identifiable by product.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY HIGH CARBON FERROCHROME (HCFeCr)

Production, in quantity, of HCFeCr at the Marietta plant declined 23 percent in 1975 from 1974 and increased 29 percent in 1976 from 1975.

Sales, in quantity, of HCFeCr at the plant declined 48 percent in 1975 from 1974 and 16 percent in 1976 from 1975.

HCFeCr accounted for 9–11 percent (in quantity) of production at the plant in each of the three years, 1974–1976.

LOW CARBON FERROCHROME (LCFeCr)

Production, in quantity, of LCFeCr at the plant declined 24 percent in 1975 from 1974 and 19 percent in 1976 from 1975.

Sales, in quantity, of LCFeCr at the plant declined 37 percent in 1975 from 1974 and 9 percent in 1976 from 1975.

LCFeCr accounted for 7–12 percent, in quantity, of production at the plant in each of the three years, 1974–1976.

HIGH CARBON (STANDARD) FERROMANGANESE (HCFeMn)

Production, in quantity, of HCFeMn increased 26 percent in 1975 from 1974 and remained virtually unchanged in 1976.

Sales, in quantity, of HCFeMn at the plant decreased 4 percent in 1975 from 1974 and 3 percent in 1976 from 1975.

HCFeMn accounted for 33–48 percent (in quantity) of production at the plant in each of the three years, 1974–1976.

MEDIUM SILICON/MEDIUM CARBON FERROMANGANESE (MS/MCFeMn)

Production, in quantity, of MS/MCFeMn at the plant decreased 40 percent in 1975 from 1974 and increased 84 percent in 1976 from 1975.

Sales, in quantity, of MS/MCFeMn at the plant decreased 37 percent in 1975 from 1974 and increased 43 percent in 1976 from 1975.

MS/MCFeMn accounted for 7–13 percent (in quantity) of production at the plant in each of the three years, 1974–1976.

SILICOMANGANESE (SiMn)

Production, in quantity, of SiMn at the plant decreased 35 percent in 1975 from 1974 and increased 40 percent in 1976 from 1975.

Sales, in quantity, of SiMn at the plant declined 39 percent in 1975 from 1974 and increased 11 percent in 1976 from 1975.

SiMn accounted for 17–25 percent (in quantity) of production at the plant in each of the three years, 1974–1976.

Manganese metal, chromium metal, vanadium and electrolytic manganese dioxide are also produced at the plant but they each accounted for less than 4 percent (in quantity) of the production at the plant in each of the three years 1974–1976.

INCREASED IMPORTS

Imports of HCFeCr increased in absolute terms and relative to domestic production in 1972–1975 from the previous year. Imports decreased from 257,577 tons in 1975 to 178,846 tons in 1976. Relatively, imports were 118.9 percent of domestic production in the first 10 months of 1976 compared to 215.0 percent in the same period of 1975.

Imports of LCFeCr, in absolute terms and relative to domestic production, increased in 1972 from 1971, decreased in 1973 from 1972, and increased in 1974 from 1973 and in 1975 from 1974. Imports increased absolutely from 61,257 tons in 1975 to 63,750 tons in 1976. Relatively, imports were 211.6 percent in the first 10 months of 1976 compared to 104.6 percent in the first 10 months of 1975.

Imports of HCFeMn, in absolute terms and relative to domestic production, increased in 1972 from 1971, in 1973 from 1972, in 1974 from 1973 and decreased in 1975 from 1974. Imports increased from 369,821 tons in 1975, 72.5 percent of domestic production, to 461,802 tons, 116.5 percent of domestic production in 1976.

Imports of medium and low carbon ferromanganese in absolute terms and relative to domestic production increased in 1972 from 1971, decreased in 1973 from 1972, and decreased in 1974 from 1973. Imports decreased absolutely in 1975 from 1974, but increased relative to domestic production. Imports increased from 36,990 tons, 37.9 percent of domestic production in 1975 to 75,607 tons, 80.0 percent of domestic production in 1976.

Imports of silicomanganese increased in absolute terms in 1972 from 1971, in 1973 from 1972, in 1974 from 1973 and decreased in 1975 from 1974. Relative to domestic production, imports increased in 1972 from 1971, decreased in 1973 from 1972 and increased in 1974 from 1973 and in 1975 from 1974. Imports increased from 55,567 tons, 24.9 percent of domestic production in 1975, to 80,118 tons, 45.5 percent of domestic production in 1976.

CONTRIBUTED IMPORTANTLY

Customers of LCFeCr and HCFeMn indicated that they have decreased purchases of these products from Union Carbide and have increased purchases of imports. Customers of MS/MCFeMn and SiMn did not switch purchases from Union Carbide to imports.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with low-carbon ferrochrome and high carbon ferromanganese produced at the Marietta, Ohio, Metals Division plant of Union Carbide Corp., contributed importantly to the total or partial separation of the workers of that plant. In accordance with the provisions of the Act, I make the following certification.

All workers engaged in employment related to the production of low carbon ferrochrome and high carbon ferromanganese at the Marietta, Ohio, Metals Division plant of Union Carbide Corp. who became totally or partially separated from employment on or after August 1, 1976, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

It is further concluded that workers engaged in employment related to the production of high carbon ferrochrome, medium silicon/medium carbon ferromanganese and siliconmanganese are denied eligibility to apply for adjustment assistance.

Signed at Washington, D.C., this 29th day of January 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-25941 Filed 9-8-77;8:45 am]

[TA-W-2042]

VOGUE INDUSTRIES, INC., LOWELL, MASSACHUSETTS

Certification Regarding Eligibility To Apply for Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-2042: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on May 2, 1977 in response to a worker petition received on that date which was filed by Vogue Industries, Inc. on behalf of workers and former workers engaged in employment related to the production of stainless steel flatware at Vogue Industries, Inc., Lowell, Mass.

The Notice of Investigation was published in the FEDERAL REGISTER on May 13, 1977 (42 FR 24346). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Vogue Industries, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or threatened to become totally or partially separated;

(2) That sales or production, or both of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation revealed that all of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Employment of production workers at Vogue Industries decreased 33 percent from 1975 to 1976.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales at Vogue Industries decreased 41 percent in dollar value from 1975 to 1976.

Production at Vogue Industries decreased 39 percent in quantity from 1975 to 1976.

INCREASED IMPORTS

Imports of stainless steel flatware have increased absolutely and relatively to domestic production each year from 1972 through 1976. From 1975 to 1976, the ratio of imports to domestic production increased from 173.1 in 1975 to 233.7 percent in 1976.

CONTRIBUTED IMPORTANTLY

Customers surveyed reduced purchases of stainless steel flatware from Vogue Industries and increased purchases from domestic firms which have increasingly used foreign manufacturers as the source of stainless steel flatware.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with stainless steel flatware manufactured at Vogue Industries, Inc., Lowell, Mass. contributed importantly to the total or partial separation of the workers at that plant. In accordance with the provisions of the Act, I make the following certification:

All workers at Vogue Industries, Inc., Lowell, Mass. who became totally or partially separated from employment on or after April 26, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 29th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (77-59)]

SPACE SCIENCE STEERING COMMITTEE; OUT-OF-ECLIPTIC (OOE) MISSION AD HOC ADVISORY SUBCOMMITTEE

Establishment

Pursuant to Section 9(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463) and after consultation with the Office of Management and Budget NASA has determined that the establishment of an Ad Hoc Advisory Subcommittee for the Out-of-Ecliptic (OOE) Mission is in the public interest in connection with the performance of duties imposed upon NASA by law. The Space Science Steering Committee, under which the Subcommittee will operate, is a NASA internal committee, composed wholly of Government employees.

The function of this Subcommittee will be to obtain the advice of the scientific community on proposals in the specialized areas identified by the name of the Subcommittee.

KENNETH R. CHAPMAN,
Assistant Administrator for DOD and Interagency Affairs.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Humanities

EDUCATION PROGRAMS PANEL

Notice of Meeting

SEPTEMBER 2, 1977.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, as amended), notice is hereby given that a meeting of the Education Programs Panel will be held at 806 15th Street NW., Washington, D.C. 20506, in room 1025, from 9:30 a.m. to 5:30 p.m. on October 6, 1977.

The purpose of the meeting is to review Humanities Institutes applications submitted to the National Endowment for the Humanities for projects beginning after December 1, 1977.

Because the proposed meeting will consider financial information and disclose information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Acting Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated August 2, 1977, I have determined that the meeting would fall within exemptions (4) and (6) of 5 U.S.C. 552b(c) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. Stephen J. McCleary, 806 15th Street NW., Washington, D.C. 20506, or call area code 202-724-0367.

STEPHEN J. MCCLEARY,
Advisory Committee Management Officer.

FELLOWSHIPS PANEL

Notice of Meeting

AUGUST 30, 1977.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, as amended), notice is hereby given that a meeting of the Fellowships Panel will be held at 806 15th Street NW., Washington, D.C. 20506, in room 314 from 9:30 a.m. to 5:30 p.m. on October 4, 1977.

The purpose of the meeting is to review 1978 Summer Seminar applications from perspective seminar directors in the field of Spanish submitted to the National Endowment for the Humanities for projects beginning in the summer of 1978.

Because the proposed meeting will consider financial information and disclose information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Acting Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated August 2, 1977, I have determined that the meeting would fall within exemptions (4) and (6) of 5 U.S.C. 552b(c) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. Stephen J. McCleary, 806 15th Street NW., Washington, D.C. 20506, or call area code 202–724–0367.

STEPHEN J. MCCLEARY,
Advisory Committee Management Officer.

FELLOWSHIPS PANEL

Notice of Meeting

AUGUST 30, 1977.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, as amended), notice is hereby given that a meeting of the Fellowships Panel will be held at 806 15th Street NW., Washington, D.C. 20506, in room 314 from 9:30 a.m. to 5:30 p.m. on October 6, 1977.

The purpose of the meeting is to review 1978 Summer Seminar applications from perspective seminar directors in the field of Music submitted to the National Endowment for the Humanities for projects beginning in the summer of 1978.

Because the proposed meeting will consider financial information and disclose information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Acting Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated August 2, 1977, I have determined that the meeting would fall within exemptions (4) and (6) of 5 U.S.C. 552b(c) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. Stephen J. McCleary, 806 15th Street NW., Washington, D.C. 20506, or call area code 202–724–0367.

STEPHEN J. MCCLEARY,
Advisory Committee Management Officer.

OFFICE OF MANAGEMENT AND BUDGET

PRIVACY ACT OF 1974

Report on New Systems

The Purpose of this notice is to list reports on new systems filed with the Office of Management and Budget to give members of the public the opportunity to make inquiries about them and to comment on them.

The Privacy Act of 1974 requires that agencies give advance notice to the Congress and the Office of Management and Budget to their intent to establish or modify systems of records subject to the Act (5 U.S.C. 552a(o)). During the period August 22 through September 2, 1977 the Office of Management and Budget received the following reports on new (or revised) systems of records

PANAMA CANAL COMPANY

System Name: Canal Protection Division Activity Report Files.

Report Date: August 29, 1977.

Point-of-Contact: Joseph J. Wood, Agency Records Officer, Chief, Administrative Services Division, Panama Canal Company, Box M, Balboa Heights, Canal Zone.

Summary: This system contains records concerning maintenance of security for the Panama Canal and Canal Zone facilities.

VELMA N. BALDWIN,
Assistant to the Director for Administration.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–13929; File No. SR–DTC–77–8]

DEPOSITORY TRUST CO.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. 94–29, 16 (June 4, 1975), notice is hereby given that on August 25, 1977, the abovementioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The proposed rule change permits inclusion of interchangeable debt securities issued by state and local governments (municipal bonds) among the securities eligible for the book-entry transfer and pledge system of the Depository Trust Co. (DTC). Participant Operating Procedures for deposits and withdrawals of municipal bonds in the bearer form, a form of indemnity agreement from a Participant and a form of agreement between a municipal bond transfer agent and DTC are attached as Exhibits 2, 3, and 4, respectively, to DTC's filing on Form 19b–4A, File No. SR–DTC–77–8. The proposed rule change requires a determination pursuant to Rules 8c–1(g) and 15c2–1(g) under the Securities Exchange Act of 1934. The proposed rule change also establishes fees associated with deposits and withdrawals of municipal bonds in the bearer form.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change are as follows:

V 42 175 SEP 9 77 UMI

The purpose of the proposed rule change is to permit inclusion of interchangeable municipal bonds (i.e., municipal bonds which are issued in both the bearer form and the registered form) among the securities eligible for the DTC book-entry transfer and pledge system. Currently, municipal bonds are not DTC-eligible. The proposed rule change would enable Participants to deposit the bearer form of some municipal bond issues at DTC or the transfer agent and to deposit the bearer form of other municipal bond issues only at the transfer agent. All deposits of the bearer form of municipal bonds would be added to a balance certificate registered in the name of DTC's nominee, Cede & Co., pursuant to the FAST program, and all withdrawals of bearer municipal bonds would be deducted from the balance certificate. DTC would not store in its vault municipal bond certificates in the bearer form. Participants would pick up withdrawals of municipal bonds in the bearer form at the transfer agent upon presentation of a window receipt issued to them by DTC. Safeguards implemented by DTC to prevent such receipts from being improperly issued or used would include controls over the issuance and authentication of the receipts, photographic evidence of their delivery to Participants' messengers, and direct communication by DTC of receipt data to the transfer agent for matching against receipts presented at its window. Participants would be required to indemnify DTC against any losses incurred as a result of delivery of bearer municipal bonds by the Participant to the transfer agent or pick-up of bearer municipal bonds by the Participant from the transfer agent after receiving a valid window receipt from DTC. Any fees charged to DTC by transfer agents for handling deposits and withdrawals of municipal bonds in the bearer form would be passed through to the Participants initiating such transactions. In most other respects, the municipal bond services provided by DTC would be the same as those for corporate debt securities.

The proposed rule change will facilitate the prompt and accurate clearance and settlement of securities transactions by encouraging immobilization of interchangeable municipal bonds.

DTC developed the proposed rule change as a result of suggestions from Participants. Discussions with the Securities Operations Division of the Securities Industry Association, the Securities Committee of the New York Clearing House Association, the Public Securities Association, and the Municipal Securities Rulemaking Board indicated their support of efforts to immobilize municipal bonds. A DTC study of the feasibility of including a new municipal bond issue in DTC's book-entry underwriting distribution systems was announced in the DTC Newsletter of June 1977. The Municipal Securities Rulemaking Board commented on the inapplicability of one of its rules to the proposed municipal bond service. In meetings and telephone conversations with Participants and transfer agents, favorable opinions on the proposed municipal bond service were expressed on the grounds that the proposed service would reduce municipal bond processing costs and the risk of loss or theft associated with physical deliveries of bearer municipal bonds.

DTC perceives no burden on competition by reason of the proposed rule change.

On or before October 14, 1977, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the public reference room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should be submitted on or before September 30, 1977.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

SEPTEMBER 2, 1977.

[File No. 1-6767]

MARK CONTROLS CORP.

Application To Withdraw From Listing and Registration

SEPTEMBER 1, 1977.

The above named issuer has filed an application with the Securities and Exchange Commission, pursuant to Section 12(d) of the Securities Exchange Act of 1934 and Rule 12d2-2(d) promulgated thereunder, to withdraw the specified security from listing and registration on the American Stock Exchange, Inc.

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

This security has become listed and registered on the New York Stock Exchange, Inc., and the management of the Company has concluded that the costs of maintaining the listing on both exchanges outweigh the possible benefits of dual listing.

The American Stock Exchange, Inc. has not objected to this application.

Any interested person may, on or before September 29, 1977, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission will, on the basis of the application and any other information submitted to it, issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 34-13879;
File No. SR-MOC-77-4]

MIDWEST CLEARING CORP.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. 94-29, 16 (June 4, 1975), notice is hereby given that on August 18, 1977, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The proposed rule change involves the implementation of the MST Communications System (the "MST System") of the Midwest Clearing Corp. ("MCC"). The MST System will provide a fast, flexible and cost effective communications link for broker/dealers and institutions. Development of this system is another step toward realization of a national securities processing system.

MST System terminal applications will include inquiry, input, report retrieval, and administrative message capability. Although the MST System will be phased in gradually and made available to all participants, it will not be required. MCC plans to run the MST System at no cost for at least a month after receiving Commission approval. After the month, the initial fee has been set at $200 a month per participant.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

The purpose of the proposed rule change is to implement a communication linkage between MCC, its participants, and other clearing agencies which will enable them to receive information via terminal—a CRT screen, keyboard, printer, and optional card reader. Terminal receipt of information will reduce the necessity of preparation and physical delivery of many written instructions.

The proposed rule change will facilitate the prompt and accurate clearance and settlement of securities transactions by implementing an automated communications link with MCC, its participants, and other clearing agencies that MCC believes will reduce geographic disadvantages, improve cash and securities management (same day movement of cash and securities, timely confirmation of cash and security activity, reduced interest cost, reduced errors, and improved stock loan utilization), and provide more timely pay and collect notification.

The proposed fee represents an equitable allocation of reasonable fees among its participants.

Comments have neither been solicited nor received.

The Midwest Clearing Corp. believes that no burdens have been placed on competition.

On or before October 14, 1977, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

All submissions should refer to the file number referenced in the caption above and should be submitted on or before September 30, 1977.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 19, 1977.

[Release No. 34-13916; File No.
SR-MSE-77-31]

MIDWEST STOCK EXCHANGE, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on August 27, 1977, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

(*Additions italicized*—[Deletions bracketed])

Interpretation and policy .01 of Rule 10 of Article I of the Midwest Stock Exchange Rules is hereby amended as follows:

.01 The Executive Committee has adopted the following procedure for processing transfers of membership:

All bids for, and offerings of, memberships will be submitted to, and processed by, the Exchange's Membership Department. No private negotiations and/or sales of memberships will be allowed without the written approval of the Exchange and any sale contracts resulting from such private negotiations may be nullified by the Exchange.

Applicants for membership will not be permitted to enter a bid for a membership until the staff has [recommended to the Executive Committee that the applicant be elected to membership or in the absence of such recommendation, until the Executive Committee has elected the applicant to membership.] *determined from the application submitted that no statutory bar to membership exists.*

Any contract for the sale of a membership, which contract has been made by the Exchange on behalf of the buyer and seller, will remain in force for the fifteen calendar days next following the date on which the contract was executed. Such contract will be extended beyond the original termination date only if both parties agree in writing to such an extension and to a new termination date.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

The purpose of this amendment is to clarify the practice that bids for memberships are accepted upon preliminary determination that no statutory disqualification to membership exists. Upon acceptance of a bid, membership is posted and the procedures established for election to membership are commenced.

The procedure established herein is consistent with the requirements of section 6(c) of the Act which provides in part that a National Securities Exchange may deny membership to any person who is subject to a statutory disqualification.

Comments have neither been solicited nor received.

The proposed rule change will impose no burden on competition.

On or before October 14, 1977, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before September 30, 1977.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

SEPTEMBER 1, 1977.

[Release No. 34-13915; File No.
SR-NYSE-77-24]

NEW YORK STOCK EXCHANGE, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29 (June 4, 1975), notice is hereby given that on August 26, 1977, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

TEXT OF THE PROPOSED RULE CHANGE AS SUBMITTED BY THE NEW YORK STOCK EXCHANGE, INC. ("NYSE")

Rule 103A. Upon notice to the member and an opportunity to be heard, Exchange approval to act as a specialist may be withdrwn in one or more stocks by the Market Performance Committee when the member's performance as a specialist is below acceptable performance levels established by the Market Performance Committee.

Notice to the member required by this Rule shall be in writing and shall contain the specific grounds to be considered as the basis for withdrawal of approval. The member shall have an opportunity to submit a written reply no later than ten days after the receipt of such notice.

The member shall also have an opportunity to be heard upon the specific grounds to be considered before the Market Performance Committee and a written record of any such hearing shall be maintained. The decision of a majority of the members of that Committee shall be final, subject to the power of the

V 42 175 SEP 9 77 UMI

Board of Directors to review such decision in accordance with the provisions of Article III, Section 1 of the Constitution.

* * * Supplementary Material:

.10 Acceptable Performance. — The Market Performance Committee has established that a specialist's performance will be below acceptable levels if such specialist has been evaluated below average by members other than specialists on a specialist performance evaluation questionnaire which is used to evaluate specialists in various aspects of their performance, with an overall quarterly weighted grade below 3.00 for two or more quarters, average quarterly grades below 3.00 on three or more individual questions for two or more quarters, or an average quarterly grade below 3.00 for the same individual question for four or more consecutive quarters.

NYSE's STATEMENT OF PURPOSE

The purpose of proposed new Rule 103A is to authorize the Exchange's Market Performance Committee, pursuant to authority delegated by the Exchange's Board of Directors, to establish methods of evaluating the performance of Exchange specialists, to establish minimum acceptable levels of performance based upon those evaluations, to withdraw the registration of a specialist organization in one or more stocks when its performance is below acceptable performance levels, and to initiate reallocation proceedings for such stock(s). The new rule enables the Market Performance Commitee to initiate reallocation proceedings in those stocks where it believes that performance might significantly be improved by transfer to another specialist organization. This procedure will occur for the purpose of improving the quality of the Exchange's marketplace, not as a disciplinary action.

A specialist organization whose stock is selected for such reallocation may apply to retain the stock or may apply to register as a competing specialist in the stock should it be assigned to another specialist.

Rule 103A also provides due process guarantees with respect to any specialist organization whose performance is below acceptable performance levels established by the Market Performance Committee. The specialist will be provided a written notice and statement of the grounds considered as the basis for initiating reallocation proceedings, and will have the opportunity to submit a written reply and be heard by the Market Performance Committee. A written record of such hearing will be maintained, and any decision of the Committee can be appealed to the Board of Directors. Moreover, as previously mentioned, when reallocation proceedings are initiated, the specialist may apply to retain the stock, or he also may apply to compete in the stock.

Proposed Rule 103A.10 describes the measures of performance and minimum acceptable performance levels which shall be used by the Market Performance Committee to identify those specialist organizations against whom reallocation proceedings may be initiated. These will be subject to change from time to time by the Market Performance Committee as it develops new or improved performance evaluation procedures.

Rule 103A.10, as proposed, provides that the performance evaluation procedure to be used by the Market Performance Committee will be the Exchange's Specialist Performance Evaluation Questionnaire. The Questionnaire is distributed every quarter to non-specialist Floor Members, and is completed each quarter by approximately 130 such members. It contains eight questions relating to various aspects of specialist performance, and the nonspecialist Floor members are asked to evaluate specialists on each question on a scale of 5 to 1, where 5 is excellent, 4 above average, 3 average, 2 below average and 1 poor. For each specialist organization, an average grade for each question is calculated. In addition, each of the eight questions is weighted according to its relative importance, and these weights are used to comput an overall weighted grade for each specialist organization.

The Market Performance Committee may exercise its reallocation authority as set forth in proposed Rules 103A and 103A.10 based on results achieved by specialist organizations on the Specialist Performance Evaluation Questionnaire. In all cases where a specialist organization receives a grade below 3.00 it will be given at least one quarter to improve its performance before any reallocation proceeding is initiated. During that time, Exchange staff and members of the Market Performance Committee will meet with the specialist organization to counsel and assist it regarding possible methods of improving performance.

NYSE's STATEMENT OF BASIS UNDER THE ACT FOR PROPOSED RULE CHANGE

Proposed new Rules 103A and 103A.10 will provide a method for the Exchange to renew the competition for registration in a stock through reallocation procedures and provide a means for the Exchange to enhance the quality of its marketplace and, thus, to remain competitive with other market centers. The proposed new Rules are consistent with section 6(b)(5) of the Securities Exchange Act of 1934 which, in part, provides for Exchange rules concerned with the administration of the Exchange, and section 11A(a)(1)(C)(ii) which states that the Congress finds that it is in the public interest and appropriate for the protection of investors and the maintenance of fair and orderly markets to assure fair competition among brokers and dealers, among exchange markets, and between exchange markets and markets other than exchange markets.

COMMENTS RECEIVED FROM MEMBERS, PARTICIPANTS OR OTHERS ON PROPOSED RULE CHANGE

The Exchange has not solicited comments on the proposed rule change nor have any written comments been received.

BURDEN ON COMPETITION

NYSE asserts that the proposed rule change does not impose any burden on competition.

On or before October 14, 1977, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(a) By order approve such proposed rule change, or

(b) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before September 30, 1977.

For the Commission by the Division of Market Regulation pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

SEPTEMBER 1, 1977.

[FR Doc 77-26307 Filed 9-8-77;8:45 am]

[Release No 34-13893; File No. SR-NYSE-77-23]

NEW YORK STOCK EXCHANGE, INC.

Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29 (June 4, 1975), notice is hereby given that on August 19, 1977, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

NEW YORK STOCK EXCHANGE'S ("NYSE's") STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The proposed rule change provides guidelines governing the conduct and safety of members and Floor clerical employees of a member or member organization, and a schedule of penalties which would be imposed where a violation of a guideline is found to have occurred.

NYSE STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

The purpose of the proposed rule change is to insure that the behavior of individuals on the Floor of the Exchange contributes to the efficient, undisrupted conduct of business, and does not jeopardize the safety or welfare of others. The Exchange's Board of Directors has given Floor Officials the authority to impose on-the-spot penalties against any member or Floor clerical employee of a member or member organization found in violation of the guidelines.

Permitting Floor Officials to impose on-the-spot penalties simplifies and facilitates the administration of disciplinary sanctions for minor offenses, thus enabling the Exchange to maintain better control of conduct on the trading Floor. Individuals adversely affected by the action of a Floor Official may appeal the decision to a committee of three Floor Governors. This is in addition to the due process rights guaranteed under Article III, section 1 of the Exchange Constitution, and Rule 345.

BASIS UNDER THE ACT FOR PROPOSED RULE CHANGE

The NYSE states that the proposed rule change ensures the efficient, undisrupted conduct of business on the Floor of the Exchange, and, in so doing, contributes to the protection of investors and of the public interest.

COMMENTS RECEIVED FROM MEMBERS, PARTICIPANTS OR OTHERS ON PROPOSED RULE CHANGE

NYSE states that no comments were solicited by the Exchange on the proposed rule change nor have any written comments been received.

BURDEN ON COMPETITION

The Exchange has determined that no burden on competition will be imposed by the proposed rule change.

The foregoing rule change has become effective, pursuant to section 19(b)(3) of the Securities Exchange Act of 1934. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons desiring to make written submissions should file six (6) copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before September 30, 1977.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 26, 1977.

[File No. 1-4935]

OVERHEAD DOOR CORP.

Application to Withdraw From Listing and Registration

SEPTEMBER 1, 1977.

The above named issuer has filed an application with the Securities and Exchange Commission, pursuant to section 12(d) of the Securities and Exchange Act of 1934 and rule 12d2-2(d) promulgated thereunder, to withdraw the specified security from listing and registration on the American Stock Exchange, Inc.

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

This security has become listed and registered on the New York Stock Exchange, Inc., and the management of the Company has concluded that the costs of maintaining the listing on both exchanges outweigh the possible benefits of dual listing.

The American Stock Exchange, Inc., has not objected to this application.

Any interested person may, on or before September 29, 1977, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission will, on the basis of the application and any other information submitted to it, issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

VETERANS ADMINISTRATION

WAGE COMMITTEE

Meetings

Pursuant to the provisions of section 10 of Pub. L. 92-463, notice is hereby given that meetings of the Veterans Administration Wage Committee will be held on:

Thursday, October 6, 1977
Thursday, October 20, 1977
Thursday, November 3, 1977
Thursday, November 17, 1977
Thursday, December 1, 1977
Thursday, December 15, 1977
Thursday, December 29, 1977

The meetings will convene at 2:30 p.m. and will be held in Room 1144C, Veterans Administration Central Office, 810 Vermont Avenue NW., Washington, D.C.

The Committee's primary responsibility is to consider and make recommendations to the Chief Medical Director, Department of Medicine and Surgery, on all matters involved in the development and authorization of wage rate schedules for Federal Wage System (blue-collar) employees.

At these scheduled meetings, the Committee will consider wage survey specifications, wage survey data, local committee reports and recommendations, statistical analyses, and proposed wage schedules derived therefrom.

Under the provisions of section 10(d) of Pub. L. 92-463, the Federal Advisory Committee Act, as amended by Pub. L. 94-409, meetings may be closed to the public when they are concerned with matters listed under section 552b, Title 5, United States Code. Two of the matters so listed are those related solely to the internal personnel rules and practices of an agency (5 U.S.C. 552b(c)(2)) and those involving trade secrets and commercial or financial information obtained from a person and privileged or confidential (5 U.S.C. 552b(c)(4)).

Accordingly, I hereby determine that all portions of the meetings cited above will be closed to the public because the matters considered are related to the internal rules and practices of the Veterans Administration (5 U.S.C. 552b(c)(2)), and the detailed wage data considered by the Committee during its meetings have been obtained from officials of private establishments with a guarantee that the data will be held in confidence (5 U.S.C. 552b(c)(4)).

However, members of the public who wish to do so are invited to submit material in writing to the Chairman regarding matters believed to be deserving of the Committee's attention. Additional information concerning these meetings may be obtained by contacting the Chairman, Veterans Administration Wage Committee, Room 1175, 810 Vermont Avenue NW., Washington, D.C.

Dated: September 1, 1977.

MAX CLELAND,
Administrator.

Bonneville Power Administration

DRAFT ENVIRONMENTAL STATEMENT

Public Meetings

The Bonneville Power Administration hereby gives notice of a series of public meetings to be held to discuss BPA's Fiscal Year 1979 Draft Program Environmental Statement. The purpose of the meetings is twofold: to present to the public BPA's proposed Fiscal Year 1979 Program (including major new proposed facilities included as part of this program), and to elicit comments from the public with respect to the environmental impact of BPA's proposed program.

The dates, hours, and places of these meetings are as follows: Multipurpose Room, Noxon School, Noxon, Mont., on October 11, 1977, at 7:30 p.m.; First National Bank, 504 Mineral Avenue, Libby, Mont., on October 12, 1977, at 7:30 p.m.; City Council Chambers, Sandpoint City Hall, Second Avenue Entrance, Sandpoint, Idaho, on October 13, 1977, at 7:30 p.m.; and at the Franklin County P.U.D. Auditorium, 1411 West Clark Street, Pasco, Wash., on October 25, 1977, at 7:30 p.m.

In addition to the four public meetings mentioned above, a public information center will also be set up. The purpose of the public information center is to answer questions which interested members of the public may have regarding the Fiscal Year 1979 Proposed Program in general and the proposal for Libby Integrating Transmission in particular. The public information center will be open to the public in the Council Room of the Bonner's Ferry City Hall, 104 Main, Bonner's Ferry, Idaho, on October 13, 1977, from 1 p.m. to 4:30 p.m.

For those who cannot attend any of these meetings, written comments will be accepted until the close of comment date, which is November 4, 1977. Additional or clarifying information may be obtained by writing or calling the Environmental Manager's Office, Bonneville Power Administration, P.O. Box 3621, Portland, Oreg. 97208 (503-234-3361, Ext. 5136).

Dated: September 6, 1977.

WILLIAM H. CLAGETT,
Assistant Administrator.

Closure of Lands to Surface Disturbing Activities

AUGUST 31, 1977.

Notice is hereby given that under the authority of Executive Order 11644, as amended May 24, 1977, and the regulations in 43 CFR 6010, the Fruita Paleontological Area under the administration of the Bureau of Land Management is closed to unauthorized motorized and mechanized vehicular use and all other unauthorized surface disturbing activities. The area is more specifically described as:

UTE PRINCIPAL MERIDIAN, COLO.

T. 1 N., R. 3 W.,
Sec. 13: SW¼SW¼;
Sec. 24: NW¼, W½NE¼.

The described area aggregates approximately 280 acres in Mesa County, Colo.

This closure is necessary to preserve the unique scientific values and protect the natural environment of the site from possible destruction by surface disturbing activities.

The closure shall become effective on August 31, 1977.

CHARLES W. LUSCHER,
Acting State Director.

NEW MEXICO

Application

SEPTEMBER 1, 1977.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Southern Union Gathering Co. has applied for one 4-inch natural gas pipeline right-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN, N. MEX.

T. 32 N., R. 10 W.,
Sec. 18, lots 14, 19, and 20;
Sec. 19, lots 10, 11, and 14.
T. 32 N., R. 11 W.,
Sec. 24, $SE\frac{1}{4}SW\frac{1}{4}$;
Sec. 25, $N\frac{1}{2}NE\frac{1}{4}$, $NE\frac{1}{4}NW\frac{1}{4}$;
Sec. 35, $E\frac{1}{2}SE\frac{1}{4}$.

This pipeline will convey natural gas across 1.68 miles of public lands in San Juan County, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 6770, Albuquerque, N. Mex. 87107.

[Wyoming 59189—Amendment]

WYOMING

Application

AUGUST 31, 1977.

Notice is hereby given that pursuant to section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Marathon Pipeline Co. of Casper, Wyo., has filed an application amending its right-of-way application Wyoming 59189 for the purpose of constructing two rectifiers and related ground bed facilities across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 45 N., R. 92 W.,
Sec. 21, $SW\frac{1}{4}NW\frac{1}{4}$;
Sec 26, $E\frac{1}{2}NW\frac{1}{4}$.

The rectifiers and related ground bed facilities are necessary for the operation of the oil and other synthetic liquid fuels pipelines already under consideration in this application.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the amended application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 1700 Robertson Avenue, P.O. Box 119, Worland, Wyo. 82401.

WILLIAM S. GILMER,
Acting Chief, Branch of Lands and Minerals Operations.

[FR Doc. 77-26295 Filed 9-8-77;8:45 am]

[Wyoming 59863—Amendment]

WYOMING

Application

SEPTEMBER 1, 1977.

Notice is hereby given that pursuant to section 28 of the Minerals Leasing Act of 1920, as amended (30 U.S.C. 185) Montana-Dakota Utilities Co. of Bismarck, N. Dk. filed an application for an amendment to existing right-of-way Wyoming 59863 to construct a 4-inch lateral pipeline for the purpose of transporting natural gas across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 39 N., R. 90 W.,
Sec. 29, $E\frac{1}{2}SW\frac{1}{4}$, $NW\frac{1}{4}SE\frac{1}{4}$.

The pipeline will transport natural gas from Cottonwood well in $SE\frac{1}{4}$ of section 29, T. 39 N., R. 90 W., Fremont County, Wyo., to the applicant's pipeline in $SW\frac{1}{4}$ of section 29, T. 39 N., R. 90 W.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, P.O. 670, 1300 Third Street, Rawlins, Wyo. 82301.

Target
Jim Chamberlain Nevada
Do
Dr. Jesus Cotubillo Mexico

(1) Phasianus Versicolor Mongolicus, (Ceresopitilion-manchuricus).
Jim (2).
1976 Hatch, Home.
Explanation for new blood, propagation and enhancement of the species.

(2) Phasianus covered by this application were bred and hatched and raised in captivity at Fallon, Nevada, U.S.A. by the applicant during the year of 1976.

(3) No attempt has been made, nor is one contemplated by the applicant to obtain wild stock from the wild as in any other manner that would cause injury or death to the species.

(4) As in (2) above, these pheasants were hatched and raised in captivity in Fallon, Nv.

(5) Phasianus covered by this application will be housed in the aviaries of Dr. Cotubillo a 200 hour drive from Mexico City, Mexico 1976 - Colonia Portales - Mexico 13 DF.

(6)(1) The Ranchero of Dr. Cotubillo covers many acres and the beauty of the well layed out and landscaped aviaries is beyond the description of the written word. Photographs and aviaries are only planted with the various trees over 40 ft high.
See Enclosure #1 for available photographs. Minimum pen size 10' x 30'.

(6)(2) Dr. Cotubillo is a certified veterinarian in Mexico. His collection of birds of more variety exists in one of the finest and largest in the world and additional info. held for the world wide as above requested. See Enclosure #1 for additional info.

(6)(3) Dr. Cotubillo will be more than willing to participate in any breeding program that will tend to enhance the survival of any species.

(6)(4) The two pheasants will be transported in all new ressorts crates. Size will be 12-1/2 wide x 14-1/4 high x 33-1/2" long. The inside top will be heavily padded with foam rubber to prevent any head damage during shipment. Food and water containers will be wired into the corners of the shipping crates.

(6)(5) Yes the past five years the only mortalities in the aviaries of Dr. Cotubillo have been due to old age of a very few birds.

(7) There are no contracts or agreements in this transaction other than the cost of the pheasants which is less than $300.

(8) The issuance of this Permit will enable Dr. Cotubillo to introduce new blood lines into his existing flock of Ramchukors.

(9)(1) Details of activities authorized by this Permit are described in Block #5.

(9)(2) As in (9)(1) above.

(9)(3)(i) The object of this Permit is to further the propagation and survival of the species. It intends to carry the two hens covered by this application with it, after that has already obtained from the Cabin Zoo then the completion of the Chinese Government.

(9)(3)(ii) If and when Dr. Cotubillo consumates his activities in propagating the various species of birds he would like sell them to other qualified aviculturist in the Republic of Mexico in accordance with existing rules and regulations of the Mexican Government at that time.

FEDERAL FISH AND WILDLIFE LICENSE/PERMIT APPLICATION

1. APPLICATION FOR (Check one): ☐ LICENSE/EXPORT LICENSE ☒ PERMIT — One time only

2. BRIEF DESCRIPTION OF ACTIVITY FOR WHICH REQUESTED LICENSE OR PERMIT IS REQUIRED: To export ten (12) Bears Eared Pheasants from Jim Chamberlain (Consopitilion-manchuricus) to Dr. Jesus Cotubillo at address in Block #3 to Dr. Jesus Cotubillo L of Mexico City, DF. for New Blood in an existing flock for propagation and the enhancement of the species. The above birds are 1976 hatch.

3. APPLICANT: (Name, complete address and area code (telephone) (individual, business, or institution)
C.J. (Jim) Chamberlain
L/J Game Bird Ranch
4850 Alcorn Road
Fallon, Nv. 89406
PH. (702)867-2237

4. IF APPLICANT IS AN INDIVIDUAL, COMPLETE THE FOLLOWING: ☐ MR. ☐ MRS. ☐ MS. — HEIGHT 5-7 1/2" — WEIGHT 140
DATE OF BIRTH: 2/18/1911 — COLOR EYES: Blue — COLOR HAIR: Gray
PHONE NUMBER WHERE EMPLOYED: (702)867-2237 — SOCIAL SECURITY NUMBER: 530-10-0581
OCCUPATION: Retired, Civil Service, Navy Dept.
IF APPLICANT IS A CORPORATION, GIVE RELATIONSHIP TO INSTITUTION OR BUSINESS ENTITY DESIRING TO ENGAGE IN ACTIVITY AUTHORIZED BY THIS PERMIT: N.A.

5. LOCATION WHERE PROPOSED ACTIVITY IS TO BE CONDUCTED: Between address as in Block #3 and Ramachkis #910, Colonia Portales, Mexico 13, D.F.

6. CERTIFIED CHECK OR MONEY ORDER (If required) PAYABLE TO THE U.S. FISH AND WILDLIFE SERVICE: N.A.

7. IF THIS APPLICATION IS MADE BY AN AGENT, ATTACH LETTER OF AUTHORIZATION FROM PRINCIPAL.

8. IF THIS APPLICATION IS FOR AN AMENDMENT OR RENEWAL OF A PERMIT, GIVE PERMIT NUMBER: N.A.

9. GIVE SPECIFIC INFORMATION REQUIRED FOR THE TYPE OF LICENSE/PERMIT DESIGNATED IN BLOCK 1 ABOVE. IF ADDITIONAL SPACE IS REQUIRED, USE ADDITIONAL SHEETS OF PAPER AND ATTACH HERETO. IF ATTACHED, IT CONSTITUTES AN INTEGRAL PART OF THIS APPLICATION. LIST SECTIONS OF 50 CFR UNDER WHICH ATTACHMENTS ARE PROVIDED: 50 CFR 17.22

10. IF REQUIRED BY ANY STATE OR FOREIGN GOVERNMENT, DO YOU HAVE THEIR APPROVAL TO CONDUCT THE ACTIVITY YOU HAVE REQUESTED IN BLOCK 2? (If yes, list jurisdictions and type of document(s)): Dr. Cotubillo will provide Mexican Import Permit & Export Permit & Certificate

11. IF REQUIRED BY ANY STATE OR FOREIGN GOVERNMENT, DO YOU HAVE THEIR APPROVAL TO CONDUCT THE ACTIVITY YOU HAVE REQUESTED IN BLOCK 2? (If yes, list jurisdictions and type of document(s)): I have Nevada State Commercial game Permit

12. DESIRED EFFECTIVE DATE: ASAP

13. DURATION NEEDED: 4-5 Months

CERTIFICATION

I HEREBY CERTIFY THAT I HAVE READ AND AM FAMILIAR WITH THE REGULATIONS CONTAINED IN TITLE 50, PART 11 OF THE CODE OF FEDERAL REGULATIONS AND THE CRIMINAL PROVISIONS OF THE ENDANGERED SPECIES ACT OF 1973, AND FURTHER CERTIFY THAT THE INFORMATION SUBMITTED IN THIS APPLICATION FOR A LICENSE/PERMIT IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE AND BELIEF. I UNDERSTAND THAT ANY FALSE STATEMENT HEREIN MAY SUBJECT ME TO THE CRIMINAL PENALTIES OF 18 U.S.C. 1001.

Endangered Species Permit; Receipt of Application

Notice is hereby given that the following application for a permit is deemed to have been received under section 10 of the Endangered Species Act of 1973 (Pub. L. 93-205).

Applicant: Charles Sivelle, 41 Westcliff Drive, Dix Hills, N.Y. 11746.

DIX HILLS, N.Y.,
August 4, 1977.

DIRECTOR (FWS),
U.S. Fish and Wildlife Service, P.O. Box 19183, Washington, D.C.

DEAR SIR: The undersigned hereby applies for an Endangered Species Permit under Section 10(a) of the Endangered Species Act of 1973. The following information is submitted pursuant to paragraph 17.22 of Volume 40, No. 188 of the FEDERAL REGISTER. A corresponding Export Permit pursuant to the Convention on International Trade Endangered Species is also requested simultaneously.

Request is made for a permit to export 6 female Edwards pheasants (*Lophura edwardsi*) 1977 hatch, as a gift for the purpose of providing new blood for propagation and enhancement of the species in Europe. The specimens referred to were propagated in the aviaries of the undersigned at 41 Westcliff Drive, Dix Hills, N.Y., 11746 during 1977.

Four (4) female Edwards pheasants (*Lophura edwardsi*) 1976 hatch were shipped in March to Mr. Winstanley under Permit No. PRT 2-526 and they have already been bred successfully, yielding progeny in 1977.

Mr. Winstanley is one of the foremost propapators of rare pheasants in England. He has successfully raised quantities of Edwards pheasants (*Lophura edwardsi*) and other rare pheasants during the last 12 years. His pheasant aviaries contain inside protective enclosures of 1,200 cubic feet and outside runs of approximately 3,000 cubic feet. The enclosures are landscaped and his management techniques have proven successful in the past. The British Ministry of Fish and Widlilfe has authorized him to maintain a Quarantine Station so that he can arrange for the direct importation

The undersigned is a prime propagator of the *Lophura edwardsi* pheasant in the United States today and is participating in the World Pheasant Association project for the enhancement of the survival and propagation program for this endangered pheasant.

The recipient will participate in a cooperative breeding program established by the World Pheasant Association and all data will be collected by Dr. Tim Lovell, official record holder of the World Studbook on Edwards Pheasants.

Birds will be shipped in crates similar and equal to International Air Transport Association taken from Live Animal Regulations 5th Edition, Feb. 7, 1975, containing litter on bottom, containers for feed and water and a padded top for the protection of the birds.

Proper import permits including any permit that applies to the Convention on International Trade in Endangered Species will be provided by Mr. Winstanley and the World Pheasant Association.

Sincerely,

CHARLES SIVELLE.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. 3-200 10/76 GPO 899-842

DIX HILLS, N.Y.
August 8, 1977.

DIRECTOR (FWS),
U.S. Fish and Wildlife Service, P.O. Box 19183, Washington, D.C.

DEAR SIR: The undersigned hereby applies for an Endangered Species Permit under Section 10(a) of the Endangered Species Act of 1973. The following information is submitted pursuant to paragraph 17.22 of Volume 40, No. 188 of the FEDERAL REGISTER.

Request is made for a permit to export two (2) pair of White Eared pheasants (*Cros. cros. drouyni*) and two (2) pair of Palawan Peacock pheasants (*polyplectron emphanum*). The specimens referred to were captive propagated in the aviaries of the undersigned at 41 Westcliff Drive, Dix Hills, N.Y. 11746 during 1977.

Mr. E. G. Drew of Cordoniz, S.A., P.O. Box 4279, San Jose, Costa Rica, is a noted game bird breeder within his country having propagated many rare species of waterfowl, quail and partridge over the past ten years. He now wishes to propagate the above mentioned endangered species of pheasants. He has prepared aviaries with shelter of approximately 1,800 cubic feet and outside runs of approximately 3,000 cubic. The aviaries where these birds will be kept is approximately 8 feet high by 20 feet long by 12 feet wide and are covered at one end. The enclosures are landscaped and his management techniques have proven successful in the past with the various game birds including other pheasants.

He operates a commercial Quail Farm and has a veterinarian available for necropsy and analytical work. He is familiar with the many avian diseases and their remedies. His mortalities on game birds have not been excessive and not repetitive. A commercial Quail operation of necessity involves extreme care, sanitary control, and alertness.

He hopes to establish a captive self-sustaining flock of these species in his country and distribute progeny among other breeders therein. At present there aren't any of these species available in Costa Rica.

The recipient will participate in a cooperative breeding program which is one of the conditions of the sale and will contribute data to any Studbook when required.

Birds will be shipped in crates similar and equal to International Air Transport Association taken from Live Animal Regulations, 5th Edition, Feb. 7, 1975, containing litter on bottom, containers for feed and water and a padded top for the protection of the birds.

Proper import permits including any permit that applies to the Convention on International Trade in Endangered Species will be provided by Mr. Drew.

Sincerely yours,

CHARLES SIVELLE.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. ATTACHMENT TO FORM 3-200: FEDERAL FISH AND WILDLIFE PERMIT APPLICATION

Re: *Ameiva polops* (endangered species)

Remarks: Application, item 9: Instructions indicate fees are listed in 50 CFR 13.11, but no permit fee for endangered species is listed. Accordingly, no fee is enclosed. Please advise if fee is required.

Attachment information (itemized as referenced in 50 CFR 17.22(a)):

(1) Common name: St. Croix ground lizard.

Scientific name: *Ameiva polops.*

Number, age, and sex: Approximately 15–20 adults, both sexes (actual ages cannot be determined, sex is difficult to establish on live specimens).

Activity: Reintroduction to Buck Island from Protestant Cay (and Green Cay if necessary; though this is unlikely), all small islands north of St. Croix, U.S. Virgin Islands. (See item 7, below.)

(2) The lizards which would be covered by this permit:

(i) Are still in the wild.

(ii) Have not been removed from the wild.

(iii) Were not born in captivity.

(3) Since *A. polops* was designated an endangered species, by notification in the FEDERAL REGISTER (Vol. 42, No. 107, pp. 28543–28545), no member of our Bureau (applicant) has attempted to obtain this lizard, in any manner, for any purpose.

However, in 1968, prior to his employment with this Bureau, Dr. Richard Philibosian, and an associate of his, Dr. Rodolfo Ruibal, introduced 16 *A. polops* from Protestant Cay to Buck Island. (See Appendix A, attached.)

(4) The lizards sought to be covered by this permit have now already been removed from the wild; no specimens have been raised in captivity.

(5) If the permit is issued, *A. polops* will be transferred, live, from Protestant Cay (and Green Cay, if necessary, though this is unlikely) to the same grove of manchineel trees (*Hippomane mancinella*) adjacent to west end picnic area on Buck Island, where the 1968 reintroduction occurred. The location and description of this area is described in Appendix A. Buck Island is a National Monument, managed by the National Park Service. It is our understanding that reintroduction of *A. polops* to Buck Island is part of the National Park Service's Master Plan (personal comm. from Robert Thomas, Park Ranger, Buck Island National Monument).

(6) We seek to have live specimens covered by this permit.

(i) Specimens will not be maintained in any facility. They would be captured alive and unharmed, kept that way and transferred immediately to Buck Island for prompt release.

(ii) Members of the Bureau (applicant), Dr. Richard Philibosian or John Yntema, have successfully maintained in captivity several species of frogs, lizards (*Anolis* spp.) and snakes (*Alsophis portoricensis* and *Arrhyton exiguum*, among others) for periods ranging from months to years, either for use in scientific experiments or as pets. Two attempts to maintain a specimen of an *Ameiva* (*A. exsul*) resulted in death of the lizards within 2–3 months; they would not eat in captivity.

(iii) Applicant is willing to participate in a cooperative breeding program, but we advise against such a program if captive specimens are used. Survival rate in captivity for prolonged periods has been zero. (See 6(ii), above, for related species.) *A. polops* breeds satisfactorily in its normal habitat if predators (e.g., mongoose, cats) are absent. Adequate natural habitat presently exists for the natural propagation and survival of the species.

(iv) After capture and until release, specimens will be maintained in individual porous cloth bags, kept in the shade. Our experience in collecting lizards indicates this is the most satisfactory method of holding such animals for the brief periods anticipated in the transfer from one island to another. Feeding and watering under these conditions are unnecessary and inappropriate.

(v) Two *A. polops* were captured on Protestant Cay by applicants in December 1973, were photographed, and preserved in our museum collection for future comparative identification purposes. A photograph (slide) of one of these lizards was supplied to the Office of Endangered Species, at their request. (See Appendix C.)

Specimens of *A. exsul* were captured in November 1974, and preserved. These were voucher specimens for a series of biogeographic distribution records papers (see Appendix B). Mortalities of two *A. exsul* held in captivity are described in 6(ii), above.

(7) Enclosed are the relevant portions of contracts and agreements pursuant to which the activities sought to be authorized by the permit will be carried out, viz:

(A) Approved Application for Federal Assistance, dated 4 June 1975. The relevant portions included are: AFA form for 5-year project FW-2, narrative for Study IV, and literature cited for research and survey activities. (See Appendix D.)

(B) Project Agreement with Fish and Wildlife Service, as prepared for fiscal year 1978. This document has not yet been approved, but such approval is anticipated. The regional office (Region 4) advised that the documents be submitted, per usual, with Study IV included, and that we should apply for a permit, as we are hereby doing. The relevant portions included are: Project Agreement (form 3-1552) for FY 78 and description of Job IV-A. (See Appendix E.)

(8) The reasons for justification in obtaining the permit are generally covered in the foregoing information and attached Appendices. However, to specifically refer to the itemizations:

(1) The details of the activities sought to be authorized by the permit are explained in:
(a) Response (5), above.
(b) Response (6) (i) and (iv), above.
(c) "Procedures" section of Study IV of Program Narrative, contained in Appendix D, enclosed.
(d) "Procedures" section of description of Job IV-A, contained in Appendix E, enclosed.

(ii) The details of how such activities will be carried out are fully explained in the items referred to in (8)(i), above.

(iii) The relationship of such activities to scientific objectives or to objectives enhancing the propagation of the wildlife sought to be covered by the permit is fully covered in Appendices A, B, D, and E.

(iv) Planned disposition of such wildlife upon termination of the activities sought to be authorized by the permit:

(a) With the cooperation of the National Park Service (see response (5), above), it is the intention to reintroduce a self-sustaining population of *Ameiva polops* on Buck Island, near St. Croix, V.I. The success of this effort will depend largely on the continued trapping of mongoose on Buck Island.

Theoretically, the mongoose can be entirely eliminated from Buck Island if there is adequate and continued trapping. Such trapping is necessarily a job for the National Park Service, which has jurisdiction over Buck Island, although our Bureau will cooperate in whatever way possible.

(b) If, for some reason, the trapping of mongoose on Buck Island terminates permanently at some time in the future, and we have by then shown that the mongoose is capable of extirpating the reintroduced *A. polops* population, every effort would then be made to remove the remaining *A. polops* population from Buck Island and:

(1) Return the live lizards to the Cay(s) from which they were originally captured, or

(2) Possibly introduced them to another area free of mongoose, where they would have a good chance of survival without interference. In the event this course of action were to be followed, specific permission for such activity would be requested.

Such "another area" appears to exist: Ruth Island, a.k.a. Harvey Island, a dredge spoil island just off the St. Croix south shore location of the Martin-Marietta alumina plant at the former Krause Lagoon. The island was created in the 1960s, and is composed of sand, coral, shells, and some vegetation which has become established. Its area is probably in excess of 25 acres, or more than the combined areas of the only present habitat (Protestant and Green Cays, off St. Croix) where *A. polops* now exists. To the best of our knowledge, Ruth Island is owned by the government of the U.S. Virgin Islands.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. This application has been assigned File Number PRT 2-1345-07; please refer to this number when submitting comments. All relevant comments received on or before October 11, 1977, will be considered.

Dated: September 2, 1977.

CERTIFICATION

I HEREBY CERTIFY THAT I HAVE READ AND AM FAMILIAR WITH THE REGULATIONS CONTAINED IN TITLE 50, PART 13, OF THE CODE OF FEDERAL REGULATIONS AND THE OTHER APPLICABLE PARTS IN SUBCHAPTER B OF CHAPTER I OF TITLE 50, AND I FURTHER CERTIFY THAT THE INFORMATION SUBMITTED IN THIS APPLICATION FOR A LICENSE/PERMIT IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE AND BELIEF. I UNDERSTAND THAT ANY FALSE STATEMENT HEREIN MAY SUBJECT ME TO THE CRIMINAL PENALTIES OF 18 U.S.C. 1001.

SIGNATURE (In ink) Clayton F. Freiheit, Director, Denver Zoo
DATE: August 2, 1977

3-200
10/76

DENVER ZOOLOGICAL FOUNDATION, INC.
Denver, Colo.
August 3, 1977.

DIRECTOR (FWS/LE),
U.S. Fish & Wildlife Service, U.S. Department of the Interior, P.O. Box 19183, Washington, D.C.

DEAR SIR: The Denver Zoological Gardens requests an endangered species permit to purchase one (1) male Black Lemur and one (1) female Black Lemur from the Saint Louis Zoological Gardens, Forest Park, Saint Louis, Mo. 63110. These animals now reside at the Denver Zoo on an inter-institutional breeding loan.

1. Common and scientific name of the species or subspecies, number, age and sex of the wildlife to be covered in the permit.

Black Lemur. Scientific Name: *Lemur macacc.* Number and Sex: one (1) male and

V 42 175
SEP 9 77
UMI

one (1) female, the male born 21 March, 1975 and the female born 26 March, 1975.

2. Copy of the contract or other agreement under which wildlife is to be shipped, showing country of origin, name and address of the seller, date of the contract, number and weight (if available) and description of the wildlife.

Attached is a photocopy of a letter from Mr. C. Hoessle, Deputy Director of the Saint Louis Zoo, Forest Park, Saint Louis, Mo. 63110, which is an agreement to sell the above pair of Lemurs to the Denver Zoological Gardens.

3. A full statement of justification for the permit including details of the project or other plans for utilization of the wildlife in relation to zoological, educational, scientific, or propagational purposes, as appropriate and the planned disposition of the wildlife upon termination of the project.

The Denver Zoo currently displays two species of Lemurs totaling eleven specimens. These animals are kept in accepted primate cages behind glass for optimum security and health. By obtaining this particular species we believe we have an excellent chance to reproduce them based on our previous experience.

In addition, these Lemurs will be on public display with appropriate graphics explaining the purpose and nature of the exhibit.

Any specimens that would die would receive a total post mortem examination and distribution of requested body parts by our staff veterinarian. The specimen would then be preserved as a skin or a whole mount for deposit in the Denver Museum of Natural History.

4. A description and the address of the institution or other facility where the wildlife will be used or maintained.

The pair of Lemurs will be held at the Denver Zoo. This institution is owned by the City and County of Denver but managed and operated by a Colorado non-profit organization known as the Denver Zoological Foundation, incorporated in 1950. The postal address is Denver Zoo, City Park, Denver, Colo. 80205, telephone: 303-575-2432.

5. A statement that at the time of application the wildlife to be purchased is still in the wild, was hatched in captivity, or has been removed from the wild. As stated in Mr. Hoessle's letter, the pair of Lemurs were captive born and raised in the Saint Louis Zoo, Saint Louis, Mo., in the year of 1975.

6. A resume of the applicant's attempts to obtain the wildlife to be purchased from sources which would not cause the death or removal of mammals from the wild. The pair of Lemurs were captive born and reared, thus will not be a drain on the natural population of Black Lemurs.

7. (i) A complete description, including blueprints, of the area and facilities in which the wildlife will be housed. Individual primate cages in which the Lemurs will be housed measure 8'x7½'x7'. (See attached photocopies.)

The primate building consists of 14 of these cages. Each cage has tiled walls, sealed, heated, concrete floors, glass fronted viewing, climbing devices, and interconnecting holding cages between individual cages. A separate ventilating system provides heat and air exchange to all cages. Access to individual cages is through a single metal door located on the side of each cage, access to holding spaces is through a single wire door located on the front of each such cage. Feeding is accomplished through small metal feeding doors located at the bottom of the glass viewing areas of each cage, each feeding door has a lock. The public is maintained at a distance from the cages by a 2½ foot high guard rail and at no time can the public come into contact with the animals. This type of primate cage has proven successful in many zoological parks around the country and has been very successful at the Denver Zoo for over six years.

7. (ii) A brief resume of the technical expertise available including any experience the applicant or his personnel have had in propagating the species or closely related to the species to be purchased. See enclosed resumes. Over the past six years the Denver Zoo has maintained two species of Lemurs: the Mongoose Lemur, *Lemur mongoz*, and the Ringtail Lemur, *Lemur catta*. A resume of the history of these two species follows:

Ring-tailed Lemurs (Lemur catta).—In May and June of 1971, the Denver Zoo received two pair of Ring-tailed Lemurs, all four of which came from other zoos in the United States. The two pair proved to be incompatible and had to be separated; one pair subsequently being shipped to the Hogle Zoo in Salt Lake City, Utah on a breeding loan where they reside today, and the other pair were placed on exhibit in the Denver Zoo Primate House in a cage previously described. Since April of 1973 the following breeding has taken place in this group:

April 8, 1973—female born.
March 30, 1974—male born.
March 25, 1975—female born.
March 8, 1976—twins—stillborn
March 20, 1977—male born.

All of the above animals with the exception of the stillborn twins are alive and in the collection. The male born in 1974 was sent to the Jackson, Miss. Zoo in December 1975 on a breeding loan where he continues to do well.

Mongoose Lemurs (Lemur mongoz).—In June 1970, the Denver Zoo received a trio, one (1) male and two (2) females, of Mongoose Lemurs from an animal dealer, original source unknown. The trio did well and one female produced an offspring in 1972. The male offspring was abandoned and died two days later.

Subsequent observations made it necessary to separate the two females, and a second pair was created by purchasing a male from the Brownsville, Tex. Zoo in December, 1972. This pair produced no offspring and the female died in 1975 and was replaced with a female sent to us by the Los Angeles, Calif. Zoo on a breeding loan. This pair has also failed to produce any offspring as of this application. The breeding of the original pair is as follows:

May 9, 1972—female born.
April 5, 1975—male born.
March 14, 1976—male born.
April 27, 1977—female born.

Of the above animals, the female born in 1972 lived for 3 years and died in 1975. The male born in 1975 was abandoned at birth and died 2 days later. The other two animals are alive and well, and are in the collection at this time.

7. (iii) A statement of willingness to participate in a cooperative breeding program and maintain or contribute data to a studbook. We will collaborate in contributing to/or maintaining a studbook. We, at this time, contribute to studbooks for the Edwards Pheasant, the Orangutan, Przewalski Horse, and are involved in over 50 breeding loan agreements throughout the country.

8. (iv) A detailed description of the type, size and construction of the container: Arrangements for caring for the wildlife in transit. The lemurs were shipped from St. Louis, Mo., to Denver, Colo. in crates similar and equal to International Air Transport Association requiremetns with one animal per crate.

I hereby certify that I have read and am familiar with the regulations contained in Title 50, Part 13, of the Code of Federal Regulations and the other applicable parts in Subchapter B of Chapter I, Title 50, and I further certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement hereon may subject me to the criminal penalties of 18 U.S.C. 1001.

Sincerely,

EDWARD C. SCHMITT,
General Curator,
Denver Zoological Gardens.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street NW., Washington, D.C.

SIGNATURE (In ink) Clayton F. Freiheit, Director Denver Zoological Gardens
DATE August 3, 1977

3-200 10/76

DENVER ZOOLOGICAL FOUNDATION, INC.,
Denver, Colo., August 3, 1977.

DIRECTOR (FWS/LE),
U.S. Fish & Wildlife Service, U.S. Department of the Interior, Washington, D.C.

DEAR SIR: The Denver Zoological Gardens requests an endangered species permit to purchase one (1) male Palawan Peacock Pheasant and one (1) female Palawan Peacock Pheasant from M. Ollson, Route 1, Box 152, Glendale, Ariz. 85301. These birds are now located at the Denver Zoo as an interinstitution breeding loan.

1. Common and Scientific name of the species or subspecies, number, age, and sex of the wildlife to be covered in the permit.

Palawan Peacock Pheasant. Scientific Name: *Polyplectron emphanum*. Number and Sex: one (1) male and one (1) female, 1976 hatch (captive-bred).

2. Copy of the contract or other agreement under which wildlife is to be shipped, showing country of origin, name and address of the seller, date of the contract, number and weight (if available) and description of wildlife.

Attached is a photocopy of a letter from Mr. Mickey Ollson, Route 1, Box 152, Glendale, Ariz., which is an agreement to loan the said birds to the Denver Zoological Gardens until such time as the birds may legally be purchased by the Denver Zoological Gardens.

3. A full statement of justification for the permit including details of the project or other plans for utilization of the wildlife in relation to zoological, educational, scientific, or propagational purposes, as appropriate and the planned disposition of the wildlife upon termination of the project.

The Denver Zoo currently exhibits seven (7) species of pheasants in a newly completed pheasantry that is very heavily planted, providing excellent bird security. By obtaining these birds, we feel we have an excellent chance of captive propagation. We currently exhibit a related species, the Grey Peacock Pheasant (*Polyplection bicalcaratum*) which at present is laying eggs. By providing this unique environment and breeding these birds, we would hope to supply a surplus of these birds to increase the nucleus of these birds in the United States.

In addition, these birds will be in a public display which contains appropriate graphics explaining the purpose and nature of the exhibit.

Any specimens that would die would receive a total postmortem examination and distribution of requested body parts by our staff veterinarian. The specimen would then be preserved as a skin or a whole mount for deposit in the Denver Museum of Natural History.

4. A description and the address of the institution or other facility where the wildlife will be used or maintained.

The pair of pheasants will be held at the Denver Zoo. This institution is owned by the City and County of Denver, but managed and operated by a Colorado non-profit organization known as the Denver Zoological Foundation, Incorporated in 1950. The postal address is: Denver Zoo, City Park, Denver, Colo. 80205, telephone 303-575-5542.

5. A statement that at the time of application the wildlife to be purchased is still in the wild, was hatched in captivity, or has been removed from the wild.

As documented in Mr. Ollson's letter, the pair of pheasants were captive hatched in 1976.

6. A resume of the applicant's attempts to obtain the wildlife to be purchased from sources which would not cause the death or removal of birds from the wild.

The pair of pheasants were captive hatched, thus will not be a drain on the natural population of Palawan Peacock Pheasants.

7. (i) A complete description, including blueprints of the area and facilities in which the wildlife will be housed.

Individual pheasant pens in which the birds will be displayed measure 15 foot x 30 foot with a maximum height of 11 foot. The pheasantry consists of ten individual pens. At the back of each pen (farthest from public viewing area) is a wooden, insulated building, heated inside, with a ceiling height of 11 foot. One-by-two inch welded wire covers the entire series of pens. Access to the individual aviaries is through a single wooden door located inside the service-holding barn. This access prevents escape by being within a holding cage and it is necessary to pass through 2 doors before reaching the access door. A substantial hedge is planted in the 2½ foot space between the front of the cage and the guard rail, and serves as a buffer between the public and the birds. (Blueprints of aviarys' floor plan is enclosed.)

This type of aviary has proven successful in many zoological and private situations throughout the country.

This pheasantry has been in operation since September of 1976 with the loss of only one bird due to a trauma inflicted injury.

(ii) A brief resume of the technical expertise available, including any experience the applicant or his personnel have had in propagating the species or closely related to the species to be purchased.

See enclosed resumes. A list of the birds that have been reproduced through the efforts of the Curator is attached.

(iii) A statement of willingness to participate in a cooperative breeding program and maintain or contribute data to a studbook.

We are participating in various studbooks at this time, including the one on the White Eared Pheasant and will continue to contribute to or help maintain a studbook. This project is in fact a cooperative and collaborative effort of game breeders throughout the world. We, at this time, are actively participating in 30 breeding loan arrangements throughout the country.

(iv) A detailed description of the type, size and construction of the container: Arrangements for caring for the wildlife in transit.

The pheasants have been shipped from Phoenix, Ariz., to Denver in crates similar and equal to International Air Transport Association Style F with one bird per compartment.

I hereby certify that I have read and am familiar with the regulations contained in

V 42 175 SEP 9 77 UMI

Title 50, Part 13, of the Code of Federal Regulations and the other applicable parts in Subchapter B of Chapter I, Title 50, and I further certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement hereon may subject me to the criminal penalties of 18 U.S.C. 1001.

Sincerely,

EDWARD C. SCHMITT,
General Curator,
Denver Zoological Gardens.

I would like to have the unlimited permit so I will be able to purchase these birds whenever they are available.

They will be housed in pens that have an outside run and a shelter in which they can be locked inside during stormy weather. The shelter house would be six feet square by eight feet high that slopes to six feet. The outside run would be ten feet wide and twenty-four feet wide by six feet high.

ATTACHMENTS FOR AN UNLIMITED CSSP PERMIT

There are four species of pheasants that I would like to get depending on which ones are available. They are the Swinhoe (*Lophura Swinhoii*), Brown-Eared (*Crossoptilon mantchuricum*), Humes-Bartailed (*Syrmaticus humiae*), and Mikado (*Syrmaticus mikado*).

I will be the one who will be taking care of the pheasants. I have been raising pheasants and peafowl for about the last five years. I am willing to participate in a cooperation breeding program and to contribute data on a studbook. I have a friend that also lives in Minnesota and we will be helping each other from time to time breeding birds.

Depending on how far I have to travel to buy the birds they will be put in a small wooden box. I will bring the box with me to feed to keep the birds in the dark to keep them settled. If it's a long trip they will be given sufficient time for water and feed. In which I will personally attend them.

Their transportation will be by car as I will not have them shipped by plane or other.

I would get the birds myself.

I have not had any of these birds before so I cannot comment on mortalities. The birds I have now are okay. I have had a couple die of colds and sinus problems. To combat this I have given the sick birds an injection of penicillin and a couple of days later they are back to normal.

I feel that the permit so I can buy these birds legally from other states. And so I can also sell the young that I would raise. If I were ever to quit I would sell out to other people who are qualified to raise and purchase them.

ATTACHMENTS FOR AN ENDANGERED SPECIES PERMIT

There is one species of pheasants that I would like to get, the Elliots (*Symaticus elliotti*).

This is the only difference otherwise it is the same as the above.

KEITH ESSELINK.

LOS ANGELES ZOO

Threatened Species Permit; Receipt of Application

Notice is hereby given that the following application for a permit is deemed to have been received under section 10 of the Endangered Species Act of 1973 (Pub. L. 93-205).

Applicant: Los Angeles Zoo, 5333 Zoo Drive, Los Angeles, Calif. 90027.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. This application has been assigned File Number PRT 2-1344-25; please refer to this number when submitting comments. All relevant comments received on or before October 11, 1977, will be considered.

Dated: September 2, 1977.

DONALD G. DONAHOO,
Chief, Permit Branch, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service.

V 42 175 SEP 9 77 UMI

THE LOS ANGELES ZOO,
Los Angeles, Calif., August 8, 1977.

USDI
Federal Wildlife,
Permit Office,
Washington, D.C.

TO WHOM IT MAY CONCERN:

(1) Export (sell) 8 Arabian oryx, (*Oryx leucoryx*), born Los Angeles Zoo 1976 and 1977 (ISIS sheets enclosed), to Nature Reserve Authority, 16 Hanatalv Street, Tel Aviv, Israel.

(2) Born in captivity.

(3) All specimens captive born—no animals removed from the wild.

(4) All animals born Los Angeles Zoo, Los Angeles, Calif.

(5) See enclosure on Hal-Bar Reserve.

(6) a.I. See enclosure on Hal-Bar Reserve.

II. Like all the other animals in the Reserve, the oryx will be under the devoted, joint care of the following excellent team:

(a) Dr. Amnon Tadmor—After graduation from a secondary agricultural school in Israel, Dr. Tadmor studied veterinary medicine at the Royal University of Utrecht, from which he graduated in 1960. He is a first-class veterinarian, highly experienced in the treatment of wild animals for some twenty years now. Dr. Tadmor is a senior employee of the Veterinary Services Dept. in Israel, and has been in charge of the Tel Aviv University Zoological Garden for many years.

(b) Dr. Moshe Avram—Studied veterinary medicine at Bern University (Switzerland), from which he graduated in 1954. Worked for 9 years as District Veterinarian at the 'Hahakla'it' Animal Insurance Company. He has been Director of the Zoological Garden of Tel Aviv for many years, and has had 15 years of experience in the treatment of wild animals at the Hai-Bar Reserve, as well as at the Tel Aviv University Zoo. Dr. Avram is a member of the Board of Directors of Hai-Bar.

(c) Mr. Mike van Grevenbroek—A 32-year-old Dutchman, studied at a university in Holland, from which he graduated with a degree in animal husbandry. He has been managing the Hai-Bar Reserve since September 1969, and is a man of outstanding knowledge and experience in the treatment of the wild animals in the Hai-Bar Reserve.

(d) Mr. Berend van Wyk—A Dutch veterinary student, who has been in Israel since January 1977, for a year's work at the Hai-Bar Reserve. He is extremely capable, loyal, and devoted in his work and treatment of our wild animals.

(e) Mr. Uri Tzon—Studied Zoology at Tel Aviv University. Has had much practical experience with wild animals' breeding and upbringing since 1951. He was one of the original keepers at the Hai-Bar Reserve (since 1968), and has been General Secretary of the Hai-Bar Organization since 1960.

III. The Los Angeles Zoo is and will continue to submit data to the Arabian oryx studbook keeper. Data is also submitted to ISIS and to the International Zoo Yearbook. The Hai-Bar Reserve submits data to the appropriate studbook keeper on those species which it maintains.

IV. The animals will be sent to Israel by air. Each animal will be in its own crate measuring 61" long 62" high and 30" wide. They will be flown from Los Angeles to Lod Airport in Israel, or with one intermediate stop in New York or in Europe. The flight will take 12–14 hours. At Lod Airport they will be unloaded from the aeroplane, and loaded onto a special truck which will carry them straight to the Hai-Bar Wildlife Reserve, which is located in the Arava (in the south of Israel). The trip from Lod Airport to the Hai-Bar Wildlife Reserve will take 5½ hours. On the trip from Lod Airport the animals will be accompanied by two Veterinary Doctors, Dr. Amnon Tadmor and Dr. Moshe Avram, and by a team of employees of the Wildlife Reserve, who will all be waiting at the airport for the animals to arrive.

V. (a) Addax—2 (one of these died of old age and the other as a result of goring by a Scimitar-orned oryx).

(b) Ecimitar-horned oryx—3 (one was rejected by the herd and killed in a fight between two males; the second (aged one month) died as a result of being bitten and trampled on by an onager; the third died at the age of two months as a result of a congenital defect causing it loss of balance).

(c) Nubian ibex—6 (five died of food poisoning, and the sixth broke its neck as a result of panic caused by a low-flying aeroplane).

All the mortalities described above occurred in the open 3,000-acres terrain, where the animals were free in natural surroundings, with not a single case of mortality having been due to disease.

Mike van Grevenbroek from the Hai-Bar Reserve will most probably be sent to the United States to accompany the animals from Los Angeles to Lod Airport in Israel.

(7) Offer of sale and Israel import permit enclosed.

(8) I. and II. Los Angeles Zoo personnel will accompany the animals to the Los Angeles Airport. Upon arrival at the Reserve the oryx will be accommodated in two separate groups, consisting of two males and two females each. Both groups will be released into two separate 3-acres enclosures, well protected by 2" × 3" wire-netted 7 ft. high fencing secured with a very strong wooden base.

Each enclosure will be equipped with adequate feeding and drinking facilities, and with special arrangements which will make possible the isolation of any one animal for purpose of treatment, etc. Likewise, there will be special arrangements for isolating all the males, or part of them or each one of them separately, if necessary, in the case of any one male being rejected by the other specimens in the herd.

At a later stage, after several months of acclimatization, one pair of oryx will be released into an open 3000-acre area, well protected by a fence, consisting of strong concrete posts and 7 ft. high wire-netting, secured, on a slant, 3.5 ft. below ground.

There is plenty of natural pasture in this terrain, and the indigenous Acacia trees give much shade. Several drinking stations are dispersed over the area.

After an additional period of several months, yet another pair of oryx will be released into this terrain, and so forth until all the animals will have been so released.

III. The aim of the Hai-Bar Reserve in obtaining the Arabian oryx is propagation of the species. The overall goal of this organization is to encourage the breeding of rare wild species which in ancient times populated Israel, the Holy Land and which have been completely exterminated there and are now on the list of endangered species. The Nature Reserve Authority hopes to populate the 3,000-acre Hai-Bar Reserve in the Arava (in the south of Israel) with wild animals that once lived in the area.

IV. The 8 Arabian oryx will be permanently maintained at the Hai-Bar Reserve.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. This application has been assigned File Number PRT 2-1306-C07; please refer to this number when submitting comments. All relevant comments received on or before October 11, 1977, will be considered.

Dated: September 2, 1977.

Re: Permit to capture, tag, and disturb American alligator, and to take no more than 20 alligator eggs.

Sec. 17.22; 17.32

(1) American alligator (*Alligator mississippiensis*). Activity to be covered includes capture, tagging, marking, disturbing American alligator. Unlimited numbers of males and females of all age and size classes to be included. Animals will be released immediately after tagging. Allow for taking of up to 20 eggs in different developmental stages from unguarded nests. Transport of dead specimens.

(2) The animals to be covered by this permit are in the wild.

(3) In 1976 and 1977 capture of yearlings has been accomplished successfully by hand. In 1977 larger juveniles and adults have been captured by noosing. Neither method has resulted in any fatalities.

(4) NA.
(5) NA.
(6) (i) NA.
(ii) NA.
(iii) NA.
(iv) NA.

(v) To date, no animals captured for tagging by this individual, have died as a result of the capturing and tagging procedure.

(7) Attachments: Letter permitting activity at Okefenokee N. W. R., renewable 1-1-78; current permits for states of North Carolina, South Carolina, and Florida, renewable 1-1-78; current permit for state of Georgia, renewable 4-1-78. Contract with Oak Ridge Associated Universities for work at Savannah River Ecology Laboratory.

(8) (i), (ii), and (iii) I propose to continue my study of the reproductive and social behavior of the American alligator (*Alligator mississippiensis*) in one of its least disturbed habitats, the Okefenokee Swamp in Georgia, and in other areas, including, but not limited to, the Savannah River Ecology Laboratory in South Carolina, the Rockefeller Refuge in Louisiana, and coastal regions of South Carolina and Georgia. Included in this study will be comparison of nesting sites used in each year of the study (beginning with 1978), observations and photography of behavior patterns seen in courtship, mating, nest-building, hatching of the young, and mother-offspring interactions, and analysis of response of these animals to different alligator vocalizations. The role of the female and vocalizations in protecting and nurturing the young will be emphasized.

This study is important in that it will (1) clarify the predominant mating system and thus denote its sensitivity to environmental change; (2) determine factors influencing survival of the young and the tolerable range of variability of these factors; (3) outline communication systems in the alligator, and analyze the components of these systems, especially in comparison with communication systems in avians; and (4) give a clearer indication of phylogeny of crocodilian behavior.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. This application has been assigned File Number PRT 2-1277-26; please refer to this number when submitting comments. All relevant comments received on or before October 11, 1977, will be considered.

Dated: September 2, 1977.

Attachment to Application for Permit to enhance the survival of the Everglade Kite (*Rostrhamus sociabilis plumbeus*).

We expect to supply a nest-support structure, in the form of a welded wire basket, about 20" in diameter, 8" deep, for nests which we consider extremely vulnerable to destruction by high wind. Since 1973, we have provided this type of support for approximately 20 nests per year. The nests average about 2.5 viable eggs. The eggs, nestlings, or adults are not handled. The nest is not moved except as necessary to place it in the basket, at the same height and location. We have seen no evidence that the Florida Everglade Kite (*Rostrhamus sociabilis plumbeus*) is in any way disturbed by this action. On the contrary, very few nests which are not supported have survived the effects of high winds in recent years.

This action will take place only on that portion of Lake Okeechobee, Florida, that is leased by the State to the National Audubon Society for a wildlife sanctuary.

Only those nests which, in our judgment based upon several years of experience, are apt to capsize in the wind will be supported by the structures.

Our research indicates that this management measure greatly enhances the production of young Everglade Kites on Lake Okeechobee. Prior to the application of this technique, production varied from zero to 3 young per year for several years. Since then about 20 young have survived annually.

Mr. Roderick Chandler, 505 SW., 10th Street, Okeechobee, Fla. 33472, telephone 813-763-3946, will be the only individual performing the work under this permit.

The Principal Officer's name is Alexander Sprunt, IV, Director, Research Department, National Audubon Society. His office address is 115 Indian Mound Trail, Tavernier, Fla. 33070. Telephone 305-852-5092.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street NW., Washington, D.C.

(1) One male, one female Hawaiian Goose (*Branta sandvicensis*), ages, one year. Purchase the pair of Hawaiian Goose that have been sent to Sea World of Florida on breeding loan.

(2) This pair of Hawaiian Goose was born in captivity at the St. Louis Zoological Park.

(3) Not applicable.

(4) Born in captivity, St. Louis Zoological Park, St. Louis, Mo., (spring 1976).

(5) Sea World of Florida, 7007 Sea World Drive, Orlando, Fla. 32809. One hundred twenty-five acre Aquatic Zoological Park, specializing in marine animals, fishes, and aquatic birds.

(6) Hawaiian Goose will be maintained in a simulated natural environmental exhibit. Proper foliage, space and constant running well water is provided. (Diagram attached.)

The Sea World Animal Care staff has been specifically trained in the area of animal husbandry which includes general maintenance procedures, nutritional requirements, egg collection and incubation procedures, brooding and rearing techniques, sexing and pinioning procedures. Waterfowl collection at Sea World of Florida is 600 individuals. Annual propagation results average 1,000 waterfowl raised each year.

Sea World of Florida is willing to cooperate and participate in any breeding program and to maintain or contribute data for stud books.

Sea World has maintained one pair of Hawaiian Goose for one year without any complications or mortalities.

(7) Copy of breeding loan agreement between the St. Louis Zoo and Sea World of Florida is attached.

(8) Activities to be conducted will be to cooperatively propagate and distribute this wildlife to assure and maintain a captive breeding population. Standard practices in animal husbandry and waterfowl incubation, brooding and rearing techniques will be utilized to maximize the effectiveness of the program.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. This application has been assigned File Number PRT 2-1273-C07; please refer to this number when submitting comments. All relevant comments received on or before October 11, 1977, will be considered.

Dated: September 2, 1977.

Attachment
Part 12 of Form 3-200

(a) Application for permit under section 17.33 of 50-CFR for captive self-sustaining populations.

(1) I would like to purchase the following pheasants, which are on the Endangered and Threatened Wildlife list, for propogation of the said species and eventual dispersal of 2nd and 3rd generation of excess offspring through interstate sale and shipment.

(a) Brown Eared Pheasant, *Crossoptilon Manchuricum.*

(b) Edwards Pheasant, *Lophura Edwardsi.*

(c) Bar-Tailed Phesant, *Symaticus Humiae.*

(d) Mikado Pheasant, *Symaticus Mikado.*

(e) Swinhoe Pheasant, *Lophura Swinhoii.*

(2) See attached graph paper.

(3) I will personally care for the birds myself. I have had two years experience raising Golden, Lady Amherst, Reeves, Silver, Ringneck pheasants. I also have had great success in raising Blue Scale, Bobwhite, Gamble, Valley quail. I have visited several people in the pheasant business and by combining their experience and proven ways into a successful program for myself.

(4) I would be willing to participate in a cooperative breeding program and maintain the required data on a stud book.

(5) The transport cartons are well ventilated, waxed cartons, 24 inches by 18 inches by 7. I use this type carton for my quail. I prefer to use apple boxes for my pheasants. I include in the boxes sliced apple and lettuce for their food source. I have always picked up my birds in person so that I may control their environment during shipping. That is what I intend to do with these birds that are concerned in this application.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. This application has been assigned File Number PRT 2-1307-25; please refer to this number when submitting comments. All relevant comments received on or before October 11, 1977, will be considered.

Dated: September 2, 1977.

PINE CREEK STATE AND NATIONAL SCENIC RIVER

Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act, the Bureau of Outdoor Recreation has prepared a draft environmental statement for the proposed Pine Creek State and National Scenic River in Pennsylvania.

The environmental statement considers the probable impact of establishing Pine Creek and selected tributaries as a component of the State and National Wild and Scenic Rivers Systems.

Comments are invited and should be submitted to the Regional Director, Bureau of Outdoor Recreation, 600 Arch Street, Room 9310, Philadelphia, Pennsylvania 19106, within 45 days. Copies of the draft statement are available for inspection at the following locations:

Office of Communications, Department of the Interior, room 7200, Washington, D.C. 20240, telephone: 202-343-4662.
Office of Information, Bureau of Outdoor Recreation, room 242, Department of the Interior, Washington, D.C. 20240, telephone: 202-343-5726.
Office of the Regional Director, Bureau of Outdoor Recreation, 600 Arch Street, room 9310, Philadelphia, Pa. 19106, telephone: 215-597-7995.
Tioga County Planning Commission, Courthouse Annex, Wellsboro, Pa. 16901, telephone: 717-724-1906.
District Forestry Office, 66 Main Street, Wellsboro, Pa. 16901, telephone: 717-724-2868.
Mr. Leonard Harrison, State Parks Office, R.D. 6, Wellsboro, Pa. 16901, telephone: 717-724-3061.
State Parks Office, Little Pine State Park, Waterville, Pa. 17776, telephone: 717-647-3200.
District Forestry Office, 423 East Central Avenue, South Williamsport, Pa. 17701, telephone: 717-326-3576.
Lycoming County Planning Commission, County Courthouse, Williamsport, Pa. 17701, telephone: 717-323-9611 x317.

Single copies are available to the public and may be obtained by writing to the Regional Director, Bureau of Outdoor Recreation, 600 Arch Street, Room 9310, Philadelphia, Pennsylvania 19106. Please refer to the statement number shown above.

Dated: September 2, 1977.

LARRY E. MEIEROTTO,
Deputy Assistant Secretary of the Interior.

DEPARTMENT OF STATE

Agency for International Development

[Redelegation of Authority No. 99.1.62, Amdt. No. 1]

COUNTRY DEVELOPMENT OFFICER/CHAD

Redelegation of Authority Regarding Contracting Functions

Pursuant to the authority delegated to me under Redelegation of Authority No. 99.1 (38 FR 12836) from the Assistant Administrator for Program and Management Services of the Agency for International Development, I hereby amend Redelegation of Authority No. 99.1.62 dated November 11, 1974, (39 FR 41266), as follows:

(1) The first paragraph is revised to read as follows: "U.S. Government contracts and grants and amendments thereto: *Provided*, That the aggregate amount of each individual contract or grant does not exceed $50,000 or local currency equivalent."

(2) Delete Paragraph "2." in its entirety.

(3) The third paragraph is revised to read as follows: "The authority herein delegated may be redelegated in writing, in whole or in part, by said Country Development Officer only to the person designated by the Country Development Officer as Contracting Officer. Such redelegation shall remain in effect until such designated person ceases to hold the office of Contracting Officer or until the redelegation is revoked by the Country Development Officer, whichever shall first occur. The authority so redelegated by the Country Development Officer may not be further redelegated."

(4) The fourth paragraph is revised to read as follows: "The authority delegated herein is to be exercised in accordance with regulations, procedures, and policies established or modified and promulgated within AID and is not in derogation of the authority of the Director of the Office of Contract Management to exercise any of the functions herein redelegated."

Except as provided herein, the Redelegation of Authority remains unchanged and continues in full force and effect.

This amendment is effective on the date of signature.

Dated: August 19, 1977.

MISSION DIRECTOR, USAID/PAKISTAN

Regarding Contracting Functions

Pursuant to the authority delegated to me as Director, Office of Contract Management, under Redelegation of Authority No. 99.1 (38 FR 12836) from the Assistant Administrator for Program and Management Services of the Agency for International Development, I hereby redelegate to the Mission Director, USAID/Pakistan, the authority to sign U.S. Government contracts, grants, and amendments thereto: *Provided*, That the aggregate amount of each individual contract or grant does not exceed $100,000 or local currency equivalent.

The authority herein delegated may be redelegated in writing, in whole or in part, by said Mission Director only to the person or persons designated by the Mission Director as Contracting Officer. Such redelegation shall remain in effect until such designated person ceases to hold the office of Contracting Officer for the Mission, or until the redelegation is revoked by the Mission Director, whichever shall first occur. The authority so redelegated by the Mission Director may not be further redelegated.

The authority delegated herein is to be exercised in accordance with AID regulations, procedures, and policies in effect at the time the authority is exercised and is not in derogation of the authority of the Director of the Office of Contract Management to exercise any of the functions herein redelegated.

The authority herein delegated to the Mission Director may be exercised by duly authorized persons who are performing the functions of the Mission Director in an acting capacity.

Any official actions taken prior to the effective date hereof by officers duly authorized pursuant to previous delegations are hereby continued in effect, according to their terms until modified, revoked, or superseded by action of the officer to whom I have delegated relevant authority in this delegation.

Actions within the scope of this delegation heretofore taken by the official designated in such delegation are hereby ratified and confirmed.

This redelegation of authority shall be effective on the date of signature.

Dated: August 19, 1977.

HUGH L. DWELLEY,
Director, Office of Contract Management.

"The authority herein delegated may be redelegated in writing in whole or in part, by said Regional Development Officer only to the person designated by the Regional Development Officer as Contracting Officer. Such redelegation shall remain in effect until such designated person ceases to hold the office of Contracting Officer or until the redelegation is revoked by the Regional Development Officer, whichever shall first occur. The authority so redelegated by the Regional Development Officer may not be further redelegated."

(4) The fourth paragraph is revised to read as follows:

"The authority delegated herein is to be exercised in accordance with regulations, procedures, and policies established or modified and promulgated within AID and is not in derogation of the authority of the Director of the Office of Contract Management to exercise any of the functions herein redelegated."

Except as provided herein, the Redelegation of Authority remains unchanged and continues in full force and effect.

This amendment is effective on the date of signature.

Dated: August 18, 1977.

HUGH L. DWELLEY,
Director, Office of Contract Management.

DEPARTMENT OF THE TREASURY

Customs Service

LETTERS OF CREDIT TO SECURE POTENTIAL COUNTERVAILING DUTY LIABILITY

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: General notice.

SUMMARY: This notice announces that the Customs Service will accept letters of credit to secure the payment of possible countervailing duties on certain Japanese electronic products. The procedure is to be used as an alternative to the acceptance of bonds for the potential liability for duties.

EFFECTIVE DATE: September 9, 1977.

FOR FURTHER INFORMATION CONTACT:

John E. Elkins, Attorney, Drawback and Bonds Branch, Office of Regulations and Rulings, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229 (202-566-5856).

SUPPLEMENTARY INFORMATION:

BACKGROUND

In general, a countervailing duty is an additional duty which is imposed upon imported merchandise after it has been determined that the manufacture, production, or export of that merchandise has benefited directly or indirectly from a bounty or grant (subsidy) bestowed by a foreign government or person.

On April 12, 1977, the United States Customs Court, in *Zenith Radio Corp.* v. *United States*, C.D. 4691, held that the rebate or forgiveness of the Japanese commodity tax upon the export of certain consumer electronic products from Japan is a bounty or grant within the meaning of the United States countervailing duty law (section 303 of the Tariff Act of 1930, as amended (19 U.S.C. 1303)). The Court ordered that countervailing duties be ascertained and assessed on the products covered by its decision entered or withdrawn from warehouse for consumption on or after April 13, 1977. Section 516(g) of the Tariff Act of 1930, as amended (19 U.S.C. 1516(g)), provides for the suspension of liquidation of merchandise covered by such decisions of the Customs Court until final disposition is made of the action. On July 28, 1977, the decision of the Customs Court was reversed by the U.S. Court of Customs and Patent Appeals in *United States* v. *Zenith Radio Corp.*, C.A.D. 1195. The decision of the Court of Customs and Patent Appeals will be final and conclusive unless modified, vacated, set aside, reversed, or remanded by the U.S. Supreme Court.

As a result of the decision of the Customs Court, the Commissioner of Customs authorized a bonding procedure to be followed until final disposition of the *Zenith* action. The procedure allows importers to obtain delivery of their merchandise prior to the ascertainment and collection of countervailing duties, and at the same time adequately protects the revenue. Under the authority of section 623(a) of the Tariff Act of 1930, as amended (19 U.S.C. 1623(a)), and Treasury Department Order No. 165, Revised (T.D. 53654, 19 FR 7241), as amended, the Commissioner by specific instruction authorized Customs officers to require a special countervailing duty bond. Under this procedure, the products may be released under a bond to guarantee payment of any countervailing duties that may be assessed. The bonding requirement went into effect with respect to any of the products entered or withdrawn from warehouse for consumption on or after April 13, 1977.

The Commissioner subsequently determined that an alternate means of securing the possible countervailing duty liability may be permitted without jeopardizing the revenue. The Commissioner has therefore authorized district/area directors of Customs to accept clean irrevocable letters of credit, as an alternative to the bonding requirements, to secure potential countervailing duty liability for merchandise covered by the opinions in the *Zenith* cases.

A clean letter of credit is one that requires no documents to be presented with the draft or demand for payment thereunder. An irrevocable letter of credit, once established in favor of the district/area director, cannot be modified or revoked without the consent of the district/area director.

In order to be accepted by the district/area director, the letter of credit must meet the following requirements:

(a) It must cover entries of a single importer filed in a single district or area.

(b) It must contain a statement indicating the letter of credit will be automatically renewed for additional one-year periods without any affirmative action by the district/area director, unless the provisions of item (c), below, are invoked by the issuing bank.

(c) It must contain a statement indicating that the letter of credit may be terminated by the issuing bank at the end of its term only if the issuing bank submits a written intent of termination by registered mail at least 30 days prior to the expiration date of the letter of credit. If this termination provision is exercised by the issuing bank, the district/area director will immediately draw on the credit in the full amount of the potential countervailing duty liability.

(d) It must contain a statement that the letter of credit is to secure a potential liability for countervailing duties.

(e) It must be submitted in an original and two copies.

(f) The initial term of the letter of credit must be for one year or for any longer period willing to be undertaken by the issuing bank.

(g) The letter of credit must be clean and irrevocable.

(h) If the letter of credit is issued by other than a local bank, it must be confirmed through a local bank.

Further information regarding the letter of credit procedure can be obtained from Customs officers at the port where the merchandise is to be entered.

LEONARD LEHMAN,
Assistant Commissioner, Regulations and Rulings.

Internal Revenue Service

DEPARTMENT OF LABOR

Pension and Welfare Benefit Programs

[Application No. D-850]

CERTAIN TRANSACTIONS INVOLVING THE CENTRAL STATES, SOUTHEAST AND SOUTHWEST AREAS PENSION FUND

Pendency of Proposed Exemptions

AGENCIES: Department of the Treasury/Internal Revenue Service and the Department of Labor.

ACTION: Notice of pendency of proposed exemptions.

SUMMARY: This document contains a notice of pendency before the Internal Revenue Service (the Service) and the Department of Labor (the Department) of several proposed exemptions from certain restrictions imposed by the Internal Revenue Code of 1954 (the Code) and the Employee Retirement Income Security Act of 1974 (the Act). The proposed exemptions were requested in applications filed by The Equitable Life Assurance Society of the United States (Equitable) and Victor Palmieri and Co. Inc. (VPCO) for transactions involving the Central States, Southeast and Southwest Areas Pension Fund (the Fund).

The proposed exemptions, if granted, would affect participants and beneficiaries of the Fund, their employers, the Fund's named fiduciary and investment managers, and other persons participating in the described transactions.

DATES: Written comments must be received by the Service on or before September 26, 1977.

A public hearing with respect to the proposed exemptions will be held on September 26, 1977, beginning at 10 a.m. in the Department of Labor Auditorium, Main Building Lobby, 200 Constitution Avenue NW., Washington, D.C. 20016.

Any interested person who desires to present oral comments at the hearing and who wishes to be assured of being heard should submit a statement to that effect, an outline of the topics he wishes to discuss, and the time he wishes to devote, by 4 p.m. on September 22, 1977. The statement and outline should be submitted to the Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224, Attention: E:EP:PT (D-850) Hearing. An agenda will then be prepared containing the order of presentation of oral comments and the time allotted to such presentation. Ordinarily, a period of 10 minutes will be the time allotted to each person for making his oral comments. Information with respect to the contents of the agenda may be obtained on September 23, 1977, by telephoning Neil Grossman of the Internal Revenue Service, 202-566-4260. This is not a toll free number.

At the conclusion of the presentation of comments by persons listed in the agenda, to the extent time permits, other comments will be received. The public hearing will be transcribed.

A person wishing to make oral comments at the hearing may do so without filing written comments. Persons making oral comments should be prepared to answer questions regarding information brought forth in their comments (including written comments, if any).

ADDRESS: All written comments (at least six copies) should be addressed to the Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224, Attention: E:EP:PT (D-850). The applications for exemptions referred to in this notice and all comments relating thereto will be available for public inspection at the Internal Revenue Service National Office Reading Room, 1111 Constitution Avenue NW., Washington, D.C. 20224, and the Public Documents Room of Pension and Welfare Benefit Programs, Room N-4677, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT:

Neil Grossman of the Internal Revenue Service, 202-566-4260, or Martha McLane of the Department of Labor, 202-523-9141. These are not toll free numbers.

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department and the Service (hereinafter collectively referred to as the Agencies) of applications filed by Equitable and VPCO (hereinafter collectively referred to as the applicants) for exemptions from the taxes imposed by sections 4975 (a) and (b) of the Code by reason of sections 4975(c)(1)(A) through (F) of the Code and from the restrictions of sections 406(a), 406(b), and 407(a) of the Act. The proposed exemptions would apply to a number of transactions involving Equitable, VPCO, entities related to Equitable and VPCO, the Fund's other investment managers, and the Fund as a result of contractual agreements dated June 30, 1977. The proposed exemptions are based on the representations contained in various applications for exemptions on file with the Agencies which are summarized below. Interested persons are referred to the applications for exemptions for the complete representations of the applicants. The applications were filed pursuant to section 4975(c)(2) of the Code and section 408(a) of the Act and in accordance with the procedures set forth in Rev. Proc. 75-26, 1975-1 C.B. 722, and ERISA Procedure 75-1 (40 FR 18471, April 28, 1975).

BACKGROUND

Equitable and VPCO have made the following common representations which apply to each proposed exemption.

The Fund is a multiemployer employee benefit plan established and maintained pursuant to collective bargaining agreements between employers and certain affiliated unions of the International Brotherhood of Teamsters. It was established in 1955 by trust agreement, amended from time to time thereafter, by and between Central Conference of Teamsters, Central States Drivers Council, Southern Conference of Teamsters, and their affiliated local unions, and the Southeastern Area Motor Carriers Labor Relations Association, Southwest Operators Association, National Automobile Transporters Labor Council, Motor Carriers Employers Conference—Central States, Cartage Employers Management Association; Cleveland Draymen Association, Inc., and Northern Ohio Truck Association, Inc. In accordance with section 302(c)(5) of the Labor Management Relations Act, 1947 (29 U.S.C. section 186(c)(5)), the Fund is jointly administered by ten trustees, consisting of an equal number of employee and employer representatives. The Fund generally covers Teamster employment in 33 states located in the Central, Southeast and Southwest areas of the United States.

The Fund has been the subject of investigation by the Department of Labor, the Department of Justice, the Internal Revenue Service, the Securities and Exchange Commission and other agencies for a period of years. It has also been the subject of numerous Congressional inquiries and hearings. In published statements of government agencies, congressional committees, and the Fund's staff, and in other publicly available information, there has been widespread criticism and allegations of abuse in connection with the management of the Fund's assets.

During the last year, the following governmental actions, among others, have been announced:

By letter dated June 25, 1976, the District Director of the Internal Revenue Service, Chicago District, revoked the Fund's tax exempt status.

Subsequent to the date of the initial revocation letter, the Internal Revenue Service delayed the application of the revocation four times with respect to certain contributing employers, employees, beneficiaries, and survivors of participants of the Fund. During this period, government attorneys and attorneys for the Fund engaged in a series of negotiations on problem areas.

On March 14, 1977, the Service and the Department issued a joint release (USDL 77-232, IR 1775) announcing the resolution of certain issues respecting asset management of the Fund "in a manner that meets the government's objectives." In part, the release stated:

> The trustees of the Fund have resolved to delegate to one or more investment managers (as defined in section 3(38) of the Act) the control of all investments of the Fund.

Based on this and other matters announced, and subject, among other things, to the engagement of professional investment managers, the Service said that it would issue a determination letter requalifying the Fund and the Department said that it would terminate that portion of its investigation relating to procedures of the Fund respecting asset management.

Subsequently, on April 26, 1977, the Service issued a determination letter requalifying the Fund for tax years beginning after December 31, 1976, subject to a number of conditions, including, among others, the following:

V 42 175 SEP 9 77 UMI

1. The Fund completing by May 1, 1978 an examination of all loans and related financial transactions entered into by the Fund from February 1, 1965 to April 30, 1977. The results of this examination, including all background information, conclusions and recommendations will be submitted to unrelated independent professionals to determine if the Fund has an enforceable causes of action or other recourse arising from the transactions. These independent professionals may require the Fund to produce, or may themselves otherwise obtain, such additional information concerning these transactions as they deem necessary to make their determination. The completed reports and recommendations for each transaction will be available to the IRS no later than the 5th working day of each month, summarizing progress on this activity.

2. The Trustees placing all Fund assets and receipts, including funds derived from liquidation of existing investments (except funds reasonably retained by the Fund for (a) payment of plan benefits and (b) payment of administrative expenses), under direct continuing control of independent professional investment managers as defined by section 3(38) of ERISA. The Trustees will adopt appropriate amendments to the trust agreement to accomplish this condition and will expeditiously transfer the assets to the investment managers. Recognizing the complexities of the large investment portfolio, the completion date for accomplishing delivery of the investment assets will be no later than December 31, 1977. However, the securities-related assets and the majority of the real estate-related assets will be made available to the investment managers for inspection, documentation and evaluation no later than June 30, 1977.

During this period, officials of the Fund were actively attempting to secure independent, professional investment managers. The selection of independent investment managers for the Fund was regarded by the government as a crucial objective of governmental demands upon representatives of the Fund. Representatives of the Department were continually apprised of the progress of the negotiations. Ultimately, on June 17, 1977, the trustees of the Fund announced their selection of Equitable as named fiduciary for the Fund and Equitable, VPCO, and others as investment managers.

Equitable is a mutual life insurance company whose principal office is located at 1285 Avenue of the Americas, New York, N.Y. 10019. Its Employer I.D. No. is 13-5570651. It is a New York corporation subject to the insurance laws of New York, and it is registered as an investment adviser under the Investment Advisers Act of 1940. Equitable is the third largest life insurance company in the United States; as of December 31, 1976, its assets were a total of $22,430,472,618. Prior to its execution of the June 30, 1977 contracts, with a minor exception described below, it had no affiliation or relationship with the Fund.[1]

VPCO is a corporation which has provided executive management services to various businesses and whose application for registration as an investment adviser under the Investment Advisers Act of 1940 is currently pending. It is presently managing assets and operating companies valued at more than $1,500,000,000, including all the non-rail assets and operating companies of the Penn Central Transportation Co. and those of Levitt and Sons, Inc. It has a principal office at 2021 K Street NW., Washington, D.C. 20006; its Employer I.D. No. is 95-2644862. Prior to its execution of the June 30, 1977 contracts, with a minor exception described below, it had no affiliation or relationship with the Fund.[2]

To effectuate the independent, professional management of the Fund's assets, the trustees of the Fund entered into a series of agreements with Equitable, VPCO, Lazard Freres and Co. (Lazard), Mercantile National Bank at Dallas (Mercantile), and Crocker Investment Management Corp. (CIMCO).

The agreements establish a framework whereby Equitable will serve as named fiduciary of the Fund, having responsibility for, among other things, monitoring, appointing, and removing investment managers (other than VPCO) and custodians, allocating available investment funds among different types of investments and different investment managers, and developing and implementing investment objectives and policies. Equitable, Lazard, Mercantile, and CIMCO will be appointed investment managers for securities-related assets, with each to receive, as determined by Equitable, an initial allocation of approximately one-fourth of the total market value of the securities-related assets held by the Fund, and with the restriction that the securities-related assets initially allocated to Equitable for its management will have a value of approximately one-fourth of the total market value of the securities-related assets as of the closing date and that Equitable will be allocated one-fourth of such additional funds as may become available for new investment in securities-related assets. Equitable and VPCO will be appointed investment managers for real estate-related assets, with Equitable generally responsible for property situated east of the Mississippi River and VPCO generally responsible for property situated west of the Mississippi River. However, Equitable and VPCO may agree to reallocate property between themselves, any any such reallocation may result in a corresponding reallocation of their management fees. In the performance of their fuctions as investment managers for the real estate-related assets, Equitable and VPCO or companies related to either may provide goods or services to the Fund. In the event that the Fund holds assets other than securities-related and real estate-related assets, Equitable will be authorized to appoint an investment manager for such other assets, which may include itself or VPCO. The trustees will retain all authority not vested in Equitable, the investment managers, and the custodians, including responsibility for the management of the Benefits and Administration Acount and the concomitant power to cause Equitable to provide for the transfer of available investment funds to the Benefits and Administration Account for the purpose of paying benefits and administrative expenses of the Fund.

The fees paid to each of the investment managers for securities-related assets will be based on a percentage of the value of the assets under its management. Equitable and VPCO, as investment managers for real estate-related assets, will receive annual fees of $1,900,000 and $3,100,000, respectively. Equitable's fee for serving as named fiduciary will be based on a percentage of the Fund's assets under the management of all the investment managers except Equitable.

The appointment of Equitable as named fiduciary and Equitable and VPCO as investment managers can only be terminated during the first five years by the trustees "for cause" and with the consent of the Secretary of Labor.

These agreements are now scheduled to take effect on October 3, 1977, which has been established as the closing date for most of the above arrangements. However, this date may be extended by Equitable or VPCO if either determines that it has not received all necessary rulings, exemptions, and opinions of governmental authorities. The trustees of the Fund may rescind the agreements if the closing date does not occur on or before November 1, 1977.

The Department and the Service will play a continuing role after the agreements become effective. As set forth in the agreements, the Department has established a special task force for the purpose of providing assistance and guidance to the investment managers and protecting the interests of participants and beneficiaries of the Fund. In addition, Equitable and VPCO will, through reports, the subject and nature of which are specified below, provide the Department and the Service with the opportunity to review certain aspects of their activities as named fiduciary and investment managers. The Agencies will review these reports and, if circumstances warrant, take appropriate action to protect the interests of the Fund and its participants and beneficiaries. For example, see sections 9.02 and 9.03 of Rev. Proc. 75-26, 1975-1, C.B. 722, and ERISA Procedure 75-1 (40 FR 18471, April 28, 1975).

The reports submitted to the Department will be available for public inspection at the Public Documents Room of the Pension and Welfare Benefit Programs, Room N-4677, U.S. Department

[1] The minor exception involves a ground lease between the Fund and Equitable which arose because of a mortgage foreclosure between Equitable and an unrelated third party.

[2] The minor exception involves a loan made by the Fund in 1963 (and refinanced in 1974) to an independent third party to finance a hotel, secured by the hotel property and by guarantees of the third party. In 1976, a limited partnership, in which two executives (one also a stockholder) of VPCO have interests, purchased the hotel, subject to the Fund mortgage on which the third party remains liable.

of Labor, 200 Constitution Avenue NW., Washington, D.C. 20216.

Notice of the pending exemptions as published in the FEDERAL REGISTER will be send by certified mail within 3 days of publication in the FEDERAL REGISTER to each current trustee and to each employer association and employee organization which is a signatory to the trust agreement.

PROPOSED EXEMPTIONS

The applications contain certain representations which are specifically applicable to each of the proposed exemptions which are summarized below. Interested persons are referred to the applications and supporting documents on file with the Agencies for the complete representations of the applicants. Each part set forth below contains a summary of the specific representations which are applicable to the particular proposed exemption followed by the proposed exemption.

PART I.—ALLOCATION BY EQUITABLE OF SECURITIES-RELATED ASSETS AMONG THE INVESTMENT MANAGERS

Summary of representations. Under the agreements, each of the securities investment managers will be initially allocated approximately one-fourth of the value of the Fund's securities-related assets. Equitable in its capacity as named fiduciary will make the initial allocation of securities-related assets among the investment managers, including itself. In so doing, Equitable will allocate to itself securities-related assets valued at approximately one-fourth of the total value of all such assets held by the Fund. However, Equitable will determine which securities-related assets will be allocated to each manager.

In addition, under the agreements, Equitable has exclusive responsibility and authority to appoint and remove any securities investment manager and to increase or decrease the portion of the securities-related assets allocated to each investment manager (except that Equitable will be allocated approximately one-fourth of all securities-related assets initially allocated and one-fourth of any additional funds as may become available for new investment in securities-related assets). Further, Equitable is authorized, subsequent to the initial allocation of securities-related assets, to name additional or substitute investment managers for any or all of the Fund's securities-related assets.

Within 45 days following each calendar quarter (or such other three month period as the trustees shall designate in writing), Equitable is required to render to the trustees a report concerning its services and activities as named fiduciary which will include a report concerning the initial allocations of any securities-related assets. Any report concerning the allocation of securities-related assets will contain the following information:

(a) A list of the securities-related assets each manager has received,

(b) A description of how Equitable valued the securities-related assets,

(c) A description of the allocation plan,

(d) The reason for adopting the particular method of allocation, and

(e) Any other information the trustees may request.

As part of their overall responsibility under the agreements for monitoring the performance of Equitable in its capacity as named fiduciary, the trustees of the Fund are required to monitor the actions of Equitable in initially allocating securities-related assets. Beginning with the first quarterly report submitted to the trustees subsequent to January 1, 1978, Equitable will submit to the Agencies for their review annually copies of the reports which were submitted to the trustees during the prior twelve months. Such annual reports will be submitted to the Agencies at the same time that the first quarterly report of the calendar year is submitted to the trustees.

Pending exemption. Based on the application described herein, the Agencies have under consideration the granting of an exemption, effective the date of the closing pursuant to the agreements, under the authority of section 4975(c)(2) of the Code and section 408(a) of the Act and in accordance with the procedures set forth in Rev. Proc. 75-26, 1975-1 C.B. 722, and ERISA Procedure 75-1 (40 FR 18471, April 28, 1975), so that the taxes imposed by sections 4975 (a) and (b) of the Code by reason of sections 4975(c)(1) (D) and (E) of the Code and the restrictions of sections 406(a)(1)(D) and 406(b)(1) of the Act shall not apply to Equitable's development and implementation of short-term and long-term investment objectives and policies for the Fund.

PART II.—EQUITABLE'S AUTHORITY TO DEVELOP AND IMPLEMENT INVESTMENT OBJECTIVES AND POLICIES FOR THE FUND

Summary of representations. Under the agreements, Equitable as named fiduciary is responsible for developing and implementing short-term and long-term investment objectives and policies for the Fund. These objectives and policies are to be developed by Equitable with appropriate regard for the actuarial requirements of the Fund and will be submitted for review by the trustees on a regular basis. Each investment manager, including Equitable, is required to follow the investment objectives and policies established by Equitable.

In addition, within 45 days following each calendar quarter (or such other three month period as the trustees shall designate in writing), Equitable is required to render to the trustees a report concerning its services and activities as named fiduciary which will include a report as to the development and implementation of the investment objectives and policies of the Fund.

As part of their overall responsibility under the agreements for monitoring the performance of Equitable in its capacity as named fiduciary, the trustees of the Fund are required to monitor the actions of Equitable in developing and implementing the objectives and policies that the trustees have reviewed. Beginning with the first quarterly report submitted to the trustees subsequent to January 1, 1978, Equitable will submit to the Agencies for their review annually copies of the reports which were submitted to the trustees during the prior twelve months. Such annual reports will be submitted to the Agencies at the same time that the first quarterly report of the calendar year is submitted to the trustees.

Pending exemption. Based on the application described herein, the Agencies have under consideration the granting of an exemption, effective the date of the closing pursuant to the agreements, under the authority of section 4975(c)(2) of the Code and section 408(a) of the Act and in accordance with the procedures set for in Rev. Proc. 75-26, 1975-1 C.B. 722, and ERISA Procedure 75-1 (40 FR 18471, April 28, 1975), so that the taxes imposed by sections 4975 (a) and (b) of the Code by reason of sections 4975(c)(1) (D) and (E) of the Code and the restrictions of sections 406(a)(1) (D) and 406(b)(1) of the Act shall not apply to Equitable's development and implementation of short-term and long-term investment objectives and policies for the Fund.

PART III.—EQUITABLE'S AUTHORITY TO DIRECT THE INVESTMENT MANAGERS TO PROVIDE FUNDS FOR THE BENEFITS AND ADMINISTRATION ACCOUNT

Summary of representations. The Benefits and Administration Account (the Account) contains assets of the Fund needed for the payment of pension benefits and the Fund's administrative expenses. The Account is managed by the Executive Director of the Fund, who has no affiliation or relationship with Equitable; neither Equitable nor any of the investment managers has any responsibility for managing, or supervising the management of, the assets of the Account.

Generally, money for the Account will be derived from two sources: employer contributions and income earned by the Fund on its real estate and mortgage investments which is not needed to offset the Fund's expenses in managing such investments. Although the influx of money from these sources should ordinarily be sufficient to pay pension benefits and the Fund's administrative expenses, it is conceivable that additional money may be needed for the Account at some time in the future. In such a case, the Fund's Executive Director is authorized to request Equitable to transfer additional funds to the Account, and, under the agreements, Equitable can comply with the request by directing the investment managers, including itself and VPCO, to liquidate assets and transfer money to the Account. Equitable, acting on its own, has no authority to initiate a transfer of assets to the Account.

Although the likelihood of such a transfer is remote, if requested, Equitable will determine the best source of funds from which to make the transfer. If Equitable decides to make a transfer

V 42 175 SEP 9 77 UMI

from the Fund's securities-related assets, Equitable will supply 25 percent of the assets and the other securities managers will supply the remaining 75 percent. If Equitable decides to transfer real estate-related assets, it has the authority to decide on the basis of the best interests of the Fund what portion will be provided by VPCO and what portion by Equitable. Under the agreements of June 30, 1977, within 45 days following each calendar quarter (or such other three month period as the trustees shall designate in writing), Equitable is required to render to the trustees a report concerning its services and activities as named fiduciary, which will include a report explaining the reasons for any such transfer. The trustees are required under the agreements to monitor the actions of Equitable as a named fiduciary, which includes any direction to make payments to the Account. Beginning with the first quarterly report submitted to the trustees subsequent to January 1, 1978, Equitable will submit to the Agencies for their review annually copies of the reports which were submitted to the trustees during the prior twelve months. Such annual reports will be submitted to the Agencies at the same time that the first quarterly report of the calendar year is submitted to the trustees.

Pending exemption. Based on the application described herein, the Agencies have under consideration the granting of an exemption, effective the date of the closing pursuant to the agreements, under the authority of section 4975(c)(2) of the Code and section 408(a) of the Act and in accordance with the procedures set forth in Rev. Proc. 75–26, 1975–1 C.B. 722, and ERISA Procedure 75–1 (40 FR 18471, April 28, 1975), so that the taxes imposed by sections 4975(a) and (b) of the Code by reason of sections 4975(c)(1)(D) and (E) of the Code and the restrictions of sections 406(a)(1)(D) and 406(b)(1) of the Act shall not apply to Equitable's determination of which assets to liquidate in order to provide the Account with additional funds.

PART IV.—PROVISION OF SERVICES UNDER THE CONTRACTUAL ARRANGEMENTS

Summary of representations. Prior to the execution of these agreements, neither, Equitable nor VPCO was a disqualified person (party-in-interest) with respect to the Fund. Under the new arrangements, however, both Equitable and VPCO will be required to perform a number of services for the Fund. For instance, in addition to acting as investment manager, Equitable, in its capacity as named fiduciary, will monitor the performance of the other investment managers, including VPCO, and will develop general investment objectives and policies to be followed by the other investment managers. Similarly, VPCO will serve as investment manager for a portion of the Fund's real estate-related assets and will also make an evaluation of the asset management staff.

Further, under the agreements, Equitable and VPCO are required to perform a preliminary physical inspection and examination of the documentation relating to the real estate-related assets as soon as practicable after the execution of the agreements (dated June 30, 1977), and are required to use their best efforts to complete the inspection and documentation within 90 days after the closing date. Equitable and VPCO began performing services in accordance with this provision of the agreements immediately upon the execution of the agreements.

Equitable and VPCO assert that the services to be provided under the new arrangements are necessary for the operation of the Fund and that no more than reasonable compensation will be paid for such services. Further, they assert that the contracts for the provision of services are reasonable, notwithstanding their limited terminability provisions. Under the agreements, neither Equitable nor VPCO may be dismissed during the first five years of the agreements, except "for cause" and with the consent of the Secretary of Labor. Nor may the contractual terms of the agreements be terminated, modified, or amended for five years without the consent of Equitable or VPCO.

Equitable and VPCO assert that while these provisions for limited terminability are unusual, they are appropriate under the circumstances of this case. They also assert that the provisions are consistent with the Agencies' objectives of preventing the trustees from quickly reasserting control over the Fund and of ensuring the protection of the Fund's participants by means of independent, professional investment management during the next five years. Finally, they note that in the event of the termination for cause or resignation by Equitable or VPCO, the recurring fees payable to the party being terminated or resigning will be prorated to the effective date of the termination or resignation. Thus, should a termination or resignation occur, the Fund will not be penalized by reason of these provisions.

Pending exemption. Based on the application described herein, the Agencies have under consideration the granting of an exemption, effective June 30, 1977, under the authority of section 4975(c)(2) of the Code and section 408(a) of the Act and in accordance with the procedures set forth in Rev. Proc. 75–26, 1975–1 C.B. 722, and ERISA Procedure 75–1 (40 FR 18471, April 28, 1975), so that the taxes imposed by sections 4975 (a) and (b) of the Code by reason of section 4975(c)(1)(C) of the Code and the restrictions of section 406(a)(1)(C) of the Act shall not apply to the execution of the new agreements by Equitable and VPCO or to their performance of services under those agreements.

PART V.—PROVISION OF "SUPPLEMENTAL SERVICES" BY EQUITABLE AND VPCO

Summary of representations. Under the agreements, the Fund will pay Equitable and VPCO an annual fee for the management of the Fund's real estate-related assets. This fee, plus an initial "start-up fee," is compensation for "basic services" that Equitable and VPCO will provide. With respect to the inspection, documentation, and evaluation of assets prior to acceptance for management, "basic services" will include the following:

(a) Examination of all items of documentation delivered.

(b) Examination of additional documents determined to be relevant and necessary for an adequate understanding of the assets and the Fund's interests therein.

(c) Arranging for, as appropriate, legal advice and opinions in order to clarify, insofar as possible, the existence, extent, and status of the Fund's interest in each asset.

(d) Conducting on-site inspections of each property and real estate project owned by the Fund, the operations of each operating business owned by the Fund, and the tangible asset and, where necessary and appropriate, operations securing obligations owing to the Fund.

(e) Organization and analysis of all of the information obtained from the foregoing items, and verification of the existence and condition of each asset, and otherwise completion of all documentation and inspection.

(f) Preparation of Valuation Files (with a recommended valuation) for each asset, where required, containing such materials and documents as are ordinarily and customarily employed in the evaluation of such asset, and arranging for, where deemed necessary and appropriate for such purpose, legal advice and opinions, appraisals, accounting analyses, audits, market and economic studies, land use and planning, engineering and architectural advice.

With respect to real estate-related assets accepted for management, "basic services" will include the following general management services:

(a) Supervision of the provision of all servicing and related accounting for each loan and receivable, including supervision of collection and supervision of payment of taxes, assessments and insurance premiums where required.

(b) Review and refinement, development and implementation, where necessary, of accounting and management information systems for the general loan portfolio sufficient to provide appropriate management controls and the preparation of required periodic reports to the fiduciary, the trustees and governmental agencies.

(c) Monitoring compliance with terms of each loan.

(d) Physical inspection on a regular basis of any collateral securing each loan.

(e) Periodic evaluation of each loan and determination of whether it should be "classified", and whether reserves or additional reserves are necessary or appropriate, all under statutory requirements.

(f) Development and implementation of actions and strategies to be taken with respect to loans in default.

(g) Negotiating with borrowers, where appropriate, with respect to restructuring defaulted loans or refinancings.

(h) Determining and supervising any appropriate legal steps to be taken in order to protect the interests of the Fund in each loan and other receivable.

(i) Directing and supervising the management of all properties, projects and business operations owned or otherwise controlled by the Fund (Controlled Assets), including the replacement of employees, contractors and consultants employed by the

individual projects or operations for work on those specific projects or operations.

(j) Supervision of the review and refinement, development and implementation, where necessary, of accounting and management information systems for the Controlled Assets sufficient to provide appropriate management controls for these assets and the preparation of required periodic reports to the fiduciary, the Fund trustees and governmental agencies.

(k) Supervision of the development of annual operating plans for each Controlled Asset including cash controls and forecasts, operating programs and budgets, capital expenditures and marketing or leasing strategies where appropriate.

(l) Physical inspection of each of the Controlled Assets on a regular basis.

(m) Periodic evaluation of each of the Controlled Assets and determination of whether reserves or additional reserves are necessary or appropriate under statutory requirements.

(n) Supervision of the employment and retention of those providing "supplemental services."

Under the agreements, Equitable, in its capacity as investment manager for real estate-related assets, or VPCO each may provide "supplemental services" to the Fund or cause such "supplemental services" to be provided to the Fund by other persons or companies, including those in which it or any of its officers, directors, or shareholders has a financial interest of 5 percent or more (hereinafter collectively referred to as related companies). The cost of "supplemental services" will not be covered by the fees paid for "basic services," but rather will be provided at an additional cost to the Fund. "Supplemental services" are defined to include the following:

(a) In relation to a specific asset, including its valuation, the contractual work of architects, attorneys, accountants, appraisers, auditors, brokers, collection agents, engineers, insurance agents, land planners, market and economic analysts, surveyors and zoning experts.

(b) Direct operating, project management and property management activities related to a specific managed asset, including the activities of employees, contractors, managers and consultants employed by an individual project or operation for work on such projects or operation.

(c) To the extent not included in the above, the leasing or selling of a specified managed asset including marketing, advertising and brokerage services, and the making of any additional investments, repairs and improvements in such assets to the extent permitted; and the payment of expenses associated with management of specific managed assets, including but not limited to property taxes, title insurance, surveys, interest and other similar expenses.

Equitable and VPCO will be initially responsible for determining whether a service that it or one of its related companies will provide is "supplemental" or "basic".

It is Equitable's and VPCO's current intention not to use related companies to provide "supplemental services" to the Fund. However, it is possible that Equitable or VPCO might use a related company to provide "supplemental services" in the future.

If a "supplemental service" is performed by Equitable, VPCO, or a related company, the cost to the Fund will be the direct salary and related benefit costs of the employees performing such "supplemental service". In calculating direct salary and related benefit costs, only the actual time spent by personnel of Equitable or VPCO will be considered. Time spent by executives generally responsible for the operations of Equitable or VPCO will not be considered at all. Direct salary costs will be determined by multiplying the periodic salary actually paid to an employee by the percentage of such employee's time during that period actually spent on providing the "supplemental service". Related benefit costs represent those additional amounts actually contributed by Equitable or VPCO for pension, health, and other benefits, and will be prorated in the same manner as direct salary costs. In no event will Equitable or VPCO receive compensation in excess of direct salary and related benefit costs in connection with the provision of "supplemental services" to the Fund by Equitable, VPCO or any related company; however, a payment might be made from a related company to Equitable or VPCO as a result of the provision of "supplemental services" to the Fund by the related company. In addition, if a related company performs any "supplemental service", it will not receive any compensation from unrelated third parties with respect to the performance of such "supplemental service". Further, if "supplemental services" are provided to the Fund by unrelated third parties, neither Equitable, VPCO or any related company will receive any compensation in connection therewith.

Pursuant to the agreements of June 30, 1977 Equitable and VPCO are required to render certain reports with respect to the provision of "supplemental services". Whenever Equitable or VPCO provide, or arrange for any party to provide, a "supplemental service", Equitable is required to provide the trustees and VPCO is required to provide Equitable and the trustees with the following information:

(a) The name and qualifications of the party retained to provide the service,

(b) A description of the service to be provided,

(c) A description of the fees to be paid, and

(d) Any other information that is requested by the trustees.

Such reports will also include an explanation of why the service is necessary.

Further, within 30 days following each calendar quarter (or such other three month period as the trustees shall designate in writing), Equitable is required to render to the trustees and VPCO is required to render to Equitable and the trustees a report concerning its services as an investment manager, which will include a report concerning the provision of any "supplemental service" provided to the Fund. Equitable is also required to provide the trustees with a quarterly report of the fees that it or any of its related companies received from the Fund for "supplemental services". Similarly, VPCO is required to provide both Equitable, in its capacity as named fiduciary, and the trustees of the Fund with a quarterly report of the fees that VPCO or any of its related companies have received from the Fund for "supplemental services".

Equitable, as named fiduciary, and the trustees are required under the agreements to monitor the actions of VPCO as investment manager, in providing, or arranging for the provision of, any "supplemental services" to the Fund by VPCO or its related companies. As part of their responsibility under the agreements to monitor the performance of Equitable as an investment manager, the trustees are required to monitor the actions of Equitable in providing, or arranging for the provision of, any "supplemental services" to the Fund by Equitable or its related companies. Beginning with the first quarterly report submitted to the trustees subsequent to January 1, 1978, Equitable and VPCO will submit to the Agencies for their review annually copies of the reports which were submitted to the trustees during the prior twelve months. Such annual reports will be submitted to the Agencies at the same time the first quarterly report of the calendar year is submitted to the trustees.

Pending Exemption. Based on the application described herein, the Agencies have under consideration the granting of an exemption, effective the date of the closing pursuant to the agreements, under the authority of section 4975(c)(2) of the Act and in accordance with the procedures set forth in Rev. Proc. 75–26, 1975–1 C.B. 722, and ERISA Procedure 75–1 (40 FR 18471, April 28, 1975), so that the taxes imposed by sections 4975 (a) and (b) of the Code by reason of section 4975(c)(1)(C), (D), (E) and (F) of the Code and the restrictions of sections 406(a)(1)(C), 406(a)(1)(D), and 406(b) of the Act shall not apply to the provision of "supplemental services" by Equitable, VPCO or related companies to the Fund and their receipt of compensation for such "supplemental services" from the Fund, or to the determination by Equitable or VPCO that a particular service is "supplemental" rather than "basic".

PART VI.—REALLOCATION OF REAL ESTATE-RELATED ASSETS BETWEEN EQUITABLE AND VPCO

Summary of Representations. Although the investment management responsibility over real estate-related assets will be allocated pursuant to the agreement, under certain conditions Equitable and VPCO will be permitted to make changes in the initial allocation. During the term of the agreements, however, all real estate-related assets will be managed by either Equitable or VPCO.

In general, under the initial allocation, Equitable will be given responsibility for the management of real estate-related assets located east of the Mississippi River, and VPCO will manage the real

V 42 175 SEP 9 77 UMI

estate-related assets located west of the Mississippi River.

The Fund will pay a fixed fee for real estate investment management. Under the agreements, Equitable will receive a one-time start-up fee of $500,000 and an annual fee of $1,900,000. VPCO will receive a start-up fee of $900,000 and an annual fee of $3,100,000.

The agreements permit the initial allocation described above to be changed during their term by reallocation between Equitable and VPCO. Reallocations may be made only if both Equitable and VPCO agree that the reallocation of responsibility would not be adverse to the interests of the Fund. Neither Equitable nor VPCO is required to accept management responsibility over any real estate-related asset the management of which the other is seeking to reallocate.

In the event of a reallocation, an appropriate adjustment in the real estate management fees may be made between Equitable and VPCO to reflect the change. The total annual fee of $5,000,000 for real estate management will not change as a result of any reallocation. Because Equitable's fee for serving as named fiduciary for the Fund is computed on the basis of only those assets which it does not manage, the fee for serving as named fiduciary may increase or decrease as a result of any reallocation.

A complete analysis of the Fund's real estate-related assets was not available on June 30, 1977 and, given the size of the fund's portfolio, an accurate listing will take some time. As a result, it is not possible for Equitable and VPCO to make all appropriate allocations of real estate-related assets either at the closing date or upon their acceptance of such assets for management. Accordingly, Equitable and VPCO believe that it is not only desirable to permit adjustments at a later date when they can be made on the basis of the manager's knowledge of the individual properties and the portfolio as a whole, but also in the interests of sound professional investment management.

Under the agreements, within 30 days following each calendar quarter (or such other three month period as the trustees shall designate in writing), Equitable is required to render to the trustees and VPCO is required to render to Equitable and the trustees a report concerning its services as an investment manager, which will include a report concerning any reallocation of real estate-related assets. As part of their responsibility under the agreements to monitor the performance of Equitable and VPCO, the trustees are required to monitor the actions of Equitable and VPCO in reallocating any real estate-related asset. Beginning with the first quarterly report submitted to the trustees subsequent to January 1, 1978, Equitable and VPCO will submit to the Agencies for their review annually copies of the reports which were submitted to the trustees during the prior twelve months. Such annual reports will be submitted to the Agencies at the same time that the first quarterly report of the calendar year is submitted to the trustees.

Pending Exemption. Based on the application described herein, the Agencies have under consideration the granting of an exemption, effective the date of the closing pursuant to the agreements, under the authority of section 4975(c)(2) of the Code and section 408(a) of the Act and in accordance with the procedures set forth in Rev. Proc. 75-26, 1975-1 C.B. 722, and ERISA Procedure 75-1 (40 FR 18471, April 28, 1975), so that the taxes imposed by sections 4975 (a) and (b) of the Code by reason of section 4975(c)(1) (D) and (E) of the Code and the restrictions of sections 406(a)(1)(D) and 406(b)(1) of the Act shall not apply to the reallocation between Equitable and VPCO of investment management authority over any real estate-related asset and to any resulting adjustments in the investment management fees for the real estate-related assets.

PART VII.—LEASE OF OFFICE SPACE BY VPCO

Summary of Representations. Under the agreements, investment management authority over the Fund's real estate-related assets is given exclusively to Equitable and VPCO and allocated between them in the manner described above. As soon as practicable, the trustees are obligated to deliver to the custodian certain items of documentation relating to each real estate-related asset. These documents are then to be made available to Equitable or VPCO, as the case may be, which is directed to conduct a physical inspection of each asset to be managed by it, to verify the existence and condition of each asset, and to determine the need for such additional documentation as it considers appropriate.

In general, each investment manager's inspection and documentation of each asset is to be completed prior to its acceptance of the asset for management. Where the documentation has not been completed prior to the closing date of the agreements, Equitable and VPCO shall each use its best efforts to complete the process within 90 days thereafter.

At the time this application was filed, VPCO had not received a complete listing of the real estate-related assets located west of the Mississippi River, but it believes that these assets consist largely of loans secured by real property. The documents pertaining to these loans are on file at the Fund's headquarters in Chicago, Ill. In order to assume management responsibility for these assets and to comply with its contractual obligations regarding inspection and documentation, it is necessary for VPCO to inspect and copy the documents filed in Chicago. VPCO estimates that this process will take several months.

VPCO is also obligated to undertake and complete a study of the Fund's asset management staff with a view to determining the extent to which, and the basis upon which, the staff's functions should continue to be performed by the staff.

In view of its obligation to inspect and copy documents on the Fund's real estate-related assets and its obligation to complete a study of the Fund's asset management staff, VPCO must occupy space during this period at or near the Fund's headquarters. Because the Fund's headquarters is not centrally located with respect to other office space, VPCO desires to occupy space in the building owned by and headquartering the Fund on a short-term basis. VPCO will pay rent to the Fund for this space at the same rate per square foot as other commercial tenants in the building pay.

Pending exemption. Based on the application described herein, the Agencies have under consideration the granting of an exemption, effective July 1, 1977, under the authority of section 4975(c)(2) of the Code and section 408(a) of the Act and in accordance with the procedures set forth in Rev. Proc. 75-26, 1975-1 C.B. 722, and ERISA Procedure 75-1 (40 FR 18471, April 28, 1975), so that the taxes imposed by sections 4975 (a) and (b) of the Code by reason of section 4975(c)(1)(A) of the Code and the restrictions of section 406(a)(1)(A) of the Act shall not apply to VPCO's lease of office space from the Fund on a short-term basis.

PART VIII.—ADJUSTMENT AND/OR CONTINUATION BY INVESTMENT MANAGERS OF ANY LOAN, LEASE, SERVICE AGREEMENT, OR OTHER ARRANGEMENT, OR THE HOLDING BY THE FUND OF ANY EMPLOYER SECURITY OR REAL PROPERTY

Summary of representations. Because the process of delivering asset schedules, inspecting and verifying assets, determining the acceptability of assets for management, and allocating assets among managers had just begun at the time this application was filed, Equitable, VPCO, and the other investment managers have no significant first-hand knowledge concerning the assets of the Fund that they will manage. However, the Annual Report for the Fund for the fiscal year ending January 31, 1976, indicates that there were approximately 30 transactions involving the Fund's assets with a person known to be a party in interest (with a current value of $43,400,000) and approximately 74 loans and leases currently uncollectable or in default.

The primary goal of the investment managers is to preserve the viability of the Fund by obtaining the best financial results for the Fund consistent with prudent management, given the assets which the investment managers inherit for management and the needs of the Fund. The investment managers must make decisions with respect to each asset on the basis of financial considerations, without regard to whether the asset may once have been the subject of a prohibited transaction. Accordingly, the investment managers intend to accept loans and other real estate-related assets without regard to whether another party to the loan or other real estate-related transaction is or may be a party in interest or a disqualified person and without any investigation as to whether there is or may be a past or ongoing prohibited transaction related to the asset.

Where a party in interest transaction is brought to the attention of Equitable, VPCO, or another investment manager, it may be in the interest of the Fund and its participants and beneficiaries to permit the investment manager to determine whether it is prudent to rescind, modify, or continue the arrangement. Additionally, where Equitable, VPCO, or another investment manager determines that it would be prudent and in the best interests of the Fund to continue existing arrangements with parties in interest or disqualified persons, but not in accordance with their current terms, that investment manager may wish to adjust existing arrangements in order to achieve, on behalf of the Fund, the most favorable investment results obtainable under the circumstances. In such case, any adjustments will be made pursuant to a written agreement executed or authorized by the investment manager responsible for the management of the Fund asset or the arrangement related to the Fund asset. Also, Equitable and VPCO expect to be "working-out" troubled loans with various parties, some of whom will be parties in interest or disqualified persons.

In the absence of an exemption for the continuation or adjustment of prior prohibited transactions, Equitable, VPCO, and the other investment managers would not be permitted the type of flexibility necessary to make decisions that are in the best interests of the Fund. Further, the burden of investigating whether previously entered transactions constitute a violation of the prohibited transactions rules would be enormous and to a large extent duplicative where, as in this case, a procedure has already been established for an investigation of past loan transactions.

Pending exemption. Based on the application described herein, the Agencies have under consideration the granting of an exemption under the authority of section 4975(c)(2) of the Code and section 408(a) of the Act and in accordance with the procedures set forth in Rev. Proc. 75-26, 1975-1 C.B. 722, and ERISA Procedure 75-1 (40 FR 18471, April 28, 1975), so that the taxes imposed by sections 4975 (a) and (b) of the Code by reason of section 4975(c)(1)(A) through (D) of the Code and the restrictions of sections 406(a) and 407(a) of the Act shall not apply to:

(1) The continuation of any loan, lease, service agreement, or other arrangement, or the continued holding of any employer security or real property, which is or relates to a plan asset of the Central States, Southeast and Southwest Areas Pension Fund, or

(2) The adjustment of the terms of any loan, lease, service agreement, or other arrangement (and all acts necessary and proper to the carrying out of such arrangement in accordance with its terms as adjusted), which is or relates to a plan asset of the Central States, Southeast and Southwest Areas Pension Fund: *Provided*, That any adjustment is made pursuant to a written agreement executed or authorized by the investment manager responsible for the management of the Fund asset or the arrangement related to the Fund asset.

If granted, the proposed exemption would apply to the following persons:

(1) An investment manager of Fund assets whose management commenced on or after October 3, 1977, to the extent that such person, as investment manager, caused the Fund to engage in the continuation or adjustment described above, and

(2) Any party in interest or disqualified person involved in the transaction, but only if the existence of a prohibited transaction is brought to the attention of the investment manager described in the preceding clause as a result of a formal notification by an agency of the United States Government, a final order of a United States Court, or an acknowledgment in writing communicated to the investment manager of such prohibited transaction by the party in interest or disqualified person involved in the transaction, and

(a) The investment manager affirmatively determines that the continuation or modification (other than a rescission or termination) is in the best interest of the Fund, and

(b) Such determination is promptly communicated in writing by the investment manager to the Department of Labor and the Internal Revenue Service.

If granted, the proposed exemption would be effective as to the investment managers on the date of the closing pursuant to the agreements with respect to the assets for which management was assumed on or after the closing date and as to a party in interest or disqualified person involved in the transaction on the date that the investment manager communicates to the Agencies in writing (pursuant to section (2)(b) above) its determination that the continuation or modification of the transaction is in the best interest of the Fund.

PART IX.—NEW TRANSACTIONS WITH CERTAIN PARTIES IN INTEREST AND DISQUALIFIED PERSONS

Summary of representations. The Annual Report of the Fund for the fiscal year ending January 31, 1976, indicates that the Fund held, among its assets, over $97,000,000 of commercial paper or other corporate debt; over $96,000,000 of common stock consisting of shares of approximately 120 corporations; over $114,000,000 of real estate consisting of land, air rights, various buildings, including one or more shopping centers, hotels and/or motels, and office buildings; and approximately 500 mortgage notes and collateral loans with an assigned current value of $832,000,000. In addition, the Report indicates that, during the plan year, the Fund had 167 service providers and 16,300 contributing employers. Taking into account affiliated corporations and partnerships, there appear to be an immense number of persons who are parties in interest or disqualified persons with respect to the Fund by virtue of their status as service providers, contributing employers, or persons related to service providers or contributing employers. Thus, because of the magnitude of the Fund's assets and the immense number of parties in interest and disqualified persons with respect to the Fund, the management of its assets will inevitably, and perhaps inadvertently, result in transactions which are prohibited by the Code and the Act.

If an investment manager causes the Fund to engage in a transaction with a service provider with respect to the Fund and any other person which is a party in interest or disqualified person solely by virtue of a relationship to such service provider (other than a trustee, administrator or investment manager with respect to the Fund and any other person which is a party in interest or disqualified person by virtue of a relationship to such trustee, administrator, or investment manager), who at the time of the transaction such investment manager actually knows is a party in interest or disqualified person with respect to the Fund, it will submit to the Agencies a report concerning the transaction. The report wil be submitted to the Agencies annually with the copies of the quarterly investment manager reports submitted to the trustees and will include a description of the transaction, the identification of the party in interest or disqualified person and its relationship to the Fund, and an explanation of hy the transaction is in the interest of the Fund and its participants and beneficiaries and protective of the rights of participants and beneficiaries of the Fund.

Pending exemption. Based on the application described herein, the Agencies have under consideration the granting of an exemption, effective the date of the closing pursuant to the agreements and five years thereafter, under the authority of section 4975(c)(2) of the Code and section 408(a) of the Act and in accordance with the procedures set forth in Rev. Proc. 75-26, 1975-1 C.B. 722, and ERISA Procedure 75-1 (40 FR 18471, April 28, 1975), so that the taxes imposed by sections 4975 (a) and (b) of the Code by reason of section 4975(c)(1)(A) through (D) of the Code and the restrictions of sections 406(a) and 407(a) of the Act shall not apply to any transactions between or involving the Fund and any of the following persons:

(1) A service provider with respect to the Fund and any other person which is a party in interest or disqualified person solely by virtue of a relationship to such service provider (other than a trustee, administrator, or investment manager with respect to the Fund and any other person which is a party in interest or disqualified person by virtue of a relationship to such trustee, administrator, or investment manager),

(2) An employer (treating employers who are of the same affiliated group, within the meaning of section 1563(a) of the Code, determined without regard to section 1563(a)(4) and (e)(3)(C) of the Code as one employer) whose contributions for the preceding plan year did not exceed five percent of the total employer contributions paid to or under the Fund for that year, or

(3) Any other person which is a party in interest or disqualified person solely by virtue of a relationship to such employer

Provided, That the transaction is no less favorable to the Fund than the terms

V 42 I 175 SEP 9 77 UMI

that would be obtained in an arm's-length transaction with an unrelated party, *And provided*, That where the transaction involves a person described in (1) above whom the investment manager actually knows to be a party in interest or disqualified person with respect to the Fund, it shall have determined prior to causing the Fund to engage in the transaction that the transaction is in the interest of the Fund and its participants and beneficiaries and protective of the rights of the participants and beneficiaries of the Fund.

The pending exemptions, if granted, will be subject to the express conditions that the material facts and representations contained in the applications are true and complete.

GENERAL INFORMATION

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption granted under section 4975(c)(2) of the Code and section 408(a) of the Act does not relieve a fiduciary or other disqualified person or party in interest with respect to a plan to which the exemption is applicable from certain other provisions of the Code and the Act, including any prohibited transactions provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which, among other things, require a fiduciary to discharge his duties respecting the plan solely in the interest of the plan participants and beneficiaries and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that a plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 4975(c)(2) of the Code and section 408(a) of the Act, the Agencies must find that the exemption is administratively feasible, in the interest of the plan and of its participants and beneficiaries, and protective of the rights of participants and beneficiaries of the plan; and

(3) The pending exemptions, if granted, are supplemental to, and not in derogation of, any other provisions of the Code and the Act, including statutory exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption or transitional rule is not dispositive of whether the transaction is in fact a prohibited transaction.

(4) All interested persons are invited to submit written comments on the pending exemptions contained herein to the address and within the time period set forth above. The applications for exemption referred to herein and all comments relating thereto will be open to public inspection at the addresses set forth above.

(5) The Agencies will hold a public hearing on the pending exemptions at the time and address set forth above. All interested persons who desire to present oral comments at the hearing should comply with the procedures set forth above.

Signed at Washington, D.C., this 8th day of September 1977.

ALVIN D. LURIE,
Assistant Commissioner (Employee Plans and Exempt Organizations), Internal Revenue Service.

J. VERNON BALLARD,
Deputy Administrator, Pension and Welfare Benefit Programs, Department of Labor.

INTERSTATE COMMERCE COMMISSION

[No. 477]

ASSIGNMENT OF HEARINGS

SEPTEMBER 6, 1977.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 46879 Sub No. 12 Walters Transit Corp., now being assigned December 20, 1977 (3 days) at Newark, New Jersey, in a hearing room to be later designated.

MC 135874 (Sub-No. 75), LTL Perishables, Inc., now being assigned November 29, 1977, (1 day), at Chicago, Ill., in a hearing room to be later designated.

MC 142855 (Sub-No. 1), Wiersema Charter Service, Inc., now being assigned for November 30, 1977 (3 days), at Chicago, Ill., in a hearing room to be later designated.

MC 123980 (Sub-No. 4), Mandus R. Olson, now being assigned December 5, 1977 (1 week), at Chicago, Ill., in a hearing room to be later designated.

MC 116703 (Sub-No. 368), Carl Subler Trucking, Inc., and MC 119726 (Sub-No. 81), N. A. B. Trucking, Inc., now being assigned December 6, 1977 (1 day), at Memphis, Tenn., in a hearing room to be later designated.

MC 138177 (Sub-No. 8), Brown Trucking, Inc., now being assigned December 7, 1977 (3 days), at Memphis, Tenn., in a hearing room to be later designated.

FOURTH SECTION APPLICATIONS FOR RELIEF

SEPTEMBER 6, 1977.

An application, as summarized below, has been filed requesting relief from the requirements of section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1100.40) and filed on or before September 26, 1977.

FSA No. 43426—Rice from Houston, Tex. Filed by Southwestern Freight Bureau, Agent, (No. B-704), for interested rail carriers.

Rates on cracked or broken rice (brewers' rice) or milled rice, in bulk in covered hopper cars, as described in the application, from Houston, Tex., to Waverly, N.J.

Grounds for relief—Market competition.

Tariff—Supplement 83 to Southwestern Freight Bureau, Agent, tariff 326-C, I.C.C. No. 5155.

Rates are published to become effective on October 5, 1977.

AGGREGATE-OF-INTERMEDIATES

FSA No. 43427—Rice from Houston, Tex. Filed by Southwestern Freight Bureau, Agent, (No. B-705), for interested rail carriers.

Rates on cracked or broken rice (brewers' rice) or milled rice, in bulk in covered hopper cars, as described in the application, from Houston, Tex., to Waverly, N.J.

Grounds for relief—Maintenance of depressed rates published to meet market competition without use of such rates as factors in constructing combination rates.

Tariff—Supplement 83 to Southwestern Freight Bureau, Agent, tariff 326-C, I.C.C. No. 5155.

Rates are published to become effective on October 5, 1977.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

1

CIVIL AERONAUTICS BOARD.

NOTICE OF CORRECTION AND ADDITION OF ITEMS TO THE SEPTEMBER 8, 1977 MEETING AGENDA

TIME AND DATE: 10 a.m., September 8, 1977.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: 1. Request by Braniff Airways, Inc. for waiver from the requirements of section 221.171 (Memo No. 7372, BE, BAS). 10a. Dockets 29193, Alamogordo's and Ponca City's petitions for reconsideration of Order 77–2–116 insofar as it granted Frontier's petition to overfly Ponca City and Alamogordo (Memo No. 6408–B, BOR). 21. Docket 29926, Notice of Proposed Rulemaking, SPDR–56—OTC Advance Purchase Period (For Information Memo 8/3, BIA, OGC, BOE, BE, BOR).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, The Secretary (202–673–5068).

SUPPLEMENTARY INFORMATION: Because of an administrative problem, it was not possible to announce these additions to the September 8, 1977, agenda by close of business September 1, 1977. Item 10a. concerns petitions for reconsideration filed March 24 and 28, 1977. Item 21 concerns a notice of proposed rulemaking issued February 28, 1977. The staff will be prepared to answer Vice Chairman O'Melia's questions on September 8, 1977, on Item 21. So that the Board's consideration of these items will not be delayed, the following Members have voted that agency business requires that these items be added to the agenda on less than seven days' notice and that no earlier announcement of the additions was possible:

Chairman Alfred E. Kahn
Vice Chairman Richard J. O'Melia
Member G. Joseph Minetti
Member Lee R. West
Member Elizabeth E. Bailey

This notice also corrects a typographical error in item 1 which originally said "section 221.771". The correct citation "section 221.171" is above.

[S–1260–77 Filed 9–7–77;9:02 am]

2

CIVIL AERONAUTICS BOARD.

NOTICE OF DELETION OF ITEM 16 FROM THE SEPTEMBER 8, 1977 MEETING AGENDA

TIME AND DATE: 10 a.m., September 8, 1977.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: 16. Report of the Ad Hoc Committee on Financial Security Aspects of the Board's Charter Regulations and Comments of Chairman Kahn requesting staff views. (For Information Memo dated 8/17/77, BOR.)

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, The Secretary 202–673–5068.

SUPPLEMENTARY INFORMATION: Item 16 was announced on the September 8, 1977 agenda. At the time the agenda was prepared, it was believed that there was a draft notice of proposed rulemaking ready for Board deliberation. This was not the case. There is no need at this time for further Board discussion of the Report. Accordingly, the following Members have voted that agency business requires the deletion of this item from the September 8, 1977, agenda and that no earlier announcement of the deletion was possible:

Chairman Alfred E. Kahn
Vice Chairman Richard J. O'Melia
Member G. Joseph Minetti
Member Lee R. West
Member Elizabeth E. Bailey

3

FEDERAL MARITIME COMMISSION.

TIME AND DATE: 10 a.m., September 14, 1977.

PLACE: Room 12126, 1100 L Street NW., Washington, D.C. 20573.

STATUS: Open.

MATTERS TO BE CONSIDERED:

1. Proposed Delegation of Authority to Managing Director with Respect to Passenger Vessel Certification Matters.
2. Agreement No. T–3484: Between South Carolina State Ports Authority and The Italian Line—Terminal Lease at Charleston Harbor.
3. Agreement No. 9984–10, modification of the South Atlantic North Europe Rate Agreement Regarding Inland Movement of Containers and Collection of Underpayments of Freight.
4. Agreement No. 10292: Bermuda Discussion Agreement, between Pan Atlantic Shipping Ltd. and Bermuda Express Service.
5. Agreement No. 10305: Far East Trades Self-Policing Discussion Agreement.
6. Provisions and Reporting Requirements Applicable to Self-Policing Systems Under General Order 7—Docket No. 73–64—Further Proposed Rules.

CONTACT PERSON FOR MORE INFORMATION:

Joseph C. Polking, Acting Secretary (202–523–5727).

[S–1265–77 Filed 9–7–77;10:46 am]

4

FEDERAL POWER COMMISSION.

FEDERAL REGISTER CITATION OF PREVIOUS ANNOUNCEMENT: 42 FR 44867, 9/7/77.

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: 10 a.m., September 8, 1977; continued 10:00 a.m., September 9, 1977.

CHANGE IN THE MEETING: The following items have been added:

Item No.:	Docket No. and company
G–65..	RP77–122, Locust Ridge Gas Processing Co.
G–66..	CP77–299, Columbia Gas Transmission Corp.
G–67..	CP77–450, Northern Natural Gas Co.; CP77–533, Trunkline Gas Co. and Panhandle Eastern Pipe Line Co.

KENNETH F. PLUMB, *Secretary.*

[S–1269–77 Filed 9–7–77;10:46 am]

5

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM.

TIME AND DATE: 10 a.m., Wednesday, September 14, 1977—Closed Portion. 12 noon, Wednesday, September 14, 1977—Open Portion.

PLACE: 20th Street and Constitution Avenue, NW., Washington, D.C. 20551. (Please use the C Street entrance.)

STATUS: Part of the meeting will be open; part will be closed.

MATTERS TO BE CONSIDERED:

Closed portion:

1. Proposed statement to be presented to the Senate Committee on Banking, Housing and Urban Affairs regarding S. 684, a bill entitled the "Federal Bank Commission Act of 1977" and S. 711, a bill entitled the "Federal Bank Examination Council Act". This matter was originally considered at a meeting on August 15, 1977.
2. Proposed statement to be presented to the Subcommittee on Consumer Affairs of the House Committee on Banking, Finance and Urban Affairs regarding H.R. 8753, the Consumer Credit Protection Act Amendments of 1977.
3. Any agenda items carried forward from a previously announced meeting.

Open Portion:

1. Proposed revisions to the Federal Reserve System's Reports of Condition and Income.
2. Report to the Comptroller of the Currency regarding the competitive factors involved in the proposed acquisition of The First National Bank of Lawton, Lawton, Mich., by The American National Bank and Trust Company of Michigan, Kalamazoo, Mich.
3. Any agenda items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION:

Mr. Joseph R. Coyne, Assistant to the Board: (202) 452–3204.

Dated: September 7, 1977.

GRIFFITH L. GARWOOD, *Deputy Secretary of the Board.*

[S–1268–77 Filed 9–7–77;11:39 am]

6

INDIAN CLAIMS COMMISSION.

TIME AND DATE: 10:15 a.m., September 14, 1977.

PLACE: Room 500, 1730 K Street NW., Washington, D.C.

STATUS: Open to the Public.

Docket 182, Fort Sill Apache.
Docket 229, Navajo.

FOR MORE INFORMATION:

David H. Bigelow, Executive Director, Room 640, 1730 K Street NW., Washington, D.C. 20006. Tel: 202–653–6184.

[S–1259–77 Filed 9–6–77;3:45 pm]

7

UNITED STATES INTERNATIONAL TRADE COMMISSION.

TIME AND DATE: 9:30 a.m., Thursday, September 22, 1977.

PLACE: Room 117, 701 E Street NW., Washington, D.C. 20436.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

1. Agenda.
2. Minutes.
3. Ratifications.
4. Investigation TA–201–26 (Malleable Cast-Iron Pipe and Tube Fittings)—vote.
5. Petitions and complaints:

a. Motion M–280 with respect to Investigation AA1921–165. (Metal-Walled, Above-Ground Swimming Pools from Japan);

b. Motion M–283 with respect to Investigation AA1921–127. (Elemental Sulphur from Canada).

6. Any items left over from previous agenda.

CONTACT PERSON FOR MORE INFORMATION:

Kenneth R. Mason, Secretary, 202–523–0161.

[S–1258–77 Filed 9–6–77;2:46 pm]

8

NATIONAL MEDIATION BOARD.

TIME AND DATE: 2 p.m., Tuesday, September 13, 1977.

PLACE: Board Hearing Room, 8th Floor, 1425 K Street NW., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED.

(1). Ratification of Board actions taken by notation voting during the month of August, 1977.

(2). Jurisdictional determination re Catalina Airlines, Inc.

CONTACT PERSON FOR MORE INFORMATION:

Mr. Rowland K. Quinn, Jr., Executive Secretary; Tel: 202–523–5920.

SUPPLEMENTARY INFORMATION: A majority of the Board has determined by recorded vote that agency business requires a meeting on this date and that no earlier announcement of such meeting was practicable.

(Date of Notice: September 2, 1977.)

9

NATIONAL RAILROAD PASSENGER CORPORATION.

SPECIAL BOARD OF DIRECTORS MEETING

In accordance with rule 4a. of Appendix A of the By-laws of the National Railroad Passenger Corp., notice is given that the Board of Directors will meet on September 19, 1977.

A. The meeting will be held on Monday, September 19, 1977, in the Monet Suite of the Loew's L'Enfant Plaza East, SW., Washington, D.C. beginning at 9:30 a.m.

B. The meeting will be open to the public.

C. The agenda items to be discussed at the meeting follow:

AGENDA, NATIONAL RAILROAD PASSENGER CORPORATION, SPECIAL MEETING OF THE BOARD OF DIRECTORS, SEPTEMBER 19, 1977 (9:30 a.m.)

1. *Selection of Chairman for Meeting.*

12

UNITED STATES PAROLE COMMISSION.

Public Announcement pursuant to the Government in the Sunshine Act [5 U.S.C. § 552(b)]

A meeting of the National Commissioners of the United States Parole Commission will be held at 10 a.m. on Tuesday, September 20, 1977, in Room 338 of the Federal Home Loan Bank Board Building at 320 First Street NW., Washington, D.C.

Referrals of approximately 20 cases in which inmates of Federal Prisons have applied for parole or are opposing revocation of parole or mandatory release have been made by Regional Commissioners for decision at this meeting pursuant to 28 CFR § 2.17. Each case will be adjudicated on a record following the inmate's parole or revocation hearing.

The General Counsel of the United States Parole Commission has certified that this meeting may be closed to the public pursuant to 5 U.S.C. § 552b(c)(10) and 28 CFR § 16.205(b)(1).

The name and phone number of the official designated by this agency to respond to questions about this meeting is Mr. Lee H. Chait, Analyst, 202–724–3094.

Dated: September 6, 1977.
